## Subchapter 1: General Standards

1. **Title and Effective Date** ................................................................. 1
2. **Purpose** ........................................................................................... 1
3. **Authority, Applicability, and Jurisdiction** .......................................................... 1
   - 1.3.1 Authority ...................................................................................... 1
   - 1.3.2 Applicability .................................................................................. 1
   - 1.3.3 Compliance Required ....................................................................... 2
   - 1.3.4 Conflicts with Other Ordinances and Criteria Manuals ......................... 2
   - 1.3.5 Private Covenants ........................................................................... 2
   - 1.3.6 Transfer of Ownership ..................................................................... 3
   - 1.3.7 Emergency Powers .......................................................................... 3
4. **Severability** .................................................................................... 3
5. **Nonconformities** ............................................................................. 3
   - 1.5.1 Purpose ................................................................................................. 3
   - 1.5.2 Regulations Applicable to All Nonconformities ................................. 3
   - 1.5.3 Nonconforming Uses ......................................................................... 5
   - 1.5.4 Nonconforming Structures .................................................................. 6
   - 1.5.5 Nonconforming Lots ........................................................................... 6
   - 1.5.6 Nonconforming Site Features ............................................................. 6
   - 1.5.7 Nonconforming Signs ......................................................................... 7
   - 1.5.8 Amortization of Nonconforming Uses or Structures ............................ 7
   - 1.5.9 Illegal Nonconformities ...................................................................... 7
6. **Enforcement** .................................................................................. 8
   - 1.6.1 Purpose ................................................................................................. 8
   - 1.6.2 Violations ............................................................................................. 8
   - 1.6.3 Continuing Violations ........................................................................ 9
   - 1.6.4 Enforcement Actions .......................................................................... 9
   - 1.6.5 Penalties and Remedies ................................................................. 10
   - 1.6.6 Continuation of Prior Enforcement Actions ........................................ 10
7. **Transition from Prior Regulations** ......................................................... 10
   - 1.7.1 Continuity of Provisions ..................................................................... 10
   - 1.7.2 Violations Continue .......................................................................... 11
   - 1.7.3 Nonconformities Under Prior Regulations .......................................... 11
   - 1.7.4 Uses, Lots, Structures, and Sites Rendered Nonconforming .................... 11
   - 1.7.5 Pending Applications ........................................................................ 11
   - 1.7.6 Preliminary Plat Approvals .............................................................. 12
   - 1.7.7 Approved Projects ............................................................................ 12
   - 1.7.8 Rezonings With Overlay Conditions Under Prior Regulations ............. 12
   - 1.7.9 Master Planned Communities ......................................................... 13

## Subchapter 2: Administration and Procedures

2. **Purpose and Organization** ................................................................. 14
   - 2.1.1 Purpose ............................................................................................. 14
   - 2.1.2 Organization of this Subchapter ....................................................... 14
3. **Summary Table of Review Procedures** ..................................................... 14
4. **Review and Decision-Making Bodies** ....................................................... 18
   - 2.3.1 Purpose ............................................................................................. 18
2.4 Common Review Procedures ................................................................. 21
   2.4.1 Overview .................................................................................. 21
   2.4.2 Consistency with State and Federal Provisions ......................... 22
   2.4.3 Step 1: Pre-Application Activities ........................................... 22
   2.4.4 Step 2: Application Submittal and Processing ......................... 24
   2.4.5 Step 3: Staff Review and Action ............................................... 27
   2.4.6 Step 4: Scheduling and Notice of Public Meetings/Hearings ..... 30
   2.4.7 Step 5: Review and Decision .................................................. 31
   2.4.8 Step 6: Post-Decision Actions and Limitations ....................... 32

2.5 Development Permits and Procedures ................................................. 34
   2.5.1 Site Plan Review ..................................................................... 34
   2.5.2 Specific Use Permit (SUP) ....................................................... 37
   2.5.3 Temporary Use Permit ............................................................ 40
   2.5.4 Certificate of Zoning Compliance ............................................ 42
   2.5.5 Environmental Sensitive Areas (ESAs) Field Assessments ....... 44
   2.5.6 Vested Rights ......................................................................... 46
   2.5.7 Exaction Proportionality Determination and Appeal ............... 48

2.6 Subdivision Procedures ....................................................................... 52
   2.6.1 General ................................................................................. 52
   2.6.2 Administratively Approved Plat .............................................. 52
   2.6.3 Preliminary Plat ..................................................................... 55
   2.6.4 Final Plat ............................................................................... 59
   2.6.5 Development Plat ................................................................. 60
   2.6.6 Gas Well Development Plat .................................................. 62
   2.6.7 Replat .................................................................................. 64
   2.6.8 Vacating Plat ...................................................................... 65

2.7 Plan and DDC Amendments ............................................................... 66
   2.7.1 Comprehensive Plan Amendment ......................................... 66
   2.7.2 Zoning Map Amendment (Rezoning) ...................................... 69
   2.7.3 Rezone to a Planned Development (PD) District .................... 72
   2.7.4 Zoning Text Amendment ...................................................... 78
   2.7.5 Annexation .......................................................................... 80

2.8 Flexibility and Relief Procedures ....................................................... 81
   2.8.1 Variance .............................................................................. 81
   2.8.2 Minor Modification ............................................................... 84
   2.8.3 Appeal of Administrative Decision ....................................... 87
   2.8.4 Alternative Environmentally Sensitive Area (ESA) Plan ......... 89
   2.8.5 Watershed Protection Permit Relief ..................................... 92
   2.8.6 Interpretations ..................................................................... 93

2.9 Historic Preservation Procedures ...................................................... 96
   2.9.1 General Provisions ............................................................... 96
   2.9.2 Certificate of Appropriateness .............................................. 97
2.10 **Design Standards Review Procedures** ................................................................. 106
2.11 **Development Criteria Manual Procedure** ......................................................... 109

**Subchapter 3: Zoning Districts** ................................................................................. 112

3.1 **Purpose and Organization** ................................................................................. 112
  3.1.1 Zoning Districts Established ............................................................................. 112
  3.1.2 Organization of this Subchapter ........................................................................ 113
  3.1.3 Official Zoning Map .......................................................................................... 113
  3.1.4 Annexed Territory ............................................................................................. 114

3.2 **Residential Districts** ......................................................................................... 116
  3.2.1 RR – Residential Rural .................................................................................... 116
  3.2.2 R1 - Residential ............................................................................................... 118
  3.2.3 R2 - Residential ............................................................................................... 120
  3.2.4 R3 – Residential .............................................................................................. 122
  3.2.5 R4 - Residential ............................................................................................... 124
  3.2.6 R6 - Residential ............................................................................................... 126
  3.2.7 R7 - Residential .............................................................................................. 128
  3.2.8 Summary Table of Residential Dimensional Standards .................................. 130

3.3 **Mixed-Use Districts** .......................................................................................... 132
  3.3.1 MN - Mixed-Use Neighborhood ..................................................................... 132
  3.3.2 MD - Mixed-Use Downtown Core ................................................................. 134
  3.3.3 MR - Mixed-Use Regional .............................................................................. 136
  3.3.4 Summary Table of Mixed-Use Dimensional Standards ................................ 138

3.4 **Corridor Districts** ............................................................................................ 140
  3.4.1 SC - Suburban Corridor .................................................................................. 140
  3.4.2 HC - Highway Corridor .................................................................................. 142

3.5 **Other Nonresidential Districts** ....................................................................... 144
  3.5.1 GO - General Office ...................................................................................... 144
  3.5.2 LI - Light Industrial ......................................................................................... 146
  3.5.3 HI - Heavy Industrial ...................................................................................... 148
  3.5.4 PF - Public Facilities ...................................................................................... 150
  3.5.5 Summary Table of Other Nonresidential Dimensional Standards ............... 152

3.6 **PD - Planned Development District** ................................................................. 153
  3.6.1 Purpose ......................................................................................................... 153
  3.6.2 Review Procedure ......................................................................................... 153
  3.6.3 Planned Development Standards ................................................................... 153

3.7 **Measurements and Exceptions** ...................................................................... 153
  3.7.1 Purpose ......................................................................................................... 153
  3.7.2 Lot and Site Requirements ............................................................................ 153
  3.7.3 Setbacks ........................................................................................................ 154
  3.7.4 Vision Clearance Area Requirements ........................................................... 156
  3.7.5 Building Height ............................................................................................. 156
  3.7.6 Building Coverage ....................................................................................... 157
  3.7.7 Floor Area and Square Footage .................................................................... 158
Subchapter 4: Overlay and Historic Districts ................................................................. 160

4.1 Purpose .................................................................................................................. 160

4.2 Applicability of Underlying Zoning Districts ....................................................... 160

4.3 Conflicts with Other Ordinances ......................................................................... 160

4.4 Creation and Amendments .................................................................................... 160
  4.4.1 Overlay Districts ............................................................................................... 160
  4.4.2 General Standards .......................................................................................... 160

4.5 MAO – Municipal Airport Overlay District .......................................................... 161
  4.5.1 Purpose .......................................................................................................... 161
  4.5.2 Municipal Airport Overlay District Established .............................................. 161
  4.5.3 Applicability .................................................................................................. 162
  4.5.4 Conflicts with Other Provisions ..................................................................... 162
  4.5.5 Exemptions ..................................................................................................... 162
  4.5.6 Nonconformities ............................................................................................ 163
  4.5.7 General Prohibition on Airport Hazards ......................................................... 163
  4.5.8 AHHD - Airport Height Hazard District .......................................................... 163
  4.5.9 ACLUD - Airport Compatibility Land Use District ........................................ 167
  4.5.10 Noise Mitigation .......................................................................................... 169

4.6 FSO - Fry Street Overlay District .......................................................................... 170
  4.6.1 Purpose .......................................................................................................... 170
  4.6.2 Fry Street Overlay District Established .......................................................... 170
  4.6.3 Applicability .................................................................................................. 171
  4.6.4 FSO District Dimensional Standards ............................................................... 171
  4.6.5 Permitted Uses ................................................................................................ 171
  4.6.6 Development Standards .................................................................................. 172
  4.6.7 Additional Development Standards for Subarea B ........................................... 172
  4.6.8 Sign Regulations ............................................................................................. 175
  4.6.9 Minor Amendments ....................................................................................... 176

4.7 ULD – Unicorn Lake Overlay District .................................................................... 177
  4.7.1 Purpose .......................................................................................................... 177
  4.7.2 Unicorn Lake Overlay District Established .................................................... 177
  4.7.3 Applicability .................................................................................................. 178
  4.7.4 ULD District Dimensional Standards ............................................................... 178
  4.7.5 Permitted Uses ................................................................................................ 178
  4.7.6 Development Standards .................................................................................. 179

4.8 RZR – Rayzor Ranch Overlay District ................................................................... 182

4.9 Historic Landmark Preservation and Historic Districts ........................................... 182
  4.9.1 Purpose .......................................................................................................... 182
  4.9.2 Penalties ......................................................................................................... 182
  4.9.3 Enforcement ................................................................................................... 183
  4.9.4 Oak-Hickory Historic District ....................................................................... 183
  4.9.5 Bell Avenue Historic District ....................................................................... 189
  4.9.6 West Oak Area Historic District .................................................................... 191

4.10 The Denton Square District .................................................................................. 196
  4.10.1 Purpose and Overall Intent ............................................................................ 196
  4.10.2 Relation of the Denton Square District to Base Zoning Districts .................. 197
  4.10.3 Boundaries of The Denton Square District .................................................... 198
  4.10.4 Definitions ..................................................................................................... 198
  4.10.5 Work Requiring A Permit ............................................................................ 201
  4.10.6 Procedures .................................................................................................... 202
Subchapter 7: Development Standards .............................................................................. 315

7.1 Purpose .......................................................................................................................... 315
7.2 Applicability .................................................................................................................. 315
  7.2.1 Generally ................................................................................................................. 315
  7.2.2 Development Activities .......................................................................................... 315
7.3 Land-Disturbing Activities ............................................................................................ 316
  7.3.1 Purpose .................................................................................................................. 316
  7.3.2 Applicability .......................................................................................................... 317
  7.3.3 Legal Responsibility for Land Disturbance ............................................................... 317
  7.3.4 Applications ........................................................................................................... 318
  7.3.5 General Standards ................................................................................................ 318
  7.3.6 Compliance Required ............................................................................................ 320

Subchapter 1: General Standards

1.1 Title and Effective Date

1.1.1 This document is Chapter 35 of the Municipal Code of Ordinances of the City of Denton, Texas. It shall be officially known and cited as the “Denton Development Code,” and is referred to internally in this document as “this DDC” and “this Code.”

1.1.2 This DDC shall become effective on October 1, 2019.

1.2 Purpose

Pursuant to the Texas Local Government Code (TLGC), the City Council enacts this DDC to:

1.2.1 Promote the health, safety, and general welfare of the City’s inhabitants;

1.2.2 Implement the City’s comprehensive plan – the City’s guide in managing growth, promoting reinvestment, and improving the quality of life of the citizens of Denton;

1.2.3 Preserve and protect the natural environment;

1.2.4 Improve the City’s appearance;

1.2.5 Improve mobility for all modes of transportation and promote traffic safety;

1.2.6 Facilitate the adequate provision of public services and utilities;

1.2.7 Encourage the appropriate use of land, buildings, and structures; and

1.2.8 Establish procedures for the processing of planning and zoning actions that affect the development and use of property subject to the planning jurisdiction of the City.

1.3 Authority, Applicability, and Jurisdiction

1.3.1 Authority

A. This DDC is adopted pursuant to the authority in Article X of the Denton Municipal Charter, as amended, and enacted pursuant to the powers granted and limitations imposed by provisions of the State of Texas, including the statutory authority granted in Chapters 42, 43, 211, 212, and 213 of the TLGC, and all other relevant provisions of the State of Texas.

B. Whenever any provision of this DDC refers to or cites a section of the Texas state statute and that section is later amended or superseded, this DDC shall be deemed amended to refer to the amended section or the section that most nearly corresponds to the superseded section.

C. Whenever a provision of this DDC requires or authorizes an officer or employee of the City to do some act or perform some duty, it shall be construed to authorize the officer or employee to designate, delegate, and authorize subordinates to perform the act or duty, unless the terms of the provision designate otherwise.

1.3.2 Applicability

A. General Applicability

Unless otherwise stated, this DDC applies to all land, buildings, structures, and uses located within the City and if applicable, its extraterritorial jurisdiction (ETJ).
B. **Applicability to Public Agencies**
   To the extent allowed by law, the provisions of this DDC shall apply to all land, buildings, structures, and uses owned, leased, or otherwise controlled by any district, county, state, city, or federal government agencies in the City of Denton. Where the provisions of this DDC do not legally control such land, buildings, structures, and uses, such agencies are encouraged to meet the provisions of this DDC.

1.3.3 **Compliance Required**

No land shall be used or divided, and no structure shall be constructed, occupied, enlarged, altered, or moved until:

A. All applicable development review and approval processes have been followed in accordance with Subchapter 2: Administration and Procedures;

B. All applicable approvals have been obtained; and

C. All required permits or authorizations to proceed have been issued.

1.3.4 **Conflicts with Other Ordinances and Criteria Manuals**

A. Whenever any provision of this DDC conflicts with other provisions of the Municipal Code of Ordinances, the stricter provision, as determined by the Director following the interpretation procedure in Subsection 2.8.6, Interpretations, shall govern.

B. Whenever any provision of this DDC conflicts with a Criteria Manual adopted by ordinance by the City of Denton as established in Section 2.11, including but not limited to those listed below, the Criteria Manual shall govern, as determined by the Director:
   1. Administrative Criteria Manual
   2. Connectivity Component - Mobility Plan
   5. Solid Waste Criteria Manual
   7. Transportation Criteria Manual
   8. Water and Wastewater Criteria Manual

C. All Criteria Manuals are available online on the City’s website and housed in the Development Services Department. Criteria Manuals are maintained and updated by the Department annually.

1.3.5 **Private Covenants**

A. This DDC is not intended to revoke or repeal any easement, covenant, or other private agreement.

B. Nothing in this DDC shall modify or repeal any private covenant or deed restriction, but such covenant or restriction shall not excuse any failure to comply with this DDC.

C. Nothing in this DDC obligates the City to enforce the provisions of any easements, covenants, or agreements between private parties.
1.3.6 Transfer of Ownership

Permits, licenses, or approvals authorizing a particular use of land or structure shall transfer with the ownership of the land or structure so long as the land or structures, or any portion of the land or structures, continue to be used for the purpose and in the manner authorized by a permit, license, or approval. No person, including a successor or assignee of the person who obtained the permit or approval, may use the land or structure except in accordance with all the terms, conditions, and requirements of the permit or approval.

1.3.7 Emergency Powers

The Mayor may authorize any deviation from this DDC during a local state of disaster as prescribed in Chapter 418 of the TLGC.

1.4 Severability

In the event one or more of the provisions of this DDC shall for any reason be held to be illegal or invalid by a court of competent jurisdiction, it is the intention of the City Council that such illegality or invalidity shall not affect any other provision in this DDC, but this DDC shall be construed and enforced as if such illegal or invalid provision had not been contained.

1.5 Nonconformities

1.5.1 Purpose

The purpose of Section 1.5 is to regulate and limit the development and continued existence of land, buildings, structures, uses, and site features that were lawfully established prior to the effective date of this DDC, but that no longer conform to the requirements of this DDC. All such situations are collectively referred to in this section as "nonconformities." While nonconformities may continue, the provisions of this section are designed to curtail substantial investment in nonconformities to bring about their eventual elimination in order to preserve the integrity of this DDC and the goals of the City of Denton.

1.5.2 Regulations Applicable to All Nonconformities

A. Authority to Continue

Nonconformities may continue to be used and occupied, subject to regulations as to the maintenance of premises and conditions of operations set forth in this section, or unless such nonconformity is terminated as provided in this section.

B. Determination of Nonconformity Status

The burden of establishing the existence of a nonconformity shall be solely on the owner of the property containing the nonconformity. An applicant may use the procedure in Subsection 2.5.4, Certificate of Zoning Compliance, to establish the existence of a nonconformity.

C. Maintenance and Minor Repair

Minor repairs and maintenance of nonconformities are permitted and encouraged, provided that the repairs and maintenance do not increase the degree of nonconformity. Minor repairs and maintenance include the following:

1. Repairs necessary to maintain and to correct any damage or deterioration to the structural soundness of, or the exterior or interior appearance of, a building or structure without
expanding the height or footprint of the building or structure, unless compliant with this DDC;

2. Maintenance of land to protect against and mitigate health and environmental hazards;

3. Resurfacing or restriping parking areas (but no enlargement of parking area) pursuant to Section 7.9, Parking and Loading;

4. Replacing diseased or dead plant materials pursuant to Section 7.7, Landscaping, Screening, Buffering, and Fences;

5. Repairs that are required to remedy unsafe conditions; and

6. Repairs necessary to comply with current building code requirements.

D. Change of Ownership or Tenancy
Changes in ownership, tenancy, or management of property with an existing nonconformity may occur, but such nonconformities shall continue to be subject to the standards of this Section 1.5.

E. Compliance to the Maximum Extent Practicable
Where compliance with the requirements of this section is precluded by a lack of sufficient developable area due to the size of the lot, the layout of existing development, or the presence of significant wetlands, floodplains, watercourses, hazard areas, or other significant environmental constraints, the applicant shall comply with the requirements of this section to the maximum extent practicable, as determined by the Director.

F. Discontinuance
1. Whenever a nonconforming use or structure is discontinued for one year or more, all nonconforming rights shall cease, and the use of the premises or the structure shall be in conformance with this Subchapter and all applicable codes of the City. For purposes of this provision, the following actions shall create a rebuttable presumption of discontinuance: the property or structure is vacant and no attempt to market the property is observable on the property or from the exterior of any structure, or that the property or structure is vacant and City taxes owed on the property are delinquent. The determination of discontinued status may be delayed for up to one year by the Director upon written request, if the applicant provides documentation that the property has been actively marketed for at least six months during the previous, first year.

2. The right to maintain or operate a nonconforming structure or use may be terminated by the Zoning Board of Adjustment in accordance with Subsection 1.5.8, Amortization of Nonconforming Uses or Structures. Any appeal of the termination of nonconforming rights by the Zoning Board of Adjustment under this Subchapter shall be made to the District Court within 10 days of receipt of written notice of the termination by the Director.

G. Nonconformity Due to Outside Action
1. Where a lot, tract, or parcel is occupied by a lawful structure, and where the acquisition of right-of-way, by eminent domain, dedication, or purchase, by a city, county, state, or federal agency creates noncompliance of the structure or property regarding any requirement of this DDC, such structure or property shall be deemed nonconforming, and acquiring agency shall provide a compliance plan. Such designation shall apply only to noncompliance that results directly from the acquisition of right-of-way or by acquisition through eminent domain.
Subchapter 1: General Standards
1.5 Nonconformities
1.5.3 Nonconforming Uses

2. In the event that such structure is partially or totally destroyed by natural or accidental causes, the structure may be rebuilt upon approval of a building permit by the Building Official, subject to Subsection 1.5.4D, Damage or Destruction of More than 50 Percent of the Gross Floor Area.

H. Prior Construction Approved
Nothing contained in this section shall require any change in the plans, construction, or designated use of a building legally under construction, or for which a permit for construction has been issued, at the time of passage of this DDC or amendments.

I. Applicability of this DDC to Existing Residential Uses and Structures
The adoption of this DDC shall not cause any existing, legally established single-family detached dwelling, townhome, or duplex use or structure to become nonconforming. Any single-family detached dwelling, townhome, or duplex structure, lot, and associated site features lawfully existing on the effective date of this DDC shall be deemed a lawful structure, lot, or site feature.

1.5.3 Nonconforming Uses

A. Limitations on Continuation of Nonconforming Uses of Land
1. A nonconforming use may be extended throughout the same building, provided that:
   a. No structural alteration of the building (or portion of such building containing the nonconforming use in the case of buildings with multiple uses) shall be permitted;
   b. No additional dwelling units shall be permitted in the building; and
   c. No additional nonresidential units and/or uses shall be permitted.
2. No nonconforming use shall expand into an additional structure.
3. Any use of land that was established in the City's extraterritorial jurisdiction and annexed into the City shall be subject to the provisions established in TLGC, Section 43.002, as amended.

B. Change of Use
1. A nonconforming use may be changed to another nonconforming use, provided the Director determines that the new use creates lesser impacts on surrounding properties and is no more intensive than the use it replaces, and no structural alterations to the building are required to accommodate such change, except those alterations necessary to meet accessibility provisions required by state and federal law.
2. A nonconforming use that has been changed to a less nonconforming use pursuant to this subsection may not subsequently be changed back to a more nonconforming use.
3. A nonconforming use, if changed to a conforming use, may not subsequently be changed back to any nonconforming use unless otherwise permitted by this DDC.

C. Existing Uses Requiring a Specific Use Permit
The adoption of this DDC shall not cause any existing, legally established use that requires a specific use permit pursuant to Subsection 2.5.2: Specific Use Permit (SUP), to become nonconforming. Any legally established use existing on the effective date of this DDC that has been damaged or destroyed by fire or other natural or accidental causes in whole or in part may be restored to its original condition and is not required to obtain a specific use permit.
1.5.4 Nonconforming Structures

A. Expansion of a Nonconforming Structure
A nonconforming structure may only be expanded or enlarged pursuant to Subsection 1.5.2C, and any such expansion or enlargement shall be in full compliance with this DDC.

B. Increasing Level of Nonconformity Prohibited
A nonconforming structure shall not be altered in a way that increases the nonconformity of the structure, but any structure or portion of a structure may be altered to decrease the nonconformity of the structure.

C. Damage or Destruction of Less than 50 Percent of the Gross Floor Area
A nonconforming structure that has been damaged or destroyed by fire or other natural or accidental causes may be restored to its original condition, provided that:

1. The extent of the damage does not require the reconstruction of more than 50 percent of the gross floor area of the nonconforming structure. For purposes of this provision, the 50-percent threshold shall apply to each individual structure, and not cumulatively to multiple structures on one lot; and

2. A building permit is issued for the work to be performed and such work is commenced within one year of such event and completed within 18 months of such event. By written request from the property owner, the Director may grant one extension of either the work commencement and/or the completion of work time period.

3. A restoration or reconstruction of the structure in violation of this subsection immediately terminates the right to operate the nonconforming structure.

D. Damage or Destruction of More than 50 Percent of the Gross Floor Area
A nonconforming structure that has been damaged or destroyed by fire or other natural or accidental causes shall not be rebuilt or occupied, except in conformance with this DDC.

1.5.5 Nonconforming Lots

A. A structure situated on a nonconforming lot shall be considered a nonconforming structure, subject to the provisions of this Section 1.5.

B. A nonconforming lot that was made nonconforming by virtue of enactment of this DDC may be used for construction of a building allowed in the applicable zoning district, provided that all other zoning district and dimensional standards are met, unless as otherwise provided for in this Section 1.5.

C. A structure on a nonconforming lot deemed nonconforming by virtue of Subsection 1.5.4C may be restored to its original condition pursuant to Subsection 1.5.4C.

1.5.6 Nonconforming Site Features

A. For purposes of this provision, the term “nonconforming site feature” includes any driveway, off-street parking or loading area, building coverage, landscaping, buffer, or screening element that lawfully existed per regulations in place prior to the effective date of this DDC, as well as the lack of any such feature required by subsequently enacted City regulations.
Subchapter 1: General Standards

1.5 Nonconformities

1.5.7 Nonconforming Signs

Denton, Texas – Denton Development Code

A lawfully nonconforming site feature may continue in its existing condition unless and until full or limited compliance with the development standards of this DDC, as required in Section 7.2: Applicability.

No action shall be taken that increases the degree of the nonconformity of a site feature.

1.5.7 Nonconforming Signs

Nonconforming signs shall comply with Municipal Code of Ordinances, Chapter 33.10, Nonconforming Signs.

1.5.8 Amortization of Nonconforming Uses or Structures

A. Initiation of Proceedings

The City Council may initiate proceedings to amortize a nonconforming land use or structure.

B. Consideration by Zoning Board of Adjustment

1. Generally

The Zoning Board of Adjustment may require the termination of nonconforming uses of land or structures under a plan whereby the value of the structure and facilities can be amortized within a definite period of time, taking into consideration the general character of the neighborhood and the necessity for all property to conform to the regulations of this DDC.

2. Criteria for Determining Amortization Period

Before the Zoning Board of Adjustment may determine an amortization period, it shall consider the following factors:

a. The owner’s capital investment in the structures on the property at the time the use became nonconforming;

b. The amount of the investment realized to date from revenue generated by the property and the amount remaining, if any, to be recovered during the amortization period;

c. The existence or nonexistence of lease obligations, as well as any contingency clauses therein permitting termination of such leases;

d. Removal costs that are directly attributable to the establishment of a termination date; and

e. Other costs and expenses that are directly attributable to the establishment of a termination date.

3. Cessation of Use

If the Zoning Board of Adjustment establishes a termination date for a nonconforming use or structure, the use shall cease operations on that date and the owner shall not operate it after that date unless it becomes a conforming use or structure.

1.5.9 Illegal Nonconformities

A nonconformity becomes illegal when:

A. A nonconforming structure is destroyed or substantially destroyed by an intentional act of the owner or an agent without a proper permit or other required city approval. If this occurs, the nonconforming structure shall lose its nonconforming status and shall be required to conform to
existing codes. If a nonconforming use was also in the structure, the nonconforming use and all site improvements shall lose their nonconforming status and be required to come into compliance with existing codes; and

B. A use, structure, or site improvement results in a nonconformity without being lawfully authorized in accordance with the provisions of this DDC. Such use and/or structure shall cease operations until the required city approvals are obtained.

1.6 Enforcement

1.6.1 Purpose

This Section 1.6 establishes procedures through which the city seeks to ensure compliance with the provisions of this DDC and obtain corrections for violations of this DDC. This section also sets forth the remedies and penalties that apply to violations of this DDC.

1.6.2 Violations

A. Generally

Any person who violates any applicable provision of this DDC shall be deemed guilty of a violation punishable in accordance with Subsection 1.6.5. For purposes of this section, the term "violation" shall mean a final finding by a court of record that an ordinance has been violated.

B. Prior Violations

If a development or activity in violation of the prior development regulations fully complies with this DDC, such development or activity shall no longer be deemed a violation. Unpaid fees and/or penalties from prior enforcement of violations are still valid and shall remain the responsibility of the violator under the prior regulations.

C. Violations within the Extraterritorial Jurisdiction

Any person who violates any applicable provision of this DDC within the extraterritorial jurisdiction shall not be guilty of a misdemeanor; however, the city may institute any appropriate action or proceeding in the District Court to enjoin the violation of this DDC.

D. Activities Constituting a Violation

1. Activity Inconsistent with this DDC

Any erection, construction, reconstruction, remodeling, alteration, maintenance, expansion, movement, or use of any land, building, structure, or sign that is inconsistent with this DDC.

2. Activity Inconsistent with a Permit or Approval

Any development, use, or other activity that is in any way inconsistent with the terms or conditions of any permit or approval required to engage in such activity under this DDC.

3. Illustrative Examples of Violations

Examples of violations of this DDC include, but are not limited to:

a. Increase of the density or intensity of any use of land or structure except in accordance with the requirements of this DDC;

b. Reduction or diminishment of lot area, setbacks, buffers, open space, or other standards below the minimum requirements set forth in this DDC;
c. Creation, expansion, replacement, or change of a nonconformity inconsistent with this DDC;
d. Failure to install, improve, or maintain any public or private improvements required by the terms of any permit or approval;
e. Failure to abide by conditions of any approval or agreements executed in association with an approval;
f. Failure to comply with applicable requirements for a certificate of occupancy or building permit; or
g. Failure to obtain any required permit.

1.6.3 Continuing Violations

Any violation of this DDC shall be considered a separate offense for each day during any portion of which any violation of this DDC is continued past the date of the issuance of notice of violation, with each violation punishable in accordance with Subsection 1.6.5.

1.6.4 Enforcement Actions

A. Responsibility for Enforcement
   This DDC shall be administered and enforced by the Director or such other person as may be designated by the Director.

B. Investigation
   Whenever the Director receives a written, signed, third-party complaint alleging a violation of this DDC or a permit or approval issued under this DDC, the Director shall investigate the complaint and inform the complainant in writing of his or her findings and any actions that have been, or will be taken.

C. Persons Liable
   The owner, tenant, manager, or occupant of any building or land, or any part thereof, and any architect, builder, contractor, agent, or other person who participates in, assists, directs, creates, or maintains any situation that is contrary to the requirements of this DDC or a permit or approval issued pursuant to this DDC, may be held responsible for the violation and be subject to the penalties and remedies provided in this section.

D. Procedures upon Discovery of Violations
   1. If the Director finds that any provision of this DDC is being violated, the Director shall send a written notice to the person responsible for such violation, indicating the nature of the violation and ordering the action necessary to correct it. Additional written notices may be sent at the Director’s discretion.
   2. The Director shall not be required to provide notice of intent to suspend or revoke for violations of this DDC that cause imminent destruction of property or injury to persons.
   3. When a delay would seriously threaten the effective enforcement of the DDC, or pose a danger to the public health, safety, and welfare, the Director may immediately issue an order for compliance by personal service, posting of the property as indicated in the current Denton Central Appraisal District records, or certified mail with return receipt required to the owner of record of the subject property, or to the homeowners association, as applicable, and seek enforcement through the municipal court as authorized below.
E. **Continuation of Prior Enforcement Actions**
   Nothing in this DDC shall prohibit the continuation of previous enforcement actions undertaken by the city pursuant to previous regulations.

1.6.5 **Penalties and Remedies**

A. **Fines**
   Any violator of this DDC pursuant to Subsection 1.6.2 shall be guilty of a misdemeanor, and upon conviction shall be subject to the penalties prescribed Subpart A, Section 1-12: *General Penalty*, of the Municipal Code of Ordinances.

B. **Deny, Withhold, or Revoke Approval**
   Any form of approval or permit issued under this DDC may be denied, withheld, or revoked after notice and a hearing, when the Director determines that:
   1. There is a departure from the approved plans, specifications, limitations, or conditions as required under the approval;
   2. The approval or permit was established by false representation;
   3. The approval or permit was issued in error; or
   4. There is any other violation of this DDC.

C. **Stop-Work Orders**
   1. The Building Official may issue a stop-work order whenever any building, structure, site, or portion of a building, structure, or site is being demolished, constructed, reconstructed, altered, or repaired in a hazardous manner, in substantial violation of any state or local building provision, or in a manner that endangers life or property.
   2. The Building Official may issue a stop-work order on any property with an uncorrected violation of this DDC or approval issued under this DDC.
   3. A stop-work order shall be in writing and directed to the applicant/permit holder and/or person performing the work, and shall specify the provision of this DDC or other law in violation.
   4. If a stop-work order is issued, no work shall proceed on any building, structure, site, or portion of a building, structure, or site subject to the order except to correct a violation or to comply with the order.
   5. Once conditions cited in the stop-work order have been adequately addressed, the Building Official shall rescind the stop-work order.

1.6.6 **Continuation of Prior Enforcement Actions**
   Nothing in this section shall be construed to prevent the city from pursuing any other remedies it may have for violations of this DDC.

1.7 **Transition from Prior Regulations**

1.7.1 **Continuity of Provisions**
   The provisions of this DDC, insofar as they are substantially the same as previously existing regulations relating to the same subject matter, shall be construed as restatements and continuations thereof and not
Subchapter 1: General Standards

1.7 Transition from Prior Regulations

1.7.2 Violations Continue

Any violation of the previous zoning and subdivision regulations will continue to be a violation under this DDC and be subject to penalties and enforcement under Section 1.6, Enforcement, unless the use, development, construction, or other activity complies with the provisions of this DDC. The enactment of this DDC shall not abate any pending prosecution and/or lawsuit or prevent any prosecution and/or lawsuit from being commenced for any violation of a previously existing ordinance occurring before October 1, 2019.

1.7.3 Nonconformities Under Prior Regulations

Any nonconformity under the previous zoning and subdivision regulations that has been issued a Certificate of Occupancy will remain a nonconformity under this DDC, as long as the situation that resulted in the prior nonconforming status continues to exist. If a nonconformity under the previous zoning and subdivision regulations becomes conforming because of the adoption of this DDC, then the situation will no longer be a nonconformity.

1.7.4 Uses, Lots, Structures, and Sites Rendered Nonconforming

A. When a lot is used for a purpose that was a lawful use before October 1, 2019, and when a Certificate of Occupancy was issued and this DDC no longer classifies such use as either a permitted use or specific use in the zoning district in which it is located, such use shall be considered nonconforming and shall be controlled by the provisions of Section 1.5, Nonconformities.

B. Where any building, structure, lot, or development site that legally existed on October 1, 2019 and does not meet all standards set forth in this DDC, such building, structure, lot, or site shall be considered nonconforming and shall be controlled by the provisions of Section 1.5, Nonconformities.

1.7.5 Pending Applications

A. Any complete application subject to TLGC § 245 that has been submitted for approval, but upon which no final action has been taken by the appropriate decision-making body prior to October 1, 2019, shall be reviewed in accordance with the regulations in effect on the date the application was deemed complete unless the applicant requests otherwise pursuant to Subsection 1.7.5B below. If the applicant fails to comply with any applicable required period for submittal or other procedural requirements, the application shall expire and subsequent applications shall be subject to the requirements of this DDC. Any re-application of an expired project approval shall meet the standards in effect at the time of re-application.

B. An applicant with a complete application subject to TLGC § 245 that has been submitted for approval, but upon which no final action has been taken prior to October 1, 2019, may submit a written request for the complete application to be reviewed under this DDC.
Subchapter 1: General Standards
1.7 Transition from Prior Regulations
1.7.6 Preliminary Plat Approvals

A. An application for which approval of a preliminary subdivision plat was granted prior to October 1, 2019, shall be considered as having received preliminary plat approval under this DDC.

B. Preliminary approvals granted under the previous regulations shall be valid for two years from the date of approval.

C. Failure to obtain a final plat approval, within two years of the approval of a preliminary plat, shall result in the expiration of the preliminary plat.

D. In the instance of large tracts or blocks of land contained within a recorded subdivision and intended or designed for replatting into smaller tracts, lots, or building sites, the replatting shall comply with all provisions of this DDC.

1.7.7 Approved Projects

A. Any permits or licenses subject to the standards of this DDC that are valid on October 1, 2019, shall remain valid until their expiration date. Projects with valid permits or licenses may be carried out in accordance with the zoning and subdivision regulations in effect at the time of approval, provided that the permit or license remains valid and has not lapsed.

B. No provision of this DDC shall require any change in the plans, construction, or designated use of any structure for which a building permit has been issued prior to October 1, 2019, unless the building permit has expired.

C. The Director may renew or extend the time of a previous approval of an application that was administratively approved if the required findings or criteria for approval remain valid. Any extension granted shall not exceed one year in length, and no more than one extension may be granted.

D. Non-administratively approved projects may be granted one extension not exceeding one year in length, from the reviewing body by which they were originally approved as identified in Section 2.2: Summary Table of Review Procedures, where such extension would be permissible under the zoning and subdivision regulations in effect at the time of approval. If those regulations are silent as to extensions then no extension may be granted.

E. Any re-application for an expired project approval shall meet the standards in effect at the time of reapplication.

1.7.8 Rezonings With Overlay Conditions Under Prior Regulations

Any property that was rezoned with overlay conditions under the prior regulations shall be designated as a Planned Development (PD) on the “Official Zoning Map of City” and shall be governed by the conditions listed in the ordinance authorizing the rezoning. All remaining zoning district regulations and design standards shall be governed by the base zoning district and the development standards of this DDC, effective on October 1, 2019. Proposed changes to such properties shall follow the PD amendment procedures provided in paragraph 2.7.3.C.6.d: Amendments to a Planned Development.
1.7.9 Master Planned Communities

The following Master Planned Communities (MPCs) shall retain the zoning and development regulations established by their respective MPC ordinances, specifically including those regulations incorporated (or excepted) from prior development codes or ordinances as they existed on the date of approval for each MPC approval ordinance and amendment.

A. Hills of Denton MPC (Ordinance 2007-150).

B. Cole Ranch MPC (Ordinance 2008-030).

C. Hills of Denton North MPC (Ordinance 2008-262).

D. Hunter Ranch MPC (Ordinances 2008-286; 2010-159; and 2010-160).
Subchapter 2: Administration and Procedures

2.1 Purpose and Organization

2.1.1 Purpose

This subchapter establishes procedures for the processing of planning and zoning actions that affect the development and use of property subject to the planning jurisdiction of the city.

2.1.2 Organization of this Subchapter

A. Section 2.2, Summary Table of Review Procedures, includes a summary table listing the land use and development procedures in this DDC.

B. Section 2.3: Review and Decision-Making Bodies, describes the duties and membership of the boards, commissions, and committees that have review and decision-making responsibilities under this DDC.

C. Section 2.4: Common Review Procedures, describes standard procedures that are applicable to most application types.

D. Section 2.5, Development Permits and Procedures, describes the procedures for site-specific development provisions.

E. Section 2.6, Subdivision Procedures, describes the procedures for applications for subdivision and conveyance of land.

F. Section 2.7, Plan and DDC Amendments, describes the procedures for amending the comprehensive plan or amending this DDC.

G. Section 2.8, Flexibility and Relief Procedures, describes the procedures for applications to vary from strict conformance with this DDC and contains various relief provisions.

H. Section 2.9, Historic Preservation Procedures, describes the procedures for various applications related to historic properties.

I. Section 2.9.10, Design Standards Review Procedures, describes the procedures for various applications related to properties in design overlay districts.

2.2 Summary Table of Review Procedures

Table 2.2-A lists the development applications authorized in this DDC. For each type of application, the table indicates the role of city review, noticing requirements, and decision-making and appeal authorities.

**Notes:**

1. The Director at his discretion may refer the plat to the Planning and Zoning Commission. The Director shall not disapprove an administratively approved plat but shall refer such plat to the Planning and Zoning Commission if he recommends disapproval.

2. Non-residential minor replats may be approved by Staff pursuant to TLGC 212.0065, as amended. The appeal authority is determined based on the original approval body (i.e., if the Planning and Zoning Commission is the approval authority then the appeal authority is the City Council; if City Staff is the approval authority then the appeal authority is Zoning Board of Appeals.

3. Mailed notice shall not be required if the Planning and Zoning Commission or City Council initiate an application to repeal and replace the Official Zone Map for all or substantially all of the planning jurisdiction.

4. The Director, City Engineer, or Building Official may make an interpretation based on the criteria in Subsection 2.8.6,
Subchapter 2: Administration and Procedures

2.2 Summary Table of Review Procedures

2.1.2 Organization of this Subchapter
Subchapter 2: Administration and Procedures

2.3 Review and Decision-Making Bodies

2.3.1 Purpose

This section establishes and prescribes the basic duties and operating procedures of the administrative entities responsible for administering and enforcing this DDC.

2.3.2 City Council

2.3.3 Planning and Zoning Commission

A. Composition and Operational Procedures

B. Powers and Duties

1. The Planning and Zoning Commission shall have the review and decision authority as shown in Table 2.2-A, pursuant to the application-specific procedures outlined in this DDC.

2. The Planning and Zoning Commission also has the powers and duties permitted under Article X, Section 10.03 in the Municipal Code of Ordinances, and § 211.007 and § 371.042 of the TLGC.

3. The members of the Planning and Zoning Commission are held to the City of Denton's Ethics Code.

2.3.4 Zoning Board of Adjustment

A. Composition and Operational Procedures

B. Powers and Duties

1. The Zoning Board of Adjustment shall have the review and decision authority as shown in Table 2.2-A pursuant to the application-specific procedures outlined in this DDC.

2. The Zoning Board of Adjustment’s jurisdiction shall extend to and include the hearing and deciding of final decisions regarding changes, the reestablishment, or termination of a nonconforming use.

3. The Zoning Board of Adjustment shall be the body responsible for hearing appeals of administrative determinations under this DDC, unless otherwise specified elsewhere in this DDC.

4. The Zoning Board of Adjustment shall also have the powers and duties permitted under TLGC § 211.009 and Subpart B, Section 33.6: Appeal, Variances, and Special Exceptions, of the Municipal Code of Ordinances.

5. The members of the Zoning Board of Adjustment are held to the City of Denton’s Ethics Code.

2.3.5 Public Utility Board

2.3.6 Historic Landmark Commission

A. Composition

B. Operational Procedures

1. The Historic Landmark Commission shall meet as often as necessary to dispose of the business of the Historic Landmark Commission or upon call by the Historic Landmark Commission chair or upon petition of a simple majority of Historic Landmark Commission members.

2. Five members present shall constitute a quorum for the transaction of business, and all issues shall be decided by a majority of those members present and voting, except that in those instances where only a quorum of five is present at a meeting, all issues shall be decided by at least four affirmative votes.

3. The Historic Landmark Commission shall adopt appropriate rules and regulations for the conduct of its business and the election of its chair and other officers. The minutes of each meeting shall be filed in the office of the City Secretary.

C. Powers and Duties

The Historic Landmark Commission shall have the review and decision authority as shown in Table 2.2-A, pursuant to the application-specific procedures outlined in this DDC, and the following additional powers and duties under this DDC:

1. The Historic Landmark Commission shall thoroughly familiarize itself with buildings, structures, sites, districts, areas, and lands within the City that may be eligible for designation as historic landmarks, shall have review authority over the City’s Historic Preservation Plan, and shall:
   a. Establish criteria to be used in determining whether certain buildings, structures, sites, districts, areas, lands, and other objects should be designated as historic landmarks;
   b. Establish guidelines to be used in determination of whether to grant or deny certificates of appropriateness for demolition;
   c. Suggest sources of funds for preservation and restoration activities and acquisitions, to include federal sources, state sources, private and foundation sources, as well as municipal sources; and
   d. Recommend, to the proper agencies, incentives designed to encourage historic preservation.

2. The City’s Historic Preservation Plan shall be presented to the Planning and Zoning Commission for consideration and recommendation to the City Council for inclusion in the Denton Comprehensive Plan.

3. The Historic Landmark Commission shall recommend to the Planning and Zoning Commission ordinances designating certain buildings, structures, sites, districts, areas and lands in the city as historic landmarks.

4. The Historic Landmark Commission shall hold a public hearing on all proposed ordinances and the owner of any land included in the proposed ordinance shall be given at least 15 days written notice of the public hearing.
5. If the Historic Landmark Commission finds that buildings, structures, sites, districts, lands or areas cannot be preserved without acquisition, the Historic Landmark Commission may recommend to the City Council that the fee or a lesser interest of the property in question be acquired by gift, device, purchase, eminent domain or otherwise, pursuant to the City’s Charter and state and federal law.

6. Where there are conditions under which the required preservation of a historic landmark would cause undue hardship on the owner, use district changes may be recommended by the Historic Landmark Commission.

7. The designation of an historic landmark may be amended or removed using the same procedure provided in this DDC for the original designation.

8. The Historic Landmark Commission shall provide information and counseling to owners of designated historic landmarks.

9. Any person making application to have any building, structure, site, district, area or land designated as an historic landmark pursuant to the provisions of this article shall pay to the Development Services Department a filing fee in an amount determined and as from time to time amended by ordinance by the City Council, a copy of which ordinance is on file with the Department.

10. The members of the Historic Landmark Commission are held to the City of Denton’s Ethics Code.

**2.3.7 Economic Development Partnership Board**

**2.3.8 Health and Building Standards Commission**

**2.3.9 Park and Recreation Board**

**2.3.10 City Administration**

A. The Director of Development Services (referred to as “Director”) shall have the responsibility for administering this DDC and shall have the review and decision-making responsibilities listed in Table 2.2-A, and elsewhere in this DDC.

B. The Director shall also coordinate other types of review not specifically addressed in this DDC, but relevant to land use and governed by other parts of the Municipal Code of Ordinances, including but not limited to: clearing and grading; fire; health; and building permits.
2.3.11 Development Assistance Team

A. Composition

1. The Development Assistance Team (DAT) is an advisory group comprised of City staff members and outside agencies (as necessary) who meet to review and comment on development proposals and applications and to discuss other matters related to the city’s review and management of development.

2. The members of the DAT shall be composed of persons from various city departments, which have an interest in the development review and approval process, as designated by the Director.

B. Powers and Duties of the Development Assistance Team

The DAT shall have the review authority and responsibilities shown in Table 2.2-A, and the following additional powers and duties under this DDC:

1. To assist the Director in developing and maintaining an Administrative Criteria Manual, on request;

2. To provide expertise and technical assistance to the city’s review and decision-making bodies on request; and

3. To review and comment on proposed amendments to the Comprehensive Plan.

2.4 Common Review Procedures

2.4.1 Overview

A. These common review procedures provide the foundation for specific review and approval procedures identified in Sections 2.5 through 2.9. The common review procedures are illustrated in Figure 2.4-1. Tailored versions of this illustration appear in each of the specific application types.

B. Not all common review procedures apply to every development application type. Sections 2.5 through 2.9 identify how these common review procedures are applied to specific application types, and identify additional procedures and requirements beyond the common review procedures.

Figure 2.4-1: Summary of Common Review Procedures
2.4.2 Consistency with State and Federal Provisions

The notice, decision-making authority, public hearing, and other requirements for all approvals shall comply with the TLGC and other applicable state and federal provisions. This Subchapter shall be interpreted and applied in accordance with all applicable state and federal provisions. If these requirements conflict with state or federal provisions, then the state or federal provisions shall control.

2.4.3 Step 1: Pre-Application Activities

A. Pre-Application Conference

1. Purpose
   Pre-application conferences are intended to provide an opportunity for a potential applicant to meet with city staff to review submittal requirements, procedures, and schedules; discuss details and potential impacts of the proposed project; and establish points of contact for the development review process.

2. Applicability
   A pre-application conference is required prior to submittal of certain types of applications, as listed in Table 2.2-A, and is recommended for most other types of applications. City-initiated applications are exempt from holding a pre-application conference.

3. Procedure
   a. Request
      The applicant may submit a request for a pre-application conference to the Development Services Department.
   b. Scheduling
      The Director shall coordinate with the applicant and facilitate the meeting, including the time and location of the meeting.
   c. Meeting Process
      The meeting shall be conducted pursuant to the requirements in the Administrative Criteria Manual.

4. Effect
   a. Any information, comments, or other material provided to the potential applicant by the city shall expire after 45 days of the pre-application conference.
   b. Any information or discussions held as part of the pre-application conference shall be binding on the city or the potential applicant, up to 45 days.
   c. Discussions of potential conditions to mitigate impacts do not reflect actions by the decision-making body until and unless a decision-making body takes formal action to attach that condition to a development approval.

B. Citizen Participation

1. Purpose
   The citizen participation process provides the residents of Denton with an opportunity to actively participate in the city’s development review procedures to help shape the direction of the city’s development, thereby enhancing the welfare of the community.
2. **Applicability**
   The preparation and execution of a Citizen Participation Plan and submittal of a Citizen Participation Report is recommended prior to submittal of certain types of applications, as listed in Table 2.2-A Summary of Development Review Procedures.

3. **Citizen Participation Plan**
   a. **Director Review**
      The Citizen Participation Plan is recommended to be reviewed by the Director prior to its execution by the applicant.
   b. **Property Owner Names and Mailing Addresses**
      Upon request by the applicant, staff will provide to the applicant the names and mailing addresses of property owners within 200 feet of the subject property and residents within 500 feet of the subject property.
   c. **Neighborhood Meetings**
      i. **Two Neighborhood Meetings**
         The applicant is recommended to conduct a minimum of two neighborhood meetings.
         a. The first neighborhood meeting is recommended to occur prior to distribution of the city’s first set of development review comments to the applicant.
         b. The second neighborhood meeting is recommended to occur prior to the first public meeting/hearing in which the application is heard.
      ii. **Generally**
         a. Neighborhood meeting invitations should be sent out in advance to allow attendees time to prepare for the meeting.
         b. The invitation should include the date, time, and location of the scheduled neighborhood meeting.
         c. The invitation should include as much information about the project and subject request as possible to inform attendees regarding what is being proposed.
         d. Neighborhood meetings should be located in the City of Denton and as close to the subject property as is practical to help minimize the distance that attendees need to travel to participate.
         e. Neighborhood meetings should be schedule to avoid, as much as possible, any conflict with other publicly scheduled meetings.
         f. Neighborhood meetings should take place during non-business hours to allow attendees who work during the day an opportunity to attend.
   d. **Staff Attendance**
      i. It is recommended that the applicant keep the Development Services Department informed of the status of its citizen participation efforts by informing staff regarding the details for the neighborhood meeting.
Staff will attend neighborhood meetings to observe, collect information, and provide answers related to Denton Plan 2030, this DDC, and all other applicable codes and ordinances of the City.

4. Citizen Participation Report
   a. Contents
      A Citizen Participation Report prepared by the applicant is recommended and should include the following:
      i. Dates, times, and locations of all meetings that attendees were invited to attend to discuss the project and subject request.
      ii. The names and affiliation of those that attended that represent the applicant.
      iii. The names and department of staff that attended the meeting.
      iv. A sign-in sheet listing the names of the attendees that participated in the process.
      v. A written summary of the issues and/or concerns raised by the attendees and how the applicant proposes to resolve these issues and/or concerns. If the applicant is unable to resolve the issues and/or concerns raised by the attendees, the summary should state the reason why these issues and/or concerns cannot be resolved.
   b. Public Meeting/Hearing
      i. Prior to the public meeting/hearing, staff will prepare a summary of the neighborhood meeting and include it as part of the staff’s analysis.
      ii. If a Citizen Participation Report is submitted by the applicant, the report will be reviewed by staff and included as an exhibit as part of the backup that is sent to the decision-making body prior to the public meeting/hearing.

2.4.4 Step 2: Application Submittal and Processing

A. Authority to Submit Application
   Unless expressly stated otherwise in this DDC, a development application shall be submitted by:
   1. The property owner, contract purchaser, or any other person having a recognized property interest in the land on which development is proposed; or
   2. A person authorized to submit the application on behalf of the owner, contract purchaser, or other person having a recognized property interest in the land; or
   3. If there are multiple owners, contract purchasers, or other persons authorized to submit the application, all such persons shall sign the application or a letter or document consenting to the application.

B. Application Content
   1. The application shall be submitted to the Development Services Department.
   2. The application shall be submitted on a form established by the Director.
   3. The applicant bears the burden of ensuring that an application contains sufficient information to demonstrate compliance with application requirements.
4. The application shall include all required information as indicated in the Administrative Criteria Manual, and any additional information requested by the Director or other staff during a pre-application conference to help demonstrate compliance with this DDC and other applicable city codes.

C. Application Fees
   1. Application fees shall be paid at the time of submittal according to the type of application. Fees shall be established by ordinance by the City Council.
   2. All fees required by this DDC, the Administrative Criteria Manual, or otherwise prescribed in the Municipal Code of Ordinances shall be paid to and collected by the Development Services Department.
   3. Where initial application fees are based on the estimated costs of review of the application by an outside consultant (for example, review of a project’s traffic impacts by a traffic consultant), and the Director determines that additional funds are needed to complete the consultant’s review, the Director may impose additional application fees to recover the city’s actual costs in completing review. Prior to imposing such additional fees, the Director shall notify the applicant of the additional fees and provide the applicant with the option to move forward or withdraw the application.

D. Submittal and Review Schedule
   The Director shall establish a submittal and review schedule for development applications and shall include that information in the Administrative Criteria Manual. The Director may amend the schedule to ensure effective and efficient review under this DDC.

E. Determination of Application Completeness
   1. Application Materials
      a. No application is complete unless all of the information required by Subchapter 2: Administration and Procedures, the Administrative Criteria Manual, and any application materials required by the Development Services Department, are included, and all required filing fees are paid.
      b. An application is not considered filed until it is complete.
      c. The applicant shall file an application in advance of any required public hearing or public meeting where the application is considered.
      d. The Director may establish a schedule for filing and reviewing any application that requires action by the City Council, Planning and Zoning Commission, Zoning Board of Adjustment, Historic Landmark Commission, Director, or Building Official. The schedule shall provide adequate time for notice and/or publication consistent with the applicable state statutes and this Subchapter.
      e. Completed applications shall be filed according to any published schedule.
      f. A determination of completeness shall not constitute a determination of compliance with the substantive requirements of this DDC, other Ordinances of the City of Denton, or state or federal law.
2. **Review Procedure**
   a. No later than 10 business days after an application is submitted, the Director shall determine whether the application is complete and shall transmit a written determination to the applicant. If the written determination is not made within this time period, the application is deemed complete. Failure to complete this review within the specified time does not constitute approval and does not give rise to any cause of action against the City.
   b. If the application is determined not to be complete, the Director shall provide written notice to the applicant of the failure. The notice shall specify the necessary documents or other information and the date the application will expire if the documents or other information is not provided. The Director shall provide this notice no later than the 10th business day after the date the application is filed.
   c. Pursuant to TLGC 245.002(e), the application shall expire on or after the 45th day after the date the application is filed if:
      i. The applicant fails to provide documents or other information required by Subsection 2.4.4B above; or
      ii. The Director provides the notice described in paragraph 2.4.4E.2.b, above; and
      iii. The applicant fails to provide the specified documents or other information within the time provided in the notice.
   d. If an application expires, the city shall not process the application. The applicant shall file a new application and pay the required fees to obtain the requested approval.

3. **Notice of Application Acceptance**
   When the Director determines that an application is filed in proper form and is ready to be formally accepted, the Director shall notify the applicant in writing. The application is then processed according to the remainder of this subchapter and the Administrative Criteria Manual, including referrals to outside agencies and scheduling for public hearing and/or meetings, as applicable.

4. **Time Limits Triggered by Complete Application**
   Whenever this subchapter establishes a time period for processing an application, the time period does not begin until the Director has reviewed the application for completeness and the applicant has corrected all deficiencies in the application.

5. **Appeal**
   If the application is determined to be incomplete, the applicant may appeal that decision in writing to the Zoning Board of Adjustment pursuant to Subsection 2.8.3, *Appeal of Administrative Decision*.

F. **Minor Application Revisions**
   1. An applicant may revise an application after receiving notice of deficiencies following staff review according to Subsection 2.4.5, or on requesting and receiving permission from an advisory or decision-making body after that body has reviewed, but not yet taken action on, the application.
   2. Revisions shall be limited to changes that directly respond to specific requests or suggestions made by staff or the advisory or decision-making body, as long as they constitute only minor additions, deletions, or corrections and do not include significant
Subchapter 2: Administration and Procedures

2.4 Common Review Procedures

2.4.5 Step 3: Staff Review and Action

The Director shall distribute the complete application to appropriate staff and appropriate internal and external review agencies per the Administrative Criteria Manual.

Staff shall review the application and submit recommendations and comments to the applicant in a form established by the Director. The application shall not move forward for further review until the Director determines that the applicant has adequately responded to staff recommendations and comments, or the applicant requests that the application move forward with a staff recommendation of denial.
C. Applications Subject to Staff Recommendation

1. Staff Report
   The Director shall submit a written report to the recommending or decision-making body. The Director's report should include the reports and recommendations of other city departments, if applicable, and should state whether or not the application complies with all applicable DDC requirements. The staff report may also include a recommendation for a decision by the authorized recommending or decision-making body and recommend how noted deficiencies may be corrected and negative impacts mitigated.

2. Distribution and Availability of Application and Staff Report
   The Director must submit a copy of the staff report to the applicant and advisory or decision-making body and must make the staff report and all related materials available for public review pursuant to the Administrative Criteria Manual.

3. Forwarding Applications for Review
   A recommending- or decision-making body may remand the application back to the Director for further consideration, and the City Council may remand the application back to a recommending body for further consideration.

D. Applications Subject to Staff Decision
   If an application is subject to staff review and a final decision by the Director pursuant to Table 2.2-A, the Director shall make a decision based on the review standards applicable to the application type. The decision shall be in writing and shall clearly state reasons for a denial or for conditions of approval. The Director may, at his or her discretion, require that the application be forwarded to the Planning and Zoning Commission for review.

E. Approval Criteria Applicable to all Applications

1. Generally
   a. Unless otherwise specified in this DDC, City review and decision-making bodies must review all development applications submitted pursuant to this subchapter for compliance with the general review criteria stated below.
   b. The application may also be subject to additional review criteria specific to the type of application, as set forth in sections 2.5 through 2.9.
   c. If there is a conflict between the general review criteria in this section and the specific review criteria in sections 2.5 through 2.9, the applicable review criteria in sections 2.5 through 2.9 controls.

2. Prior Approvals
   The proposed development shall be consistent with the terms and conditions of any prior land use approval, plan, development agreement, or plat approval that is in effect and not proposed to be changed. This includes an approved phasing plan for development and installation of public improvements and amenities.

3. Consistent with Comprehensive Plan and Other Applicable Plans
   The proposed development shall be consistent with the Comprehensive Plan and any applicable plans. The decision-making authority:
   a. Shall weigh competing plan goals, policies, and strategies; and
b. May approve an application that furthers the overall goals of the Comprehensive Plan even if the development does not match the future land use designation in the Comprehensive Plan.

4. Compliance with this DDC
   a. The proposed development shall comply with all applicable standards in this DDC, unless the standard is to be lawfully modified.
   b. Compliance with these standards is applied at the level of detail required for the subject submittal.

5. Compliance with Other Applicable Regulations
   The proposed development shall comply with all other city regulations and with all applicable regulations, standards, requirements, or plans of the federal or state governments and other relevant jurisdictions. This includes, but is not limited to, wetlands, water quality, erosion control, and wastewater regulations.

6. Consistent with Interlocal and Development Agreements
   The proposed development shall be consistent with any adopted interlocal and applicable development agreements, and comply with the terms and conditions of any such agreements incorporated by reference into this DDC.

7. Minimizes Adverse Environmental Impacts
   The proposed development should be designed to minimize negative environmental impacts, and should not cause significant adverse impacts on the natural environment. Examples of the natural environment include water, air, noise, stormwater management, scenic resources, wildlife habitat, soils, and native vegetation.

8. Minimizes Adverse Impacts on Surrounding Property
   The proposed development should not cause significant adverse impacts on surrounding properties. The results of the citizen participation process may be appropriately considered under this section.

9. Minimizes Adverse Fiscal Impacts
   The proposed development should not result in significant adverse fiscal impacts on the city.

10. Compliance with Utility, Service, and Improvement Standards
    As applicable, the proposed development shall comply with federal, state, county, service district, city and other regulatory authority standards, and design/construction specifications for roads, access, drainage, water, sewer, schools, emergency/fire protection, and similar standards.

11. Provides Adequate Road Systems
    Adequate road capacity shall exist to serve the uses permitted under the proposed development, and the proposed uses shall be designed to ensure safe ingress and egress onto the site and safe road conditions around the site, including adequate access onto the site for fire, public safety, and EMS services.

12. Provides Adequate Public Services and Facilities
    Adequate public service and facility capacity shall exist to accommodate uses permitted under the proposed development at the time the needs or demands arise, while
maintaining adequate levels of service to existing development. Public services and facilities include, but are not limited to, roads, domestic water, sewer, schools, public safety, fire protection, utilities, libraries, and vehicle/pedestrian connections and access within the site and to adjacent properties.

13. **Rational Phasing Plan**

If the application involves phases, each phase of the proposed development shall contain all of the required streets, utilities, landscaping, open space, and other improvements that are required for that phase, and may not defer those improvements to subsequent phases.

F. **Conditions of Approval**

1. Except for zoning map amendments or annexations, or where otherwise prohibited by law, where this DDC authorizes a review body to approve or deny an application subject to applicable criteria, the review body may approve the application with conditions necessary to bring the proposed development into compliance with this DDC or other regulations, or to mitigate the impacts of that development on the surrounding properties and streets.

2. All conditions of approval shall be reasonably related to the anticipated impacts of the proposed use or development or shall be based upon standards duly adopted by the city. Such conditions may include those necessary to carry out the purpose and intent of the City’s Comprehensive Plan, development agreements, other adopted city plans, and this DDC.

3. No conditions of approval shall be less restrictive than the requirements of this DDC, except where the DDC expressly allows deviations.

4. Any condition of approval that requires an applicant to dedicate land or pay money to a public entity in an amount that is not calculated according to a formula applicable to a broad class of applicants shall be roughly proportional both in nature and extent to the anticipated impacts of the proposed development, as shown through an individualized determination of impacts.

5. During its consideration, the decision-making body may consider alternative potential conditions; however, no discussion of potential conditions shall be deemed an attempt or intent to impose any condition that would violate the federal or state constitutions, statutes, or regulations. Discussions of potential conditions to mitigate impacts do not reflect actions by the decision-making body unless and until the decision-making body takes formal action to attach that condition to a development approval.

6. Unless otherwise provided in this DDC, any representations of the applicant in submittal materials or during public hearings shall be binding as conditions of approval.

7. Failure to meet any condition of approval prior to the issuance of any type of permit shall negate the approval and the application shall be deemed denied.

### 2.4.6 Step 4: Scheduling and Notice of Public Meetings/Hearings

A. **Scheduling**

1. If an application is subject to a public hearing pursuant to Table 2.2-A Summary of Development Review Procedures, the Director shall schedule the public hearing for either a regularly scheduled meeting or special meeting of the appropriate decision-making body following submission of a completed application.
2. Unless otherwise specified, notice for public hearings shall meet or exceed TLGC requirements.

B. Public Notice Requirements
   1. All public hearings required by this DDC shall be preceded by the notices identified in Table 2.2-A Summary of Development Review Procedures, all such notices shall meet the content, timing, and other specifications in the Administrative Criteria Manual.
   2. Applicants are responsible for any additional notice beyond the requirements in this DDC, other city ordinances, or state law.

C. Constructive Notice
   1. Minor Defects in Notice Shall Not Invalidate Proceedings
      Minor defects in any notice shall not impair the notice or invalidate proceedings pursuant to the notice if a bona fide attempt has been made to comply with applicable notice requirements. Minor defects in notice shall be limited to errors in a legal description or typographical or grammatical errors that do not impede communication of the notice to affected parties. In all cases, however, the requirements for the timing of the notice and for specifying the time, date, and place of a hearing shall be strictly construed.
   2. Failure to Receive Notice Shall Not Invalidate Action
      Failure of a party to receive written notice shall not invalidate subsequent action.
   3. Re-Noticing
      A new notice is required if there is an increase in land use intensity, as determined by the Director, between the action described in the original notice and the final action.

2.4.7 Step 5: Review and Decision

The application shall be subject to review, hearings, recommendations, and decisions as indicated in Table 2.2-A and the following:

A. Generally
   1. If the application is subject to a public hearing, the applicable review body shall hold a public hearing on the application in accordance with Subsection 2.4.6.
   2. The applicable review body shall consider the application, relevant support materials, staff report, and any evidence and public comments from the public hearing (if required).
   3. The applicable review body shall approve, approve with conditions, or deny the application based on the applicable approval criteria, including the general criteria in Subsection 2.4.5E, Approval Criteria Applicable to all Applications, and the specific standards in sections 2.5 through 2.9.
   4. If the review involves a quasi-judicial hearing, the recommendation or decision (as applicable) shall be based only on the record of the public hearing and shall:
      a. Be made in writing;
      b. Include findings of fact based on competent, material, and substantial evidence presented at the hearing;
      c. Reflect the determination of contested facts; and
      d. State how the findings support compliance with applicable review standards.
B. **Conditional Approvals**
   The decision-making body may incorporate or require, as part of a condition of approval, a written agreement between the applicant and the city that enforces the conditions. All conditions shall comply with the limitations in Subsection 2.4.5F, *Conditions of Approval*.

C. **Postponement of Public Hearings at Applicant’s Request**
   An applicant may request one postponement of the scheduled public hearing at least five business days prior to the scheduled public hearing. If any publication or notice is provided by the city, the applicant is responsible for any costs or fees associated with the postponement. If the request is submitted less than five days prior to the scheduled public hearing, the decision-making body may, in its discretion, either hold or continue the public hearing.

D. **Continuances**
   The decision-making body may continue a public hearing to a specified date, time, and place. The date of continuance shall be made part of the motion and publicly announced at the public hearing. Publication or property owner notification of the continued date is not required, unless required by state law or recommended by the hearing body or the Director.

E. **Postpone a Decision**
   A decision-making body may close a public hearing and postpone the decision. The request shall appear on the next subsequent agenda unless the decision is deferred to a specific date.

F. **Other Rules to Govern**
   Other matters pertaining to the public hearing shall be governed by other provisions of these regulations applicable to the body conducting the hearing and its adopted rules of procedure.

### 2.4.8 Step 6: Post-Decision Actions and Limitations

A. **Notice of Decision**
   1. Within 10 days after a final decision on an application, the Director shall provide written notification of the decision, unless the applicant was present at the meeting where the decision was made or required by law.
   2. If the review involves a quasi-judicial hearing, the Director shall, within 10 days after a final decision on the application, provide a written notification of the decision to the owner(s) of the subject site (unless the applicant was present at the meeting where the decision was made or required by law), and any other person that submitted a written request for a copy of the decision before its effective date.

B. **Appeal**
   1. A party aggrieved or adversely affected by any decision by the City Council or Zoning Board of Adjustment may seek review of the decision in the courts in accordance with applicable state law.
   2. A party aggrieved by other final decisions may appeal the decision in accordance with the procedures and standards in Subsection 2.8.3 and as set forth in sections 2.5 through 2.9, as applicable.
C. **Expiration of Approval**

1. An application approval under this subchapter expires if no progress is made towards completion of the project within the established expiration dates provided in sections 2.5 through 2.9.

2. A change in ownership of the land shall not affect the established expiration time period of an approval.

3. For purposes of this subsection, progress towards completion of the project is as defined in TLGC § 245.005.

D. **Extensions of Approval Period**

1. The original approval body may grant one extension of an approval period of up to one year for good cause.

2. All requests for extensions shall be submitted in writing to the Director at least 30 calendar days prior to the expiration of approval.

3. An extension request shall include:
   a. A narrative stating the reasons for the applicant’s inability to comply with the specified deadlines; and
   b. A narrative describing any changes in the character of the neighborhood, the Comprehensive Plan, or this DDC that have occurred since approval of the permit/plan, and how any such changes affect the permit/plan; and
   c. The anticipated time schedule for completing the review project and/or the specific project.

4. Additional review of the permit/plan may result in additional conditions, as applicable.

E. **Modification or Amendment of Approval**

Unless otherwise provided in this DDC, any modification of an approved plan, permit, or condition of approval shall require a new application that is submitted and reviewed in accordance with the full procedure and fee requirements applicable to the particular type of the original application.

F. **Limitation on Subsequent Similar Applications**

1. Except at City Council’s request, following denial of an application, no application that is the same or substantially similar will be accepted within one year of the previous denial. For purposes of this provision, “substantially similar” shall mean any application that is not materially different in terms of proposed development or activities relative to the reasons for denial of a previously submitted application, as determined by the Director.

2. This waiting period may be waived by the decision-making body provided that:
   a. There is a substantial change to circumstances, or new information available, relevant to the issues or facts considered during the previous application review; or
   b. The new application is materially different from the previous application, as determined by the Director.
2.5 Development Permits and Procedures

2.5.1 Site Plan Review

A. Purpose
The site plan review procedure is intended to ensure compliance with the development and design standards of this DDC and to encourage quality development reflective of the adopted goals and objectives of the city. The site plan review procedure ensures that proposed development applications address and mitigate potential adverse impacts associated with the proposal.

B. Applicability
Site plan review is required for the following types of activities. All other activities are exempted.

1. Residential
   b. Expansion of multifamily buildings by more than 10 dwelling units or 10 percent of the number of existing units, whichever is less.
   c. Reconstruction of a multifamily building after voluntary demolition.

2. Mixed-Use and Nonresidential
   a. New construction of mixed-use or nonresidential buildings.
   b. Expansion of a mixed-use building by more than 2,000 square feet of nonresidential space or the lesser of more than 10 dwelling units or 10 percent of the number of dwelling units.
   c. Expansion of a nonresidential building by the greater of either 2,000 square feet or more or 20 percent of the total square footage of the building.
   d. Reconstruction of a mixed-use or nonresidential building after voluntary demolition.
C. Site Plan Procedure

Figure 2.5-1 identifies the applicable steps from the common review procedures in Section 2.4 that apply to the review of site plans. Additions or modifications to the common review procedures are noted below.

Figure 2.5-1: Summary of Site Plan Procedure

1. Step 1: Pre-Application Activities
   a. Pre-Application Conference
      A pre-application conference is required in accordance with Subsection 2.4.3.
   b. Citizen Participation
      Not required.

2. Step 2: Application Submittal and Processing
   a. Generally
      i. The site plan application shall be submitted and accepted, and may be revised or withdrawn, in accordance with Subsection 2.4.4.
      ii. The Director may require at any stage of review of any site plan, submission of any plan, study, survey or other information, in addition to that specified in this DDC, or the Administrative Criteria Manual, and at the applicant’s expense, as determined necessary to enable review, recommendation, and/or approval of the site plan.
   b. Concurrent Review
      i. Civil Engineering Plans
         For properties that have already been platted, the Director may require submittal of civil engineering plans for proposed streets, sidewalks, drainage, utility, or other public improvements associated with the site plan review. If required, such
civil engineering plans may be submitted and reviewed concurrently with the site plan application.

ii. **Environmental Sensitive Areas ESAs Compliance Review**
   Environmental Sensitive Areas (ESAs) Compliance Review shall be reviewed concurrently with an application for a site plan in accordance with Subsection 7.4.4: ESAs Procedures.

iii. **Other Applications**
   An application for a site plan approval may be submitted and reviewed concurrently with rezonings, specific use permits, subdivision applications, and variance applications, provided that the Director shall not decide the site plan approval application until after an official decision is made on the rezoning, subdivision, and/or variance application.

3. **Step 3: Staff Review and Action**
   The Director shall review the site plan application and approve, approve with conditions, or deny the application in accordance with the approval criteria in Subsection 2.5.1D, below.

4. **Step 4: Scheduling and Notice of Public Meetings/Hearings**
   Not required.

5. **Step 5: Review and Decision**
   Not applicable. Review and decision is by the Director under Step 3.

6. **Step 6: Post-Decision Actions and Limitations**
   a. **No Building Permit without Approval**
      No building permit shall be issued until the site plan and any associated development plans have been approved, and all conditions of approval have been met.
   
   b. **Lapse of Approval**
      Unless otherwise provided in the conditions of approval, site plans shall expire after 24 months if the use or construction has not obtained all necessary permits. Extensions may be granted by the Director for good cause shown due to unforeseen circumstances, such as an application for amendments to the approved site plan. Such extensions may only be granted if a written request is made to the Director prior to expiration.
   
   c. **Amendments**
      During construction, the Director may authorize minor adjustments without requiring resubmittal of a site plan application provided such adjustments:
      i. Comply with the standards of this DDC;
      ii. Are necessary to meet provisions of the building code or other life safety code;
      iii. Are necessary to meet conditions of approval by other city, county, or state departments and/or agencies; or
      iv. Would not significantly alter the function, form, intensity, character, demand on public facilities, or impact on adjacent properties as approved with the site plan.
   
   d. **Appeal to the Zoning Board of Adjustment**
      The applicant may appeal the denial, revocation, or suspension of a site plan to the Zoning Board of Adjustment in accordance with Subsection 2.8.3.
D. **Site Plan Review Approval Criteria**
   In reviewing a proposed site plan application, the Director shall consider the general approval criteria in Subsection 2.4.5 and whether:
   1. The lot on which the development is proposed has been legally platted or is otherwise exempt from platting requirements;
   2. The site plan complies with all site specifications adopted by the city; and
   3. The site plan complies with applicable standards in this DDC, including Subchapter 3: Zoning Districts; Subchapter 4: Overlay and Historic Districts; Subchapter 5: Use Regulations; Subchapter 7: Development Standards; and any other applicable standards of this DDC.

2.5.2 **Specific Use Permit (SUP)**

A. **Purpose**
   The specific use permit (SUP) procedure provides a mechanism for the city to evaluate proposed development and land uses that have unique or widely varying operating characteristics or unusual features. This procedure is intended to ensure compatibility with surrounding areas and that adequate mitigation is provided for anticipated impacts.

B. **Applicability**
   1. The SUP procedure shall apply to uses identified in Table 5.2-A: *Table of Allowed Uses*, as requiring a SUP. No such use may be established, enlarged, or altered without approval of a SUP.
   2. The City Council may grant, repeal, and amend SUPs for certain uses, but only where specified in this DDC.
C. Specific Use Permit Procedure

Figure 2.5-2 identifies the applicable steps from the common review procedures in Section 2.4 that apply to the review of SUPs. Additions or modifications to the common review procedures are noted below.

![Figure 2.5-2: Summary of Specific Use Permit Procedure](image)

1. Step 1: Pre-Application Activities
   a. Pre-Application Conference
      A pre-application conference is required in accordance with Subsection 2.4.3.
   b. Citizen Participation
      Citizen Participation is recommended in accordance with Subsection 2.4.3B: *Citizen Participation*.

2. Step 2: Application Submittal and Processing
   The SUP application shall be submitted and accepted, and may be revised or withdrawn, in accordance with Subsection 2.4.4.

3. Step 3: Staff Review and Action
   The Director shall review the SUP application and prepare a staff report and recommendation in accordance with the approval criteria in Subsection 2.5.2D below.

4. Step 4: Scheduling and Notice of Public Meetings/Hearings
   The SUP application shall be scheduled for public hearings before the Planning and Zoning Commission and the City Council and shall be noticed pursuant to Table 2.2-A Summary of Development Review Procedures and Subsection 2.4.6.
5. **Step 5: Review and Decision**
   a. **Planning and Zoning Commission Review and Recommendation**
      The Planning and Zoning Commission shall review the SUP application in accordance with the approval criteria in Subsection 2.5.2D below, and shall forward its recommendation to the City Council.
   b. **City Council Review and Decision**
      i. The City Council may review and approve, approve with conditions, or deny the SUP application in accordance with the approval criteria in Subsection 2.5.2D below.
      ii. If the Planning and Zoning Commission recommends denial of the SUP, the SUP shall become effective only by a three-fourths vote of all members of the City Council.
   c. **Concurrent Review**
      An applicant may request a SUP approval concurrent with a rezoning.

6. **Step 6: Post-Decision Actions and Limitations**
   Post-decision actions and limitations in Subsection 2.4.8 shall apply with the following modifications:
   a. **Expiration of a Specific Use Permit**
      If the authorized use or construction is not substantially underway within 24 months after the date of SUP approval, or an extension is granted pursuant to Subsection 2.4.8C, the SUP shall expire.
   b. **Expansion or Enlargement**
      i. Expansion or enlargement of a SUP shall require a new application, unless the Director determines that the expansion or enlargement:
         a. Is not expected to increase potential negative impacts to surrounding property or the city; and
         b. Will not require adjustments to any standards greater than allowed through the minor modification procedures in Subsection 2.8.2.
      ii. Any expansion or enlargement of a SUP that does not meet the criteria for Director approval established above shall require review and recommendation by the Planning and Zoning Commission and review and approval by the City Council.
   c. **Denial or Revocation of Permit**
      i. A SUP may be revoked or modified after notice to the property owner and a hearing before the City Council, for any of the following reasons:
         a. The SUP was obtained or extended by fraud or deception; or
         b. One or more of the conditions of approval imposed on the SUP has not been met or has been violated; or
         c. At the time of change of ownership or condition indicated in the original approval.
Subchapter 2: Administration and Procedures
2.5 Development Permits and Procedures
2.5.3 Temporary Use Permit

ii. If a SUP is denied or revoked in accordance with this section, then the subject property shall not be eligible for resubmittal for 12 months unless the applicant can show a substantial change in circumstances to justify a resubmittal.

d. Recording

All approved SUPs shall be referenced on the Official Zoning Map of City as “SUP.”

D. Specific Use Permit Approval Criteria

In reviewing a proposed SUP, the Planning and Zoning Commission and City Council shall consider the general approval criteria in Subsection 2.4.5 and whether:

1. The specific use proposed is compatible with the surrounding area;
2. The specific use proposed has minimal impacts on future development of the area;
3. The specific use proposed meets all other standards of this DDC and all other applicable city codes;
4. Any impacts associated with access, traffic, emergency services, utilities, parking, refuse areas, noise, glare, and odor have been adequately mitigated;
5. The use is in conformance with the Comprehensive Plan and any other applicable adopted plans; and
6. The use adversely impacts the health, safety, and welfare of the inhabitants of the area and the City of Denton.

2.5.3 Temporary Use Permit

A. Purpose

The temporary use permit procedure provides a mechanism for the city to evaluate prospective uses and/or structures on private property of limited duration to ensure compliance with applicable standards of this DDC, including Section 5.5: Temporary Uses and Structures.

B. Applicability

A temporary use permit is required before establishing, constructing, or installing any temporary use or structure designated as requiring a temporary use permit in Section 5.5: Temporary Uses and Structures.
C. **Temporary Use Permit Procedure**

Figure 2.5-3 identifies the applicable steps from the common review procedures in Section 2.4 that apply to the review of temporary use permits. Additions or modifications to the common review procedures are noted below.

   Not required.

5. **Step 5: Review and Decision**
   Not applicable. Review and decision is by the Director under Step 3.

6. **Step 6: Post-Decision Actions and Limitations**
   Post-decision actions and limitations in Subsection 2.4.8 shall apply, with the following modifications:
Subchapter 2: Administration and Procedures

2.5 Development Permits and Procedures

2.5.4 Certificate of Zoning Compliance

a. Effect of Approval
   A temporary use permit authorizes establishment, construction, or installation of the approved temporary use or structure in accordance with the terms and conditions of the permit.

b. Expiration of Approval
   i. A temporary use permit shall be valid beginning on the date specified on the permit and shall remain valid for the time period indicated on the permit, but in no event, longer than 12 months.
   ii. Upon request, the Director may grant a one-year extension; however, in no case shall a temporary use permit be valid for more than one year after its original expiration date. This one-year extension period may not be further extended.
   iii. Any temporary use permit requesting an approval period beyond one year shall require a specific use permit approval pursuant to Subsection 2.5.2.

c. Removal and Restoration
   Before the expiration of a temporary use permit, the permittee shall disconnect all temporary uses and structures, and associated property and equipment, and free the temporary use site from all trash, litter, and debris to the satisfaction of the Director.

d. Appeal to the Zoning Board of Adjustment
   The applicant may appeal the denial, revocation, or suspension of a temporary use permit to the Zoning Board of Adjustment in accordance with Subsection 2.8.3.

D. Temporary Use Permit Approval Criteria
   In reviewing a temporary use or structure, the Director shall consider the general approval criteria in Subsection 2.4.5 and whether the proposed use or structure:
   1. Complies with applicable temporary use standards in Section 5.5: Temporary Uses and Structures, as well as all other applicable standards in this DDC;
   2. Adequately mitigates any impacts associated with access, traffic, emergency services, utilities, parking, refuse areas, noise, glare, and odor; and
   3. Complies with all requirements and conditions of approval of any prior development permit or approval.

2.5.4 Certificate of Zoning Compliance

A. Purpose
   The certificate of zoning compliance procedure provides a mechanism for the city to evaluate new and/or changes in use of any building, structure, or land to ensure compliance with applicable standards of this DDC. A certificate of zoning compliance may also be obtained by a property owner to demonstrate the existence of a nonconformity subject to Section 1.5, Nonconformities.

B. Applicability
   A certificate of zoning compliance shall be required prior to the use of any building, structure, or land, except that temporary uses and structures approved in accordance with Section 5.5, Temporary Uses and Structures, shall be exempt from certificate of zoning compliance requirements.
C. **Certificate of Zoning Compliance Procedure**

Figure 2.5-4 identifies the applicable steps from the common review procedures in Section 2.4 that apply to the review of a certificate of zoning compliance. Additions or modifications to the common review procedures are noted below.

**Figure 2.5-4: Summary of Certificate of Zoning Compliance Procedure**

1. **Step 1: Pre-Application Activities**
   a. **Pre-Application Conference**
      A pre-application conference is optional in accordance with Subsection 2.4.3.
   b. **Citizen Participation**
      Not required.
2. **Step 2: Application Submittal and Processing**
   The certificate of zoning compliance application shall be submitted and accepted, and may be revised or withdrawn, in accordance with Subsection 2.4.4.
3. **Step 3: Staff Review and Action**
   The Director shall issue a certificate of zoning compliance when, after examination of the building, structure, landscaping, and/or other improvements or changes to the property, the Department finds that the building and site complies with the applicable provisions of this DDC and other applicable ordinances and construction codes of the city. This review shall include, but is not limited to: off-street parking, landscaping, and other development standards listed in Subchapter 7: Development Standards.
4. **Step 4: Scheduling and Notice of Public Meetings/Hearings**
   Not required.
5. **Step 5: Review and Decision**
   Review and decision is subject to Subsection 2.4.7.
6. **Step 6: Post-Decision Actions and Limitations**

Post-decision actions and limitations in Subsection 2.4.8 shall apply, with the following modifications:

a. **Effect of Approval**
   i. A certificate of zoning compliance authorizes establishment of a new use and/or change of occupancy of an existing property or building with any additional terms and conditions of the permit and shall be valid as long as the conditions of the building or land use permit remain in effect.
   ii. The certificate of zoning compliance shall clearly state that the proposed use of a building or property complies with the provisions of this DDC.
   iii. For any proposed certificate of zoning compliance requiring a building permit, a certificate of zoning compliance shall be issued at the time of permitting.

b. **Revocation of a Certificate of Use Permit**
   i. A certificate of zoning compliance may be revoked by the Director if the use of the property or building is inconsistent with the authorized use of the certificate of zoning compliance.
   ii. The Director shall notify the permit holder in writing and provide 30 days from the date of the letter for the permit holder to bring the use of the property into compliance with the certificate of zoning compliance, or the permit shall be revoked.

c. **Appeal to the Zoning Board of Adjustment**
   The applicant may appeal the denial, revocation, or suspension of a certificate of zoning compliance to the Zoning Board of Adjustment in accordance with Subsection 2.8.3.

2.5.5 **Environmental Sensitive Areas (ESAs) Field Assessments**

A. **Purpose**
   The environmentally sensitive areas (ESAs) field assessment procedure provides a mechanism for the city to confirm the presence of ESAs protected habitats and to correct any errors on the Official ESA Map.

B. **Applicability**
   Field assessments are required when there is reasonable evidence that ESAs, as depicted on the Official ESA Map, may not be accurate. ESA field assessments that require map adjustment shall supersede the Official ESA Map in determining what areas of a proposed development are subject to the requirements of Section 7.4: *Environmentally Sensitive Areas.*
C. **ESA Field Assessment Procedure**

Figure 2.5-5 identifies the applicable steps from the common review procedures in Section 2.4 that apply to the review of ESA field assessments. Additions or modifications to the common review procedures are noted below.

**Figure 2.5-5: Summary of ESA Field Assessment Procedure**

<table>

</tbody>
</table>

1. **Step 1: Pre-Application Activities**
   a. **Pre-Application Conference**
      A pre-application conference is optional in accordance with Subsection 2.4.3.
   b. **Citizen Participation**
      Not required.

2. **Step 2: Application Submittal and Processing**
   a. **Generally**
      i. The ESA field assessment application shall be submitted and accepted, and may be revised or withdrawn, in accordance with Subsection 2.4.4.
      ii. The Director may require additional information deemed appropriate and necessary to process the application.
      iii. An application for an ESA field assessment must be submitted and reviewed prior to or concurrently with the platting of property.

3. **Step 3: Staff Review and Action**
   The Director shall review an ESA field assessment application and approve, approve with conditions, or deny the application in accordance with the general approval criteria in Subsection 2.4.5, and any specific biological, hydrological, and soil identification standards included on the ESA field assessment forms provided by the city.
4. **Step 4: Scheduling and Notice of Public Meetings/Hearings**
   Not required.

5. **Step 5: Review and Decision**
   Not applicable. Review and decision is by the Director under Step 3.

6. **Step 6: Post-Decision Actions and Limitations**
   a. An ESA field assessment application shall expire two years after its approval, or if the natural conditions of the ESA have been significantly altered.
   b. A change in ownership of the land shall not affect the established expiration time period of an approval.
   c. For purposes of this section, progress towards completion of the project is as defined in TLGC § 245.005.
   d. Appeals to staff determinations shall follow the procedure in Section 2.8.3.

2.5.6 **Vested Rights**

A. **Introduction and Purpose**
   TLGC, Chapter 245, commonly referred to as the state’s “vested rights law,” provides an opportunity for persons to “freeze” or “vest” governmental regulations by filing a permit application. Other laws, such as TLGC, § 211.016, also provide certain vesting to:
   1. Ensure that the city recognizes and protects all vested rights created by TLGC, Chapter 245, and other applicable laws;
   2. Ensure that all vested rights are made by the city only after the city is in receipt of all information necessary to allow the city to determine whether vested rights are present; and

B. **Vested Rights**
   For purposes of this DDC, any person who believes that they have obtained a vested right under TLGC, Chapter 245, or other applicable vested rights law, shall submit to the Director a petition explaining the factual and legal bases upon which the person relies to support their contention that they have a particular vested right and, consequently, is exempt or not subject to a particular city order, regulation, ordinance, rule, expiration date, or other properly adopted requirement otherwise applicable to development of the petitioner’s property (hereinafter referred to collectively as "regulations"). The petition shall be accompanied by an unconditional waiver of any statutory time periods or time periods established by ordinance for review of any filed applications which are the subject of the petition. The petition shall include, at a minimum, the following:
   1. The name, mailing address, phone number, and fax number of the person (or the person’s duly authorized agent);
   2. Identification of the property for which the person claims a vested right;
   3. Identification of the permit applications for which the applicant seeks relief under this DDC;
   4. Identification of the “project,” as that term is defined in TLGC, Chapter 245 at § 245.001(3), and the permit application, permit or development plan giving rise to the project;
   5. Identification of the original application for the first permit in the series of permits required for the project, as described in TLGC, Chapter 245 at § 245.001(1) and § 245.002(a) and (b),
and each subsequent permit application or permit constituting the series of permits, by type of permit and dates filed or approved by the city;

6. Identification of any exemptions under this DDC or city ordinances to which the petitioner believes are applicable to the project defined;

7. Identification of all pertinent city regulations in effect at the time the original application for the permit was filed that:
   a. The Petitioner contends control the approval, disapproval, or conditional approval of the application(s) for a permit for which relief is sought, pursuant to TLGC, Chapter 245 at § 245.002(a); and
   b. Identification of all current city regulations that the petitioner contends do not apply to the project due to the vested rights provided the person by TLGC, Chapter 245, or other applicable vested rights laws. Global references to a particular ordinance, statute or set of criteria, may be deemed insufficient and the city may consider the request for a vested rights to be incomplete and, hence, not subject to a staff determination at that time.

8. Identification of all current city regulations that the petitioner accepts as applicable to the project.

C. Vested Rights

The Director shall first determine whether the application is complete pursuant to Subsection 2.4.4: Step 2: Application Submittal and Processing. Once the application has been determined or deemed complete, the Director shall forward the vested rights petition, together with the required supporting information or documentation, to the City Manager and City Attorney for their respective reviews. Prior to rendering a final determination, the City Manager may request a pre-determination conference with the person to discuss the person's vested rights and to ensure that the nature of the claim is fully and completely understood by the City Manager. The City Manager, after consultation with the City Attorney, shall render a final administrative determination that grants the relief requested in the petition in whole or in part, or denies the requested relief in whole or in part within 30 days of the date the petition is complete. The City Manager’s determination shall include a statement of the nature and scope of the project and the reasons for the decision, and shall identify those current regulations that are applicable to the project, if any, and prior existing regulations that are applicable to the project, if any.

D. Board of Adjustment Appeal

If the petitioner believes that the City Manager’s vested rights determination is in error, the petitioner shall have the right to appeal such determination to the City's Board of Adjustment pursuant to Subsection 2.8.1: Variance, which board shall have jurisdiction to hear and decide the appeal pursuant to Subsection 2.3.4: Zoning Board of Adjustment and TLGC, Chapter 211.

E. Criteria for Deciding Petition

The City Manager, or the Board of Adjustment on appeal, shall decide the vested rights petition based upon the following factors:

1. Whether the city received fair notice of the project and the nature of the permit sought;
2. Whether the nature and scope of the project prevents the city from applying one or more current regulations to the proposed or pending applications;
3. Whether any prior approved applications for the property have expired or have been terminated in accordance with law;
Subchapter 2: Administration and Procedures

2.5 Development Permits and Procedures

2.5.7 Exaction Proportionality Determination and Appeal

4. Whether any statutory exception to a right asserted pursuant to TLGC, Chapter 245, is applicable to one or more current regulations;

5. Whether any exemption from one or more regulations under the DDC or city ordinances is applicable to the project; and

6. Whether the project is dormant.

F. Binding Determination

The City Manager's final determination, if not timely appealed to the Board of Adjustment within 15 days after the decision is rendered by the City Manager, shall be immediately filed in the city's files related to the project and the determination shall be considered binding upon the city and the petitioner for the duration of the project. If an appeal is taken to the Board of Adjustment, the Board of Adjustment's decision shall be so filed and shall supersede the decision of the City Manager. Similarly, any decision by the Board of Adjustment regarding a vested rights petition, shall be filed in the city's files related to the project and the determination shall be considered binding upon the city and the petitioner for the life of the project. The City Manager's decision, or the Board of Adjustment's decision on appeal, shall be deemed filed on the first business day following the date on which action was taken by the City Manager or Board of Adjustment. Notwithstanding the binding nature of the city's final determination, the city and petitioner may, at any time, enter into an agreement that, to the extent authorized by law, modifies the final determination and the applicable regulations to be applied to the project.

G. Judicial Review

Should the petitioner or city be aggrieved by or dissatisfied with the decision of the Board of Adjustment, the petitioner or city may pursue all legal remedies to appeal the decision to a court of competent jurisdiction pursuant to TLGC, Chapter 211.

2.5.7 Exaction Proportionality Determination and Appeal

A. Definitions

For purposes of this section:

1. Permit shall carry the meaning defined for that term by TLGC, Chapter 245, as amended.

2. Public facilities system means the collection of public infrastructure facilities owned or operated by or in behalf of the city for the purpose of providing services to the public, including existing and new developments.

3. Public infrastructure improvement means an improvement to a component part of the above-defined public facilities system, required in whole or in part as a consequence of development, excluding those public infrastructure improvements funded by development impact fees under procedures authorized by TLGC, Chapter 395.

B. Purpose, Applicability, and Designation

1. Purpose

The purpose of a proportionality appeal is to assure that a requirement to dedicate, construct or pay a fee for a public infrastructure improvement imposed on a proposed plat or development permit as a condition of approval does not result in a disproportionate cost burden on the property owner, taking into consideration the nature and extent of the demands created by the proposed development on the city's public facilities systems.
2. **Applicability**  
An appeal under this section may be filed by a property owner to contest any requirement to dedicate land, to construct improvements, or to pay development fees, other than impact fees, for a public infrastructure improvement, which requirement is imposed under the city’s subdivision regulations to a plat application pursuant to this DDC, whether the requirement is applicable under uniform standards or is imposed pursuant to an individual evaluation of the proposed subdivision.

3. **Designation**  
The City Manager may designate and retain another licensed professional engineer to perform the duties assigned to the City Engineer by this section, as needed to adjust workflow or to provide specific expertise.

C. **Proportionality Determination by City Engineer**  
Prior to consideration and approval of a final plat application or other requested permit requiring dedication or construction of a public infrastructure improvement, and upon receipt of a written request by applicant or platting entity, the City Engineer shall prepare a report affirming that each public infrastructure improvement to be imposed as a condition of plat or permit approval is roughly proportionate to the demand created by the development on the city’s public facilities systems, taking into consideration the nature and extent of the development proposed.

1. In making his proportionality determination, the City Engineer may rely upon data submitted by the developer pursuant to the Administrative Criteria Manual, as well as: findings pertaining to on-site improvements; the proposed or potential use of the land; the timing and sequence of development in relation to availability of adequate levels of public facilities; impact fee studies or other studies that measure the demand for services created by the development and the impact on the city’s public facilities systems; the function of the public infrastructure improvements in serving the proposed development; the degree to which public infrastructure improvements to serve the subdivision are supplied by other developments; the anticipated participation by the city in the costs of such improvements; any reimbursements for the costs of public infrastructure improvements for which the proposed development is eligible; or any other information relating to the mitigating effects of the public infrastructure improvements on the impacts created by the development on the city’s public facilities systems.

2. The proportionality assessment must be based upon an individualized determination, related both in nature and extent to the impact of the proposed development, but no precise mathematical calculation is required. Wherever feasible and appropriate, the determination may incorporate or consider: applicable federal, state, local or regional data, statistics, guidelines, standards, methodologies or studies; or generally accepted best practices of the profession.

3. Based upon his proportionality determination, the City Engineer shall affirm that the developer’s portion of the costs required for infrastructure improvements does not exceed the amount that is roughly proportionate to the impacts of the proposed development.

4. The City Engineer may promulgate any application requirements that may assist in making the proportionality determination required by this subsection.

D. **Commission Determination**  
The City Planning and Zoning Commission or other permitting authority shall take into account the City Engineer’s report concerning the proportionality of public infrastructure improvement
requirements to be applied to a proposed final plat application or permit approval, as the case may be, in making its decision on the plat application or permit approval, and shall identify any variation to the requirements that are to be included as conditions to plat or permit approval.

E. Appeals

1. Who May Appeal
An appeal to the City Council under this section may be filed by a property owner or the applicant for a final plat or permit, in which a requirement to dedicate land for, construct or pay a fee (other than an impact fee) for a public infrastructure improvement has been applied or attached as a condition of approval by the decision-making body, or as grounds for recommending denial of the pending plat application.

2. Time for Filing and Request for Extension of Time
The appeal shall be filed in writing within 10 days of the date the applicant receives the City Engineer's proportionality determination. The appeal shall be filed with the City Engineer, who shall place the item for consideration at an upcoming meeting of the City Council. Upon filing an appeal, the applicant is thereby requesting the postponement of consideration of a pending plat application by the Planning and Zoning Commission, or permit, as discussed under Subsection 2.5.7C, pending preparation of the study required by subsection (4) below, and completion of the appeal process, in which case the applicant shall also waive the statutory period for deciding plats for the time needed to decide the appeal by the City Council.

3. Form of Appeal
An appeal under this subsection shall allege that application of the standard or the imposition of conditions relating to the dedication, construction or fee requirement is not roughly proportional to the nature and extent of the impacts created by the proposed development on the city's public facilities systems, or does not reasonably benefit the proposed development.

4. Study Required
The appellant shall provide a study in support of the appeal that includes the following information, within 30 days of the date of appeal, unless a longer time is requested in writing, not to exceed 60 days total:

a. Total capacity of the city's roadway, drainage or park system to be used by the proposed development, employing standard measures of capacity and equivalency tables relating the type of development proposed to the quantity of system capacity to be consumed by the development. If the proposed development is to be developed in phases, such information also shall be provided for the entire development proposed, including any phases already developed.

b. Total capacity to be supplied to the city's roadway, drainage or park facilities system by the dedication of an interest in land, construction of improvements or fee contribution. If the plat application is proposed as a phased development, the information shall include any capacity supplied by prior dedication, construction or fee payments.
c. Comparison of the capacity of the city’s public facilities system(s) to be consumed by the proposed development with the capacity to be supplied to such system(s) by the proposed dedication of an interest in land, construction of improvements, or fee payment. In making this comparison, the impacts on the city’s public facilities system(s) from the entire development shall be considered.

d. The amount of any city participation in the costs of oversizing the public infrastructure improvement to be constructed in accordance with the city’s requirements.

e. Any other information that shows the alleged disproportionality between the impacts created by the proposed development and the dedication, construction or fee requirement imposed by the city.

F. Processing Application

1. Responsible Official
   The City Engineer is the responsible official for evaluation and processing of an appeal under this subsection.

2. Evaluation Recommendation
   The City Engineer shall evaluate the appeal and supporting study and shall make a recommendation to the City Council based upon the information contained in the study, and the City Engineer’s analysis based upon the same factors considered in making his original proportionality determination.

G. Decision
   The City Council shall decide the appeal based on the criteria listed in Subsection 2.5.7H, and may take one of the following actions:

   1. Deny the appeal, and impose the standard or condition on the plat or permit application in accordance with the City Engineer’s recommendation or the Planning and Zoning Commission’s decision on the plat;

   2. Deny the appeal, upon finding that the proposed dedication, construction or fee requirements are inadequate to offset the impacts of the subdivision on the public facilities system for water, wastewater, roadway, drainage or park improvements, and either deny the plat or permit application, or require that additional public infrastructure improvements be made as a condition of approval of the application;

   3. Grant the appeal, and waive in whole or in part any dedication, construction or fee requirement for public infrastructure improvements to the extent necessary to achieve proportionality; or

   4. Grant the appeal, and direct that the city participate in the costs of acquiring land for or constructing the public infrastructure improvement under standard participation policies.

H. Criteria for Approval
   In deciding an appeal under this section, the City Council shall determine whether the application of the standard or condition requiring dedication of an interest in land for, construction of, or payment of a fee for public infrastructure improvements is roughly proportional to the nature and extent of the impacts created by the proposed subdivision on the city’s public facilities systems for water, wastewater, roadway, drainage or park facilities, and reasonably benefits the development. In making such determination, the City Council shall consider the evidence
submitted by the appellant, the City Engineer’s report and recommendation, considering in particular the factors identified in Subsection 2.5.7C.

I. Action Following Decision
If the relief requested under the proportionality appeal is granted in whole or in part by the City Council, the dedication, construction or fee requirement initially recommended by the decision-making body as a condition of plat or permit approval shall be modified accordingly, and the standards applied or the conditions attached to approval of the plat or permit application shall be conformed to the relief granted.

J. New Study Following Modification
If the plat or permit application is modified to increase the number of residential units or the intensity of non-residential uses, the responsible official may require a new study to validate the relief granted by the City Council.

K. Expiration of Relief
If an applicant for plat or permit approval prevails on a proportionality appeal but fails to conform the plat or permit application to the relief granted by the City Council within the 90-day period provided, the relief granted by the City Council on the appeal shall expire.
1. The Council may extend the time for filing the revised plat or permit application for good cause shown, but in any event, the expiration date for the relief granted shall not be extended beyond one year from the date relief was granted on the appeal.
2. If the plat application for which relief was granted is denied on other grounds, a new petition for relief shall be required on any subsequent application.

2.6 Subdivision Procedures

2.6.1 General
The following provisions apply to all subdivision procedures in this section:

A. Timing of City Action Following Completeness Determination
When a plat application is considered complete, the city shall take final action on such application within 30 days unless the applicant signs a waiver.

B. Finding of Proportionality
Any payment of fees or construction costs or required easement, dedication, and/or reservation of land included on any plat application required in this section shall meet the requirements of TLGC, § 212.904.

2.6.2 Administratively Approved Plat

A. Purpose
The administratively approved platting procedure is used to evaluate proposed plats that will create few lots and/or involve minimal adjustments to approved final plats. The administratively approved platting procedure also provides a mechanism for administrative platting decisions, to address plat errors, to apply minor adjustments to property boundaries, and for conveyance plats.

B. Applicability
The administratively approved platting procedure shall apply to:
Subchapter 2: Administration and Procedures
2.6 Subdivision Procedures
2.6.2 Administratively Approved Plat

1. Subdivisions of properties creating four or fewer lots fronting on an existing street and not requiring the creation of any new street or the extension of municipal facilities;
2. An amending plat as permitted by TLGC § 212.016, as amended or superseded;
3. A replat that does not require the creation of any new street or the extension of municipal facilities, as permitted by TLGC § 212.0065, as amended or superseded; and
4. A conveyance plat, which is an interim plat recording the subdivision of property, or defining the remainder of a property created by the approval of a final plat, and that creates four or fewer lots fronting on an existing street and not requiring the creation of any new street or the extension of municipal facilities. A conveyance plat may be used solely for the purpose of subdividing land and the recording of same, or recording a single existing lot or parcel created by other means. A conveyance plat allows the recording of a subdivision without requiring the construction or design of public improvements or collection of development fees. Easements, dedications, and reservations may be recorded on a conveyance plat.

C. Administratively Approved Plat Procedure
Figure 2.6-1 identifies the applicable steps from the common review procedures in Section 2.4 that apply to the review of administratively approved plats. Additions or modifications to the common review procedures are noted below.

**Figure 2.6-1: Summary of Administratively Approved Plat Procedure**

<td>This step does not apply</td>
<td>Record with Denton County Clerk and Recorder within 24 months of approval</td>
</tr>
</tbody>
</table>

1. **Step 1: Pre-Application Activities**
   a. **Pre-Application Conference**
      A pre-application conference is required in accordance with Subsection 2.4.3.
   b. **Citizen Participation**
      Not required.
2. **Step 2: Application Submittal and Handling**
The administratively approved plat application shall be submitted and accepted, and may be revised or withdrawn, in accordance with Subsection 2.4.4.

3. **Step 3: Staff Review and Action**
   a. **Director Review and Decision**
      The Director shall review and approve, approve with conditions, or deny the administratively approved plat application in accordance with the approval criteria in Subsection 2.6.2D below.
   b. **Referral to Planning and Zoning Commission**
      i. The Director, at his discretion, may refer the plat to the Planning and Zoning Commission.
      ii. Any plat that involves a dedication, reservation, or easement shall be referred to the Planning and Zoning Commission for findings pursuant to TLGC, § 212.904.
      iii. The Director shall not disapprove an administratively approved plat but shall refer such plat to the Planning and Zoning Commission if he recommends disapproval.

4. **Step 4: Scheduling and Notice of Public Meetings/Hearings**
   Not required.

5. **Step 5: Review and Decision**
   Review and decision is subject to Subsection 2.4.7.

6. **Step 6: Post-Decision Actions and Limitations**
   Post-decision actions and limitations in Subsection 2.4.8 shall apply with the following modifications:
   a. **Signing and Filing**
      i. After the approval of the plat, the applicant shall submit filing fees and the required number of copies to the city for filing with the county. Having submitted all copies and fees, the applicant may request a delay of filing for up to 180 days from the date of approval.
      ii. Prior to filing, the Director shall certify the plat and it shall be recorded with the Denton County Clerk and Recorder.
      iii. The Director shall forward one copy of the recorded plat to the property owner.
   b. **Effect of Approval**
      i. Plat approval and acceptance by the city does not relieve the owner from obligations, including fees, required by other sections of this DDC or any other chapter of the Municipal Code of Ordinances pertaining to the improvement of the property or extension of services as required to make the property suitable for development.
      ii. Neither reservation nor dedication of right-of-way shall relieve the property owner from any obligation for street construction or assessments associated with public street improvement programs. Easements for access, utilities, and drainage shall be recorded on plats.
Subchapter 2: Administration and Procedures

2.6 Subdivision Procedures

2.6.3 Preliminary Plat

iii. No building permits shall be issued, nor development begun, nor permanent utility service provided, for land that has only received approval of a conveyance plat. This information shall be set forth in bold type on the plat.

iv. A conveyance plat may be vacated, replatted, or superseded in total or in part by compliance with the procedures and requirements of this DDC.

c. Lapse of Approval

i. Any plat that has not been filed with the county within 180 days of the date of approval shall be void.

ii. Any plat withdrawn or voided must be resubmitted under current regulations and procedures and reapproved by the Planning and Zoning Commission or the Director and filed with the county.

d. Reservation of Rights-Of-Way

i. Conveyance plats shall identify any future rights-of-way for public thoroughfares and streets specified on the City's thoroughfare plan;

ii. The identification of the right-of-way does not grant any right or interest in the property to the City or other entity; and

iii. The final alignment may be adjusted upon final platting in order to meet engineering design standards.

e. Dedication of Rights-of-Way

i. Dedication of right-of-way shall be required where a plat is used to record the remainder of a tract created by the final platting of a portion of the property; and

ii. The required right-of-way dedication shall be limited to that which is necessary to provide access to the property proposed for final plat approval and to complete turn lanes, intersections, and transitions in road pavement width resulting from development of property proposed for final plat approval.

D. Administratively Approved Plat Approval Criteria

In reviewing an administratively approved plat application, the Director shall consider the general approval criteria in Subsection 2.4.5 and whether the application:

1. Is consistent with the intent of the underlying zoning district;

2. Complies with applicable dimensional and development standards in this DDC;

3. Does not affect a recorded easement without approval from the easement holder;

4. Will not result in adverse impacts to surrounding property;

5. Will not limit the city’s ability to provide adequate and sufficient facilities or services; and

6. Complies with all other ordinances and plans and regulations adopted by the city, including the Comprehensive Plan and other long-range or special area planning documents.

2.6.3 Preliminary Plat

A. Purpose

The preliminary plat procedure provides a mechanism for the city to review an overall plan for a proposed subdivision to ensure compliance with this DDC, the Comprehensive Plan, other
applicable city plans and regulations, and the adequate provision of facilities and services in the city.

B. **Applicability**

1. A preliminary plat is required if the proposed subdivision is within the city limits and:
   a. Is on land that has not been platted;
   b. Is on land that will be developed in phases;
   c. Will include the dedication of public right-of-way, other public tracts, or public improvements not determined to be eligible for minor subdivision processing; or
   d. Is not eligible to be processed as an administratively approved plat, pursuant to Subsection 2.6.2.

2. A preliminary plat is not required but may be submitted within the ETJ.

C. **Preliminary Plat Procedure**

Figure 2.6-2 identifies the applicable steps from the common review procedures in Section 2.4 that apply to the review of preliminary plats. Additions or modifications to the common review procedures are noted below.

**Figure 2.6-2: Summary of Preliminary Plat Procedure**

<table>

<td>Preliminary plat expires if final plat not recorded within 24 months</td>
</tr>
</tbody>
</table>

1. **Step 1: Pre-Application Activities**

   a. **Pre-Application Conference**
      A pre-application conference is required in accordance with Subsection 2.4.3.

   b. **Citizen Participation**
      Citizen Participation is recommended in accordance with Subsection 2.4.3B: *Citizen Participation*. 
2. **Step 2: Application Submittal and Processing**
The preliminary plat application shall be submitted and accepted, and may be revised or withdrawn, in accordance with Subsection 2.4.4.

3. **Step 3: Staff Review and Action**
The Director shall review the preliminary plat application and prepare a staff report and recommendation that includes the City Engineer’s findings when required by TLGC, § 212.904, in accordance with the approval criteria in Subsection 2.6.3D below.

4. **Step 4: Scheduling of Public Meetings**
The preliminary plat application shall be scheduled for public meetings before the Planning and Zoning Commission.

5. **Step 5: Review and Decision**
The Planning and Zoning Commission shall review and approve, approve with conditions, or deny the preliminary plat application in accordance with the approval criteria in Subsection 2.6.3D below.

6. **Step 6: Post-Decision Actions and Limitations**
Post-decision actions and limitations in Subsection 2.4.8 shall apply with the following modifications:

   a. **Expiration of Approval**
   A preliminary plat shall become null and void 24 months from the date of approval by the Planning and Zoning Commission, unless a final plat is filed and approved for all or part of the preliminary plat within that time or within the time provided by a phasing schedule approved for the preliminary plat.

   b. **Effect of Approval**
   i. Within six months of approval of the final plat for the first phase of the development, or within such other period as may be provided in a phasing schedule approved by the Planning and Zoning Commission, a complete application for a final plat must be approved for the next phase of the development, continuing with each successive phase, until final plats have been approved for all the land subject to the original preliminary plat in accordance with this section or a phasing schedule approved by the Planning and Zoning Commission.

   ii. If the applicant fails to receive approval for a final plat for any phase of the development within the prescribed period, or within any extension granted pursuant to Subsection 2.6.3C.6.c, below, the original preliminary plat shall expire for that phase and for all other phases for which a final plat has not been approved or no longer remains in effect on the date of expiration.

   iii. If an approved final plat expires, the preliminary plat for that phase shall also expire, and all other phases for which a final plat has not been approved or is not pending approval, or has lapsed subsequent to approval, on the date of expiration.
C. Extension of Preliminary Plat Approval
   i. The Planning and Zoning Commission may extend a preliminary plat or any phase thereof pursuant to Subsection 2.4.8D: Extensions of Approval Period, and the following criteria:
      a. The request must be considered by the Planning and Zoning Commission before the preliminary plat or phase expires and must document the reasons for the extension.
      b. In determining whether to grant a request, the Planning and Zoning Commission shall take into account:
         1. The reasons for the requested extension;
         2. The ability of the applicant to comply with any conditions attached to the original approval;
         3. Whether the extension is likely to result in timely completion of the project; and
         4. The extent to which any newly adopted regulations should be applied to the proposed development.
   c. In granting an extension, the Planning and Zoning Commission may impose such conditions as are needed to assure that the land will be developed in a timely fashion and that the public interest is served, including compliance with one or more new adopted development standards.

7. Concurrent Review
   Preliminary plat applications may be submitted and reviewed concurrently with an application for a zoning map amendment pursuant to Subsection 2.7.2; rezone to a planned development pursuant to Subsection 2.7.3; and/or a site plan pursuant to Subsection 2.5.1.

D. Preliminary Plat Approval Criteria
   In reviewing a preliminary plat application, the Planning and Zoning Commission shall consider the general approval criteria in Subsection 2.4.5 and whether the preliminary plat:
   1. Provides a layout of lots, roads, driveways, utilities, drainage, and other public facilities and services designed to minimize the amount of disturbance to sensitive natural areas or other community resources;
   2. Provides evidence of public water and sewer system connections;
   3. Identifies and adequately mitigates known natural hazard areas; and
   4. Proposes reasonable project phasing in terms of infrastructure capacity.
2.6.4 Final Plat

A. Purpose
The final plat procedure completes the subdivision process and ensures compliance with the approved preliminary plat and applicable standards in this DDC.

B. Applicability
The final plat procedure applies to all subdivisions in the city and the ETJ, unless otherwise stated in this DDC.

C. Final Plat Procedure
Figure 2.6-3 identifies the applicable steps from the common review procedures in Section 2.4 that apply to the review of final plats. Additions or modifications to the common review procedures are noted below.

![Figure 2.6-3: Summary of Final Plat Procedure](image)

1. Step 1: Pre-Application Activities
   a. Pre-Application Conference
      A pre-application conference is required in accordance with Subsection 2.4.3.
   b. Citizen Participation
      Citizen Participation is recommended in accordance with Subsection 2.4.3B: Citizen Participation.

2. Step 2: Application Submittal and Processing
The final plat application shall be submitted and accepted, and may be revised or withdrawn, in accordance with Subsection 2.4.4, and subject to the following modifications:
   a. The final plat application shall be submitted within 24 months of preliminary plat approval, or within six months as established in Subsection 2.6.3C.6;
b. The final plat may reflect the entire area covered by a preliminary plat or any part thereof; and

c. ESA Compliance Review shall be reviewed concurrently with an application for a final plat in accordance with Subsection 7.4.4: ESAs Procedures.

d. The Director may require submittal of civil engineering plans for proposed streets, sidewalks, drainage, utility, or other public improvements associated with the final plat review. If required, such civil engineering plans may be submitted and reviewed concurrently with the site plan application.

3. **Step 3: Staff Review and Action**
The Director shall review the final plat application and prepare a staff report and recommendation that includes the City Engineer’s findings when required by TLGC, § 212.904, in accordance with the approval criteria in Subsection 2.6.4D below.

4. **Step 4: Scheduling and Notice of Public Meetings/Hearings**
The final plat application shall be scheduled for public meetings before the Planning and Zoning Commission.

5. **Step 5: Review and Decision**
The Planning and Zoning Commission shall review and approve, approve with conditions, or deny the final plat application in accordance with the approval criteria in Subsection 2.6.4D below.

6. **Step 6: Post-Decision Actions and Limitations**
Post-decision actions and limitations in Subsection 2.4.8 shall apply and the Director shall record the approved final plat with the Denton County Clerk and Recorder upon acceptance of any public improvements or dedications.

7. **Concurrent Review**
Final plat applications may be submitted and reviewed concurrently with an application for a site plan pursuant to Subsection 2.5.1.

D. **Final Plat Approval Criteria**
In reviewing a final plat application, the Planning and Zoning Commission shall consider the general approval criteria applicable to all applications in Subsection 2.4.5 and whether:

1. The final plat conforms to the approved preliminary plat, including any conditions of approval;
2. The development will substantially comply with all requirements of this DDC; and
3. The development will comply with the applicable technical standards and specifications adopted by the city.

2.6.5 **Development Plat**

A. **Purpose**
The development plat procedure provides a mechanism for any person who proposes development of a tract of land located within the corporate limits or within the city's extraterritorial jurisdiction that is not required by this DDC to prepare a preliminary or final plat.
B. **Applicability**

Any person who proposes the development of a tract of land located within the corporate limits or within the city’s extraterritorial jurisdiction that is not required by this DDC to prepare a preliminary or final plat, shall prepare a development plat in accordance with the elements required for preliminary and final plats by this subchapter unless:

1. The development is excepted under Section 8.2.3: *Exemptions*; or
2. The development is an addition or alteration to existing development which, after development, would result in development no less compliant with the DDC than before the development.

C. **Development Plat Procedure**

Figure 2.6-4 identifies the applicable steps from the common review procedures in Section 2.4 that apply to the review of development plats. Additions or modifications to the common review procedures are noted below.

![Figure 2.6-4: Summary of Development Plat Procedure](image)

1. **Step 1: Pre-Application Activities**
   - a. **Pre-Application Conference**
     A pre-application conference is required in accordance with Subsection 2.4.3.
   - b. **Citizen Participation**
     Not required.

2. **Step 2: Application Submittal and Processing**
   The development plat application shall be submitted and accepted, and may be revised or withdrawn, in accordance with Subsection 2.4.4.

3. **Step 3: Staff Review and Action**
   The Director shall review the development plat application and approve, approve with conditions, or deny the application in accordance with Subsection 2.4.5 and TLGC, §
subchapter 2: administration and procedures

2.6 subdivision procedures

2.6.6 gas well development plat

212.041 through 212.050, as amended. No new development may begin on the subject property until the development plat is filed and approved by the City.

4. Step 4: Scheduling and Notice of Public Meetings/Hearings
Not required.

5. Step 5: Review and Decision
Review and decision is subject to Subsection 2.6.5C.3.

6. Step 6: Post-Decision Actions and Limitations
A development plat shall become null and void two years from the date of approval by the Director if no progress toward completion has been made per TLGC, § 245.005(c), as amended.

2.6.6 Gas Well Development Plat

A. Plats Required
Any person who proposes gas drilling or production on a tract of land located within the city’s extraterritorial jurisdiction, shall submit a gas well development plat for review and approval by the city. If any portion of the proposed area to be platted lies within a floodplain, an ESA or within 1,200 feet of the flood pool elevation of Lake Ray Roberts or Lake Lewisville, a watershed protection permit application for such area(s) shall be submitted with the development plat application, and shall be decided before any decision on the plat.

B. Gas Well Development Plats in Areas Subject to Flooding
No gas well development plat shall be approved for land located within a floodplain, an ESA or within 1,200 feet of the flood pool elevation of Lake Ray Roberts or Lake Lewisville until a watershed protection permit and, where applicable, a specific use permit or application for relief pursuant to Subsection 2.8.5, have been first approved. Denial or conditional approval of the applicable watershed protection permit or petition for review shall constitute grounds for denial or conditional approval of the gas well development plat for such land.

C. Gas Well Development Plat Procedures
Gas well development plats shall be processed and approved in accordance with TLGC, § 212.041 through 212.050, as amended, and no new natural gas development may begin on property until the gas well development plat is filed and approved by the city in accordance with this DDC.

D. Gas Well Development Plat Standards for Approval
Gas well development plats shall conform to the following standards:

1. All proposed gas well development shall be in compliance with the Roadway Component of the Mobility Plan.

2. Erosion control is required and shall comply with all local, state, and federal requirements or as required by the watershed protection permit or gas well development plat. The operator shall file a copy of the stormwater pollution plan if required by the EPA.

3. Reserve pits within 200 feet of a body of water, creek or floodplain shall be lined to prevent water pollution.

4. With the exception of vehicular access, no gas well development or activity is allowed in the FEMA designated 100-year floodway. Drilling within a flood fringe or other ESA shown on the map adopted by the city is allowed under the restrictions set forth in Subsection 6.3.9D: Watershed Protection Permit Standards.
5. Where tree mitigation is required, pursuant to a watershed protection permit, any funds due shall be paid prior to final approval of a gas well development plat.

6. No gas well development plat shall be approved until the applicant has entered into a road damage remediation agreement with the city in substantially the same form as the agreement on file in the City’s Development Services Department, and has paid all road damage remediation fees provided for in the agreement based in the road damage remediation calculations set forth in the attachments to the agreement. A road damage remediation agreement is not required if access to the well site is through roadways not maintained by the city.

7. The gas well development plat shall provide for adequate required public facilities, which may include water supply, access roads, drainage, erosion control and other necessary supporting facilities identified on the plat. The design, location, and arrangement of all driveways and required parking spaces shall provide for the safe and convenient movement of vehicular and pedestrian traffic without adversely affecting the general public or adjacent developments.

8. In addition to the requirements of Subsection 2.6.3: Preliminary Plat, if applicable, a gas well development plat shall:
   a. Identify truck routes and access points.
   b. Identify environmentally sensitive areas (ESA’s) including floodplains and any proposed floodplain, creek and stream crossings.
      i. All floodplain, creek and stream crossings requiring the use of a culvert shall be designed to a 10-year storm frequency.
      ii. All floodplain crossings shall have no negative effects on surrounding property.
      iii. A drainage study sufficient to substantiate subsections (i) and (ii) above will be required as part of the submittal if crossings are proposed.
   c. Show the location and use of all structures within 1,000 feet of the wellhead.
   d. Identify the proposed source of water and any other public utilities required.
   e. Identify and show proposed method of erosion control.
   f. Identify the location of proposed lease lines and well locations.
      i. Label distance between wells and property lines.
      ii. Label distance between wells and structures within 500 feet of wells as measured from the property line.
      iii. Label distance between temporary holding ponds and floodplains.
   g. Provide typical well site schematics showing layout during drilling and upon completion of drilling.
   h. Show location of all proposed underground pipelines. As built drawings shall be filed with the city. All pipelines proposed in public rights-of-way shall require a right-of-way use agreement. The City Manager shall have the authority to enter into a right-of-way use agreement.
      i. Identify if pipelines connect with a gas distribution system.
      j. Clearly delineate the boundaries of the gas well drilling or production area with metes and bounds. All gas well drilling and production activities shall be limited to this area.
Subchapter 2: Administration and Procedures
2.6 Subdivision Procedures
2.6.7 Replat

k. A gas well development plat shall only contain one drilling or production area, and the area shall not be greater than five acres.

E. Expiration of Gas Well Development Plat
1. If gas well drilling activities have not commenced within one year from the date of approval, the gas well development plat shall expire.
2. A gas well development plat may not be extended.
3. If the gas well development plat expires, then so too shall all associated watershed protection permits.
4. Upon expiration of a gas well development plat, the applicant may reapply for a new gas well development plat, subject to all requirements of the DDC, as amended. If a watershed protection permit is required in conjunction with the gas well development plat, the applicant must also apply for a new watershed protection permit, subject to all requirements of the DDC, as amended.
5. If gas well drilling or production has commenced, the gas well drilling and production area shall be subject to inspections by the city.

2.6.7 Replat

A. Purpose
The intent of the replat procedure is to outline the process for replatting any portion of an approved final plat, other than to amend or vacate the plat.

B. Applicability
A replat of a subdivision or part of a subdivision may be recorded and is controlling over the preceding plat without vacation of that plat if the replat:
1. Is signed and acknowledged by the owners of the property being replatted;
2. Is approved after a public hearing; and
3. Does not attempt to amend or remove any covenants or restrictions.

C. Replat Procedure
1. Replats are subject to the procedures established for administratively approved plats in Subsection 2.6.2, and shall conform to the requirements of TLGC, § 212.0065, if:
   a. The replat involves four or fewer lots fronting an existing street that does not require the creation of any new street or the extension of municipal facilities; or
   b. The replat is for part of a subdivision without vacation of the preceding plat as provided in TLGC, § 212.0145; or
   c. The amending plat is signed by the applicants only and is solely for one or more of the purposes identified in TLGC, § 212.016.
2. Residential replats without vacation of the preceding plat are subject to the procedures established for administratively approved plats in Subsection 2.6.2, and shall conform to the requirements of TLGC, § 212.015 if:
   a. During the preceding five years, any of the area to be replatted was limited by an interim or permanent zoning classification to residential use for not more than two residential units per lot; or
b. Any lot in the preceding plat was limited by deed restrictions to residential use for not more than two residential units per lot.

3. All other replats that do not include the vacation of the preceding plat and that do not qualify for administrative approval pursuant to Subsection 2.6.2, are subject to the approval procedures established for preliminary plats (see Subsection 2.6.3). Such replats shall require a public hearing before the Planning and Zoning Commission; however, notification shall not be required.

### 2.6.8 Vacating Plat

#### A. Purpose
The intent of the vacating plat procedure is to outline the process for vacation of all or a portion of a prior-approved plat.

#### B. Applicability
The property owner of the tract covered by a plat may vacate the plat pursuant to TLGC, § 212.013, as amended. If dedicated by an instrument other than a plat, then the applicant shall follow the procedure established in Charter, Article XII: Public Utilities.

#### C. Vacating Plat Procedure
Figure 2.6-5 identifies the applicable steps from the common review procedures in Section 2.4 that apply to the review of vacating plats. Additions or modifications to the common review procedures are noted below.

**Figure 2.6-5: Summary of Vacating Plat Procedure**

1. **Step 1: Pre-Application Activities**
   a. **Pre-Application Conference**
      A pre-application conference shall be held in accordance with Subsection 2.4.3.
b. **Citizen Participation**
   Not required.

2. **Step 2: Application Submittal and Processing**
The vacating plat application shall be submitted and accepted, and may be revised or withdrawn, in accordance with Subsection 2.4.4.

3. **Step 3: Staff Review and Action**
The Director shall review the vacating plat application and prepare a staff report and recommendation in accordance with the general approval criteria applicable to all applications in Subsection 2.4.5.

4. **Step 4: Scheduling and Notice of Public Meetings/Hearings**
The vacating plat application shall be scheduled for a public meeting before the Planning and Zoning Commission and shall be noticed pursuant to Table 2.2-A Summary of Development Review Procedures and Subsection 2.4.6.

5. **Step 5: Review and Decision**
   a. The Planning and Zoning Commission shall review and approve, approve with conditions, or deny the vacating plat application in accordance with the general approval criteria applicable to all applications in Subsection 2.4.5.
   b. As a condition of approval, the Planning and Zoning Commission may require the applicant to prepare a revised final plat in accordance with Subsection 2.6.4: Final Plat.

6. **Step 6: Post-Decision Actions and Limitations**
Post-decision actions and limitations in Subsection 2.4.8 shall apply with the following modifications:
   a. The Director shall record the vacating plat with the Denton County Clerk and Recorder prior to the recordation of a new plat.
   b. Regardless of the Planning and Zoning Commission’s action on the application, the applicant will have no right to a refund of any monies, fees, or charges paid to the city nor to the return of any property or consideration dedicated or delivered to the city except as may have previously been agreed to by the Planning and Zoning Commission.

### 2.7 Plan and DDC Amendments

#### 2.7.1 Comprehensive Plan Amendment

A. **Purpose**
The purpose of this section is to provide standards for amending the text and or maps of the Comprehensive Plan or for adoption of a new Comprehensive Plan. The amendment process is established to provide flexibility in response to changing circumstances and to reflect changes in public policy, and to advance the general welfare of the city.

B. **Applicability**
An amendment to the Comprehensive Plan may be initiated by the City Council, the Planning and Zoning Commission, the Director, or the property owner(s) with an application executed by all property owners, or their authorized agents.
C. Comprehensive Plan Amendment Procedure

Figure 2.7-1 identifies the applicable steps from the common review procedures in Section 2.4 that apply to the review of Comprehensive Plan amendments. Additions or modifications to the common review procedures are noted below.

**Figure 2.7-1: Summary of Comprehensive Plan Amendment Procedure**

<table>

<td>P&amp;Z review; City Council review and decision</td>
<td>Action is final and cannot be appealed</td>
</tr>
</tbody>
</table>

1. **Step 1: Pre-Application Activities**
   a. **Pre-Application Conference**
      A pre-application conference is required in accordance with Subsection 2.4.3.
   b. **Citizen Participation**
      Citizen Participation is recommended in accordance with Subsection 2.4.3B: *Citizen Participation*.

2. **Step 2: Application Submittal and Processing**
   The comprehensive plan amendment application shall be submitted and accepted, and may be revised or withdrawn, in accordance with Subsection 2.4.4.

3. **Step 3: Staff Review and Action**
   a. **Director Review and Recommendation**
      The Director shall review the comprehensive plan amendment application and prepare a staff report and recommendation in accordance with the approval criteria in Subsection 2.7.1D below.

4. **Step 4: Scheduling and Notice of Public Meetings/Hearings**
   The comprehensive plan amendment application shall be scheduled for public hearings before the Planning and Zoning Commission and the City Council and shall be noticed pursuant to Table 2.2-A Summary of Development Review Procedures, and Subsection 2.4.6.
5. **Step 5: Review and Decision**
   
   a. **Planning and Zoning Commission Review and Recommendation**
   The Planning and Zoning Commission shall review the comprehensive plan amendment application in accordance with the approval criteria in Subsection 2.7.1D below, and shall forward its recommendation to the City Council.

   b. **City Council Review and Decision**
   The City Council may approve, approve with conditions, or deny the comprehensive plan amendment application in accordance with the approval criteria in Subsection 2.7.1D below. The adoption or amendment of a new comprehensive plan shall become effective by a simple majority vote of all members of the City Council.

6. **Step 6: Post-Decision Actions and Limitations**
   The City Council decision is a final action and may not be appealed.

D. **Comprehensive Plan Amendment Approval Criteria**

1. Comprehensive plan amendments may be approved by the City Council only following a determination that the proposed amendment is consistent with the overall purpose and intent of the Comprehensive Plan and that any one of the following criteria has been met:
   
   a. There was an error in the original Comprehensive Plan adoption;
   
   b. The City Council failed to take into account then-existing facts, projections, or trends that were reasonably foreseeable to exist in the future;
   
   c. Events, trends, or facts after adoption of the Comprehensive Plan have changed the City Council’s original findings made upon plan adoption; or
   
   d. Events, trends, or facts after adoption of the Comprehensive Plan have changed the character or condition of an area so as to make the proposed amendment necessary.

2. In addition to the above-listed criteria, any proposed amendment is subject to the following additional review standards:
   
   a. That the amendment is not in conflict with any portion of the goals and policies of the plan.
   
   b. That the amendment constitutes a substantial benefit to the city and is not solely for the good or benefit of a particular landowner or owners at a particular point in time.
   
   c. The extent to which the proposed amendment and other amendments in the general area are compatible with the land use goals of the plan and that they avoid creation of isolated uses that will cause incompatible community form and a burden on public services and facilities.
   
   d. That the development pattern contained in the existing plan does not provide adequate and appropriate optional sites for the use or change being proposed in the amendment.
   
   e. That the impact of the amendment, when considered cumulatively with other applications and development in the general area, will not adversely impact the city or a portion of the city by:
      
      i. Significantly altering acceptable existing land use patterns;
ii. Having significant adverse impacts on public services and facilities that are needed to support the current land use and that cannot be mitigated to the maximum extent feasible;

iii. Adversely impacting environmentally sensitive areas or resources; or

iv. Adversely impacting existing uses because of increased traffic on existing systems.

f. That site conditions, including but not limited to topography, utility corridors/easements, drainage patterns, noise, odors, or environmental contamination, would make development under the current plan designation inappropriate.

2.7.2 Zoning Map Amendment (Rezoning)

A. Purpose
The purpose of the zoning map amendment procedure (referred to as “rezoning”) is to make amendments to the Official Zoning Map of the City of Denton to reflect changes in public policy, changed conditions, or to advance the welfare of the City. The purpose is neither to relieve particular hardships nor to confer special privileges or rights on any person.

B. Applicability
1. A rezoning may be approved by the City Council following review and recommendation by the Planning and Zoning Commission.
2. Rezonings should not be used when a specific use permit, or minor modification could be used to achieve a similar result.
3. Changes to the characteristics of zoning districts (such as setback requirements) and development standards (such as parking requirements) shall be processed as zoning text amendments according to Subsection 2.7.4.
4. A rezoning to a Planned Development is a distinct type of amendment to the Official Zoning Map and shall follow the procedures in Subsection 2.7.3.
C. **Rezoning Procedure**

Figure 2.7-2 identifies the applicable steps from the common review procedures in Section 2.4 that apply to the review of rezonings. Additions or modifications to the common review procedures are noted below.

**Figure 2.7-2: Summary of Rezoning Procedure**

<table>

<td>P&amp;Z review; City Council review and decision</td>
<td>Director to amend the Official Zoning Map of City</td>
</tr>
</tbody>
</table>

1. **Step 1: Pre-Application Activities**
   a. **Pre-Application Conference**
      A pre-application conference is required in accordance with Subsection 2.4.3.
   b. **Citizen Participation**
      Citizen Participation is recommended in accordance with Subsection 2.4.3B: *Citizen Participation*.

2. **Step 2: Application Submittal and Processing**
   a. The zoning map amendment application shall be submitted and accepted, and may be revised or withdrawn, in accordance with Subsection 2.4.4.
   b. In addition to the persons authorized to submit an application listed in Subsection 2.4.4A, the City of Denton may initiate a rezoning application following discussion at any Planning and Zoning Commission meeting.

3. **Step 3: Staff Review and Action**
   The Director shall review the rezoning application and prepare a staff report and recommendation in accordance with the approval criteria in Subsection 2.7.2D below.

4. **Step 4: Scheduling and Notice of Public Meetings/Hearings**
   a. The rezoning application shall be scheduled for public hearings before the Planning and Zoning Commission and the City Council and shall be noticed pursuant to Table 2.2-A Summary of Development Review Procedures and Subsection 2.4.6.
Subchapter 2: Administration and Procedures

2.7 Plan and DDC Amendments
2.7.2 Zoning Map Amendment (Rezoning)

b. Mailed notice shall not be required if the Planning and Zoning Commission or City Council initiate an application to repeal and replace the Official Zone Map for all or substantially all of the city.

5. Step 5: Review and Decision

a. Planning and Zoning Commission Review and Recommendation
   i. The Planning and Zoning Commission shall review the rezoning application in accordance with the approval criteria in Subsection 2.7.2D, below, and shall forward its recommendation or report to the City Council.
   ii. After closing the public hearing, should a majority of voting Planning and Zoning Commissioners fail to recommend either approval or denial of a proposed amendment, or approval of a modified amendment, city staff is directed to place the matter for vote on the next available Planning and Zoning Commission agenda as an item for individual consideration. A second failure of a majority of voting Planning and Zoning Commissioners to recommend either approval or denial of a proposed amendment, or approval of a modified amendment, shall be deemed a recommendation to deny approval of any amendment to the City Council. Such failure is not subject to Subpart A, Section 2-29(g)(5)a., of the City Code of Ordinances, and shall not require a three-fourths vote of all members of the City Council qualified to vote as stated in paragraph 2.7.2C.5.b.ii.

b. City Council Review and Decision
   i. The City Council may review and approve, approve with conditions, or deny the rezoning application based on the approval criteria in Subsection 2.7.2D below.
   ii. If the Planning and Zoning Commission recommends denial of the rezoning, the rezoning shall become effective only by a three-fourths vote of all members of the City Council.

c. Protest Procedure
   i. The rules governing amendment over protest are contained in TLGC, Chapter 211. The Director may prescribe forms for protest petitions.
   ii. Property owners within 200 feet of a proposed rezoning, as indicated on the most recently approved city tax roll, may file a written protest against the rezoning. If written protests are received by owners of 20 percent or more of the area within 200 feet of the proposed rezoning, approval shall require three-fourths vote of the City Council for a rezoning to become effective. In such case, a supermajority vote shall not be required by the Planning and Zoning Commission.
   iii. The protest procedure process does not apply to citywide legislative rezonings.

6. Step 6: Post-Decision Actions and Limitations
Post-decision actions and limitations in Subsection 2.4.8, shall apply with the following modifications:

a. The City Council decision is a final action and may not be appealed.

b. Following approval of a rezoning by City Council, the Director shall prepare a revision to the Official Zoning Map of City.

Denton, Texas – Denton Development Code
Print Date: December 12, 2019
D. Zoning Map Amendment Approval Criteria

1. In reviewing a proposed rezoning, the Planning and Zoning Commission and City Council shall consider the general approval criteria in Subsection 2.4.5 and whether:
   a. The proposed rezoning is consistent with the Comprehensive Plan;
   b. The proposed rezoning is consistent with relevant Small Area Plan(s);
   c. The proposed rezoning is consistent with the purpose statement of the proposed zoning district, as provided in Subchapter 3: Zoning Districts;
   d. There have been significant changes in the area to warrant a zoning change;
   e. The intensity of development in the new zoning district is not expected to create significantly adverse impacts to surrounding properties or the neighborhood; and
   f. Public facilities and services are available to adequately serve the subject property while maintaining adequate level of service to existing development; and/or:
   g. There was an error in establishing the current zoning;

2. These approval criteria shall not apply to legislative rezonings by the City Council.

2.7.3 Rezone to a Planned Development (PD) District

A. Purpose
The zoning classification of any parcel may be changed to a Planned Development (PD) pursuant to this section. The purpose of rezoning to a PD is to achieve greater flexibility than allowed by the strict application of this DDC, and/or to encourage unique or innovative land use concepts, while providing greater benefit to the city and to ensure efficient provision of services and utilities.

B. Applicability
The PD procedure shall not be used when a specific use permit, minor modification, or rezoning to an existing base zoning district could achieve a similar result.
C. **Rezoning to PD Procedure**

Figure 2.7-3 identifies the applicable steps from the common review procedures in Section 2.4 that apply to the review of rezoning to PDs. Additions or modifications to the common review procedures are noted below.

**Figure 2.7-3: Summary of Rezoning to PD Procedure**

<table>
<thead>
<tr>

<td>P&amp;Z review; City Council review and decision</td>
</tr>
</tbody>
</table>

1. **Step 1: Pre-Application Activities**

   a. **Pre-Application Conference**

   A pre-application conference is required to be held in accordance with Subsection 2.4.3. In addition, the applicant shall include a concept/schematic plan for review by the Director to help determine whether or not a proposed PD is the appropriate procedure for the applicant and the city. The concept/schematic plan shall include at a minimum the following:

   i. Proposed uses;
   ii. Number and type of dwelling or commercial units (as applicable);
   iii. Floor area of all buildings;
   iv. Floor area of each use for mixed-use buildings (if applicable);
   v. Proposed parking capacity and configuration;
   vi. General site planning layout and phasing; and
   vii. Summary of proposed deviations from DDC standards and a description of compensating public benefits achieved through the PD process.

   b. **Citizen Participation**

   Citizen Participation is recommended in accordance with Subsection 2.4.3B: *Citizen Participation*. 
2. **Step 2: Application Submittal and Processing**

   a. **Generally**
      
      i. The PD application shall be submitted and accepted, and may be revised or withdrawn, in accordance with Subsection 2.4.4.
      
      ii. An application for rezoning to a PD shall include submittal requirements as specified in the Administrative Criteria Manual, which shall include a PD plan.

   b. **PD Plan**
      
      i. **Generally**
         
         a. The PD Plan establishes the development regulations for a planned development and specifically identifies where there are deviations from this DDC.
         
         b. The PD Plan shall include a development plan map.
         
         c. Unless specifically modified by the PD Plan, the PD shall comply with all standards in this DDC, as amended.
         
         d. Where the applicant is proposing deviations from the zoning provisions of this DDC, the applicant shall specify both the existing regulations and the wording of each corresponding substitution, as proposed. The proposed PD district shall represent a quality development when weighed overall against the standards in the DDC or the alternative regulations proposed by the applicant.
         
         e. The PD plan shall be reviewed by the Director and the Planning and Zoning Commission, whose recommendations are forwarded to the City Council for review and approval.
         
         f. Approval of the PD plan is required prior to approval of a development permit in a PD zoning district.

      ii. **Prohibited Deviations from the DDC**
         
         Deviations from the following standards shall not be allowed in conjunction with a PD zoning district:
         
         a. Subchapter 6: *Gas Wells*.
         
         b. Section 7.4, *Environmentally Sensitive Areas*.
         
         c. Section 7.7.4: *Tree Preservation*.

   iii. **Public Benefits to be Provided**
      
      When an applicant is proposing deviations from the zoning provisions of this DDC to establish a PD zoning district, the applicant shall demonstrate how the proposed PD zoning district will generally provide public benefits to justify the increased flexibility offered by the city through the PD procedure.

   C. **Concurrent Comprehensive Plan Amendment Review**
      
      A comprehensive plan amendment application submitted under Subsection 2.7.1 may be reviewed concurrently with a PD application.
Concurrent Subdivision Review
A subdivision application submitted under Section 2.6 may be reviewed concurrently with a PD application. A preliminary plat for a PD shall only be approved following approval of the rezoning to PD.

Step 3: Staff Review and Action
The Director shall review the PD application and prepare a staff report and recommendation in accordance with the approval criteria in Subsection 2.7.3D below.

Step 4: Scheduling and Notice of Public Meetings/Hearings
The PD application shall be scheduled for public hearings before the Planning and Zoning Commission and City Council, and noticed in accordance with Table 2.2-A Summary of Development Review Procedures and Subsection 2.4.6.

Step 5: Review and Decision
a. Planning and Zoning Commission Review and Recommendation
The Planning and Zoning Commission shall review the PD application in accordance with the approval criteria in Subsection 2.7.3D below, and shall forward its recommendation to the City Council.

b. City Council Review and Decision
i. The City Council may review and approve, approve with conditions, or deny the PD application in accordance with the approval criteria in Subsection 2.7.3D below.
ii. If the Planning and Zoning Commission recommends denial of the PD application, the rezoning shall become effective only by a three-fourths vote of all members of the City Council.
iii. The City Council may also remand the PD application back to the Director or the Planning and Zoning Commission for further consideration.
iv. If the City Council remands the PD application back to the Director or Planning and Zoning Commission, additional public hearings will be required before final adoption.

c. Protest Procedure
i. The rules governing amendment over protest are contained in TLGC, Chapter 211. The Director may prescribe forms for protest petitions.
ii. Property owners within 200 feet of a proposed rezoning, as indicated on the most recently approved city tax roll, may file a written protest against the rezoning. If written protests are received by owners of 20 percent or more of the area within 200 feet of the proposed rezoning, approval shall require three-fourths vote of the City Council for a rezoning to become effective. In such case, a supermajority vote shall not be required by the Planning and Zoning Commission.
6. **Step 6: Post-Decision Actions and Limitations**

   a. **Adoption of a Planned Development District**

      At the time a PD zoning document is approved by the City Council, it becomes an integral part of this DDC for that PD district established by the city on the property. All future development within the adopted PD district shall thereafter be in conformity with the PD zoning document for that property.

   b. **Future Development**

      Upon adoption of the PD district, the applicant may proceed with the development of the property in accordance with the PD zoning document and, the PD development standards document by applying for preliminary and final plat(s) approval in accordance with the phasing plan in the PD district.

   c. **Administration and Enforcement**

      i. While ownership of a project may subsequently be transferred (in whole or in part), PD zoning will continue to be implemented and maintained on the total acreage of the PD district. It is the responsibility of the owner to notify all prospective purchasers of the existence of the PD district and the PD development plan.

      ii. In the event that the applicant has failed to comply with the conditions adopted by the City Council in conjunction with the approved PD zoning document, the city may proceed in accordance with Section 1.6: Enforcement.

   d. **Amendments to a Planned Development**

      i. **Generally**

         a. The applicant or its successors may request amendments to the PD zoning document and or PD development standards document.

         b. Amendments to the approved PD documents shall be delineated as major or minor amendments, according to the criteria set forth in this subsection.

         c. Amendments to the approved PD documents will not affect development units not included in the proposed amendment.

         d. Upon receipt of a PD amendment application, the Director shall determine if the proposed amendment constitutes a major or minor amendment subject to the criteria in subsections ii and iii below.

      ii. **Major Amendments**

         a. An amendment will be deemed major if it involves any one of the following:

            1. A change in the overall PD district boundary;

            2. A significant change to the approximate boundary of one or more development unit(s) from that approved in the PD district, as determined by the Director. A change to an individual development unit generally shall be deemed to be significant if it represents a 10 percent increase to the approximate gross area of the development unit as approved in the PD district;
3. An increase of 10 percent or more of the approved number of projected dwelling units or gross leasable area (GLA) for an individual development unit;

4. Any change in land use or density that is likely to negatively impact or burden public facilities and utilities infrastructure as determined by the Director;

5. Any change in land use or density that is likely to negatively impact or burden mobility adjacent to the PD district or to the overall major street system; or

6. Any other proposed change to the development plan, which substantively alters one or more components of the PD district.

b. If the Director determines the amendment to be major, the amendment request shall be processed under the rezoning procedure described in Subsection 2.7.2.

iii. Minor Amendments

a. Amendments not meeting one or more of the criteria listed above for major amendments shall be considered minor. If the Director determines the amendment to be minor, the Director may administratively act on the amendment and attach stipulations or conditions of approval thereto, to protect the public health, safety, and welfare.

b. At least 15 days prior to consideration of a requested minor amendment by the Director, notice of the proposed minor amendment shall be mailed to each owner of property wholly or partly within 200 feet of the affected development unit(s) to which the amendment relates.

c. If written protest to any minor amendment is received from any notified property owner within 10 days of the notification mailing date and such protest cannot be resolved, then the minor amendment shall be reclassified as a major amendment. No additional application shall be required; however, all provisions governing major amendments shall then apply.

d. If written protest is not received as described above, the Director shall render a decision on the minor amendment request.

e. The Director’s decision shall be final unless appealed to the Planning and Zoning Commission pursuant to Subsection 2.4.8.

iv. Administrative Decision Appeals

a. The applicant or a property owner within 200 feet may appeal an action or decision by the Director on minor amendments to the Planning and Zoning Commission within 10 days from the date of the Director’s decision.

b. Appeals shall be in writing on a form provided by the Director and shall include only the specific items being appealed.

D. Rezoning to PD Approval Criteria

In reviewing a proposed rezoning to a PD district, the Planning and Zoning Commission and City Council shall consider the general approval criteria in Subsection 2.4.5 and whether and to what extent the proposed PD district:
1. Complies with the goals of the Comprehensive Plan;
2. Complies with this DDC, except where modifications are expressly authorized through the PD zoning document, the PD development standards document, and in the PD development plan map;
3. Provides a greater level of building design quality, community amenities, and connectivity than would be required if the project were not being developed in a PD district;
4. In the case of proposed residential development, that the development will promote compatible buildings and uses and that it will be compatible with the character of the surrounding area;
5. In the case of proposed commercial, industrial, institutional, recreational and other non-residential uses or mixed-uses, that such development will be appropriate in area, location, and overall planning for the purpose intended; and
6. The provisions for public facilities such as schools, fire protection, law enforcement, water, wastewater, streets, public services and parks are adequate to serve the anticipated population within the PD district.

**2.7.4 Zoning Text Amendment**

**A. Purpose**
This subsection describes the review and approval procedures for amending the text of this DDC to respond to changed conditions or changes in public policy, or to advance the general welfare of the city.

**B. Applicability**
A zoning text amendment shall be initiated by the Director, the Planning and Zoning Commission, or the City Council.
C. **Zoning Text Amendment Procedure**

Figure 2.7-4 identifies the applicable steps from the common review procedures in Section 2.4 that apply to the review of a zoning text amendment. Additions or modifications to the common review procedures are noted below.

**Figure 2.7-4: Summary of Zoning Text Amendment Procedure**

1. **Step 1: Pre-Application Activities**
   a. **Pre-Application Conference**
      Not required.
   b. **Citizen Participation**
      Citizen Participation is recommended in accordance with Subsection 2.4.3B: *Citizen Participation*.

2. **Step 2: Application Submittal and Processing**
   A zoning text amendment application shall be prepared by the Director. If the zoning text amendment is initiated by the Planning and Zoning Commission or City Council, the Director shall prepare the application at the request of the Planning and Zoning Commission or City Council.

3. **Step 3: Staff Review and Action**
   The Director shall review the zoning text amendment application and prepare a staff report and recommendation in accordance with the approval criteria in Subsection 2.7.4D below.

4. **Step 4: Scheduling and Notice of Public Meetings/Hearings**
   The zoning text amendment application shall be scheduled for public hearings before the Planning and Zoning Commission and City Council, and noticed in accordance with Table 2.2-A *Summary of Development Review Procedures* and Subsection 2.4.6.
5. **Step 5: Review and Decision**

   a. **Planning and Zoning Commission Review and Recommendation**
      
      The Planning and Zoning Commission shall review the zoning text amendment application in accordance with the approval criteria in Subsection 2.7.4D below, and shall forward its recommendation to the City Council.

   b. **City Council Review and Decision**
      
      i. The City Council may review and approve, approve with conditions, or deny the zoning text application in accordance with the approval criteria in Subsection 2.7.4D below.
      
      ii. If the City Council remands the application back to the Director or Planning and Zoning Commission, additional public hearings may be required prior to final action.

6. **Step 6: Post-Decision Actions and Limitations**

   Post-decision actions and limitations in Subsection 2.4.8 shall apply with the following modifications:

   a. Approval of a zoning text amendment authorizes the approved revision to the text only. A zoning text amendment shall not authorize specific development activity.

   b. A zoning text amendment shall remain valid until the revised text of the DDC is subsequently amended in accordance with this Subsection 2.7.4.

D. **Approval Criteria for Code Text Amendments**

   A DDC text amendment is a legislative decision by the City Council. Prior to recommending approval or approving a proposed DDC text amendment, the Planning & Zoning Commission and City Council shall consider whether and to what extent the proposed amendment:

   1. Is consistent with the Comprehensive Plan, other adopted plans, and other city policies;
   2. Does not conflict with other provisions of this DDC or other provisions in the Municipal Code of Ordinances;
   3. Is necessary to address a demonstrated community need;
   4. Is necessary to respond to substantial changes in conditions and/or policy; and
   5. Is consistent with the general purpose and intent of this DDC.

### 2.7.5 Annexation

Annexation into the Denton city limits may occur pursuant to the procedures outlined in TLGC, Chapter 43 and § 212.172; and City of Denton Charter, Section 1.03; and any other applicable city ordinance.
2.8 Flexibility and Relief Procedures

2.8.1 Variance

A. Purpose
   1. This section describes the process for gaining relief from the strict application of the DDC, where literal enforcement of the DDC will result in an unnecessary hardship and where the variance is necessary to develop a specific parcel of land which cannot otherwise be developed in the same manner allowed for other similar parcels due to unique conditions on the property.
   2. The variance procedure may not allow a use in a zoning district where it is not currently permitted, or alleviate inconveniences or financial burdens imposed on landowners.

B. Applicability
   1. Any property owner seeking relief from this DDC may request a variance when the strict application of the DDC would meet the approval criteria listed in Subsection 2.8.1D. The Zoning Board of Adjustment shall decide all requests for variances.
   2. Any property owner seeking relief from Subpart B, Chapter 33: Signs and Advertising Devices, of the Code of Ordinances, may request a variance when the strict application of the standards in Subpart B, Chapter 33, of the Code of Ordinances would meet the approval criteria listed in Subsection 2.8.1D.

C. Variance Procedure
   The following variance procedure is established to comply with TLGC, § 211.008 and 211.009. Figure 2.8-1 identifies the applicable steps from the common review procedures in Section 2.4 that apply to the review of variances. Additions or modifications to the common review procedures are noted below.

   Figure 2.8-1: Summary of Variance Procedure

</tbody>
</table>
1. **Step 1: Pre-Application Activities**
   a. **Pre-Application Conference**
      A pre-application conference is required in accordance with Subsection 2.4.3.
   b. **Citizen Participation**
      Not required.

2. **Step 2: Application Submittal and Processing**
   a. The variance application shall be submitted and accepted, and may be revised or withdrawn, in accordance with Subsection 2.4.4.
   b. Initiation of a variance application may be made by recommendation of the Director or application by the property owner or their authorized agent.

3. **Step 3: Staff Review and Action**
   The Director shall review the variance application and prepare a staff report and recommendation to the Board of Adjustment in accordance with the approval criteria in Subsection 2.8.1D, below.

4. **Step 4: Scheduling and Notice of Public Meetings/Hearings**
   Variance applications shall be scheduled for a public hearing before the Zoning Board of Adjustment.

5. **Review and Decision**
   a. The Zoning Board of Adjustment shall review and approve or deny the variance application in accordance with the approval criteria in Subsection 2.8.1D below.
   b. After closing the public hearing, the Zoning Board of Adjustment shall take action consistent with this DDC and state law. A concurring vote of 75 percent of the members of the Zoning Board of Adjustment shall be required to approve a variance application.
   c. The Zoning Board of Adjustment shall make written findings of fact and conclusions of law stating the facts upon which it relied when making its legal conclusions in reversing, affirming, or modifying any order, requirement, decision, or determination which comes before it under the provision of this DDC.

6. **Post-Decision Actions and Limitations**
   a. **Notice of Decision**
      The Director shall provide written notification of the Zoning Board of Adjustment’s decision to the applicant.
   b. **Expiration of Variance**
      If the property owner has not commenced development or obtained the required permits to carry out the approved variance within 24 months of the variance approval, the variance shall automatically expire.
   c. **Non-Transferable**
      An approved variance shall apply only to the property or structure described in the approval and shall not be transferable to any other property or structure.
d. Appeals
   The decision of the Zoning Board of Adjustment is final and may be appealed to a
district court or county court of law within 10 days after the date the decision is filed,
in accordance with the procedures contained in TLGC, Chapter 211.

e. Suspension and Revocation of a Variance
   i. When the City determines there is a failure to comply with any term, condition, or
   requirement made as a condition of approval of the variance, the City Council
   may direct the Building Official or Director, as appropriate, to suspend the
   variance pending compliance with the terms, conditions, or requirements under
   which the variance was approved.

   ii. Notice of suspension or revocation of a variance shall be sent by certified mail
   with return receipt requested.

   iii. The Zoning Board of Adjustment shall hold a public hearing no later than 45 days
   after notification. If the Zoning Board of Adjustment determines there is a failure
   to comply with any term, condition, or requirement made as a condition of the
   variance, the Zoning Board of Appeals may revoke the variance or take such
   action as it considers necessary to ensure compliance.

   iv. A decision to revoke a variance is effective immediately. Notice of the decision by
   the Zoning Board of Adjustment shall be sent by certified mail.

D. Variance Approval Criteria
   1. In reviewing a variance application, the Zoning Board of Adjustment shall find that all of
   the following exist:

   a. Special circumstances or conditions apply to the parcel for which the variance is
   sought, which circumstances or conditions are peculiar to such parcel and do not
   apply generally to other parcels in the same district or neighborhood and that said
   circumstances or conditions are such that the strict application of the provisions of
   this DDC would deprive the applicant of the reasonable use of such parcel;

   b. The granting of the variance will not be detrimental to the public welfare or injurious
   to other property or improvements in the district or neighborhood in which the parcel
   is located;

   c. The variance granted is the minimum variance that will accomplish this purpose;

   d. The literal enforcement and strict application of the provisions of this DDC will result
   in an unnecessary hardship inconsistent with the general provisions and intent of this
   DDC and that in granting such variance the spirit of the DDC will be preserved and
   substantial justice done;

   e. The granting of a variance is not solely for the purpose of mitigating a financial
   hardship; and

   f. The condition or feature that creates the need for the variance did not result from the
   owner's actions.

2. Any person desiring to erect or increase the height of any structure, or permit the growth
   of any natural object, or use their property, in violation of the airport zoning regulations
   prescribed Section 4.5, MAO – Municipal Airport Overlay District, shall provide a
determination from the Federal Aviation Administration as to the effect of the proposal on
the operation of air navigation facilities and the safe, efficient use of navigable airspace.

2.8.2 Minor Modification

A. Purpose

1. The minor modification procedure is intended to allow minor modifications or deviations
   from the dimensional or numeric standards of this DDC.

2. Administrative adjustments are intended to provide greater flexibility when necessary,
   without requiring a formal zoning amendment.

3. The minor modification procedure is not a waiver of current standards of this DDC and
   shall not be used to circumvent the variance procedure.

B. Applicability

1. Allowed Modifications and Deviations

   The minor modification procedures shall apply to the standards and limitations established
   in Table 2.8-A: Allowable Minor Modifications.

2. Prohibited Modifications and Deviations

   The minor modification procedure shall not apply to any proposed modification or
   deviation that result in:

   a. A change in permitted uses or mix of uses;

   b. A deviation from the use-specific standards in Section 5.3: Use-Specific Standards;

   c. A deviation from sensitive area protection standards in Section 7.4, Environmentally
      Sensitive Areas;

   d. A change to a development standard that is already modified through a separate
      minor modification or variance;

   e. A change to a development standard that is already exempted from maximum
      building height pursuant to Subsection 3.7.5B; minimum setbacks pursuant to 3.7.3D;
      or maximum building coverage pursuant to Subsection 3.7.6; or

   f. Requirements for public roadways, utilities, or other public infrastructure or facilities.
3. **Table of Allowable Minor Modifications**

An application for a minor modification that is not related to a request for "reasonable accommodation" under the Federal Fair Housing Act or the Religious Land Use and Institutionalized Persons Act may request only the types of adjustments shown in Table 2.8-A: Allowable Minor Modifications.

<table>

4. **Reasonable Accommodations Under the FFHA**

a. In response to a written application identifying the type of housing being provided and the portions of the Federal Fair Housing Act that require that reasonable accommodations be made for such housing, the Director is authorized to take any of the following actions in order to provide reasonable accommodations without the need for a rezoning or variance:

i. Modify any facility spacing, building setback, height, building coverage, or landscaping requirement by no more than ten percent; or

ii. Reduce any off-street parking requirement by no more than one space.

b. The city may be required to accommodate any requests for reasonable accommodations under the FFHA, regardless of whether or not such request otherwise qualifies as a minor modification.

c. The Director may approve a type of reasonable accommodation different from that requested by the applicant if the Director concludes that a different form of accommodation would satisfy the requirements of the Federal Fair Housing Act with fewer impacts on adjacent areas.

d. The decision of the Director shall be accompanied by written findings of fact as to the applicability of the Fair Housing Act, the need for reasonable accommodations, and the authority for any reasonable accommodations approved.

e. Requests for types of accommodation that are not listed above may only be approved through a variance or rezoning process.
5. **Religious Land Use and Institutionalized Persons Act of 2000 (RLUIPA)**
   a. The Director may grant minor modifications in order to eliminate a substantial burden on religious exercise as guaranteed by the Federal Religious Land Use and Institutionalized Persons Act of 2000, as amended.
   b. In no circumstance shall the Director approve an adjustment that allows a religious assembly use, or any uses, structures, or activities accessory to it, in a zoning district where this DDC prohibits such use or accessory use, structure, or activity.
   c. A person may claim that a provision of the DDC substantially burdens the person’s free exercise of religion. In making such a claim a person shall give written notice to the city by certified mail with return receipt requested, according to the provisions of Texas Civil Practice & Remedies Code § 110.001, et seq. (Vernon Supp. 2001).
   d. The Director may grant a waiver or partial waiver of the provisions of the DDC according to federal or state law to accommodate a person’s free exercise of religion.

6. **Limitations on Minor Modifications**
   Except when requested as a reasonable accommodation for Federal Fair Housing Act ("FFHA") purposes, a request for a minor modification shall not be used to further modify a development standard that, as applied to the subject property, already qualifies as an exception to, or modification of, a generally applicable development standard required under Subchapter 7: Development Standards.

C. **Minor Modification Procedure**

1. **Generally**
   a. An application for a minor modification shall only be submitted and reviewed concurrently with an application for a specific use permit, temporary use permit, site plan approval, or plat approval (minor, preliminary, final, conveyance, or replat).
   b. Each code standard in Table 2.8-A: shall be considered a separate minor modification request as it relates to the approval criteria in Subsection 2.8.2D, but multiple modifications may be considered in one minor modification application.

2. **Review and Decision**
   a. Where the concurrently reviewed application requires review and approval by the Director, the Director shall review and approve, approve with conditions, or deny the modification in accordance with the approval criteria in Subsection 2.8.2D. The Director may refer the minor modification to the Planning and Zoning Commission prior to making a decision.
   b. Where the concurrently reviewed application requires review and approval by the Planning and Zoning Commission or City Council, the Commission or Council, as applicable, shall review and approve, approve with conditions, or deny the modification in accordance with the approval criteria in Subsection 2.8.2D.

3. **Effect of Approval**
   Approval of a minor modification authorizes only the particular modification of standards approved, and only to the subject property of the application.
4. **Expiration of Minor Modification**
   A minor modification shall automatically expire if the associated development application is
denied or if approval of the concurrently reviewed application expires, is revoked, or
otherwise deemed invalid.

D. **Minor Modification Approval Criteria**
   In reviewing a proposed minor modification, the decision-making body shall consider the general
approval criteria in Subsection 2.4.5 and whether and to what extent the minor modification is of
a technical nature that:
   1. Compensates for an unusual site condition;
   2. Eliminates a minor inadvertent failure to comply with a DDC standard; or
   3. Protects a sensitive resource, natural feature, or community asset; and
   4. The minor modification will not produce an adverse change to the character of the
neighborhood.

2.8.3 **Appeal of Administrative Decision**

A. **Purpose**
   The purpose of this section is to establish a remedy whereby persons claiming to have been
aggrieved by a decision of the Director or other administrative official in administering this DDC
may appeal that decision.

B. **Applicability**
   Any person may appeal a decision of an administrative office or agency made in the
administration or enforcement of this DDC. Appeals shall be made to the appropriate body as
indicated in Table 2.2-A Summary of Development Review Procedures, and in accordance with
state law.
C. Procedure
Figure 2.8-2 identifies the applicable steps from the common review procedures in Section 2.4 that apply to the review of administrative appeals. Additions or modifications to the common review procedures are noted below.

Figure 2.8-2: Summary of Administrative Appeal Procedure

1. Step 1: Pre-Application Activities
   a. Pre-Application Conference
      A pre-application conference is optional in accordance with Subsection 2.4.3.
   b. Citizen Participation
      Not required.

2. Step 2: Application Submittal and Processing
   An administrative appeal application shall be submitted and accepted, and may be revised or withdrawn, in accordance with Subsection 2.4.4, with the following modifications:
   a. Time Limit
      Appeals shall be made in writing and filed with the Director within 10 business days of the action or decision being appealed.
   b. Stay of Proceedings
      An appeal stays all proceedings from further action unless the Director determines that a stay would create adverse impacts to the health, safety, or welfare of the city or neighborhood.

3. Step 3: Staff Review and Action
   The Director shall review the appeal application and prepare a staff report in accordance with the general approval criteria applicable to all applications in Subsection 2.4.5, with the following modifications:
2.8 Flexibility and Relief Procedures

2.8.4 Alternative Environmentally Sensitive Area (ESA) Plan

a. Staff review shall only confirm that the application is complete and that the appeal is heard by the appropriate authority.

b. The staff report shall not make a formal recommendation. The report shall include necessary facts to warrant an appeal, which shall be provided by the appellant/applicant.

4. Step 4: Scheduling and Notice of Public Meetings/Hearings

An appeal shall be scheduled for public hearings before the Zoning Board of Adjustment, Planning and Zoning Commission, or City Council, and noticed in accordance with Subsection 2.4.6.

5. Step 5: Review and Decision

a. The appropriate decision-making body may affirm, reverse, or amend a decision or interpretation made by another decision-making body in accordance with the approval criteria in Subsection 2.8.3D below.

b. The appeal decision-making authority may reverse a previous decision in whole or in part, or may modify the order, requirement, decision, or determination appealed from.

c. The appeal decision-making authority may attach conditions of approval on any appeal to ensure the health, safety, and welfare of the city.

6. Step 6: Post-Decision Actions and Limitations

Post-decision actions and limitations in Subsection 2.4.8 shall apply. Any further appeals from the appropriate appeal decision-making authority shall be made to the courts in accordance with state law.

D. Appeals Approval Criteria

In considering an appeal, the appropriate decision-making body shall consider the approval criteria applicable to all applications in Subsection 2.4.5, and shall consider the following:

1. The facts stated in the application, as presented by the appellant and/or the Director; and

2. The requirements and intent of the applicable standards from this DDC compared to the written decision that is being appealed.

2.8.4 Alternative Environmentally Sensitive Area (ESA) Plan

A. Purpose

The alternative ESA plan provides the option to address the ESA regulations through a flexible discretionary process using the procedure outlined in Section 2.7.2: Zoning Map Amendment.

B. Applicability

An alternative ESA plan is required when development deviates from regulations established in Section 7.4: Environmentally Sensitive Areas, and encroaches or removes protected ESAs.

C. Alternative ESA Plan Procedure

Figure 2.8-3 identifies the applicable steps from the common review procedures in Section 2.4 that apply to the review of alternative ESA plans. Additions or modifications to the common review procedures are noted below.
Subchapter 2: Administration and Procedures

2.8 Flexibility and Relief Procedures

2.8.4 Alternative Environmentally Sensitive Area (ESA) Plan

Figure 2.8-3: Summary of Alternative ESA Plan Procedure

1. Step 1: Pre-Application Activities
   a. Pre-Application Conference
      A pre-application conference is required in accordance with Subsection 2.4.3.
   b. Citizen Participation
      Citizen Participation is recommended in accordance with Subsection 2.4.3B: Citizen Participation.

2. Step 2: Application Submittal and Processing
   a. Generally
      i. The alternative ESA plan application shall be submitted and accepted, and may be revised or withdrawn, in accordance with Subsection 2.4.4.
      ii. The Director may require additional information deemed appropriate and necessary to process the application.
      iii. An application for an alternative ESA plan must be submitted and reviewed concurrently with the platting of property.
   b. Step 3: Staff Review and Action
      The Director shall review the alternative ESA plan application and prepare a staff report and recommendation in accordance with the general approval criteria applicable to all applications in Subsection 2.4.5, and the approval criteria in Subsection 2.8.4D below.
   c. Step 4: Scheduling and Notice of Public Meetings/Hearings
      The alternative ESA plan application shall be scheduled for public hearings before the Planning and Zoning Commission and the City Council and shall be noticed pursuant to Table 2.2-A Summary of Development Review Procedures, and Section 2.4.6.
d. **Step 5: Review and Decision**

i. **Planning and Zoning Commission Review and Recommendation**
   The Planning and Zoning Commission shall review the alternative ESA plan application in accordance with the approval criteria in Subsection 2.8.4D below, and shall forward its recommendation to the City Council.

ii. **City Council Review and Decision**
   a. The City Council may review and approve, approve with conditions, or deny the alternative plan application in accordance with the approval criteria in Subsection 2.8.4D below.
   b. If the Planning and Zoning Commission recommends denial of the alternative ESA plan, the alternative plan shall become effective only by a three-fourths vote of all members of the City Council.

iii. **Protest Procedure**
   a. The rules governing amendment over protest are the same as for a zoning amendment and are contained in TLGC, Chapter 211. The Director may prescribe forms for protest petitions.
   b. Property owners within 200 feet of a proposed rezoning, as indicated on the most recently approved city tax roll, may file a written protest against the rezoning. If written protests are received by owners of 20 percent or more of the area within 200 feet of the proposed rezoning, approval shall require three-fourths vote of the City Council for an alternative plan to become effective. In such case, a supermajority vote shall not be required by the Planning and Zoning Commission.

e. **Step 6: Post-Decision Actions and Limitations**
   Post-decision actions and limitations in Section 2.4.8 shall apply. The City Council decision is a final action and may not be appealed.

D. **Alternative ESA Plan Approval Criteria**
   The City Council may approve the alternative ESA plan with conditions necessary to mitigate the impacts of the proposed development upon considering the factors and goals noted in this section.

1. Mitigation goals are obtained by creating, expanding, and/or improving ESAs.
2. Mitigation goals are obtained by preserving ESAs above the minimum requirements, exchanges between different types of ESAs, installing pollution prevention controls, and/or implementing best management practices or any other approaches that result in the improvement of the environment being impacted.
3. Areas offered as mitigation are linked to existing or planned open space or conserved areas to provide an overall open space system.
4. Development is arranged for maximizing access and utilization of the ESAs by citizens.
5. Areas offered as mitigation are placed either in a lot or lots that incorporate a permanent conservation easement, a preserved habitat, restrictive covenants, or such other legal mechanism to allow for the long term conservation of said areas. Such legal mechanisms
shall limit any future land disturbing activity or construction within the ESAs, shall run with the land, and shall be binding upon all successors and assigns of the current owner.

6. The alternative ESA plan shall demonstrate that the property owner’s alternative proposal results in a high-quality development meeting the intent of the standards in this DDC.

### 2.8.5 Watershed Protection Permit Relief

**A. Purpose**

The watershed protection permit allows a determination of whether the application of the standards in this DDC, as applied to a watershed protection permit and related development applications would, if not modified or other relief granted, constitute a regulatory taking under constitutional standards.

**B. Applicability**

A property owner or authorized agent may file an application for relief under this subsection following final decision to deny or conditionally approve an application for a watershed protection permit and related applications within 10 days.

**C. Application Submittal and Processing**

1. The Director has the authority to establish requirements for applications in the Administrative Criteria Manual. No application shall be accepted for filing until it is complete and the fee established by the City Council has been paid.

2. Upon approval of an application in whole or in part by the City Council, the Director shall process the watershed protection permit, and related development applications, and the Director shall decide the applications consistent with the relief granted on the application, including any amendments to applicable standards approved by City Council.

3. A denial of an application by the City Council is a final determination.

**D. Approval Criteria**

In deciding whether to grant relief to the applicant, the City Council will consider whether there is any evidence from which it can reasonably conclude that the application of all or a part of the standards governing approval of a watershed protection permit under this DDC will deprive the applicant of all economically viable use of the land, based upon the following factors:

1. Whether the operations proposed are consistent with protecting the ecological integrity and environmental quality, including protection of surface and ground water sources, of potentially impacted environmentally sensitive areas (ESAs).

2. The nature and intensity of the uses allowed following application of the standards in the DDC to the watershed protection permit and related development applications, in comparison with the nature and intensity of the uses allowed without application of the standards.

3. Whether the standards of the DDC, when applied to the watershed protection permit and related development applications, allow an economically viable use of the land.

4. For applications in which it is alleged that there has been a devaluation of property, whether the adoption or application of standards in this DDC is the producing cause of any devaluation of the property.
Subchapter 2: Administration and Procedures
2.8 Flexibility and Relief Procedures
2.8.6 Interpretations

5. The extent to which the applicant’s expectations for economically viable uses have been realized through actual or anticipated development on land or an interest in land originally part of the same tract or parcel as the land for which relief is sought under the application.

6. The extent to which the applicant has taken advantage of any other relief measures provided by this DDC that would result in mitigation of economic impacts resulting from application of the standards in this DDC.

7. The extent to which the owner of the property had actual or constructive notice of regulations or proposed changes in the standards governing watershed protection permits.

8. Unique circumstances exist on the property on which the application is made related to size, shape, area, topography, surrounding conditions, and location that do not apply to other property in the vicinity.

9. Whether there are other alternative well site locations.

10. Any claim for relief pursuant to TLGC, Chapter 245.

E. Review and Decision

1. In granting relief under the application, the City Council may waive or modify the standards to be applied to the watershed protection permit or related development applications, and may impose reasonable conditions on related development applications in order to implement the relief granted.

2. The City Council may also initiate an application for a zoning map amendment in order to afford the relief granted, provided that such application shall be decided in accordance with Subsection 2.7.2: Zoning Map Amendment (Rezoning). In such case, the City Council’s decision on the application shall not be considered final until the application for the zoning map amendment is decided.

3. The action taken by the City Council under this section shall not deprive the Planning and Zoning Commission or any responsible official of its final approval authority over subdivision plats and other development permits.

4. No application for local permit under TLGC, Chapter 245, will be allowed for a watershed protection permit.

2.8.6 Interpretations

A. Purpose

The purpose of this section is to provide a uniform mechanism for rendering formal written interpretations of this DDC.

B. Authority

Responsibility for making interpretations of provisions of this DDC is assigned as follows:

1. The Director shall be responsible for all interpretations of the zoning and subdivision provisions in the text of this DDC, including, but not limited to:

   a. Interpretations as to which is the stricter and thus controlling provision in case of conflict with this DDC and other provisions of the Municipal Code of Ordinances;
   b. Interpretations of compliance with a condition of approval;
   c. Interpretations of whether an unspecified use falls within a use classification, use category, or use type allowed in a zoning district; and
Subchapter 2: Administration and Procedures
2.8 Flexibility and Relief Procedures
2.8.6 Interpretations

d. Interpretations of the zoning district boundaries on the Official Zoning Map.

2. The City Engineer shall be responsible for all interpretations of the floodplain management and engineering provisions in the text of this DDC.

3. The Building Official shall be responsible for all interpretations of building code provisions as they relate to this DDC, including interpretations relating to issuance of a certificate of zoning compliance.

C. Interpretation Procedure

Figure 2.8-4 identifies the applicable steps from the common review procedures in Section 2.4 that apply to the review of interpretations. Additions or modifications to the common review procedures are noted below.

**Figure 2.8-4: Summary of Interpretation Procedure**

<table>
<thead>
<tr>
<th>Pre-Application Activities</th>

<td>Interpretation is binding on subsequent decisions</td>
</tr>
</tbody>
</table>

1. **Step 1: Pre-Application Activities**
   a. **Pre-Application Conference**
      A pre-application conference is optional in accordance with Subsection 2.4.3.
   b. **Citizen Participation**
      Not required.

2. **Step 2: Application Submittal and Processing**
   A request for interpretation shall be submitted and accepted, and may be revised or withdrawn, in accordance with Subsection 2.4.4.

3. **Step 3: Staff Review and Action**
   The Director, City Engineer, or Building Official (as applicable) shall review the request for interpretation and render a decision based on the standards in Subsection 2.8.6D. The decision shall be in the form of a written interpretation and the decision-maker shall consult with the City Attorney and affected City Officials before rendering the interpretation.
4. **Step 4: Scheduling and Notice of Public Meetings/Hearings**
   Not required.

5. **Step 5: Review and Decision**
   Not applicable. Review and decision is by the Director, City Engineer, or Building Official under Step 3.

6. **Step 6: Post-Decision Actions and Limitations**
   Post-decision actions and limitations in Subsection 2.4.8 shall apply, with the following modifications:
   
a. **Effect of Approval**
   The written interpretation shall be binding on subsequent decisions by the Director or other city administrative officials in applying the same provision of this DDC or the Zoning Map in the same circumstance, unless the interpretation is reversed or modified on appeal to the Zoning Board of Appeals or a court of law.

b. **Official Record of Interpretations**
   The Director shall maintain a record of written interpretations that shall be available for public inspection, on reasonable request, during normal business hours.

D. **Interpretation Standards**

1. **Statutory References**
   Unless otherwise specified, statutory references are to be construed as currently amended or superseded.

2. **Text Provisions**
   Interpretation of text provisions and their application shall be based on the standards in Section 9.1, *Rules of Construction*, and the following considerations:
   
a. The clear and plain meaning of the provision’s wording, as defined by the meaning and significance given specific terms used in the provision as established in Subchapter 9: Definitions, and by the common and accepted usage of the term;

b. The intended purpose of the provision, as indicated by purpose statements, its context and consistency with surrounding and related provisions, and any legislative history to its adoption;

c. The intent to give every provision meaning;

d. The general purposes served by this DDC, as set forth in Section 1.2: Purpose; and

e. Consistency with the Comprehensive Plan.

3. **Unspecified Uses**
   Interpretation of whether an unspecified use falls within a use classification, use category, or use type allowed in a zoning district shall be based on the standards in Section 5.2.4: Classification of New and Unlisted Uses, and the Comprehensive Plan.

4. **Zoning Map Boundaries**
   Interpretation of zoning district boundaries on the Official Zoning Map shall be in accordance with the standards in Subsection 3.1.3B: District Boundaries, and consistent with the Comprehensive Plan.
2.9 Historic Preservation Procedures

2.9.1 General Provisions

A. Applicability
   The following are the general provisions applicable to the creation of Historic Landmarks, Historic Distincts, and Conservation Districts within the City of Denton, as defined under Subchapter 9: Definitions.

B. Public Hearings
   1. The Planning and Zoning Commission shall hold a public hearing as required in the same manner and with the same notice provisions as provided for zoning regulations in TLGC § 211.006 – 211.007, as amended, to consider any Historic Landmark, Historic District, or Conservation District designation ordinance after receiving a recommendation from the Historic Landmark Commission (HLC).
   2. Within 30 days after the public hearing, the Planning and Zoning Commission shall set forth in writing its recommendation, including the findings of fact that constitute the basis for its decision, and shall transmit its recommendation concerning the proposed ordinance to the City Council along with the recommendation of the HLC.

C. Notices
   Any notice required to be given under this Subsection, if not actually delivered, shall be given by depositing the notice in the United States mail, postage prepaid, addressed to the person or entity to whom such notice is to be given at his last known address. When notice is required to be given to an owner of property, such notice, delivered or mailed by certified or registered mail, may be addressed to such owner who has rendered his property for city taxes as the ownership appears on the last approved city tax roll.

D. Recording of Decision
   Upon passage of a Historic Landmark designation ordinance by the City Council, the City Secretary shall file a copy of the ordinance with the Denton County Tax Clerk.

E. Amendments
   The regulations, restrictions, and boundaries created under the authority of this DDC concerning Historic Landmarks and Historic and Conservation Districts may, from time to time, be amended, supplemented, changed, modified, or repealed pursuant to the public notice and hearing requirements, as amended, herein. If there is a written protest against such change signed by the owners of 30 percent or more, either of the area of the lots or land included in such proposed change or of the lots immediately adjoining the change and extending 200 feet therefrom, such amendment shall not become effective except by a simple majority of the City Council.

F. Completeness Determination
   Every application shall be subject to a completeness determination by the Historic Preservation Officer (HPO). Applications should be accompanied by all documents required by and prepared in accordance with the requirements of this DDC and all applicable city ordinances, rules, and regulations. An application deemed incomplete shall not bind the city as the official acceptance of the application for filing, and the incompleteness of the application shall be grounds for denial or revocation of the application. The HPO will make his/her completeness determination within 10 days from the date of receipt of the application. An email or comment in the city’s permit tracking
Subchapter 2: Administration and Procedures

2.9 Historic Preservation Procedures

2.9.2 Certificate of Appropriateness

A Certification of Appropriateness (COA) shall be obtained prior to the issuance of a building permit. The COA shall be posted at the project site. A COA may be required for work not otherwise requiring a building permit. The COA shall be required in addition to, and not in lieu of, any required building permit.

A. General Provisions

1. Application
   Prior to commencement of any work for which a COA is required, the applicant shall file an application for a COA with the City Development Services Department. The application shall contain such information as is requested from a form prepared by the HPO. Applications will be subject to the completeness determination in this subchapter.

2. HPO Discretion
   Upon receipt of an application for a COA, the HPO shall determine whether the application is to be administratively reviewed or reviewed by the HLC, using the requirements in this subsection. Generally, certificates of appropriateness for exclusively ordinary maintenance and minor exterior alternations may be administratively approved; however, the Director or the HPO may place a request for a COA on the agenda to be heard by the HLC at a public meeting based on the significance of the project or its potential for impact to a Historic District, Conservation District, or a Historic Landmark.

3. Expiration
   The COA shall expire one year from the date of issuance; existing COAs shall expire one year from the adoption of this DDC.

4. Time Bar
   After a final decision by the HLC is reached denying a COA, no further applications may be considered for the subject matter of the denied COA for one year from the date of the final decision, unless changed circumstances regarding the property or project are sufficient to warrant a new meeting, in the opinion of the HPO. The HLC may also waive the one-year requirement for resubmission, by a simple majority vote.

5. Amendment
   A COA may be amended by submitting an application for amendment to the HPO. The application shall then be subject to the standard COA review procedure.

6. Emergency Procedure
   If a structure requiring a COA is damaged and the Building Official determines that the structure or property will suffer additional damage without immediate repair, the Building Official may allow the property owner to temporarily protect the structure. In such a case, the property owner shall apply for a COA within 10 days of the occurrence that caused the damage. The protection authorized under this subsection must not permanently alter the architectural features of the landmark or of the structure in the Historic or Conservation District.
7. **New Construction**  
Design for new construction on the site of a property, either individually designated as a Historic Landmark or located in a Historic or Conservation District, shall conform to applicable adopted design guidelines and a COA shall be required.

8. **Appeal**  
An applicant may appeal the HPO's decision to deny a COA by submitting to the HPO a written request for appeal within 10 days of the decision. The written request for appeal starts the HLC Review procedure in this subchapter.

9. **Compliance Required**  
In considering an application for a COA, the HPO and the HLC shall review it for compliance with The Secretary of Interior’s Standards for the Treatment of Historic Properties (The Standards), any applicable guidelines adopted by the City and any guidelines provided in this subchapter.

10. **Sustainability Guidelines**  
The use of sustainable practices in design is encouraged and the HPO and HLC shall use the Secretary of Interior’s Guidelines on Sustainability for Rehabilitating Historic Buildings as a guide for decisions related to renewable energy such as: solar technology, wind power, insulation, HVAC, and similarly related topics.

11. **Building Code Requirements**  
Historic buildings may be exempted from building code requirements due to their status at the discretion of the Building Official. The Building Official may authorize certain exemptions in accordance with state law and the city’s codes.

B. **Administrative Review**  
The HPO may administratively approve or deny a COA if the proposed work meets the following criteria:

1. **Ordinary Maintenance**  
Ordinary maintenance is defined as the process of stabilizing or repairing, deteriorated or damaged architectural features (including but not limited to roofing, windows, columns, siding, and repainting), and includes any work that does not constitute a change in design, material, color, or outward appearance, and includes in-kind replacement or repair. If the applicant is seeking a COA for ordinary maintenance only, the HPO may review the application to determine whether the proposed work complies with the regulations contained in this DDC and all applicable ordinances, and the HPO may administratively approve or deny the work.

2. **Minor Exterior Alteration**  
Minor exterior alteration shall be defined as the installation of or alteration to signage, fences, gutters and downspouts, incandescent lighting fixtures, landscaping, restoration of original architectural features that constitute a change from existing conditions, painting of wood or other appropriate elements including a change in color and additions and changes not visible from any street, as determined by the HPO, to the rear of the main structure or to an accessory structure. If the applicant is seeking a COA to authorize minor exterior alterations only, the HPO may review the application to determine whether the proposed work complies with the regulations contained in this DDC and all applicable ordinances, and administratively approve or deny the application.
3. **Conservation Districts**
   COAs for work in a Conservation District shall be approved by staff according to standards set when the Conservation District is created. Conservation Districts differ from Historic Districts in that they may be created to protect the physical attributes of an area. The preservation of architecture may or may not be a component of the regulations adopted for a given Conservation District.

C. **Historic Landmark Commission Review**
   COAs for projects not subject to administrative review shall be approved or denied by the HLC at a public meeting pursuant to these procedures.

1. **Effect of Approval**
   If a COA has been approved by the HLC, then a certificate will be issued to the applicant, and copies of the certificate will be filed with the Planning Division in the Development Services Department.

2. **Deemed Approval**
   If final action has not been taken by the HLC within 75 days of the posting of the item on the HLC’s agenda by the HPO, then the COA will be deemed approved and a certificate will be issued to the applicant. If all other requirements of this DDC and applicable regulations are met, and a building permit is required for the proposed work, the Building Official shall issue a building permit to the applicant for the proposed work.

3. **Appeal**
   If a COA has been denied, the applicant may appeal the decision in writing to the City Council by filing a written notice with the City Secretary within 10 days of receiving the notice of the denial. City Council’s decision is final and no further applications shall be considered.

D. **Demolition or Removal**

1. **Criteria**
   The HLC must consider the following criteria for a COA for demolition or removal:
   a. The state of repair of the building;
   b. The existing and/or potential usefulness, including economic usefulness of the building;
   c. The purposes behind preserving the structure as an historic structure; and
   d. The character of the neighborhood and all other factors it finds appropriate.

2. **Appeal Period**
   Any applicant or the owner of any property located within 200 feet of any landmark or structure in a Historic or Conservation District requiring a COA for demolition or removal, and who is aggrieved by a ruling of the HLC concerning the landmark or structure in a Historic or Conservation District, under the provisions of this subsection may, within 60 days after the ruling of the HLC, appeal to the City Council. Following a public hearing to be held within 30 days of the filing of a notice of such appeal with the City Secretary, the City Council may, by a favorable vote of three-fourths of all members of the City Council who are eligible to vote on the matter, uphold or overturn any ruling of the HLC made pursuant to this subsection. Applicants may not begin demolition or removal until after the appeal period has passed.
3. **Posting of Sign(s)**
   An applicant for a COA for demolition is required to post a sign at the project site pursuant to city's sign posting requirements established in the Administrative Criteria Manual.

---

**2.9.3 Historic and Conservation District Designation**

The City Council may designate buildings, structures, sites, areas, and lands in the city as part of a Historic or Conservation District and define, amend, and delineate the boundaries thereof. This is a zoning designation in addition to any other use designation. The Official Zoning Map shall reflect the designation of Historic and Conservation Districts.

A. **Applications**
   Applications for consideration of a proposed Historic or Conservation District shall be based upon architectural, historical, archeological, or cultural importance or value and accompanied by the following information:
   
   1. A map showing the boundaries of the proposed District and the location of each contributing resource identified by a number or letter designation;
   2. Notation of state and national landmarks;
   3. A list of specific buildings, structures, sites, areas, or lands of importance considered contributing to the District and a description of the particular importance or value of each such building, structure, site, area, or land; and
   4. Sufficient photographs of each building, structure, site, area, or land of importance or value showing the condition, color, size, and architectural detail of each, and where possible:
      a. Date of construction;
      b. Builder or architect;
      c. Chain of uses and ownership;
      d. Architectural style;
      e. Materials;
      f. Construction technique; and
      g. Recognition by state or national government as architecturally or historically significant, if so designated.

B. **Procedures for Designation**
   
   1. **Initiation**
      Designation as a District may be initiated by the Historic Landmark Commission (HLC) or by written petition in the form prescribed by this subsection. Such a request shall designate clearly the land proposed to be included.
   
   2. **Applications**
      Requests for designation shall be made on a form obtained from the city. Completed applications shall be returned to the HPO for review and processing as applicable. The HPO is the administrative official with original jurisdiction to review applications and submitted written support for completeness.
   
   3. **Time Limits**
      Properly submitted applications shall remain valid for one year from the date it is deemed complete and thereafter shall be expired.
4. **Petition Required**
The applicant must submit with the application, a petition with signatures of more than 50 percent of the owners of the property within the proposed District who collectively own more than 50 percent of the land area within the proposed District. Property ownership shall be verified using the last certified tax rolls of the appropriate county tax assessor collector for the proposed area. For purposes of calculating the support of more than 50 percent of the property owners, each property as listed on the tax rolls shall be counted individually, regardless of whether an individual or group owns multiple properties within the proposed area. Properties owned by governmental entities shall not be counted in the more than 50 percent support requirement, although their written preference may be submitted to any board, commission, or to City Council for their consideration. Additionally, for properties owned by more than one party, only one property owner need submit written support in order for the HPO to count the property in the calculation.

5. **Demolition and Exterior Alterations Prohibited**
Any demolition or exterior alterations are prohibited for properties included in the area under consideration for designation while the application is being reviewed by the city. The Director may approve a permit for demolitions or exterior alterations on a case-by-case basis.

6. **Decision**
Once the HPO receives a completed application, the HPO must call a public hearing in front of HLC. The HLC shall make its recommendation for either approval or denial within 30 days from the date of the public hearing for consideration by the Planning and Zoning Commission. The Planning and Zoning Commission shall schedule a public hearing to be held within 60 days of receipt of the HLC's recommendation and shall forward its recommendation for either approval or denial to the City Council. The City Council shall, at a public hearing, review and either approve or deny the proposed district. Upon passage of any ordinance designating an area, or removing the designation of a district, the city shall send notice of the fact by mail to the owner or owners of affected property.

7. **Increasing Boundaries**
Applications to increase the boundaries of a District shall be made following the same procedure for creating the district and may be made when one or more of the following criteria are met:
   a. When buildings, structures, sites, areas, or lands of importance or value related to the district are requested for inclusion; or
   b. When facts previously undisclosed to or unknown by the HLC are revealed which indicate that a particular building or site is possessed of special architectural, archeological, cultural, or historical importance or value.

8. **Appeal**
If the HLC determines at a public hearing that the area is not eligible for a District classification, it shall notify the applicant of the fact in writing. Notice is given by depositing the notice, properly addressed and postage paid, in the United States mail. The notice must be sent to the address shown on the application. The decision of the HLC that an area is not eligible for Historic or Conservation District classification may be appealed to the City Council. The City Council's determination of eligibility on appeal is final. If the City Council determines that the area is not eligible as a District classification, no further applications for
a District classification may be considered, for the area of request, for two years from the
date of the decision. A property owner in the area of the request may apply for a waiver of
the two-year limitation and must show changes in circumstances that alter the facts and
conditions upon which the first decision was determined. The HPO shall determine if the
application may go forward.

9. **Established Districts**
Requirements of Subchapter 4: Overlay and Historic Districts, shall apply to the Historic or
Conservation Districts, however, any conflict between this subsection and other provisions
of Subchapter 4 shall be resolved in favor of this subsection.

10. **Regulations**
The ordinance creating the District may contain regulations, special exceptions, or
procedures that the HLC considers necessary to conserve the distinctive atmosphere or
character of the area, or to minimize potential adverse impacts which could result from the
creation of the District. In addition, all property owners must conform to existing building
codes and this DDC.

C. **Approval Criteria**
1. The purpose of Historic and Conservation Districts is to geographically define areas
possessing significant concentration, linkage, or continuity of buildings, structures, sites,
areas, or land which are united by architectural, historical, archeological, or cultural
importance or significance for preservation purposes. They may also include a landmark or
a group of landmarks.

2. Any District must meet two of the following criteria:
   a. Include buildings, structures, or sites that have common character defining features
      and be of common form.
   b. Include buildings, structures, or sites which are similar in size, massing, and scale.
   c. Have a common streetscape or have similar spatial relationships or contain common
      visual qualities such as vegetation, vistas, orientation, set back, spacing, site coverage,
      exterior features, or materials.
   d. Contains properties and an environmental setting that meets two or more of the
criteria for designation of a landmark (see 2.9.4: Historic Landmark Designation).

3. Any District in the City of Denton that is listed on the National Register of Historic Places is
presumed to be qualified for designation as a historic or conservation district or included
as part of a larger Historic or Conservation District.

4. For designation as a Historic District, a minimum of 51 percent of buildings, structures, or
sites in the proposed District must be 50 years of age or be of historical significance.

2.9.4 **Historic Landmark Designation**
The City Council may designate buildings, structures, sites, areas, and lands in the city as Historic
Landmarks. This is a zoning designation in addition to any other use designation. A Historic Landmark
does not have to be located in a Historic or Conservation District. The Official Zoning Map shall reflect the
designation of Historic Landmarks.
A. Procedures for Designation

1. The owner of the property seeking designation, or owner’s representative, the Historic Landmark Commission (HLC), Planning and Zoning Commission, Historic Preservation Officer (HPO), or the City Council may initiate a Historic Landmark designation by filing an application with the HPO.

2. Requests for designation shall be made on a form obtained from the HPO.

3. Applications prepared and submitted by an authorized agent shall contain the signatures of the owner or owners unless created by resolution of the City Council or the HLC.

4. Applications shall be considered by the HLC at a regular meeting. The HLC shall make a recommendation to the Planning and Zoning Commission regarding such designation. The Planning and Zoning Commission must make a recommendation to City Council for its consideration. The decision at City Council is final and cannot be appealed.

5. Historic Landmark Commission-approved medallions for designated structures may be prepared and, subject to the approval of the owners, may be affixed to individually designated Historic Landmarks.

B. Approval Criteria

The following criteria will be used in the designation of a Historic Landmark.

1. Character, interest, or value as part of the development, heritage, or cultural characteristics of the city, state or the United States;

2. Recognition as a recorded state historic landmark, a national historic landmark, or entered into the National Register of Historic Places;

3. Reflects a distinguishing characteristic of an architectural type or specimen;

4. Identification as the work of an architect or master builder whose individual work has influenced the development of the city;

5. Reflects elements of architectural design, detail, material, or craftsmanship which represent a significant architectural innovation;

6. Relationship to other distinctive buildings, sites, or areas which are eligible for preservation according to a plan based on architectural, historic, or cultural motif;

7. Portrayal of the environment of a group of people in an area of history characterized by a distinctive architectural style;

8. Archeological value in that it has produced or can be expected to produce data affecting theories of historic or prehistoric interest;

9. Exemplification of the cultural, economic, social, ethnic, or historical heritage of the city, state, or the United States;

10. Location as the site of a significant historic event;

11. Identification with a person who significantly contributed to the culture and development of the city, state or the United States;

12. A building or structure that, because of its location, has become of value to a neighborhood, community area, or the city; or

13. Value as an aspect of community sentiment or public pride.
C. **Permits Pending Designation**

1. From and after the date on which the question of whether or not a building, structure, or site within the city should be designated as an Historic Landmark is placed upon the agenda for any special or regular meeting of the HLC or from and after the date on which such agenda is posted in accordance with the provision of Chapter 551 of the Government Code (Texas Open Meetings Act), as amended, or from and after the date that the HLC approves or recommends a Preservation Plan or any amendment of any existing Preservation Plan which embraces or includes the building, structure, or site within the city, whichever date first occurs, no building permit allowing the construction, reconstruction, alteration, change, restoration, removal, or demolition of any exterior architectural feature of any building or structure then existing included or embraced in whole or in part within the scope of such agenda consideration or such preservation plan or such amendment thereof, as the case may be, and no permit allowing the demolition or removal of all or any part of any such building or structure may be issued by any official of the city nor, if no such permit is required, may any person or entity construct, reconstruct, alter, change, restore, remove, or demolish any exterior architectural feature of any such building or structure until the earliest of the following conditions have been met:

   a. A final and binding COA for the removal or demolition, as may be appropriate, has been issued by the HLC;

   b. The HLC fails to make a recommendation that some part or all of any such building or structure be designated an Historic Landmark or be included within an Historic Landmark or within a Preservation Plan or an amendment thereof within 60 days following the earliest of the dates described in this subsection, under the circumstances; or

   c. A final and binding decision has been made by the City Council that no part of any such building or structure shall be designated an Historic Landmark or shall be included within any designated Historic Landmark. However, should the City Council fail to act within 90 days from the date an appeal is filed, the requested permit shall be granted. The 90-day time limitation may be waived by the appellant to allow the City Council an additional 30 days in which to act.

2. It shall be the duty of the HPO to furnish the Building Official with a copy or written notice of each such written order or such agenda or such Preservation Plan or amendment thereof, as the case may be, as promptly after the preparation thereof as is practicable. The failure to so furnish the Building Official with a copy or written notice thereof however, shall not have the effect of validating any building permit, removal permit or demolition permit issued without knowledge of any such written order or agenda. In any instance in which any such permit may not be required, it shall be the duty of the HPO to give notice of any such written order or such agenda or such Preservation Plan or amendment thereof to the owner of any building or structure included within the scope thereof, which notice shall be deemed complete when actually given, orally, or in writing, to such owner or when written notice there is deposited in the United States mail, postage prepaid, certified or registered, with return receipt requested, addressed to such owner, whichever event first occurs.

3. Any permit issued to any person from or after the date of any such written order or such agenda or the approval or recommendation of such preservation plan or amendment
thereof, as the case may be, shall be null, void, and of no force or effect until the earliest of
the events described in subsections (1.a), (1.b), (1.c) above occur.

4. Notwithstanding any other provision of this subsection, no building permit, removal permit
or demolition permit shall be issued by the Building Official for any structure located in a
National Register District except as authorized by this subsection. The Building Official shall
notify the HPO immediately of any application requesting a building permit, removal
permit or demolition permit for a structure located in a National Register District. No such
permit shall be issued by the Building Official before the HLC has made a recommendation,
or scheduled the structure on its agenda, or before the expiration of 60 calendar days,
whichever is sooner. If a structure is placed on an agenda item, it shall be scheduled for a
public hearing as soon as property owners within the National Register District are notified.

2.9.5 Maintenance; Omission of Repairs

A. The exterior of any structure in a designated District, any designated Historic Landmark and any
building determined by the HLC to meet the criteria for Landmark designation shall be
maintained to ensure structural integrity.

B. If the HLC finds that there are reasonable grounds to believe that the exterior of any structure in a
designated District or any designated Historic Landmark is structurally unsound or in imminent
danger of becoming structurally unsound, the HLC shall direct the HPO to notify in writing the
owner of the structure of such fact.

C. Upon giving a 10 day written notice to the owner of record of such structure, the HLC shall hold a
public meeting to determine if the structure is structurally unsound or in imminent danger of
becoming structurally unsound. The HLC’s report may include evidence of economic hardship or
willful neglect.

D. At the conclusion of the meeting, if the HLC finds that the structure is structurally unsound or in
danger of becoming structurally unsound and that no valid reason exists as to why the owner
cannot or should not undertake to safeguard the structural soundness of the building, it shall in
writing notify the owner of record of the finding.

E. The owner of record of a structure who has been notified by the HLC that such landmark is
structurally unsound or in danger of so becoming, shall within 90 days of receipt of such notice,
satisfy the HLC that reasonably necessary repairs to safeguard the structural soundness of the
landmark have been effected.

F. If the HLC determines that the building is structurally unsound but there are valid reasons why the
owner cannot or should not undertake to safeguard the structural soundness of the building, it
shall forward to the City Council its recommendation as to what action, if any, should be taken on
the structure.

G. Any applicant or interested person aggrieved by a ruling of the HLC under the provisions of this
section may, within 60 days after the date of such ruling, appeal to the City Council.
A. Purpose
The Certificate of Design Consistency procedure provides a mechanism for the city to evaluate a proposed development or redevelopment projects within a design overlay district in order to ensure that such project meets the standards and/or principles established for that district by this DDC.

B. Definitions
The words, terms, and phrases listed in Section 4.10.3, Definitions, when used in this subsection, shall have the meanings ascribed to them in Section 4.10.3, except where the context clearly indicates a different meaning.

C. Applicability
When an applicant is seeking to undertake one of the actions listed in Section 4.10.5.A, a Certificate of Design Consistency shall be applied for and be approved prior to the issuance of any Building Permit, although a Certificate of Design Consistency and a Building Permit and other required permit review processes may be conducted simultaneously. A Certificate of Design Consistency shall be required in addition to, and not in lieu of, any required Building Permit.

D. Procedure
1. Step 1: Pre-Application Activities
   a. Pre-Application Conference. A Pre-Application Conference with the Director is recommended before an application is made for a Certificate of Design Consistency. The following information must be provided to the Director for discussion at the pre-application conference:
      i. Concept Plan
      ii. Photographs of the site and adjoining properties

2. Step 2: Application Submittal and Processing.
   a. The Certificate of Design Consistency application shall be submitted and accepted, and may be revised or withdrawn, in accordance with Subsection 2.4.4 of the 2019 Denton Development Code as approved by City Council on April 23, 2019.
   b. The application must contain all information required for a Certificate of Design Consistency application as detailed in the Application Criteria Manual. No application for a Certificate of Design Consistency shall be accepted for processing unless it is accompanied by the required information.

3. Step 3: Determination of Procedure. Upon receipt of a complete application for a Certificate of Design Consistency, the Director must determine the appropriate review procedure prescribed by sections 2.10.1.D.3.a-d below.
   a. Administrative Review. Applications for Certificates of Design Consistency may be reviewed by the Director if the proposed work meets the following criteria:
      i. Ordinary maintenance. Ordinary maintenance shall be defined as the process of stabilizing deteriorated or damaged architectural feature (including but not limited to roofing, windows, columns, and siding), and
Subchapter 2: Administration and Procedures

2.10 Design Standards Review Procedures

2.10.1 Certificate of Design Consistency Procedure

will include any work that does not constitute a change in design, material, or outward appearance, and include in-kind replacement or repair;

ii. Minor exterior alteration. Minor exterior alteration shall be defined as the installation of or alteration to awnings, fences, gutters and downspouts; lighting fixtures; and restoration of original architectural features that constitute a change from existing conditions.

b. City Council Review. Applications for Certificates of Design Consistency must be reviewed by the City Council in the following cases:

i. The proposed work does not meet the criteria for either “ordinary maintenance” or “minor exterior alteration,” as found in Section 2.10.1.D.3 of this subchapter.

ii. The proposed work qualifies as “ordinary maintenance” and/or “minor exterior alterations,” but, based on the significance of the proposed work or its potential to impact The Denton Square District, the Director has requested that the application be placed on the agenda to be heard by the City Council.

iii. The application for a Certificate of Design Consistency for the proposed work has gone through the Administrative Review process and been denied, and that denial has been appealed to the City Council by the applicant.

c. Local Historic Landmarks. Exterior alterations to local historic landmarks shall be governed by the procedures outlined in Sections 2.9 and 4.9 of the 2019 Denton Development Code approved by City Council on April 23, 2019, unless otherwise provided for in this ordinance.

d. Murals. Murals, as defined in Section 4.10.4, are subject to City Council review procedures in Section 2.10.1D.6.

If the Director determines that a Certificate of Design Consistency application should be reviewed through the Administrative Review process, the following procedure must be used:

a. The Director must review the application in accordance with the approval criteria in paragraph 2.10.1.D.4.a.i below. Based on this determination, the Director must either approve or deny the Certificate of Design Consistency application.

i. Administrative Review Approval Criteria: The Director may approve an application for a Certificate of Design Consistency if:

a. The proposed work complies with the standards of the Denton Square District found in Section 4.10.7, and

b. The proposed work is consistent with the Purpose and Intent for the Denton Square District found in Section 4.10.1.

ii. While the Director may encourage compliance with the Design Guidelines for The Denton Square District (see Guidelines), in no case may the Director deny a Certificate of Design Consistency due to non-compliance with the Design Guidelines.
2.10 Design Standards Review Procedures

2.10.1 Certificate of Design Consistency Procedure

b. Documentation of the Director’s decision to approve or deny the Certificate of Design Consistency application must be issued to the applicant, and copies must be filed with the Department of Development Services.

c. The applicant may appeal an Administrative Review Procedure decision by submitting to the Director a written request for appeal within ten (10) days of the decision. When the written request for appeal is received, the procedure for this type of application moves to Step 5: Scheduling and Noticing of Public Meeting.

5. Step 5: Scheduling and Noticing of Public Hearing:

a. Application Transmittal. If an application for a Certificate of Design Consistency has been determined by Director’s determination or by appeal to require review by the City Council, the Director must forward the application to the City Council for review not later than twenty-one (21) days after receipt of a completed application.

a. The City Council shall review and may approve the application for a Certificate of Design Consistency as submitted, approve the application with conditions, or deny the application, in accordance with the approval criteria in paragraph 2.10.1.D.6.a.i and, where applicable, in 2.10.1.D.6.b.

i. City Council Approval Criteria. City Council may approve an application for a Certificate of Design Consistency, not involving demolition of a structure or facade if either of the following criteria are met:

   a. The proposed work complies with the Design Standards for the Denton Square District found in Section 4.10.7 and is consistent with the Purpose and Overall Intent of the District as shown in Section 4.10.1 of this DDC.

   b. Proposed work achieves, or is an improvement on, the Purpose and Overall Intent of the District found in Section 4.10.1 but does not conform to one or more specific Design Standards in Section 4.10.7.

b. Demolition Approval Criteria. City Council may approve a Certificate of Design Consistency for a project involving demolition of a building or facade if one of the following two criteria has been met, in addition to the criteria in 2.10.1.D.6.a.i:

   i. Proposed work does not involve the demolition of a building or a facade of a building that is a Contributing Building as depicted on the National Register for Historic Places’ map of the Denton County Courthouse National Register District, and, in the case of a building, proposed work meets the standards in Section 4.10.7.L.

   ii. Proposed work does involve the demolition of a building or a facade of a building that is a Contributing Building as depicted on the National Register for Historic Places’ map of the Denton County Courthouse National Register District, and the project complies with the standards in Section 4.10.7.K.1.
Subchapter 2: Administration and Procedures

2.11 Development Criteria Manual Procedure

2.10.1 Certificate of Design Consistency Procedure

c. While the City Council may encourage compliance with the Design Guidelines for The Denton Square District (see Guidelines), in no case may the City Council deny a Certificate of Design Consistency due to non-compliance with the Design Guidelines.

d. Documentation of City Council’s decision to approve or deny the Certificate of Design Consistency application must be issued to the applicant, and copies must be filed with the Department of Development Services.

7. Step 7: Post-Decision Actions and Limitations. Provisions of Section 2.4.8 of the 2019 Denton Development Code as adopted by City Council on April 23, 2019 shall apply to the Certificate of Design Consistency Process, with the following modifications:

a. Effect of Approval: If the Director or City Council has approved a Certificate of Design Consistency, the following actions must be taken:

i. Upon filing of the documentation of approval with the Department of Development Services, the Director shall issue the Certificate of Design Consistency to the applicant for the proposed work.

ii. If all other requirements of the City’s Municipal and Development Codes are met and a Building Permit is required for the proposed work, the Building Official shall issue a Building Permit to the applicant for the proposed work.

b. Single Review. No applicant shall be required to come before the City Council more than once for the same project if approved.

2.11 Development Criteria Manual Procedure

A. Purpose

In order to optimize and facilitate the specification of safe, efficient, cost-effective design and development standards, this procedure for creating and updating Development Criteria Manuals is established. The intent is for design and development standards to be established quickly and efficiently, as a part of a collaborative dialog among land development professionals, both inside and outside the City.

B. Minimum Standards and Responsibility

The standards established by the Development Criteria Manuals and the procedures set forth herein are not intended to supersede any requirement for submission and staff approval of designs sealed by a professional having appropriate licensure. Design and development standards and procedures established in the Development Criteria Manuals under this Subsection are intended for use only as engineering and design guidelines, and to establish minimum standards. The responsibility for the sufficiency and appropriateness of any actual design shall remain the responsibility of the design engineer for the project, and the responsibility for the sufficiency of construction shall remain the responsibility of the contractor for the project. Users of the Development Criteria Manuals should be knowledgeable and experienced in the theories and application of the underlying standards or utilize someone who is knowledgeable and experienced. It is expected that all designs and construction of individual projects will meet or exceed these minimum standards.
C. Procedure:

1. **Initial Approval.** The baseline structure for each Development Criteria Manual is established by ordinance, using the Zoning Text Amendment Procedure found in Subsection 2.7.4. A Development Criteria Manual may be approved by the City Council following review and recommendation by the Planning and Zoning Commission. At the public hearings, the Planning and Zoning Commission and the City Council may hear comments from the public, outside professionals from the land development community, and staff. Approval should be based on comments made at the public hearing and other applicable federal, state and City laws and regulations. Approval shall be guided by the criteria set forth in Section 2.11D below and any other requirements to be considered under applicable law.

2. **Administrative Update.** After initial approval, updates of the approved Development Criteria Manuals will proceed according to the following administrative procedure:
   
   a. Staff will present the proposed update before the Planning and Zoning Commission at a work session. No additional public notification is required beyond posting of the item on the work session agenda of the Planning and Zoning Commission. At the work session, the Planning and Zoning Commission may offer any suggestions or recommendations concerning the proposed update.

   b. Following the work session, staff will post the proposed update on the City of Denton web site along with the current Development Criteria Manual and at City Hall at the location for posting notices of all public meetings, for a period of not less than thirty (30) calendar days.

   c. During this thirty-day period, comments of interested persons and written protests or requests for review will be collected and staff will consider all comments filed and make an attempt to resolve all protests or requests for review within the thirty (30) calendar day period.

   d. After the thirty (30) calendar day period, staff will present the proposed update before the City Council at a public hearing. The proposed update will be processed as an ordinance, requiring public hearing notification prior to the City Council meeting, that meet the content, timing, and other notices specification outlined in the Administrative Criteria Manual.

3. **Legislative Updates.** Nothing in this subchapter shall prevent the City Council from making updates to the Development Criteria Manuals by ordinance including, without limitation, to establish fee schedules or to make other changes as they may deem to be necessary or appropriate.

D. Approval Criteria

The following criteria shall be considered as guidelines for approving updates to the Development Criteria Manuals:
1. **Design Standards.** Design and construction standards shall be set to establish a baseline that will promote the health, safety and welfare of the public and to promote cost-effective construction and design.

2. **Public Improvements.** The design standards for public improvements should strive to minimize the ongoing costs to operate and maintain public improvements and to provide for an appropriate service life, to minimize the future burden on the public. The standards shall also consider the positive impact that properly designed and maintained public improvements have on the economic development and the welfare of the City as a whole.

3. **Private Improvements.** The design standards for private improvements shall establish an appropriate baseline to protect the health, safety and welfare of the public, while promoting processes that are affordable and cost effective. The standards shall also encourage quality development with lasting value, and maintain or enhance the property value of the development and its neighborhood or surrounding area.

4. **Aesthetics.** Standards should promote aesthetics to the extent of recognizing the value and importance of maintaining or improving upon the neighborhood or surrounding area in a tasteful and compatible fashion, consistent with the City’s Comprehensive Plan, so as to maintain or improve property values and attract quality development.
Subchapter 3: Zoning Districts

3.1 Purpose and Organization

3.1.1 Zoning Districts Established

Zoning districts are established as shown in Table 3.1-A: Zoning District Designations. Zoning districts are established by the city’s adoption of the Official Zoning Map of City. An explanation of the transition from established zoning districts prior to the effective date of this DDC to the zoning districts in this DDC is provided in Appendix B: Zoning District Transition Table.

Subchapter 3: Zoning Districts

3.1 Purpose and Organization

3.1.2 Organization of this Subchapter

A. Base Zoning Districts

1. Sections 3.2 through 3.5 follow a common structure for describing the purpose and intent for each base zoning district, the applicable dimensional standards, and any district-specific standards.

2. Each base zoning district includes an illustration demonstrating the dimensional requirements for that district. The illustrations are not intended to represent a specific location, but rather reflect the general character of the district.

3. Each base zoning district includes a table of dimensional standards summarizing the most pertinent dimensional standards applicable to each district. The labels in the table correspond to the applicable illustration. These tables are illustrative only and do not identify all standards that may apply to a particular development.

4. If a standard shown in an illustration is inconsistent with the respective table of dimensional standards, the standards in the table shall govern.

B. Planned Development District

1. Planned Development districts are established by the Zoning Amendment Procedure pursuant to Subsection 2.7.3: Rezone to a Planned Development (PD) District. Development in a PD district is subject to the standards included in or referenced in an approved plan.

2. Section 3.6 describes the general purpose of PD districts and sets forth base requirements applicable to all such districts, including the minimum development standards to be addressed in the district's plan and the means of modifying the standards of this DDC through a PD development approval.

3.1.3 Official Zoning Map

A. Incorporation of Map

1. The location and boundaries of the districts designated in this subchapter are established as shown on the map entitled “Official Zoning Map of City” (hereafter referred to as the "Zoning Map"), dated as of the effective date of this subchapter.

2. The signed originals of the Zoning Map shall be maintained on file in the office of the City Secretary and, by reference, are made a part of this subchapter as if fully incorporated.
B. District Boundaries
   Unless otherwise specified, district boundaries are lot lines, the centerlines of streets, creeks, and railroad right-of-way, or such lines extended.

C. Digital Mapping
   Digital maps, created through the use of geographic information system technology, containing registration points recorded on the Texas State Plane Coordinate System, as amended, may be used in the administration and enforcement of this subchapter, but shall not replace the paper originals of official maps required by this subchapter.

D. Boundary Clarification
   1. In the event that a zoning district boundary is unclear or is disputed, the Director shall determine the location of the zoning district boundary.
   2. Any appeal of the Director’s determination of the zoning district boundary shall be established by the Zoning Board of Appeals pursuant to Subsection 2.8.3, Appeal of Administrative Decision.

E. Amendments to the Zoning Map
   1. If, in accord with the provisions of this subchapter, changes are made in district boundaries portrayed on the Zoning Map, the date of such changes shall be promptly noted on the Zoning Map after the amendment has been approved by the City Council and duly noted in the minutes of the City Council meeting.
   2. No changes shall be made to the Zoning Map except in conformance with the procedures set forth in Subsection 2.7.2: Zoning Map Amendment.

3.1.4 Annexed Territory

When any territory is brought into the jurisdiction of the City of Denton, by annexation or otherwise, such territory shall be subject to the development regulations of the RR (Residential Rural) district until the City Council designates another zoning district, after review and recommendation by the Planning and Zoning Commission. Such recommendation and determination shall include consideration of surrounding uses as well as policies stated in the Comprehensive Plan. Initial annexation shall require compliance with the zoning procedure in Subsection 2.7.5: Annexation.
Subchapter 3: Zoning Districts
3.1 Purpose and Organization
3.1.4 Annexed Territory

[page left blank intentionally]
3.2 Residential Districts

3.2.1 RR – Residential Rural

A. Purpose
The RR district is intended to provide and maintain areas of rural use within the city. Application of this district will ensure that farming, forest, environmental, and scenic areas are protected from incompatible development. This district includes farms and ranches as the predominant use with large lot rural residential and rural commercial uses. The RR district may be used as an interim zoning district for annexed property.

A. **Purpose**

The R1 district is intended to preserve existing single-family neighborhoods and to ensure that any new development promotes conservation of scenic rural open space and is compatible with existing land uses, patterns, and design standards. The R1 district can be used as a transitional district between rural development and large lot residential neighborhoods.

3.2.3 R2 - Residential

A. Purpose
The R2 district is intended to preserve existing single-family neighborhoods. The R2 district is intended to ensure that any new development promotes walkability, access to parks, open space, and recreation amenities and is compatible with existing land uses and development patterns. The R2 district can be used as a transitional district between large lot residential neighborhoods and medium lot residential neighborhoods.

3.2.4 R3 – Residential

A. Purpose
The R3 district is intended to preserve existing single-family neighborhoods. The R3 district is intended to ensure that any new development promotes walkability, access to parks, open space, and recreation amenities and is compatible with existing land uses and development patterns. The R3 district can be used as a transitional district between large lot residential neighborhoods and medium lot residential neighborhoods.

3.2.5 R4 - Residential

A. Purpose
The R4 district is intended to accommodate a variety of housing types on lots designed to encourage walking to neighborhood-serving retail and other amenities such as parks and school facilities. This zoning district will ensure existing neighborhood character is maintained while also serving as a transition area between established single-family neighborhoods and mixed-use neighborhoods, commercial areas, and key corridors.

- If approved prior to October 1, 2019, see Section 1.5.2I: Applicability of this DDC to Existing Residential Uses and Structures
3.2.6 R6 - Residential

A. Purpose
The R6 district is intended to accommodate a variety of housing types on lots designed to encourage walking to neighborhood-serving retail and other amenities such as parks and school facilities. This zoning district will ensure existing neighborhood character is maintained while also serving as a transition area between established single-family neighborhoods and mixed-use neighborhoods, commercial areas, and key corridors.

3.3 Mixed-Use Districts

3.3.1 MN - Mixed-Use Neighborhood

A. Purpose

The MN district is provided to support compatibility between higher-intensity mixed-use areas and adjacent residential and commercial areas. This district contributes to a vibrant environment for pedestrians and bicyclists and includes varying densities of residential, neighborhood-serving retail, restaurants, commercial, and office uses that are sensitive to the surrounding built and natural context in scale and form.

Notes:

[1] Buildings adjacent to a Residential zoning district shall comply with the standards in Subsection 7.10.6: Building Height in Transition Areas.

[2] Buildings between 41 and 65 feet shall require a specific use permit pursuant to Subsection 2.5.2: Specific Use Permit (SUP).
3.3.2 MD - Mixed-Use Downtown Core

A. Purpose
The MD district is provided to allow for a variety of uses contributing to the economic viability of Downtown Denton. This district allows for moderate- and high-density residential, commercial, office, entertainment, and other uses tailored to encourage a greater level of activity while protecting the scale and strengthening the character of Downtown and Denton’s historic core. This district contributes to a vibrant environment for pedestrians, bicyclists, and other modes of travel.

- [2] Additional height may be allowed with a specific use permit pursuant to Subsection 2.5.2: Specific Use Permit (SUP), and a viewshed study, if such study clearly demonstrates that any views of the Historic Courthouse are not blocked by the new structure(s) additional height.
3.3.3 **MR - Mixed-Use Regional**

A. **Purpose**
   The MR district is intended to provide a walkable urban center to augment the regional draw and image of Denton. Development may include national retailers, employment, restaurants, entertainment venues, and housing at the highest levels of scale and density within the City. This district ensures that development will complement and embrace existing viable uses, and raise the standard of design to increase regional draw, accommodate greater connectivity and mobility options, and create a sense of place. The MR district may be established in areas with the greatest regional access and is sensitive to the adjacent built and natural context.

[4] Additional height may be allowed with a specific use permit pursuant to Subsection 2.5.2: Specific Use Permit (SUP).
3.4 Corridor Districts

3.4.1 SC - Suburban Corridor

A. **Purpose**

The SC district is intended to provide moderate- to high-intensity commercial, office, and retail uses along high-traffic corridors. The SC district provides elevated building and landscape design, buildings oriented to the street, and appropriate buffering from adjacent neighborhoods. While the SC district is primarily auto-oriented, it provides a safe environment for pedestrians and cyclists.

| Building coverage (maximum) | 80 percent |

**Notes:**

[1] Buildings adjacent to a Residential zoning district shall comply with the standards in Subsection 7.10.6: Building Height in Transition Areas.
3.4.2 HC - Highway Corridor

A. Purpose

The HC district is intended to provide high-intensity commercial uses along the city's busiest and most visible thorough-fares. The HC district applies to areas along highly visible commercial corridors in the city where elevated design and aesthetic qualities are desired. While the HC district is primarily auto-oriented, it provides a safe environment for pedestrians and cyclists.

3.5 Other Nonresidential Districts

3.5.1 GO - General Office

A. Purpose
The GO district is intended to provide locations for a variety of workplaces and complementary uses. Principal uses include office and research and development and related supporting uses. The GO district provides area for flexible office space to encourage the establishment of research and development enterprises, start-ups, and opportunities for business innovation. This district applies to areas throughout the city that are in close proximity to commercial use areas and employment hubs.

[1] Buildings adjacent to a Residential zoning district shall comply with the standards in Subsection 7.10.6: Building Height in Transition Areas.
[2] Additional height may be allowed with a specific use permit pursuant to Subsection 2.5.2: Specific Use Permit (SUP)
3.5.2 LI - Light Industrial

A. Purpose
The LI district is intended to provide locations for a variety of light industrial and employment uses such as light manufacturing, assembly, fabrication, warehousing and distributing, indoor and outdoor storage, and a wide range of supporting commercial uses and activities. The LI district provides a variety of transportation options for access including transit, bicycle, and pedestrian facilities. The LI district provides appropriate transitions to surrounding uses and lower-intensity districts, and is sensitive to the adjacent built and natural context.

</tbody>
</table>

**Notes:**
[1] Buildings adjacent to a Residential zoning district shall comply with the standards in Subsection 7.10.6: Building Height in Transition Areas.
3.5.3 HI - Heavy Industrial

A. Purpose
The HI district is intended to provide locations suitable for development and operation of indoor and outdoor industrial, distribution, and manufacturing uses. The HI district applies to areas primarily west of Highway I-35 W near the Denton Enterprise Airport that supports the most intense industrial uses and may require access to major rail, truck, or aircraft shipping facilities. The HI district applies to areas that can accommodate the intensity of uses while also being sensitive to the adjacent built and natural context.

**Notes:**

[1] When adjacent to a zoning district in the Residential category pursuant to Table 3.1-A: Zoning District Designations, the minimum setback shall be 200 feet.
3.5.4 PF - Public Facilities

A. Purpose
The PF district is intended to provide adequate lands for public and quasi-public community uses and services, including but not limited to fire stations, schools, libraries, community centers, hospitals, civic buildings, open space, parks, utilities, and other public-related facilities.

</table>

**Notes:**

[1] Buildings adjacent to a Residential zoning district shall comply with the standards in Subsection 7.10.6: Building Height in Transition Areas.

[2] When adjacent to a zoning district in the Residential category pursuant to Table 3.1-A: Zoning District Designations, the minimum setback shall be 200 feet.

[3] Additional height may be allowed with a specific use permit pursuant to Subsection 2.5.2: Specific Use Permit (SUP)
### 3.6 PD - Planned Development District

#### 3.6.1 Purpose

This district is intended to provide an alternative zoning district and development process to accommodate substantial development for residential, commercial, professional, recreational, industrial, or other activities, including combinations of uses appropriately requiring flexibility under controlled conditions, not otherwise attainable under conventional base zoning districts.

#### 3.6.2 Review Procedure

Planned developments may be approved pursuant to the procedure and approval criteria in Subsection 2.7.3: Rezone to a Planned Development (PD) District.

#### 3.6.3 Planned Development Standards

- **A.** Unless specifically modified by the PD Plan during the rezoning to PD procedure established in Subsection 2.7.3: Rezone to a Planned Development (PD) District, the PD shall comply with all standards in this DDC, as amended.
- **B.** Where the PD standards conflict with the standards in this DDC, the regulations of the approved PD plan shall control.

### 3.7 Measurements and Exceptions

#### 3.7.1 Purpose

This section is intended to provide uniform measures for interpretation and enforcement of this DDC and to list any exceptions to the dimensional standards in this DDC.

#### 3.7.2 Lot and Site Requirements

- **A. Minimum Lot Dimensions**
  1. Any lot that is created, developed, used, or occupied must meet the minimum lot dimensions for the applicable zoning district, unless otherwise established in this DDC.
  2. Each townhome lot shall have a minimum lot area of 2,000 square feet per unit, minimum lot width of 20 feet, and a minimum lot depth of 60 feet. Provided, however, the overall townhome development shall have a minimum land area equal to or greater in size than the minimum lot area that would be required for the development of the equivalent number of single-family dwelling units in the applicable zoning district.
  3. Land needed to comply with the minimum lot dimensions or other standards in this DDC must not be sold or leased away from such lot.
  4. New lots must meet the lot dimensions in this subchapter and must comply with Subchapter 8: Subdivisions.

- **B. Number of Principal Buildings or Uses per Lot**
  1. No lot may contain more dwellings than are permitted by the applicable zoning district.
  2. Only one principal building shall be located on a single lot for the following land uses: single-family detached dwelling; duplex; townhome; triplex; and fourplex.
3. Multiple buildings may be permitted on a single lot for multi-family, mixed-use, and nonresidential uses if each building and site development complies with this DDC.

C. Alternate Standards in Cluster Subdivisions
Alternate lot size, lot width, and setback standards may be approved through development of a cluster subdivision pursuant to Subsection 8.3.4, Cluster Subdivisions.

3.7.3 Setbacks

A. Measurement of Setbacks
Every part of a required yard must be unobstructed from ground level to the sky unless otherwise exempted in this DDC. Setbacks are measured as stated in Subchapter 9: Definitions, under the term “setback.”

B. Contextual Setbacks in Residential Zoning Districts
If structures on two or more abutting lots (even if separated by an alley or private way) have yards that are less than the required yard for the district, the yard for the subject lot may be calculated as the mean average of the yards of the abutting structures.

Figure 3.7-A: Contextual Setbacks
C. **Corner Lots**

On corner lots, the required front yard setback must be observed along both streets upon which the building is located. For purposes of measuring setbacks, an alley is not considered a street.

![Figure 3.7-B: Corner Lot Setbacks](image)

D. **Exceptions to Setbacks**

1. The features listed in Table 3.7-A are permitted to project into the required setbacks of the applicable zoning district. The exceptions apply to all zoning districts unless otherwise stated. Any authorized projections must comply with all applicable building and fire codes.

2. Projections shall not extend or encroach into a public or private easement or right-of-way, nor obscure a required visual clearance area as described in paragraph 0.

<table>
<thead>

<th>Maximum Encroachment</th>
</tr>
</thead>
<tbody>
<tr>
<td>Accessibility ramps, lifts and access facilities</td>
<td>May be located within required yards. Ramps shall not be located in the public right-of-way without approval by the City.</td>
</tr>
<tr>
<td>Front porches and stoops</td>
<td>In all residential zoning districts, unenclosed front porches and stoops may extend into the required front setback up to eight feet, provided no part of the porch is closer than five feet from the front property line Railings or other features shall not deem a porch or stoop as enclosed.</td>
</tr>
<tr>
<td>Garages, side or rear entry</td>
<td>Side-entry garages may extend into the front yard setback, provided the garage is a least 10 feet from the front property line. Rear-entry garages may extend into the rear yard setback, provided the garage is at least 5 feet from the rear property line.</td>
</tr>
<tr>
<td>Ground-mounted mechanical equipment</td>
<td>May encroach five feet into required side and rear yards provided no element is located closer than two feet from any property line and the equipment complies with screening standards in Subsection 7.7.8, Walls, Fences, and Screening.</td>
</tr>
<tr>
<td>Incidental architectural features</td>
<td>Cornices, canopies, sunshades, chimneys, flues, belt courses, headers, sills, pilasters, lintels, bay or box windows, ornamental features, and other similar architectural features may project up to two feet into any required setback provided the projections are at least five feet from the property line.</td>
</tr>

<td>A swimming pool on a lot with a single-family dwelling may be constructed no closer than three (3) feet from the side and rear lot line and the swimming pool shall not be placed in the front yard and shall not encroach into or over an easement. A swimming pool on a lot with a single-family dwelling may be constructed no closer than five (5) feet from any other buildings and structures on the same lot.</td>
</tr>
<tr>
<td>Uncovered balconies and fire escapes</td>
<td>May encroach 18 inches into required side yard; four feet into required front or rear yard and shall comply with the applicable building coverage maximum.</td>
</tr>
<tr>
<td>Uncovered porches, slabs, patios, walks and steps</td>
<td>May encroach into required yards, but not closer than three feet from a rear or side property line, provided all components of the encroachment are no greater than 30 inches above finished grade.</td>
</tr>
</tbody>
</table>

3. Attached single-family dwellings sharing a common wall are not required to comply with side setback requirements, except for the outside walls of the end units.

**Figure 3.7-C: Attached Single Family Dwelling Setbacks**

---

### 3.7.4 Vision Clearance Area Requirements

No signs, structures, or vegetation in excess of two and one-half feet in height shall be placed in the vision clearance area as established in the Transportation Criteria Manual.

---

### 3.7.5 Building Height

**A. Measurement**

Heights referred to in this DDC shall be measured as stated in Section 9.2: Definitions, under the term “height, building or structure.”

**B. Buildings Adjacent to Residential Districts**

Buildings adjacent to any Residential zoning district shall comply with the standards in Subsection 7.10.6: Building Height in Transition Areas.
Subchapter 3: Zoning Districts
3.7 Measurements and Exceptions
3.7.6 Building Coverage

C. Exceptions to Height Standards
1. In the HC and GO districts, additional building height may be allowed with approval of a specific use permit (SUP).
2. In the MD district, additional building and WECS height may be allowed with an SUP and a viewshed study, provided such study clearly demonstrates that any views of the Historic Courthouse are not blocked by the new structures’ additional height.
3. Agricultural structures permitted by this DDC shall be permitted to project beyond the height requirements of the applicable zoning district.
4. The features listed in Table 3.7-B shall be permitted to project beyond maximum height requirements of the applicable zoning district.

</tr>
</tbody>
</table>

D. Special Height Limitations in Airport Controlled Area
Building and structure height may be further limited according to Section 4.5: MAO – Municipal Airport Overlay District.

3.7.6 Building Coverage

A. Building coverage referred to in this DDC shall be measured as stated in Section 9.2: Definitions, under the term “building coverage.”
B. Agricultural buildings shall not count toward building coverage.
C. The maximum building coverage may be increased up to 10 percent for residential uses that provide a side- or rear-entry garage.
D. The maximum building coverage for townhome lots shall be 85 percent.
3.7 Measurements and Exceptions

3.7.7 Floor Area and Square Footage

A. All areas within a structure including interior storage areas, closets, living areas, and bathrooms, garages, and interior and exterior walls shall be included in the calculation of floor area of a structure.

B. Gross square footage of a structure shall be measured from the outside of the exterior walls and shall include the area of the walls.

C. When there is more than one use within a structure, the square footage of each use shall be determined by the gross square footage of the use, plus a portion of any areas used in common. Such common areas shall be pro-rated on the basis of the square footage of each use in the structure, excluding the common areas.
Subchapter 4: Overlay and Historic Districts

4.1 Purpose
This subchapter establishes procedures and standards to allow the creation of Overlay and Historic Districts in Denton to protect and enhance specific lands and structures which, by virtue of their type or location, have characteristics which are distinct from lands and structures outside such special districts. The districts shall contain such reasonable and necessary requirements to ensure the protection and enhancement of said lands and structures.

4.2 Applicability of Underlying Zoning Districts
4.2.1 Land within an Overlay or Historic District shall remain part of the underlying zoning district designation established in Subchapter 3: Zoning Districts, and may, in addition, lie in one or more overlay districts in accordance with the designation of each.
4.2.2 Whenever any provision of the underlying zoning district is in conflict with the Overlay and/or Historic Districts, the provisions of the Overlay and/or Historic Districts shall govern.

4.3 Conflicts with Other Ordinances
4.3.1 To the extent the provisions of this section conflict with any other ordinances of the City of Denton, the provisions of this section shall govern. All other regulations and ordinances of the City of Denton not in conflict with this section shall remain in full force and effect.
4.3.2 Where the regulations of this section modify any provision of any other applicable ordinance, the words used in this section shall have the meaning defined in the provisions of the ordinance modified, unless the definition is otherwise provided in this section.

4.4 Creation and Amendments
4.4.1 Overlay Districts
The creation and amendments to an Overlay District shall be made pursuant to Subsection 2.7.4: Zoning Text Amendment, and Subsection 2.7.2: Zoning Map Amendment.

4.4.2 General Standards
Every recommendation to create or amend any Overlay or Historic District shall address the following, as applicable:

A. Statement of Purpose
   1. A statement of purpose specifying the nature of the special and substantial public interest and public welfare involved;
   2. Objectives to be promoted by creation of the Overlay or Historic District; and
   3. Imposition of the regulations and design standards proposed.

B. Proposed Boundary
   Proposed district boundaries, depicted on one or more maps, including the Official Zoning Map of City, which shall include all other zoning regulations applicable to the property(s) proposed for inclusion in the district.
C. Proposed Regulations

1. Regulations and/or design standards proposed to promote the special purposes of the Overlay or Historic District.

2. Regulations or design standards shall be designed to reasonably promote the purposes of the district, and may require or address any of the following, in addition to or in lieu of other regulations affecting property within the Overlay or Historic District:
   a. Protection of features designated as being of special concern within the district;
   b. Levels of permission for land use types within the district;
   c. Special performance standards, use-specific standards, and development regulations;
   d. Other matters as appropriate to promote the special public interests of the district.

4.5 MAO – Municipal Airport Overlay District

4.5.1 Purpose

The Municipal Airport Overlay (MAO) district is intended to regulate and restrict the height of structures and objects of natural growth and the use of property in the vicinity of the Denton Enterprise Airport to prevent the creation or establishment of obstructions that are a hazard to air navigation. Application of this district will help prevent the encroachment of noise sensitive or otherwise incompatible land uses which may endanger the health, safety, and welfare of the owners, occupants, or users of the land. This district is also intended to implement state and federal rules associated with land uses in the vicinity of airports. Such state and federal rules shall apply within the MAO district.

4.5.2 Municipal Airport Overlay District Established

A. Generally
The MAO district is the area generally located outside the airport boundaries and within a rectangle bounded by lines located no farther than one and one-half statute miles from the centerline of an instrument or primary runway and no farther than five statute miles from each end of the paved surface of precision instrument runways. Where only a portion of a lot or parcel is within the boundaries explained above, the entire parcel shall be subject to the MAO regulations.

B. Subdistricts Established
The MAO district imposes two types of overlay zoning districts that combine with existing and future zoning district regulations:

1. Airport Height Hazard District (AHHD)
The Airport Height Hazard District (AHHD), as established in Subsection 4.5.8, establishes height limitations on structures and natural objects within an area generally traversed by the flight tracks of aircraft using the Denton Enterprise Airport.

2. Airport Compatibility Land Use District (ACLUD)
The Airport Compatibility Land Use District (ACLUD), as established in Subsection 4.5.9, establishes land use compatibility regulations that prohibit certain types of land uses and that impose performance standards on other land uses that potentially are subject to noise impacts from aircraft operation in the vicinity of the airport.
4.5.3 **Applicability**

**A.** The requirements of this Section 4.5, shall apply to all lands lying within the city’s extraterritorial jurisdiction (ETJ) as well as to lands within city boundaries. For properties in the ETJ, the AHHD and the ACLUD regulations constitute zoning district regulations that shall be administered through this DDC.

**B.** Nothing contained in Subsection 4.5.4, shall be construed as permitting or intending to permit any construction, or alteration of any structure, or growth of any natural object in excess of any of the height limits established in Subsection 4.5.8C.

**C.** When a parcel of land lies within more than one airport zoning subdistrict, or only a portion of a parcel lies within an airport zoning district, the provisions of the most restrictive regulations shall apply to the use of land and structures for the entire parcel, except when:

1. It is determined by the Director that a structure is located within a single airport zoning subdistrict, then the provisions of that subdistrict shall apply to such structure; or

2. It is determined by the Director that a structure is located outside any airport zoning district, then the provisions of the standard zoning district in which the structure is located shall apply.

4.5.4 **Conflicts with Other Provisions**

**A.** Where there exists a conflict between any standard, restriction, limitation, requirement, or regulation prescribed by this section and any other applicable regulation, the provisions of this section shall govern and prevail; provided that the more stringent limitation or requirement shall control in the event of a conflict, with respect to the height of a structure or object of natural growth.

**B.** In the event of a conflict between the requirements of this DDC and any provision of state law, state law requirements shall prevail.

**C.** Consistent with TLGC, § 241.012, it is the intent of this section that federal laws or rules controlling the use of land located adjacent to or in the immediate vicinity of an airport, as they may be amended from time to time, that impose more stringent limitations than are imposed under provisions herein set forth, shall be applied to any application submitted under this section until such time as the city is able to conform its airport zoning regulations to such law or rules.

4.5.5 **Exemptions**

Unless otherwise provided in this DDC, the following shall be exempt from the provisions of this section:

**A.** **Areas in the Horizontal Zone and Conical Zone**

Any natural object(s) or structure(s) less than 75 feet of vertical height above the ground, except when, because of terrain, land contour, or topographic features, such object(s) or structure(s) would extend above the height limits established in Subsection 4.5.8C.

**B.** **Areas in the Approach Zone**

Any natural object(s) or structure(s) less than 75 feet of vertical height above the ground at a horizontal distance more than 4,200 feet from each end of the runway, except when such object or structure would extend above the height limit established in Subsection 4.5.8C.
4.5.6 Nonconformities

A. Generally
Whenever the Director determines that a nonconforming structure or natural object within the area subject to this section has been abandoned or more than 50 percent torn down, physically deteriorated, or decayed, no permit shall be granted that would allow such structure or natural object to exceed the applicable height limit or otherwise deviate from the zoning regulations of this DDC. In all other cases, the continuation, repair, reconstruction, or remodeling of non-conforming uses or structures shall be governed by Section 1.5, Nonconformities; provided, however, the Director shall apply the standards in this section.

B. Regulations Not Retroactive
The regulations prescribed by this section shall not be construed to require the removal, lowering, or other change or alteration of any structure or natural object not conforming to the regulations of this section, or otherwise interfere with the continuance of any nonconforming use. Nothing herein contained shall require any change in the construction, alteration or intended use of any structure, for which a complete application was accepted for filing prior to the effective date of this section, which is consistent with existing regulations and for which construction is diligently pursued.

C. Marking and Lighting
Notwithstanding Subsection 4.5.6B, the owner of any nonconforming structure or area is hereby required to permit the installation, operation, and maintenance hereon of such markers and lights as shall be deemed necessary by the Director, in order to indicate to the operators of aircraft in the vicinity of the airport, the presence of such airport hazards. Such markers and lights shall be installed, operated, and maintained at the expense of the city or the Federal Aviation Administration (FAA).

4.5.7 General Prohibition on Airport Hazards
Notwithstanding any other provisions of this section, no person shall use land or water within any zone established by this DDC in such a manner as to create electrical interference with navigational signals or radio communication between the airport and aircraft; make it difficult for pilots to distinguish between airport lights and other lighting; result in glare in the eyes of pilots using the airport; impair visibility in the vicinity of the airport; create bird strike hazards; or otherwise in any way endanger or interfere with the landing, taking off, or maneuvering of aircraft intending to use the airport.

4.5.8 AHHD – Airport Height Hazard District

A. District Established
There is hereby established an Airport Height Hazard District (AHHD) within that area lying beneath the Approach Surfaces, Transitional Surfaces, Horizontal Surface and Conical Surface of the Denton Enterprise Airport. The AHHD consists of the following subdistricts, which are depicted in Figure 4.5-1: Airport Height Hazard District Map, and which constitutes the zoning map for the district.
Figure 4.5-1: Airport Height Hazard District Map
B. Subdistrict Descriptions
The AHHD consists of the following subdistricts that are described by reference to definitions, rules, restrictions, and regulations, as may be amended from time to time, by the FAA, as follows:

1. Approach Zones
   Approach zones for runways 18L-36R and 18R-36L hereby are established beneath the approach surfaces at each runway end on the Denton Municipal Precision Instrument Airport for landings and takeoffs. The inner edge of the approach zone shall have a width of 1,000 feet which coincides with the width of the primary surface at a distance of 200 feet beyond each end of each runway, widening thereafter uniformly to a width of 16,000 feet at a horizontal distance of 50,000 feet beyond each end of the primary surface, its centerline being the continuation of the centerline of the runway.

2. Transitional Zones
   Transition zones hereby are established beneath the transition surface adjacent to runways 18L-36R and 18R-36L, and to each approach surface as indicated on the zoning map. Transition surfaces symmetrically located on either side of runways, have variable widths as shown in Figure 4.5-1: Airport Height Hazard District Map.

3. Horizontal Zone
   The horizontal zone hereby is established at the area beneath the horizontal surface of the airport.

4. Conical Zone
   The conical zone hereby is established as the area beneath the conical surface of the airport.

C. Height Limitations
Except as otherwise provided in this section, no person shall erect, alter, or maintain a structure, and no person shall allow a tree or other natural object to grow in excess of the applicable height limitations established herein for each airport height hazard subdistrict as follows:

1. Approach Zones
   For runways 18L-36R and 18R-36L:
   a. Beginning at the end of and at the elevation of the primary surface, one foot in height for each 50 feet in horizontal distance; and
   b. Beginning at a point 10,000 feet from the end of the primary surface and extending an additional 40,000 feet along the extended runway centerline, one foot in height for each 40 feet in horizontal distance.

2. Transitional Zones
   a. Beginning at the sides of and at the same elevation as the primary surface and the approach surface, and extending to a height of 150 feet above the airport elevation (660 feet above mean sea level), one foot in height for every seven feet in horizontal distance;
   b. Beginning at the sides of and at the same elevation as the approach surfaces, and extending to where they intersect the conical surface, one foot in height for every seven feet in horizontal distance; and
c. Where the precision instrument runway approach zone projects beyond the conical zone, and beginning at the sides of and at the same elevation as the approach surface, and extending a horizontal distance of 5,000 feet measured at 90 degree angles to the extended runway centerline, one foot in height for every seven feet in horizontal distance.

3. **Horizontal Zone**
   Within the horizontal zone, 150 feet in height above the airport elevation, or a height of 810 feet above mean sea level.

4. **Conical Zone**
   From the periphery of the horizontal zone and at heights between 150 and 350 feet above the airport elevation, one foot in height for every 20 feet in horizontal distance.

### 4.5.9 ACLUD - Airport Compatibility Land Use District

**A. District Established**
There is hereby established an Airport Compatibility Land Use District (ACLUD), consisting of two subdistricts (ACLUD-1 and ACLUD-2), the boundaries of which are shown in Figure 4.5-2: Airport Compatibility Land Use District Map, and which constitutes the zoning map for the district.
B. **Prohibited Uses**

   The following uses shall be prohibited within the ACLUD:

   1. **Educational Facilities**
      
      All educational uses, including but not limited to, business or trade schools, college or universities, public schools, and private schools are prohibited in the ACLUD; provided, however, that the following educational facilities are permitted within the district:
      
      a. Schools for flight instruction or for vocations associated with the airport, airplanes, or aviation related activities; and
      
      b. Facilities for employee or client training or instruction related to services or products associated with the business of the entity providing such training or instruction and which is not the primary business of such entity.

   2. **Healthcare Facilities**
      
      Healthcare facilities, including specifically hospital services, elderly housing, group homes, and group homes for the disabled are prohibited within the ACLUD.

C. **Subdistrict ACLUD-1**

   The following regulations apply within the ACLUD-1 subdistrict:
1. **Compatible Land Uses**
   All land uses allowed within the underlying zoning district or, within the ETJ, any land use not otherwise prohibited by this section shall be allowed within the ACLUD-1 subdistrict, except for new residential uses, which are expressly prohibited.

2. **Noise Mitigation**
   Any residential structure that was established prior to the effective date of this DDC and that is permitted to be repaired, rebuilt, or remodeled in accordance with the provisions of Section 1.5, *Nonconformities*, shall be repaired, rebuilt, or remodeled in compliance with the noise mitigation standards established in Subsection 4.5.10, *Noise Mitigation*.

### D. Subdistrict ACLUD-2

1. **Compatible Land Uses**
   All land uses allowed within the underlying zoning district or, within the ETJ, and any land use not otherwise prohibited by this section shall be allowed within the ACLUD-2 subdistrict.

2. **Performance Standards for Residential Uses**
   Property owners that propose to construct a new residential building, or who propose to repair, rebuild, or remodel an existing residential structure within the boundaries of the district, shall do one of the following:

   a. **Noise Mitigation Standards**
      Construct, repair, rebuild, or remodel the residential structure in accordance with the noise mitigation standards in Subsection 4.5.10, *Noise Mitigation*; or

   b. **Avigation Easement**
      Execute an avigation easement, approved as to form by the City Attorney, conveying to the City of Denton an unobstructed right-of-way for the passage of all aircraft and rights to cause within such easement such noise, vibration, fumes, dust, fuel particles and all other effects that may be caused by the operating or aircraft landing at, taking off from, or operating at, the Denton Enterprise Airport.

### 4.5.10 Noise Mitigation

**A.** Noise mitigation shall be required in accordance with FAA requirements.

**B.** The Building Official may approve alternative standards upon the submission of plans signed by a qualified acoustical engineer certifying that the alternative standard will reduce outside noise levels to the day-night average sound level (Ldn) of 45 decibels (dB) or less inside the building.
Subchapter 4: Overlay and Historic Districts
4.6 FSO - Fry Street Overlay District
4.6.1 Purpose

The Fry Street Overlay District (FSO) is intended to promote the public peace, safety, cleanliness, and general welfare for community members and patrons of the FSO district by regulating off-street and remote parking, the location of solid waste containers, and the regulation of signs, setbacks, and residential and commercial density.

4.6.2 Fry Street Overlay District Established

A. Generally
The FSO district, as established in Figure 4.6-1: Fry Street Overlay District Area Boundary and Subareas, is the area approximately 12.42 acres in size which is bounded by Welch Street to the east, Oak Street to the north, Ave B to the northwest, Ave A to the southwest, Mulberry Street to the south, and Hickory to the southwest.

B. Subareas Established
The FSO district is further divided into subareas A and B, as depicted in Figure 4.6-1: Fry Street Overlay District Area Boundary and Subareas. Each subarea is subject to distinct regulations as provided in this section.

Figure 4.6-1: Fry Street Overlay District Area Boundary and Subareas
4.6.3 **Applicability**

The requirements of this Section 0, shall apply to all buildings, structures, sites, and properties within the FSO district as described in Subsection 4.6.2.

4.6.4 **FSO District Dimensional Standards**

The dimensional standards established in Subchapter 3: *Zoning Districts*, shall apply to the FSO district, except as modified in Table 4.6-A below:

<table>

</tbody>
</table>

**Notes:**

[2] Applies to all floors that include residential dwellings.

[3] Overall building height (including HVAC equipment, roof systems, vent stacks, chimneys, etc.) shall not exceed 45 feet in height.

[4] Overall building height (including HVAC equipment, roof systems, vent stacks, chimneys, etc.) shall not exceed 55 feet. Parking structures shall not exceed five stories, or 60 feet in height (mechanical equipment, including HVAC equipment, roof systems, vent stacks, and satellite dishes, may be mounted on the top story of parking structures, provided they are not visible from any adjacent public right-of-way).

[5] For mixed-uses that include residential on the top floor of any structure.

[6] Densities shown are maximum allowable, after observing all other site development standards (i.e., floor area ratio, building coverage, parking, height, setbacks, etc.).

4.6.5 **Permitted Uses**

In addition to the uses listed in Table 5.2-A: *Table of Allowed Uses*, for each base zoning district, multifamily dwelling uses shall be allowed within the FSO district.
4.6.6 Development Standards

A. Off-Street Parking
The standards established in Section 7.9, Parking and Loading, shall apply to the FSO district, except as follows:

1. Shared and/or Off-Site Parking
Remote off-street parking to serve a building or use within the FSO district may be provided on a tract or parcel of land provided that the required off-street parking space shall be within 1,000 feet of the building or use being served and shall provide convenient pedestrian access to the building or use being served.

2. Minimum Parking Required for Nonresidential Uses
Nonresidential uses including, but not limited to restaurant, retail, private club, and on-premises sale of beer and/or wine shall provide a minimum of one parking space for each 400 square feet of floor area, or one space for each six seats under maximum seating arrangements, whichever is greater.

3. Additional Standards for Subarea A
The minimum number of parking stalls required for multifamily residential development in Subarea A shall be:
   a. Efficiency units: One and one-fourth (1.25) spaces per dwelling unit.
   b. Units with one bedroom: One and one-half (1.50) spaces per dwelling unit.
   c. Units with two or more bedrooms: One space per bedroom.
   d. Fraternities, sororities, boarding and lodging houses: One space per bedroom.

B. Solid Waste Containers

1. Generally
   a. Location
      Solid waste containers shall be located off the street in centralized locations, to the rear of buildings served by each container, and shall be screened with devices made of masonry or wood.
   b. Consolidation
      Each owner, occupant, tenant, or lessee of any business, commercial, or institutional property, or other property not served by residential solid waste collection service, shall contract with the city for shared or consolidated commercial solid waste collection and disposal services, unless otherwise required by ordinance.

2. Additional Standards for Subarea B
Development in Subarea B shall provide adequate area to accommodate two trash compactors to serve the subarea, in a location specified by the approved site plan for the subarea.

4.6.7 Additional Development Standards for Subarea B

A. Landscaping
Subarea B shall provide landscaping as depicted in in Figure 4.6-2. Copies can be found in the Development Services Department.
Subchapter 4: Overlay and Historic Districts
4.6 FSO - Fry Street Overlay District
4.6.7 Additional Development Standards for Subarea B

Figure 4.6-2: Fry Street Overlay District Subarea B Landscaping Plan
B. Site Design

Construction shall substantially conform to the site plan shown below in Figure 4.6-3. Copies can be found in the Development Services Department.

**Figure 4.6-3: Fry Street Overlay District Subarea B Site Plan**

C. Parking Structures

Parking Structures shall be provided with a facade designed to mimic the adjacent buildings within the subarea, so as to assist in integrating the structure into the balance of the subarea, and to assist in camouflaging the structure from the public right-of-way.

D. Building Design

The following requirements shall apply to Subarea B, in addition to any other requirements in this DDC or other city ordinances:

1. Residential units fronting Welch Street shall incorporate sloped roof pitches.
2. Each principal facade or massing area shall incorporate a minimum of two of the features identified in Figure 4.6-4: Subarea B Architectural Image Board, including but not limited to:
   a. Store front design;
   b. Awnings;
   c. Stoops on the street level;
   d. Accent bay windows;
   e. Cornice details;
   f. Brick facades with flat roof lines;
g. The incorporation of a bench and street tree in front of the building;
h. Arch details; and
i. Shutters.

Figure 4.6-4: Subarea B Architectural Image Board

4.6.8 Sign Regulations

The provisions of Subpart B, Chapter 33: Signs and Advertising Devices, of the City Code of Ordinances, as hereafter amended, superseded, or replaced, shall apply, except as modified for each subarea below:

A. Wall Signs

1. Subarea A
   a. Mounting and Orientation
      All signs in Subarea A shall be wall mounted signs, mounted parallel with, and not perpendicular to, the face of the wall upon which the sign is secured.
   b. Mixed-Uses with Residential Component
      Signs associated with mixed uses in subarea A shall be allowed only on those stories of a building that include non-residential uses.

2. Subarea B
   Wall signs in Subarea B may be mounted perpendicular to building faces, provided they do not encroach into public rights-of-way.
B. Ground and Monument Signs

1. Subarea A
   Ground and monument signs are prohibited in Subarea A.

2. Subarea B
   Ground and monument signs may be allowed in Subarea B subject to the following standards:
   
   a. Size and Location
      Monument signs, not exceeding 15 square feet of effective area, may be permitted at entrances to mixed-use developments, as depicted in the site plan for Subarea B. (See Figure 4.6-3.)

   b. Design
      Signs in Subarea B shall be in a style and size consistent with the conceptual designs provided in Figure 4.6-5.

   Figure 4.6-5: Subarea B Conceptual Sign Renderings

4.6.9 Minor Amendments

A. Upon request of the applicant, the Director may authorize minor amendments to the site or landscape plan so long as such minor amendments do not change the land use or substantially change the character, development standards, or design of the development as shown on the approved site or landscape plans. For purposes of this provision, a “substantial change” shall mean a change which will increase the number of proposed dwelling units or bedrooms, height, or number of stories; or decrease the amount of required off-street parking spaces.

B. The Director shall make such authorization only in writing and such document shall be placed in the ordinance file governing the specific plan.
4.7 ULD – Unicorn Lake Overlay District

4.7.1 Purpose

The Unicorn Lake Overlay District (ULD) is intended to stabilize and improve property values, ensure compatibility of new construction with the existing scale and characteristics of surrounding properties, and balance the economic development goals and the environmental goals of the city.

4.7.2 Unicorn Lake Overlay District Established

The ULD district, as established in Subchapter 3: Zoning Districts, is the area depicted in Figure 4.7-1 below.

Figure 4.7-1: Unicorn Lake District Area Boundary
4.7.3 **Applicability**

The standards in this Section 4.7 shall apply to all property within the ULD district boundaries, unless specifically modified herein.

4.7.4 **ULD District Dimensional Standards**

The dimensional standards established in Subchapter 3: *Zoning Districts*, shall apply to the ULD district, except as modified in Table 4.7-A: *Unicorn Lake Overlay District Dimensional Standards*, below:

<table>
<thead>
<tr>
<th>Table 4.7-A: Unicorn Lake Overlay District Dimensional Standards</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>LOT DIMENSIONS (MINIMUM)</strong></td>
</tr>
<tr>
<td>Lot area</td>

</tr>
<tr>
<td>Building height (maximum)</td>
</tr>
<tr>
<td>Building coverage (maximum)</td>
</tr>
<tr>
<td>Landscaped area (minimum)</td>
</tr>
</tbody>
</table>

Notes:

[1] The minimum yard for a non-single-family use abutting a single-family use or district shall be 10 feet, plus one foot for each foot of building height above 20 feet.

[2] Any square footage under the roof shall be included except for covered patios and porches.

4.7.5 **Permitted Uses**

The land uses allowed in the MN zoning district as provided in Table 5.2-A: *Table of Allowed Uses*, are allowed in the ULD district, and are restricted to the areas shown in the attachments in Ord. No. 2006-0139 from which this section derives and the following standards:

A. A maximum of 112 single-family dwelling units, and any accessory uses to such dwelling units, including an amenity center;

B. Gas wells, including drilling operations and uses accessory to gas wells; and

C. Administrative, professional, or government offices not to exceed a total of 8,000 square feet, and any accessory uses to such offices.
4.7.6 Development Standards

Any applicable regulations for development of property in the underlying zoning district are applicable to the ULD district with the following exceptions:

A. Private Streets

1. Generally
   a. Except as otherwise provided by this DDC, private streets and sidewalks shall be designed and constructed according to public street standards.
   b. In the event any of the standards of this section fall below any applicable city standards, the minimum standards set by ASHTO shall apply. For purposes of applying ASHTO standards, Clubhouse Drive shall be considered an urban collector.
   c. A private street system with gated access may be constructed to serve the property.
   d. Clubhouse Drive shall be a public street.

2. Deed Restrictions Required
   a. Prior to the recordation of any final plat allowing the construction of a private street system, deed restrictions for the property shall be recorded in the deed records of Denton County containing provisions in substantially the same form as the attachments in Ord. No. 2006-0139 from which this section derives:
      i. Article II (and related definitional provisions);
      ii. Section 4.10;
      iii. The provisions of Section 6.02 requiring that liability insurance be obtained in an amount approved by the City, and naming the City as an additional insured;
      iv. The provisions of Section 10.03 precluding amendment (without City consent) of any of the provisions which specifically require City consent to an amendment; and
      v. Section 10.12.

3. Design Standards
   Notwithstanding any other regulation to the contrary in this DDC or city criteria manuals, the following requirements shall apply to private streets:
   a. The maximum street grade for Clubhouse Drive shall be eight percent.
   b. The maximum street grade within 60 feet of an intersection shall be eight percent.
   c. No traffic calming features are required.
   d. Cul-de-sacs may be a maximum of 300 feet in length. Cul-de-sacs shall have a minimum radius of 50 feet.
   e. Barrier free ramps shall be required at intersection curb returns.
   f. All private streets shall have a total minimum right-of-way of 50 feet.

4. Access and Connectivity
   Discontinuity with other existing or future neighborhoods is unavoidable due to adjacent conditions and constraints including:
   a. An existing subdivision to the west of the property that does not have street stubs to connect to;
b. Flood plain and lake areas to the east of the property, which present a significant physical barrier; and

c. State school property to the south of the property that does not, and likely will never, provide street connection points to the property.

5. The proposed ingress and egress for the property consists of two streets directly connecting to a collector roadway (Clubhouse Drive) that provides adequate ingress and egress for a development of 106 single-family lots. When developed for single-family uses, the property shall contain fewer units than allowed under the prior zoning, thus mitigating any concern regarding the number of ingress and egress points associated with the property. If the property is developed with any uses other than detached single-family uses, the adequacy findings of paragraph 4.7.6A.4 shall not apply.

B. Utilities

1. All water and sewer lines that serve the property shall be publicly owned and maintained and shall be designed and built according to city standards.

2. A public utility easement or other adequate water and sewer easement shall be dedicated to the City of Denton for all water and sewer lines.

3. Utilities may be located within a public utility easement or other adequate water and sewer easement dedicated to the City of Denton as shown on the attachments in Ord. No. 2006-0139 from which this section derives.

4. The city is not responsible for repairing damage to private streets resulting from city repairs to utilities located underneath the street paving. However, if the city makes such repairs, the city shall first give the home owners association the option of paying to upgrade the repair work so that the streets are repaired to city standards.

C. Pedestrian Access

Development within the ULD district is exempt from the requirement to provide pedestrian access by linking to any adjacent sidewalk(s), multi-use path(s), or public transportation stops.

D. Nonresidential and Mixed-Use Building Orientation

The alternatives authorized under paragraph 7.10.5A.3 shall not apply to the ULD district.

E. Single-Family Building Design

1. Orientation
   Primary entrances shall face the street and sidewalk.

2. Architectural Variety
   a. No elevation shall be repeated more frequently than every fifth lot on the same side of the street.
   b. No elevation shall be repeated on the lot directly across the street or next door to the lot directly across the street.

3. Building Mass and Form
   Buildings shall incorporate at least three of the following design features to provide visual relief along the front of the residence:
   a. Dormers;
   b. Gables;
c. Recessed entries, a minimum of three feet deep;
d. Covered front porches;
e. Cupolas;
f. Architectural pillars or posts;
g. Bay window, a minimum 24-inch projection;
h. Clay tile, slate, copper, or high definition composition roofing materials;
i. Fireplace chimneys matching exterior finish of home;
j. Windows and doors made of wood, metal clad or metal with bronze anodized finish;
k. Decorative wrought iron or wood railings as extensions of the architecture of the home;
l. Trim and accent colors that are dark, rich earth tones that come from stains and refined woods, medium browns, or medium to dark greens;
m. Four to twelve (4:12) to twelve to twelve (12:12) single pitch roofs or double pitch roofs up to twelve to twelve (12:12), with shed roofs used only as secondary elements; and/or
n. A minimum 10 foot first floor wall height and minimum nine foot second floor wall height.

4. Garage Design
   a. For front-entry garages, the total width of the garage door(s) shall not occupy more than 40 percent of the ground floor building frontage, unless the garage door is located at least 30 feet behind the front of the house.
   b. Attached front-entry garages shall not extend beyond the front building wall, except side load or J-swing garages.

5. Building Transparency/Windows
   Windows shall be provided with trim or shall be recessed. Windows shall not be flush with exterior wall treatment.

6. Building Materials
   a. Exterior finishes shall consist of the following materials:
      i. Stone;
      ii. Brick;
      iii. Plaster with stone; and/or
      iv. Wood.
   b. Siding and exterior insulation and finish system (EIFS) shall be prohibited.

F. Tree Preservation
   Development within the ULD is exempt from the standards in Subsection 7.7.4: Tree Preservation.

G. Buffer Requirements
   1. A minimum buffer of 50 feet in width, in the location shown on the attachments in Ord. No. 2006-0139 from which this section derives, must be provided. Alterations to the required buffer area are prohibited except as necessary to do the following:
Subchapter 4: Overlay and Historic Districts

4.8 RZR – Rayzor Ranch Overlay District

4.9.1 Purpose

Denton, Texas – Denton Development Code

Print Date: December 12, 2019

a. Accommodate drainage flows from adjacent and upstream property and meet all applicable city drainage requirements;
b. Construct a fence or wall along the boundary of the property;
c. Install a retaining wall along the east line of the buffer, if necessary; and
d. Remove dangerous, diseased, or dead trees from the buffer.

2. The only machinery that may be used in the required buffer to do the work in (1) above is machinery that is reasonably necessary and appropriate to the scope of work being performed, as determined by the Director.

H. Clubhouse Drive

No additional lanes are required on Clubhouse Drive to serve single-family development, whether an additional lane is for the purpose of providing a turn lane or bus lane or for any other purpose.

4.8 RZR – Rayzor Ranch Overlay District

Please see Appendix A: Rayzor Ranch Overlay District, for development regulations governing the Rayzor Ranch Overlay District.

4.9 Historic Landmark Preservation and Historic Districts

4.9.1 Purpose

The City Council hereby finds as a matter of public policy that the protection enhancement, preservation and use of historic landmarks is a public necessity and is required in the interest of culture, prosperity, education and general welfare in order to:

A. Protect, enhance, promote, and perpetuate historic landmarks which represent or reflect distinctive and important elements of the city's and state's architectural, archeological, cultural, social, economic, ethnic and political history and to develop appropriate settings for such places.
B. Safeguard the city's historic and cultural heritage, as embodied and reflected in such historic landmarks by appropriate regulations;
C. Stabilize and improve property values in such locations;
D. Foster civic pride in the beauty and accomplishments of the past;
E. Protect and enhance the city's attractions to tourists and visitors and provide incidental support and stimulus to business and industry;
F. Strengthen the economy of the city;
G. Promote the use of historic landmarks for the culture, prosperity, education, and general welfare of the people of the city and visitors of the city.

4.9.2 Penalty

A. It shall be unlawful to construct, reconstruct, structurally alter, remodel, renovate, restore, demolish, raze, or maintain any building, structure or land with a historic landmark designation or located in a historic or conservation district in violation of the provisions of this DDC, and the city in addition to other remedies, may institute any appropriate action or proceedings to prevent such unlawful construction, restoration, demolition, razing, or maintenance to restrain, correct or
abate such violation to prevent any illegal act, business or maintenance in and about such premises.

B. Any person violating any provision of this section shall be guilty of a misdemeanor and shall be punished as provided in Section 1.6, Enforcement.

4.9.3 Enforcement

A. No person shall construct, reconstruct, alter, remodel, renovate, restore, demolish, raze, or maintain any building, structure or land with a Historic Landmark designation or a building, structure or land located in a locally designated Historic or Conservation District unless application is made for a Certificate of Appropriateness (COA) for said work and such a certificate is granted as provided in Subsection 2.9.2, and appropriate construction or demolition permits are obtained.

B. The city in addition to other remedies, may institute any appropriate action or proceedings to prevent such unlawful construction, restoration, demolition, razing or maintenance to restrain, correct or abate such violation to prevent any illegal act, business or maintenance in an about such premises.

C. Other regulations applicable to Historic Landmarks, Conservation Districts, and Historic Districts as contained in this DDC shall continue to apply, except as specifically modified in this section.

4.9.4 Oak-Hickory Historic District

A. Purpose
The purpose of this subsection is to ensure the protection and preservation of the Oak-Hickory Historic District by providing regulations for the use, construction, alteration, repair, improvement and alteration of buildings, structures, properties and sites within the district. All properties within the district must comply with the underlying zoning district and use classification regulations.
B. **Boundaries**

The Oak-Hickory Historic District is generally bounded by Hickory Street to south, N. Welch Street to the west, Pearl Street to the north, and Williams Street to the east as established by Ordinance No. 87-224. Major Public Streets in the District are West Oak, West Hickory, Mounts, Denton, Pearl and Fulton Streets.

![Figure 4.9-1: Approximate Boundaries of the Oak-Hickory Historic District](image)

C. **Architectural Requirements**

Architectural requirements in the Oak-Hickory Historic District shall be as follows:

1. **Principal Structure**
   The principal structure must be compatible in scale with principal structures existing in the district. The combined square footage of all structures on a given lot may not exceed 50 percent building coverage. Compatibility or the appropriateness with respect to additions or alterations to an existing structure shall be determined by comparison with historical photographs or documentation whenever available.

2. **Accessory Buildings**
   Accessory buildings which are visible from any public street, as determined by the Historic Preservation Officer, must be compatible with the scale, shape, roof form, materials, detailing and color of the main building. The combined square footage of all structures on a given lot may not exceed 50 percent of the square footage of said lot. Compatibility and or the appropriateness with respect to additions or alterations to an existing structure shall be determined by comparison with historical photographs or documentation whenever available.

3. **Architectural Detail**
   Materials, colors, structural, and decoration elements and the manner in which they are used, applied or joined together must be compatible with nearby and adjacent structures.
4. **Destruction**
   If the exterior of historic structures are to be altered and if previous alterations have modified the original design, then the alteration process shall return the structure to a form based on historic documentation. In the case of destruction by natural forces, replacement structures and or repairs shall conform with the original form based on historical documentation, or if none exists, shall conform in scale and proportion to the remaining structure and or the scale and proportion of structures similarly designed.

5. **New Construction and Additions**
   Generally, all buildings must be placed so as to not adversely affect the rhythm of spaces between buildings on the block. Additions and or replacement buildings shall have a front setback that is the average of the adjacent lots of contributing buildings.

6. **Chimneys**
   All chimneys must be compatible with the style of the proposed building. Chimneys must be constructed of brick, stucco, stone, or other materials compatible in texture, color, and style with the proposed main building.

7. **Additions**
   All additions to a building must be compatible with the dominant horizontal or vertical characteristics, scale, shape, roof form, materials, detailing, and color of the existing building.

8. **Color**
   Structures in the Oak-Hickory Historic District may be painted any color from the following paint manufacturer’s preservation color pallets: Sherwin Williams America’s Heritage Historical Exterior Colors Pallet, Valspar Paint National Trust Historic Colors, Pittsburgh Paints Historic Collection, or similarly intended pallets. Any paint brand is allowed. Fluorescent and metallic colors are not permitted on the exterior of any structure in the district. The Historic Preservation Officer may administratively approve repainting of homes in this District.

   a. **Dominant and Trim Colors**
      All structures must have a dominant color which shall not be of vivid saturation. The colors of a structure must be complementary to each other and the overall character of the main building.

   b. **Gutters and Downspouts**
      Gutters and downspouts must be of a color that matches or complements the color scheme of the main building.

   c. **Roof Colors**
      Roof colors must complement the style and overall color scheme of the structure.

   d. **Masonry and Brick Surfaces**
      Masonry and brick surfaces not previously painted must not be painted unless it is determined that:
      i. The painting is absolutely necessary to restore or preserve the masonry or brick; or
ii. The color and texture of replacement masonry or brick cannot be matched with that of the existing masonry or brick surface.

e. **Stain**
The use and color of stain must be typical of the style and period of the structure.

9. **Façade Materials**
   a. **Generally**
The permitted façade materials are brick, wood siding, wood, stone, and stucco. The use of cementitious siding is also permitted on new construction and accessory buildings. Artificial facsimiles of these materials will be considered on a case-by-case basis as material technologies progress. All façade treatments and materials must be typical of the style and period of the main building.

b. **Wood Façades**
Existing wood façades must be preserved as wood façades.

10. **Front Entrances and Porches**
   a. **Detailing**
Railings, moldings, tile work, carvings, and other detailing and architectural decorations must be applied in a manner typical of the style and period of the main building.

b. **Enclosures**
A front entrance or porch may not be enclosed with any material, including iron bars, glass, or mesh screening.

c. **Façade Openings**
New porches must not obscure or conceal any façade openings in the main buildings.

d. **Floor Coverings**
Carpeting is not permitted as a porch floor or step covering. Doormats are exempt from this requirement.

e. **Style**
Each proposed main building must have a front porch or entry treatment with a shape, roof form, materials, and colors that are typical of the style of the proposed main building. A front entry or porch must reflect the dominant horizontal and vertical characteristics of the proposed main building.

11. **Roof Forms**
   a. **Material and Colors**
Roof material and colors must complement the style and overall color scheme of the structure.

   b. **Patterns**
Roof patterns must be typical of the style and period of the main building.
c. **Slope and Pitch**
   The degree and direction of the roof slope and pitch must be typical of the style and period of the main building.

d. **Skylights and Solar Panels**
   The HLC may allow skylights and solar panels on a building if their placement does not have an adverse effect on the architecture of a building or the District as a whole. Skylights are permitted on the rear of accessory buildings only.

12. **Windows and Doors**
   a. **Front Façade Openings**
      The location and size of windows and doors in proposed façades must be compatible in scale with the typical style and period of the main building.
   
b. **Glass**
      Reflective, tinted, and mirrored glass and plastic are not permitted in any opening.
   
c. **Screen, Storm Doors, and Storm Windows**
      Screens, storm doors, and storm windows may be permitted if:
      i. Their frames are painted to match or complement the color scheme of the main building; and
      ii. They do not obscure significant features of the windows and doors they cover.
   
d. **Security and Ornamental Bars**
      Security and ornamental bars are only permitted on the exterior of an accessory building, the rear façade of the main building and the interior of the building.
   
e. **Shutters**
      Shutters must be typical of the style of the proposed main building and appear to be installed in a manner to perform their intended functions.
   
f. **Style**
      All windows and doors in the front façade of the main building must be proportionally balanced in a manner typical of the style and period of the building.
   
g. **Size**
      The size and proportion of window and door openings located on the front and sides of the main building must be typical of the style and period of the main building.
   
h. **Frames**
      The frames of the windows must be trimmed in a manner typical of the style and period of the building.
   
i. **Openings**
      All windows, doors, and lights in the front and side façades of the main building must be typical of the style and period of the building. Sidelights must be compatible with the door.
13. **Outdoor Lighting**
   Outdoor light fixtures must be compatible with the style and period of the main building and not obscure or conflict with significant architectural details of the building.

D. **Fences**
   Fences are not mandatory; however, when installed or replaced, they shall comply with Subsection 7.7.8: *Walls, Fences, and Screening*, and shall require an administratively approved COA.
   
   1. **Color and Style**
      Fences must be of a color, style, and material that is compatible to the main building.
   
   2. **Masonry Columns and Bases**
      The color, texture, pattern, and dimensions of masonry and the color, width, type, and elevation of mortar joints in a fence column or base must match the masonry and mortar joints of the main building.

E. **Signs**
   All signs located within the Oak-Hickory Historic District shall be subject to the provisions of Subpart B, Chapter 33, of the Code of Ordinances, except as modified as follows:
   
   1. **Signs Prohibited**
      Ground, roof, projecting, portable, and off-premises signs are prohibited.
   
   2. **Wall Sign Regulations**
      a. Only one wall sign per premises is permitted.
      b. No wall sign shall have a maximum dimension that is greater than two feet, measured along the greater distance of any one line which defines the effective area of the sign.
   
   3. **Address or Name Signs**
      The sign regulations of this section shall not apply to the signs or numbers which are used solely to identify the street address of the premises or they identify by name the occupants of a residential building.
   
   4. **Approval Procedure for Signs**
      No signs shall be constructed or located, and no existing wall sign shall be altered, until a COA is issued in accordance with the procedure applicable to alterations or changes of the exterior architectural features of buildings, and a sign permit is obtained as required by Subpart B, Chapter 33, of the Code of Ordinances.

F. **Parking**
   The provisions of this DDC applicable to parking shall apply to the Oak-Hickory District, except as modified as follows:
   
   1. **Location**
      All off-street parking spaces for any building used as a multifamily dwelling or for a nonresidential use shall be located between the building fronting the public street and the rear property line.
   
   2. **Number of Parking Spaces**
      Each specified use shall provide the following number of parking spaces:
      a. Multifamily buildings shall have a minimum of two parking spaces for each dwelling unit.
b. Nonresidential uses shall provide one and one-half times the number of parking spaces required for that use as established in Section 7.9: Parking and Loading.

4.9.5 Bell Avenue Historic District

A. Purpose
The purpose of establishing the Bell Avenue Historic District is to safeguard the heritage of the City of Denton by preserving the Bell Avenue area of the city. The area contains landmarks, buildings, and/or sites which reflect elements of the city's cultural, social, economic, political, or architectural or archeological history. The Bell Avenue Historic is also intended to: ensure compatibility of new construction and structural alterations with the existing scale and characteristics of surrounding properties; foster civic pride in the beauty and accomplishments of the past; and identify and promote the use of historic resources for the education, pleasure, and welfare of citizens of the City of Denton.

B. Boundaries
The Bell Avenue Historic District includes all the properties that front Bell Avenue between East University Drive and East Sherman Drive, as established by Ordinance No. 2005-099.

Figure 4.9-2: Approximate Boundaries of the Bell Avenue Historic District

C. Architectural Regulations
Architectural requirements in the Bell Avenue Historic District shall be as follows:
1. **Principal Structures**
   Principal structures must be compatible in scale with principal structures existing in the district.

2. **Accessory Buildings**
   Accessory buildings which are visible from any public street, other than an alley, as determined by the Historic Preservation Officer, must be compatible with the scale, shape, roof form, materials, detailing, and color of the main building.

3. **Architectural Detail**
   Materials, colors, structural, and decoration elements and the manner in which they are used, applied, or joined together must be compatible with nearby and adjacent structures.

4. **Additions**
   All additions to a building must be compatible with the dominant horizontal or vertical characteristics, scale, shape, roof form, materials, detailing and color of the existing building.

5. **Color**
   Colors of all structures should be complementary to each other and the overall character of the main building. The Historic Preservation Officer may administratively approve re-painting of homes in this District.

6. **Façade Materials**
   a. The permitted façade materials are brick, wood siding, wood, stone, and stucco. The use of cementitious siding is also permitted on new construction and accessory buildings. Artificial facsimiles of these materials will be considered on a case-by-case basis as material technologies progress. All façade treatments and materials must be typical of the style and period of the main building.
   b. Retain significant character defining wooden or metal façade elements. Examples include cornice brackets, gingerbread, decorative trim elements, ornamental barge/fascia board, and soffit.

7. **Historic Architectural Elements**
   Historic architectural elements of the façade are to be preserved if they are still historically accurate at the time of the creation of the District. Every effort should be made to repair damaged portions of original materials.

8. **Roof Material and Colors**
   Roof materials and colors must complement the style and overall scheme of the structure.
   a. Existing roofs that are visible from the public right-of-way should retain their profile as it relates to shape and slope. Appropriate roof treatments include dimensional shingles, real or synthetic slate shingles, or standing seam metal.
   b. Historic systems that are integral to the roof, such as flashing, and leader/conductor boxes, built-in gutters, downspouts or snow guards, should be retained and maintained on a regular basis, as these types of systems often were crafted of heavy gauge, resilient materials such as copper or zinc, and generally outperform modern materials, as well as retain a patina and contribute to the appearance of the structure.
c. Buildings that incorporate a sloped roof, such as a gable and/or hipped roof, often feature decorative elements that should be retained, including but not limited to, roof cresting, ridge caps, and finials.

9. **Fencing**
   A certificate of appropriateness is not required to install a fence in the Bell Avenue Historic District; however fencing shall comply with Subsection 7.7.8: Walls, Fences, and Screening.

10. **Doors**
    Replacement doors should be sized to fit in the existing opening. The opening should not be altered so as to accept either a smaller door (e.g., filling in excess space with material such as lumber, bricks, or cement blocks) or to facilitate a larger door or doors (e.g., knocking out part of the surrounding wall and reframing the opening).

11. **Windows**
    a. Window openings should not be altered to accommodate replacement windows (e.g., “blocking down” or “blocking in” the opening).
    b. Replacement windows should relate to and be appropriate for the age and architectural style of the structure.
    c. In situations where original windows remain, every effort should be made to repair such windows, rather than replace them outright.

### 4.9.6 West Oak Area Historic District

**A. Purpose**

The purpose of the West Oak Area Historic District is to ensure the protection and preservation of the West Oak Area Historic District by providing regulations for the use, construction, alteration, repair, improvement, and alteration of buildings, structures, properties and sites within the District.
Subchapter 4: Overlay and Historic Districts
4.9 Historic Landmark Preservation and Historic Districts
4.9.6 West Oak Area Historic District

B. **Boundaries**
The West Oak Area Historic District is generally bounded by Oak Street to the south, Thomas Street to the west, Houston Place to the north, and Jagoe Street to the east, as established by Ordinance No. 2008-136.

![Figure 4.9-3: Approximate Boundaries of the West Oak Area Historic District](image)

C. **Architectural Requirements**
Architectural requirements in the West Oak Area Historic District shall be as follows:

1. **Principal Structure**
   Principal structures must be compatible in scale with the principal structures existing in the district.

2. **Accessory Buildings**
   Accessory buildings which are visible from any public street, other than an alley, as determined by the Historic Preservation Officer, must be compatible with the scale, shape, roof form, materials, detailing, and color of the main building.

3. **Architectural Detail**
   Materials, colors, structural, and decoration elements and the manner in which they are used, applied, or joined together must be compatible with nearby and adjacent structures.

4. **Awnings**
   Metal and corrugated plastic awnings are only permitted on an accessory building or the rear façade of a main building, if not visible from any public street, other than an alley, as determined by the Historic Preservation Officer. Other awnings must be typical of any proposed structure and the character of the main building.

5. **Building Placement**
   All buildings must be placed so as to not adversely affect the rhythm of spaces between buildings on the block. The front setback for new construction shall be 30 feet. Additions
Subchapter 4: Overlay and Historic Districts

4.9 Historic Landmark Preservation and Historic Districts

4.9.6 West Oak Area Historic District

and or replacement buildings shall have a front setback that is the average of the adjacent lots of contributing buildings.

6. **Chimneys**
   All chimneys must be compatible with the style of the proposed building. Chimneys must be constructed of brick, stucco, stone, or other materials compatible in texture, color and style with the proposed main building.

7. **Additions**
   All additions to a building must be compatible with the dominant horizontal or vertical characteristics, scale, shape, roof form, materials, detailing, and color of the existing building.

8. **Color**
   a. **Roof Colors**
      Roof colors must complement the style and overall color scheme of the structure.
   b. **Masonry and Brick Surfaces**
      Masonry and brick surfaces not previously painted must not be painted unless it is determined that:
      i. The painting is absolutely necessary to restore or preserve the masonry or brick; or
      ii. The color and texture of replacement masonry or brick cannot be matched with that of the existing masonry or brick surface; or
      iii. The structure is not a contributing structure to the District and/or the brick and style of the building are not complimentary to such a degree that together they define an architecturally significant whole.
   c. **Certificate of Appropriateness**
      A COA shall not be required for exterior painting of structures in the West Oak Historic District; however, it is suggested that structures in the West Oak Historic District be painted colors from the following paint manufacturer’s preservation color pallets: Sherwin Williams Preservation Pallet (including America’s Heritage Historical Exterior Colors and Suburban Modern Historical Exterior Colors); Valspar Paint National Trust Historic Colors; Pittsburgh Paints Historic Collection; or similarly appropriate products.

9. **Façade Materials**
   a. **Generally**
      The permitted façade materials are brick, wood siding, wood, stone, and stucco. The use of cementitious siding is also permitted on new construction and accessory buildings. Artificial facsimiles of these materials will be considered on a case-by-case basis as material technologies progress. All façade treatments and materials must be typical of the style and period of the main building.
   b. **Wood Façades**
      Existing wood façades must be preserved as wood façades.
10. **Front Entrances and Porches**
   
a. **Detailing**
   Railings, moldings, tile work, carvings, and other detailing and architectural decorations must be typical of the style and period of the main building.

b. **Enclosures**
   A front entrance or porch may not be enclosed with any material, including iron bars, glass, or mesh screening.

c. **Façade Openings**
   Porches must not obscure or conceal any façade openings in the main buildings.

d. **Floor Coverings**
   Carpeting is not permitted as a porch floor or step covering.

e. **Style**
   Each proposed main building must have a front porch or entry treatment with a shape, roof form, materials, and colors that are typical of the style of the proposed main building. A front entry or porch must reflect the dominant horizontal and vertical characteristics of the proposed main building.

11. **Roof Forms**
   
a. **Material and Colors**
   Roof material and colors must complement the style and overall color scheme of the structure.

b. **Patterns**
   Roof patterns must be typical of the style and period of the main building.

c. **Slope and Pitch**
   The degree and direction of the roof slope and pitch must be typical of the style and period of the main building.

d. **Skylights and Solar Panels**
   The Historic Landmark Commission may allow skylights and solar panels on a building if their placement does not have an adverse effect on the architecture of a building or the district as a whole.

12. **Windows and Doors**
   
a. **Front Façade Openings**
   The location and size of windows and doors in proposed façades must be compatible in scale with the typical style and period of the main building.

b. **Glass**
   Reflective, tinted, and mirrored glass and plastic are not permitted in any opening.

c. **Screen, Storm Doors and Storm Windows**
   Screens, storm doors, and storm windows may be permitted if:
   
i. Their frames are painted to match or complement the color scheme of the main building; and
Subchapter 4: Overlay and Historic Districts
4.9 Historic Landmark Preservation and Historic Districts
4.9.6 West Oak Area Historic District

ii. They do not obscure significant features of the windows and doors they cover.

d. Security and Ornamental Bars
Security and ornamental bars are only permitted on the exterior of an accessory building, the rear façade of the main building, and the interior of the building.

e. Shutters
Shutters must be typical of the style of the proposed main building and appear to be installed in a manner to perform their intended functions.

f. Style
All windows and doors in the front façade of the main building must be proportionally balanced in a manner typical of the style and period of the building.

g. Size
The size and proportion of window and door openings located on the front and sides of the main building must be typical of the style and period of the main building.

h. Frames
The frames of the windows must be trimmed in a manner typical of the style and period of the building.

i. Openings
All windows, doors, and lights in the front and side façades of the main building must be typical of the style and period of the building. Sidelights must be compatible with the door.

13. Outdoor Lighting
Outdoor light fixtures must be compatible with the style and period of the main building and not obscure or conflict with significant architectural details of the building.

14. Fencing
A certificate of appropriateness is not required to install a fence in the West Oak Historic District; however fencing shall comply with Subsection 7.7.8: Walls, Fences, and Screening.

D. Signs
A Special Sign District is hereby established, imposing additional regulations upon all signs located within the West Oak Area Historic District subject to the additional provisions of Subpart B, Chapter 33, of the Code of Ordinances, except as modified as follows:

1. Additional Wall and Stake Sign Regulations
   a. Number of Wall Signs
      Only one wall sign per premises is permitted.

   b. Size
      No wall sign shall have a maximum dimension which is greater than two feet, measured along the greater distance of any one line which defines the effective area of the sign.
2. **Address or Name Signs**
The sign regulations of this section shall not apply to the signs or numbers which are used solely to identify the street address of the premises or they identity by name the occupants of a residential building.

3. **Approval Procedure for Wall Signs**
No new signs shall be constructed or located and no existing sign shall be altered until a sign permit is obtained pursuant to Subpart B, Chapter 33, of the Code of Ordinances, and a COA is issued in accordance with the procedure applicable to alterations or changes of the exterior architectural features of buildings, as provided for in this DDC.

**E. Parking**
The provisions of this DDC applicable to parking shall apply to the West Oak Area District, except for the following modifications:

1. **Location**
All off-street parking spaces for any building used as a multifamily dwelling or for a nonresidential use shall be located between the building fronting the public street and the rear property line.

2. **Number of Parking Spaces**
Each specified use shall provide the following number of parking spaces:

   a. Multifamily buildings shall have a minimum of two parking spaces for each dwelling unit.

   b. Nonresidential uses shall provide one and one-half times the number of parking spaces required for that use as established in Section 7.9, *Parking and Loading*.

---

**4.10 The Denton Square District**

**4.10.1 Purpose and Overall Intent**

**A. Purpose.** The purpose of the Denton Square District ("The Square") is to preserve historic resources and build upon the image of the Square as the historic, vibrant, small-town heart of a growing city by establishing design standards for new construction, certain exterior renovations, and demolition of property in The Denton Square that serve to protect and enhance the historic character of the area, preserve property values, and encourage high-quality, sustainable, pedestrian-friendly development.

**B. Overall Intent.** The Overall Intent of the Denton Square District ("DSD") and the Denton Square Design Standards ("DSDS") is as follows:

1. **Encourage creativity and architectural diversity, while ensuring that the overall historic character of the Denton Square is protected:**
   
   The design review process is intended to be flexible, allowing for creativity while encouraging designs that are compatible with the historic character of the surrounding properties in the District.
2. Encourage and support the preservation of historically significant buildings:

The DSD includes historically significant buildings. The Denton Square Design Standards are intended to maintain the authenticity of the district by working in conjunction with the City’s Historic Preservation Ordinance to encourage preservation, rehabilitation, and restoration of historically significant buildings, and to ensure that the integrity of any individual historic resource is preserved, as much as possible.

3. Support building designs and the use of design elements in new or renovated buildings that maintain and continue the established historic design patterns found in adjacent or adjoining buildings, which contribute to the District’s unique sense of place.

Within the District, patterns and rhythms in exterior building qualities can be seen, including in setbacks, mass and scale, building form, exterior materials, placement and type of doors and windows, and use of key architectural design features. Where possible, these should be continued in new or renovated buildings and building facades.

4. Support the use of materials which protect structural integrity and preserve building longevity, while also maintaining the historic character of the Square through their similarity in appearance, quality, and type to the prevalent materials in use in adjacent buildings, and throughout the District.

5. Promote urban vitality and livability that welcomes residents and visitors of all ages by fostering a sense of community:

The DSDS support pedestrian-oriented design within the Square, which includes a diverse mix of uses, creating engaging public spaces, and functional pathways to enable and encourage enjoyment by all, day and night, throughout the week.

6. Take into account the importance of maintaining property values and supporting new and existing businesses in the Denton Square District:

When applying the DSDS, the Director and City Council should take into account the importance of supporting the success of existing and new businesses in the District and promoting reinvestment into one of the City’s most enduring spaces.

7. Encourage the integration of art into public and private development:

Art should be integrated into architecture, streetscapes, and public spaces. Art enhances the built environment and contributes to the area’s success in attracting new residents and businesses.

4.10.2 Relation of the Denton Square District to Base Zoning Districts

The Denton Square District is a zoning overlay that supplements the primary underlying zoning district classification. The permitted uses of the property shall be determined by the use regulations set forth for the primary zoning district classification for the property. Development of projects in The Denton Square District shall be subject to the Denton Square Design Standards in accordance with this section. In the event of any conflict between the design standards and the provisions of the Denton Development Code, the design standards shall control.
4.10.3 Boundaries of The Denton Square District

The Denton Square District includes all land located within the area bounded by the following: Beginning at the intersection of Cedar Street and Pecan Street, running east along Pecan Street to Austin Street, running south along Austin Street to Walnut Street, running west along Walnut Street to Cedar Street, and running north along Cedar Street to Pecan Street. The area of the district shall include all properties adjacent to the boundary streets, though it shall only include the building exteriors, either existing or which may be built along the district boundary streets in the future.

4.10.4 Definitions

The following words, terms, and phrases, when used in this subsection, shall have the meanings ascribed to them in this section, except where the context clearly indicates a different meaning:

**Administrative Review:** Refers to the review process specifically described in Section 2.1.10.D.4.

**Antenna:** Any exterior apparatus designed for telephonic, radio, or television communications through the sending and/or receiving of electromagnetic waves, excluding satellite dish antennas and antennas accessory to residential uses. Antennas ancillary to residential uses shall mean television antennas and amateur radio equipment not used for commercial purposes, including ham radio and CB equipment.

**Awning:** A shelter extending from the exterior wall of a building and composed of nonrigid materials except for the supporting framework.

**Balcony:** A platform which projects from the exterior wall of a structure, is exposed to the open air and remains unenclosed, is surrounded by a railing or balustrade, has direct access to the interior of the building, and is not supported by posts or columns extending to the ground.

**Basement:** A story below the first story as hereinafter defined. See also “Story.”

**Bays:** Repetitive divisions into which a building is divided.

**Block:** A piece or parcel of land entirely surrounded by highways or streets, other than alleys. In cases where the platting is incomplete or disconnected, the Director of Public Works shall determine the outline of the block.

**Building:** A structure having a roof supported by columns or walls for the housing or enclosure of persons, animals, or chattels.

**Building Frontage:** The linear dimensions of a building which faces upon a public street, projected along the street property line. Where a building faces two or more streets, the frontage containing the principal street address shall be designated as the building frontage.

**Building Permit:** Authorization given by the City of Denton to erect, construct, renovate, maintain, or conduct any other specified activity on any building or structure, or on any installations or facilities therein. The term “building permit” shall include but not be limited to building permits, electrical permits, mechanical permits, and plumbing permits.

**Column:** A vertical support normally consisting of a base, a round shaft, and a capital. The Greek Doric order is exceptional in that it has no base.

**Contributing Building:** A building on a property which is depicted on the National Register of Historic Places’ map of the Denton County Courthouse National Register District as a “Contributing Property.”
Cornice: A projecting shelf along the top of a wall, along the exterior trim at the meeting of a roof and wall, or at the uppermost division of an entablature.

Construction: The erection of any on-site improvements on any parcel of ground located within The Denton Square District, whether the site is presently improved, unimproved, or hereafter becomes unimproved by demolition, destruction of the improvements located thereon by fire, windstorm, or other casualty, or otherwise.

Context: The buildings, structures, landscape elements and features immediately surrounding a building.

Design Consistency Certificate means a document demonstrating compliance with the Denton Square Design Standards and/or the Purpose and Intent of the Denton Square District and Standards in Section 4.10.1.

Director means the Director of Development Services or designee.

District means the area encompassed in The Denton Square District as established by and described above in Section 4.10.3.

Design Standards as laid out in The Denton Square District Standards are objective, measurable regulations, sometimes illustrated through diagrams and sketches, with which all projects must comply. Unless noted as a guideline, all provisions in this document are standards. If a project of exceptional design is clearly consistent with the General Design Principles but does not conform to a certain standard, the City Council may vote to approve a Certificate of Design Consistency, citing the project’s consistency with those principles.

Design Guidelines are more subjective statements, through which the City proposes additional design strategies. The guidelines should be suitable for most projects, and developers should endeavor to ensure that guidelines are followed to the extent possible. City staff and the City Council will work with developers to explore design approaches that maximize conformance with design guidelines. City Council will not deny a Certificate of Design Consistency because a project fails to comply with design guidelines.

Façade Any exterior building wall fronting on the public right-of-way.

Façade, Front-Facing: The façade which contains the primary entrance for the building. For buildings fronting on the Square Proper, the façade fronting on the Square Proper shall be the front-facing façade.

Fiber-Cement Siding: A lightweight, solid material that is manufactured in similar sizes and shapes to wood products.

First Floor: For the purposes of this section, shall refer to the building story which begins at grade on the front-facing façade of the building. For buildings fronting on the Square Proper, the first floor is the first building story on the facade facing the Square Proper.

Fully Shielded: Attribute of a lighting fixture provided with internal and/or external shields and louvers to prevent light pollution.

Glare: Excessive brightness in the field of view that is sufficiently greater than the brightness to which the eyes are adapted, to cause annoyance or loss in visual performance and visibility, so as to jeopardize health, safety, or welfare.

Grade: Ground level.

**High-Quality** describes a material that, for the intended purpose, is above average, by relevant industry standards, in reliability, durability, and performance of essential functions.

**High Intensity Discharge (HID) Lamps.** Lamps which produce visible light directly by the electrical heating or excitation of a gas. Examples of such lighting include, but are not limited to, metal halide, high-pressure sodium, low-pressure sodium and mercury vapor. For purposes of this chapter, fluorescent lights are not considered HID lighting.

**Historic Preservation:** Historic preservation, for the purposes of this section and for the Denton Square District, means to take the measures necessary to sustain the existing form, integrity, and materials of historic buildings, and also to ensure that new construction complements the adjacent historic and architecturally significant buildings. Historic preservation includes ensuring that the character of historically significant structures without local, state, or national designation is also respected. Historic preservation efforts may include the restoration or rehabilitation of a historic property.

**Illuminated Sign:** Any sign for which an artificial source of light is used in order to make readable the sign’s message, including internally and externally lighted signs and reflectorized, glowing, or radiating signs.

**Light Trespass:** Light emitted by a luminaire that shines beyond the boundaries of the property on which the luminaire is located.

**Luminaire:** A device or fixture containing a light source and means for directing and controlling the distribution of light from the source.

**Mews Streets:** Mews streets are the four smaller streets (Walnut, Austin, Pecan, and Cedar) located behind the streets that front the Denton Courthouse.

**Minor Alteration** is work that is proposed to be done on a building in the DSD that meets the definition provided in Section 2.10.1.D.3.a.ii of the Denton Development Code.

**Mural** is a visual depiction and/or work of art, including mosaic or painting, applied, painted, or affixed directly onto the exterior of any wall of a building.

**Ordinary Maintenance** is work that is proposed to be done on a building in the DSD that meets the definition provided in Section 2.10.1.D.3.a.i of the Denton Development Code.

**Overall Intent:** The statements of Overall Intent, more fully described in Section 4.10.1, that serve as the basis for The Denton Square Design Standards.

**Parapets:** The portion of a wall that projects above an adjacent roof surface.

**Pilaster:** A shallow rectangular feature projecting from a wall, having a capital and a base and architecturally treated as a column.

**Pitch:** The angle or slope of a roof.

**Rehabilitation:** The process of returning a property to a condition that makes a contemporary use possible, while retaining as many of its historic, architectural, and culturally significant features as possible.

**Restoration:** The process of accurately recovering the form, features, and character of a property as it appeared at a particular period in history, which can include removal of features from later periods in history and reconstruction of missing features from the “restoration period.”

**Roofing material:** The outermost layer on the surface of a building roof.
Subchapter 4: Overlay and Historic Districts
4.10 The Denton Square District
4.10.5 Work Requiring A Permit

Sign: Meaning shall be as defined in Section 33-2 of the Code of Ordinances of the City of Denton. Notwithstanding any language in this subchapter, all proposed signs are subject to the permitting requirements of Code of Ordinances Chapter 33 Signs and Advertising Devices. Provisions related to signs in this subchapter are in addition to, and not in place of, the provisions of Chapter 33.

Square, The See “District.”

Square Proper, The refers to the area bounded by West Oak Street on the north, North Locust Street on the east, West Hickory Street on the south, and North Elm Street on the west.

Standards, The See “Design Standards.”

Story: The space between the surface of any floor and the surface of the next floor above it; or if there is no floor above it, the space between the floor surface and the top of the ceiling joists or roof rafters above it.

Theater Marquee: A marquee is a permanent roofed structure which is attached to and supported entirely by a building; no part of which shall be used for occupancy or storage; having the purpose of providing protection from sun and rain or embellishment of a façade. A Theater Marquee is a marquee that is attached to a building which contains an area regularly used for theatrical performances or for showing motion pictures.

Uplight: A type of light pollution in which light is directed above the horizontal plane of the luminaire, which can contribute to artificial sky glow.

4.10.5 Work Requiring A Permit

A. It shall be unlawful for any person to do, or allow or cause any other person to do, any of the following work on property located within the district, without first applying for and receiving a Certificate of Design Consistency under the terms of Section 2.10.1.D.3 of the Denton Development Code:

1. Construction of a new building or making an addition to an existing building.
2. Redeveloping, reconstructing, altering, changing, or restoring the exterior of any existing building
3. Demolition of an existing building or façade
4. Construction or reconstruction of a parking lot.
5. New sign or mural.
6. Ordinary maintenance to the exterior of an existing building, as defined in this Subchapter.

Changes to the interior of buildings do not require a Certificate of Design Consistency.

B. The requirements and procedures found in section 2.10 Design Standards Review Procedures will govern the process of application for and provision of any Certificate of Design Consistency required by this subsection.

C. All regulations applicable to the District as contained in the Code of Ordinances or Denton Development Code shall continue to apply to the District, except as specifically modified herein.
4.10.6 Procedures

All planning actions related to The Denton Square Design Standards and Guidelines shall be processed by one of the following procedures:

1. Denton Square Design Standards and Guidelines Amendment: refer to “Zoning Text Amendment” found in Section 2.7.4 of the 2019 Denton Development Code as approved by City Council on April 23, 2019.

4.10.7 Design Standards

A. Intent: The standards provide a framework of basic design parameters to guide the form and scale of buildings within the District, ensuring that the key attributes of the built environment of The Square are maintained. The standards provide flexibility and allow for creativity within the framework, in order to enable and encourage innovative, sustainable, high-quality development that preserves the historic character of The Square while adapting to changing conditions over time.

B. Building Orientation, Setback, Frontage, and Height Standards

1. Orientation: Buildings must have their primary entrance face the street or other public spaces.

2. Setback: Buildings must front on the property line.

3. Frontage: 100% of all lot frontages on The Square must be occupied by a building, except for building entry or access conditions, to a minimum height of the first story.

4. Building Height: The following standards shall apply to all new facades and additions to facades, except that new or altered facades on existing buildings shall not be required to be higher or lower than the existing façade.
   
   i. New building facades fronting on the Square Proper must be a minimum of two (2) stories in height.

   ii. New building facades and additions to facades fronting on the Square Proper must not exceed a maximum of two (2) stories, nor exceed a maximum of forty-five (45) feet in height.

   iii. New buildings facades on the Mews Streets must be a minimum of two (2) stories in height.

   iv. New building facades and additions to facades on the Mews Streets must not exceed a maximum of three (3) stories, nor exceed a maximum of sixty-five (65) feet in height.

      In the event of partial or complete destruction of a building or building façade in The Square by a fire, natural disaster, or other catastrophic event, the following
standards shall apply, if and when the subject building and/or facade is reconstructed:

1. The building or façade must be reconstructed to a minimum of the existing height previously.

2. The building or façade may be reconstructed to a height higher than the previous existing height – subject to the Denton Square District maximum building restrictions in Sections 4.10.7.B.4.b and 4.10.7.B.4.d.
   a. Such reconstruction must be commenced within one year of such event and completed within 18 months of such event, after which time District minimum height standard will apply.
   b. By written request from the property owner, City Council may grant one extension, up to six (6) months, of either the work commencement and/or the completion of work time period.

C. Façade Standards

1. Existing unpainted brick and stone facades must not be painted.

2. The ground floor of buildings must include a minimum of three (3) elements of architectural relief at least every twenty-five (25) linear feet. These elements must comply with other applicable Design Standards, and may include, but are not limited to, the following:
   i. Doors
   ii. Change in depth
   iii. Columns or posts
   iv. Windows
   v. Awnings
   vi. Changes in materials
   vii. Other elements of architectural relief may be approved by the Director if they are determined to meet the Overall Purpose and Intent of the District.

3. All new buildings, or new floors added to an existing building, must create a clear visual differentiation between the first and second floor, using one or more of the following elements, which must comply with all applicable Design Standards for such elements:
   i. Change in depth
   ii. Columns or posts
   iii. Transom Windows
   iv. Awnings
   v. Changes in materials, including a horizontal trim line of different material between the first and second floors.
   vi. Other elements of architectural relief may be approved by the Director if they are determined to meet the Overall Purpose and Intent of the District.
4. A minimum of seventy-five percent (75%) of the building front of a new building, on the first floor, for a depth of at least twenty (20) feet from the building front, shall be occupied by a non-residential use.

5. Façade Material Standards:

New façades must conform to the following material standards. Façade projects that incorporate unlisted materials may be submitted for review; the Director shall approve or disapprove unlisted materials based on compliance with the Purpose and Overall Intent.

i. Primary materials are limited to the following:
   1. Brick
   2. Stone or stone veneer
   3. Wood
   4. Cement composite board
   5. Tile – terra cotta, porcelain, or ceramic
   6. Stucco above the first (ground) floor

ii. The following material may be used as accents and trim:
   1. All primary materials listed above
   2. Metal – galvanized, painted, or ornamental
   3. Pre-cast masonry (trim and cornice only)
   4. EIFS (exterior insulation and finish system) above the first floor
   5. Concrete fiber simulated wood siding

iii. Inappropriate materials
   1. Vinyl or aluminum siding
   2. Mirrored glass
   3. Stucco above the first (ground) floor
   4. EIFS on the first (ground) floor

D. Fenestration, Glazing, and Entry Standards

1. Fenestration and glazing must be provided in all new facades.

2. Ground floor windows must use clear glass (80% minimum Visible Light Transmittance). All window glass must allow a minimum 60% Visible Light Transmittance and must not exceed 15% Visible Light Reflectance when measured at a perpendicular angle. The use of Low Emissivity (Low-E) glass is permitted.

3. Windows, floors, stoops, and porches must open out to the street.
4. Primary building entrances must be clearly articulated, preferably with a covered-projected type of entry. Options, which must meet all applicable Design Standards, include:
   i. Awnings
   ii. Canopies
   iii. Recessed entry
   iv. Other similar treatments may be approved by the Director if they are determined to meet with the Overall Purpose and Intent of the District.

5. Awnings, canopies, and other covered-projected types of building features are permitted to encroach partially into the public right-of-way, but do require completion and approval of a City of Denton Right-of-Way Use permit/application.

6. Awnings, canopies, and other covered-projected types of building features must comply with the following:
   i. Must be placed so as to provide weather protection for pedestrians.
   ii. Must be consistent in height with similar covered-projected features on adjacent or joining buildings.
   iii. Must be mounted in locations that do not obscure ornamental features over storefronts, such as rooflines, arches, and banding.
   iv. Must not exceed the width of the sidewalk
   v. Must not be torn, frayed, ripped, faded, or stained, soiled or dirty. When not specifically addressed by this ordinance, provisions of the City of Denton property maintenance code shall apply.
   vi. Must not have a dome or convex frame (see illustration).
   vii. Colors of awnings, canopies, and other covered-projected types of building features must enhance and complement the building to which they are attached, rather than overwhelm the building scheme. Colors must not call more attention to the projected-covered building feature than the building.
   viii. The frame structure of such building features must be finished to match the metal storefront system color or the fabric color of the associated projected-covered type of building feature.
ix. Such building features are not prohibited from encroaching partially into the public right-of-way, provided that a City of Denton Right-of-Way Use permit/application has been completed and approved.

E. Sidewalk Activity Standards
1. Bringing restaurant and retail activities out to the sidewalk is not prohibited, provided that:
   i. Unobstructed pedestrian walking is maintained.
   ii. A City of Denton Right-of-Way Use permit/application has been completed and approved for any private activity that extends into the public right-of-way.
   iii. Permanent railings for outdoor dining must not extend into the public right-of-way without an approved City of Denton Right-of-Way encroachment permit/form or exceed a maximum four (4) feet from ground level

F. Exterior Lighting Standards
1. All newly installed exterior lighting must comply with the standards of Section 6.11 of the Denton Development Code (2019) as adopted by City Council on April 23, 2019, except as those standards are specifically modified within this section. Such lighting shall require a Certificate of Design Consistency (with the exception of temporary holiday lighting).
2. The following types of newly installed exterior lighting are prohibited within the District:
   i. High-Intensity Discharge (HID) or fluorescent lights (except fluorescent bulbs that screw into standard socket fixtures).
   ii. Lights that blink, flash, or change intensity or color (except in the case of theater marquee lighting).
3. The following types of newly installed exterior lighting are not prohibited within the District, notwithstanding any restriction on them in Section 6.11:
   i. Fully shielded light fixtures (luminaires), except those containing directional lamps, which have an aggregate rated lamp output not exceeding 500 lumens.
   ii. Decorative gaseous, light-emitting diode (LED), or other electrified or illuminated tubing or backlit “band” lighting, when used to:
      1. Accent one or more of a building’s horizontal architectural elements (that is, along the rooflines including any peaks, arches, or bump-ups, or horizontally along the building’s facade as lighted tubing or a backlit “band”).
      2. Outline or decorate the outermost edges only of awnings, but not to outline the awning as a whole.

G. Sign Standards
1. All new signs installed in the District shall be required to comply with the standards of Chapter 33 of the Denton Municipal Code of Ordinances, including the requirement of an approved sign permit, when applicable. In addition, the following restrictions shall apply to all new signs within the District:
   i. Internally-lit acrylic cabinet signs are prohibited.
ii. Signs must not be installed in locations that damage or obstruct important architectural features.

iii. Signs must be compatible in scale, proportion, and design with the building’s façade.

H. Mural Standards:

1. All new murals, including those proposed for buildings designated as local historic landmarks, shall require approval by City Council.
   i. If a mural on a separate panel is approved to be mounted onto a building, it must be mounted so as to prevent damage to the wall behind the panel.

2. A mural must be compatible with the architectural and aesthetic components of the building or other structure on which it is installed.

3. A mural must not detract from the character of the District, and not be detrimental to the public health, safety, and welfare.

4. On facades fronting on the Square Proper, murals may not cover more than 25% of the total area of the façade.

5. A mural must not be painted on existing unpainted brick or stone surfaces.

6. Measurement: For the purposes of this subsection, total area of the façade will be the result of a calculation of height of the building multiplied by the width of the building. Total area
of the façade includes wall, fenestration, doors, and parapets (See illustration). Total area of the façade does not include decorative architectural elements projecting above the roofline which are less than one (1) foot in width.

I. Roof Standards

1. Roof shape of new buildings, new facades, and new additions must appear flat.

2. Roof, including roofing materials, of new buildings, new facades, and new additions to existing buildings, must not be visible from street view.
   i. This standard shall not be construed to prohibit visible parapets, cornices, or other decorative architectural features which are typically installed along or atop the edge of a roof.

J. Building Equipment and Service Area Standards

1. Building Equipment and Service Areas shall include the following:
   i. Mechanical and electrical equipment and conduits
   ii. Elevator shaft
   iii. Ducts
   iv. Piping
   v. Fire equipment
   vi. Water backflow devices
   vii. Solid waste and Recycling facilities
   viii. Utilities
   ix. Satellite dishes
   x. Antennas (Excluding those types of macro cell telephone antennas for which local regulation is preempted by Federal regulation)
   xi. Loading and unloading areas
   xii. Drainage facilities
   xiii. Grease traps, interceptors, and bins/dumpsters

2. Building equipment and service areas shall be designed and located so that they are not the primary building feature and do not interfere with pedestrian or vehicular circulation.

3. Solid waste and recycling facilities, as well as grease dumpsters, bins, barrels, or other grease storage devices shall not be visible from the public right-of-way.

4. Roof-mounted building equipment must not be visible from the street or from adjacent properties at the same level or below.
5. Screening materials, in type and color, shall complement the building with which they are associated and shall not draw attention away from the building with which they are associated.

K. Historic Preservation Standards: The following standards shall apply to projects involving Contributing Buildings as depicted on the National Register for Historic Places’ map of the Denton County Courthouse National Register District ("National Register District"): 

1. Existing facades and buildings must not be demolished or removed without approval by City Council of a Certificate of Design Consistency authorizing the demolition or removal, unless the current condition of the existing façade or building represents a life-safety issue as determined by the Building Official. Certificate of Design Consistency for a project involving such demolition or removal may not be approved unless it includes a Post-Demolition Redevelopment Plan which complies with Section 4.10.7L.2. City Council may only approve a Certificate of Design Consistency for a project that includes demolition of a Contributing Building or façade of a Contributing Building on one of the following bases:

i. The applicant proposes, in their Post-Demolition Redevelopment Plan, to replace the structure or façade with a new structure or façade that is more compatible with the historic character of the Denton Square District.

   1. Applicant shall include the following in order to establish that proposed replacement will be more compatible:

   a. Records depicting the original construction of the structure or its appearance and condition during the Period of Significance of the National Register District (Period of Significance: 1882-1949), including drawings, pictures, or written descriptions.

   b. Records depicting the current condition of the structure, including drawings, pictures, or written descriptions.

   c. Any conditions proposed to be placed voluntarily on the new structure that would mitigate the loss of the existing building or facade.

   d. Any additional documentation determined by the Director to be necessary to establish the compatibility of the proposed replacement.

ii. The applicant can establish that an unreasonable economic hardship exists if required to maintain the current building or façade. Applicant must establish proof of hardship in accordance with Section 4.10.8.

iii. The applicant can establish that the existing façade did not exist during the Period of Significance for the National Register District (Period of Significance: 1882-1949), and it is being removed to reveal an older façade underneath, which was in existence during the Period of Significance.
Subchapter 4: Overlay and Historic Districts

4.10 The Denton Square District

4.10.7 Design Standards

1. The existence of the original façade must be established with physical or documentary evidence in order to receive approval on this basis.

2. Existing facades may not be covered over with new façade material.

3. Existing window openings must remain and must not be filled in or covered over.

4. New window openings shall not be added to existing facades unless proposed windows are reviewed and approved by City Council.
   i. To be eligible for approval, new window openings must be similar in number, style, and placement to existing window openings in the National Register District that date to the Period of Significance, as established by physical or documentary evidence.

L. Demolition and Temporary Construction Standards: The following standards shall apply to all buildings within the District.

1. No building or façade of a building in the District shall be demolished without approval of a Certificate of Design Consistency by City Council, except in cases when the Building Official has approved an Emergency Demolition and a permit has been issued for that Emergency Demolition.

2. Applications for Certificates of Design Consistency for Demolition must include a Post-Demolition Redevelopment Plan, which must propose a building or façade to replace the demolished building or façade, and must include the following:
   i. Complete Architectural Drawings of proposed replacement building or façade, or, in cases where an existing underlying façade will be the replacement façade, a rendering of the expected appearance of the underlying façade, including any proposed restoration work;
   ii. A guarantee agreement between the owner and the city that demonstrates the owner’s intent and financial ability to construct the replacement building or façade, or restore an existing underlying façade. The guarantee agreement must:
      1. Contain a covenant to construct the proposed structure by a specific date in accordance with architectural drawings approved by the city through the Certificate of Design Consistency Process;
      2. Require the owner or construction contractor to post a performance and payment bond, letter of credit, escrow agreement, cash deposit, or other arrangement approved by the Director to ensure construction of the new structure; and
      3. Be approved as to form by the city attorney.
   iii. When demolition of the entire Contributing Building is proposed, the Post-Demolition Redevelopment Plan shall also include the following:
      1. Site Plan for proposed replacement structure; and
2. Plan for Temporary Construction Fencing meeting the standards of Section 4.10.7.L.3. Plan shall include a depiction of any decorative elements that will be added to Temporary Construction Fencing.

3. Temporary Construction Fencing meeting the following standards shall be installed following any building demolition or creation of a vacant lot due to catastrophic loss:
   
i. All temporary construction fencing requires application for and approval of a permit from the Department of Development Services.
   
ii. Temporary construction fencing must shield entire site from view and access from right-of-way.
   
iii. Temporary construction fencing must provide a continuous opaque screen along the front property line.
   
iv. Temporary construction fence may include decorative elements, such as a mural, but such decorative elements shall require a Certificate of Design Consistency approved by City Council.

4. Emergency Demolition or Vacant Lot Due to Catastrophic Loss: The following standards shall apply to an emergency demolition or a vacant lot caused by catastrophic loss of a building due to a fire or other act of God:
   
i. Emergency Demolition requires approval by the Building Official and issuance of a Demolition Permit.
   
ii. Temporary fencing meeting the standards of Section 4.10.7.L.3 must be installed within 30 days of the date of the emergency demolition or catastrophic loss.
   
iii. If building construction activity on the site is not begun within one (1) year of the date of the emergency demolition or catastrophic loss of the building, temporary fence must be replaced by one of the options below. One extension of up to six (6) months may be approved by Director if construction plans for the site have been submitted.
   
1. Landscaped site, with non-opaque fence, meeting the following standards:
   
a. The applicant shall submit a scaled plan showing the vacant lot layout, the proposed landscaping and irrigation, and the proposed maintenance plan, which shall include provisions for trash removal, erosion management, and landscape maintenance.
   
b. Surface shall include grass or other living ground cover, in any combination, provided that the total site is covered.
   
c. Irrigation shall be provided consistent with the applicable standards for such systems as described Subchapter 7 of the Denton Development Code.
   
2. Minimum 6’ tall screening wall constructed out of brick, stone, or brick or stone veneer.
   
a. Wall must be aligned with front wall of adjoining buildings.
   
b. Wall shall provide a continuous opaque screen along the entire length of the front property line.
c. Property owner must provide for ongoing maintenance of the wall in compliance with the provisions of Section 17-80 of the City of Denton Code of Ordinances.

d. Upon redevelopment of the site, the screening wall must be removed.

3. Alternative plan for beautification or activation of lot in line with the Purpose and Overall Intent of the District, as approved by City Council.

### 4.10.8 Establishing Unreasonable Economic Hardship

**A. Applicability.** City Council may determine that an unreasonable economic hardship exists as a basis for approving a Certificate of Design Consistency for a project which includes a demolition of a Contributing Building or the façade of a Contributing Building.

**B. Burden of proof.** When a claim of unreasonable economic hardship is asserted, the applicant must prove the following by a preponderance of evidence:

1. The property containing the Contributing Building is incapable of earning a reasonable rate of return in its current or rehabilitated state, regardless of whether that return represents the most profitable return possible;

2. The property containing the Contributing Building cannot be reasonably adapted for any other permissible use, whether by the current owner or by a purchaser, which would result in a reasonable rate of return;

3. The property owner has demonstrated reasonable, good faith efforts to find a purchaser or tenant interested in acquiring or leasing the property containing the Contributing Building.

**C. Proof of hardship.** The information to be considered as evidence of an unreasonable economic hardship must include, at a minimum, the following items, all of which must be submitted as part of a Certificate of Design Consistency application asserting an unreasonable economic hardship.

1. The original purchase price of the Contributing Building;
2. The name and legal status (e.g., partnership, corporation) of the owner(s);
3. A signed building assessment report from a licensed engineer or contractor, as to the structural soundness of either the Contributing Building and/or façade of the Contributing Building, depending on what is proposed to be demolished, and the suitability for rehabilitation of what is proposed to be demolished, and including a cost estimate for repairs;
4. A cost estimate for demolition of the Contributing Building or façade of a Contributing Building;
5. The past and current use of the Contributing Building;
6. The assessed value of the property containing the Contributing Building, according to the two most recent tax assessments;
7. The amount of real estate taxes on the property containing the Contributing Building for the previous two years;
8. The date of purchase or other acquisition of the property containing the Contributing Building;
9. Principal balance and interest rate on the current mortgage and the annual debt service on the property containing the Contributing Building, if any, for the previous two years;

10. All appraisals obtained by the owner or applicant within the previous two years in connection with the owner's purchase, financing or ownership of the property containing the Contributing Building;

11. Any listing of the property containing the Contributing Building for sale or rent, asking price, and offers received;

12. Any consideration given by the owner to profitable adaptive uses for the Contributing Building or, in cases when only the removal of the façade is proposed, for profitable adaptive uses that do not require removal of the façade;

13. The Post-Demolition Redevelopment Plans for the property containing the Contributing Building or, in the case of removal of the façade of the Contributing Building, the plans for a replacement façade or restoration of an existing underlying facade;

14. Proof that the owner's affirmative obligations to maintain the property containing the Contributing Building make it impossible for the owner to realize a reasonable rate of return on that property.

15. Additional requirements for an income producing historic property:
   a. Annual gross income from the property from the previous two years;
   b. Itemized operating and maintenance expenses from the previous two years; and
   c. Annual cash flow, if any, from the previous two years.

16. Additional information relevant to a determination of unreasonable economic hardship, as determined and requested by the Director.

17. Claims of unreasonable economic hardship by the historic property owner must not be based on conditions resulting from the following:
   a. Evidence of demolition by neglect or other willful and negligent acts by the owner;
   b. Purchasing the property for substantially more than market value at the time of purchase;
   c. Failure to take into account historic properties in the planning and design stage of development or proposed development;
   d. Failure to perform normal maintenance and repairs;
   e. Failure to diligently solicit and retain tenants; or
   f. Failure to provide normal tenant improvements.
Subchapter 5: Use Regulations

5.1 Purpose and Organization

5.1.1 Purpose
This subchapter identifies the land uses allowed in the Denton zoning districts and establishes the standards that apply to certain uses (use-specific standards).

5.1.2 Organization
This subchapter is organized as follows:

A. Section 5.2: Table of Allowed Uses, lists the uses allowed by zoning district and provides cross-references to applicable use-specific standards.

B. Section 5.3: Use-Specific Standards, establishes the unique standards applicable to certain land uses.

C. Section 5.4: Accessory Uses and Structures, establishes standards applicable to uses and structures that are accessory to the principal use of the property and/or structure.

D. Section 5.5: Temporary Uses and Structures, establishes standards applicable to non-permanent (temporary) structures and uses.

E. Section 5.6: Wireless Telecommunications Facilities, establishes standards applicable to wireless telecommunications facilities.

5.2 Table of Allowed Uses
Table 5.2-A: Table of Allowed Uses, lists the uses allowed in the base zoning districts. All uses are defined in Subchapter 9: Definitions. Development or use of a property for any other use not specifically allowed in Table 5.2-A: Table of Allowed Uses, or otherwise approved under the appropriate procedure is prohibited.

5.2.1 Explanation of Table Abbreviations

A. Permitted By-Right Uses
A “P” in a cell indicates that the use is permitted by right in the respective zoning district. Permitted uses are subject to all other applicable regulations of this DDC.

B. Specific Use Permit Required
An “S” in a cell indicates that the use is only permitted in the respective zoning district if approved as a specific use in accordance with the procedures in Subsection 2.5.2: Specific Use Permit (SUP).

C. Prohibited Uses
A blank cell indicates that the use is prohibited in the respective zoning district.

D. Use-Specific Standards
Regardless of whether or not a use is allowed by right or with approval of a specific use permit, additional standards may be applicable to that use. Use-specific standards are identified and cross-referenced in the last column of Table 5.2-A: Table of Allowed Uses. Uses marked with a “+” following the “P” or “S” in a zoning district indicates that use-specific standards apply to that use.
Subchapter 5: Use Regulations

5.2 Table of Allowed Uses

5.2.2 Organization of Table

In Table 5.2-A: Table of Allowed Uses, land uses are classified into general use categories and specific uses based on common functional, product, or physical characteristics such as the type and amount of activity, the type of customers or residents, how goods or services are sold or delivered, and site conditions. This classification provides a systematic basis for assigning present and future land uses into appropriate zoning districts.

**Print Date:** December 12, 2019
5.2.4 Classification of New and Unlisted Uses

The following procedure shall apply if an application is submitted for a use category or use type that is not specifically listed in Table 5.2-A: Table of Allowed Uses. Submission and approval of such an application shall be required prior to approval of any other permit or development approval associated with the use.

A. Director Determination of Appropriate Use Category and Use Type
   The Director shall determine the appropriate use category and use type for the proposed use. In such determination, the Director shall consider the potential impacts of the proposed use including the nature of the use and whether it includes dwellings, sales, processing, storage, operations, employment characteristics, nuisances, requirements for public utilities, and transportation requirements.

B. Establish Use-Specific Standards if Necessary
   During the initial determination, the Director shall also determine whether or not additional use-specific standards are necessary to reduce potential impacts to the surrounding properties or the community.

C. Post-Determination Actions
   1. Appeals of administrative decisions shall be made pursuant to the procedures under Subsection 2.8.3: Appeal of Administrative Decision.
   2. If the determination of an appropriate use category and use type results in a finding that the use, structure, or activity will be a common use or would create confusion by remaining unlisted, the Director may initiate an application for a DDC text amendment pursuant to Subsection 2.7.4: Zoning Text Amendment, to revise Table 5.2-A: Table of Allowed Uses, accordingly. Until final action is taken on the DDC text amendment application, the use determination by the Director shall be binding.

5.3 Use-Specific Standards

5.3.1 Generally

A. Applicability
   Use-specific standards in this section shall apply to all zoning districts unless otherwise stated.

B. Cross-References in Table of Allowed Uses
   All uses with use-specific standards as indicated in the right-hand column of Table 5.2-A: Table of Allowed Uses, shall comply with the applicable standards in this section. All development shall also comply with the applicable standards in Subchapter 6: Development Standards, and other relevant provisions of this DDC.

C. Resolution of Conflicting Standards
   In case of a conflict between these use-specific standards and the standards in Subchapter 6: Development Standards, or other relevant provisions in this DDC, these use-specific standards shall govern, unless otherwise stated.

D. Maximum Persons Occupying a Dwelling
   No single dwelling unit shall have more than four unrelated persons residing therein, nor shall any “family” have, additionally, more than four unrelated persons residing with such family. Hotels,
motels, bed and breakfast establishments, boarding houses, chapter house, and dormitories are exempt from this requirement. Additionally, any organization or institutional group that receives federal or state funding for the care of individuals is exempt from this requirement.

### 5.3.2 Performance Standards for All Uses

#### A. Applicability

1. **General**
   
   Unless exempted elsewhere in this DDC, the performance standards in this Subsection 5.3.2, shall apply to all uses in all zoning districts.

2. **Gas Wells**
   
   The standards in this Subsection 5.3.2 shall not apply to gas wells and/or gas well drilling and production as authorized in Subchapter 6: Gas Wells.

#### B. Smoke and Particulate Matter

All operations and uses shall comply with federal, state, and county emissions standards.

#### C. Odorous Matter

No use shall be located or operated which involves the emission of odorous matter in violation of Subpart A, Code of Ordinances, Chapter 17: Property Maintenance, Article II: Noise and Odors, Section 17-21: Odors.

#### D. Hazardous or Explosive Hazard Material

1. A specific use permit shall be required for any use involving the storage, handling, or use of hazardous materials when the quantity is in excess of the exempt amount or maximum allowable per control area, as specified in the Building or Fire Code.

2. Notwithstanding the above regulations regarding hazardous materials storage, any substance designated as highly hazardous and requiring a state or federal permit shall only be permitted in the HI zoning district, and shall require specific use permit approval.

#### E. Toxic and Noxious Matter

No operation or use shall emit a concentration across any property line that will exceed 10 percent of the concentration (exposure) considered as the threshold limit for an industrial worker as such standards are set forth by the State Department of Health in Threshold Limit Values Occupational Health Regulation No. 3, a copy of which is hereby incorporated by reference and is on file in the office of the Building Official.
Subchapter 5: Use Regulations
5.3 Use-Specific Standards
5.3.3 Residential Uses

F. **Vibration**
No operation or use shall at any time create earth-borne vibration beyond any property line if the source operation exceeds the limits of displacement set forth in the following table:

<table>
<thead>
<tr>
<th>Frequent Cycles per Second</th>
<th>Displacement in Inches</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>

</tr>
<tr>
<td>20 to 30</td>
<td>0.001</td>
</tr>
<tr>
<td>30 to 40</td>
<td>0.0006</td>
</tr>
</tbody>
</table>

G. **Noise**
No operation shall emit noise beyond the thresholds established in Subpart A, Code of Ordinances, Chapter 17: Property Maintenance, Article II: Noise and Odors, Section 17-20: Noise.

H. **Glare**
No use or operation shall be located or conducted in such a manner that produces intense glare or direct illumination across any property line, nor shall any light be of an intensity that creates a nuisance or detracts from the use and enjoyment of adjacent property.

I. **Evidence of Compliance**
The Director shall require such evidence of ability to comply with appropriate performance standards and mitigation measures as deemed necessary prior to issuance of a building permit and certificate of occupancy.

5.3.3 **Residential Uses**

A. **Single-Family Detached Dwelling**
1. Single-family detached structures shall comply with the design standards established in Section 7.10.3: Single-Family Detached, Duplex, Townhome, Triplex, and Fourplex Dwelling Site and Building Design.
2. A specific use permit is required prior to the placement of a manufactured home HUD-code on any lot.

B. **Townhome**
1. Each individual dwelling unit shall have a separate entrance facing the street frontage to which the building address is assigned. Buildings on corner lots may have entrances facing either street frontage.
2. Each dwelling shall have direct access to a street or alley.
3. Townhome structures shall comply with the design standards established in Section 7.10.3: Single-Family Detached, Duplex, Townhome, Triplex, and Fourplex Dwelling Site and Building Design.
4. Each individual dwelling unit shall have a minimum of 900 square feet of living space floor area.
C. **Duplex, Triplex, and Fourplex**
   1. Each individual dwelling unit shall have a separate exterior entrance and separate utility meters.
   2. Duplex, triplex, and fourplex structures shall comply with the design standards established in Section 7.10.3: *Single-Family Detached, Duplex, Townhome, Triplex, and Fourplex Dwelling Site and Building Design*.
   3. Each individual duplex dwelling unit shall have a minimum of 900 square feet of living space floor area.
   4. Each individual triplex or fourplex dwelling unit shall have a minimum of 600 square feet of living space floor area.

D. **Multifamily Dwelling**
   1. In the MN, MD, and MR zoning districts, the ground floor fronting a public street shall have a minimum wall height of 12 feet.
   2. Multifamily buildings shall comply with the design standards established in Section 7.10.4: *Multifamily Site and Building Design*.
   3. Each individual dwelling unit shall have a minimum of 400 square feet of living space floor area.

E. **Tiny Home Development**
   Tiny home developments shall be developed as part of a Planned Development and meet the following standards:
   1. **Design and Layout**
      a. The minimum project size for tiny home development is 10,000 square feet.
      b. Tiny home developments shall have a minimum of four dwelling units.
      c. Each individual dwelling unit shall have a minimum of 300 square feet of living space floor area and a maximum of 500 square feet of living space floor area.
      d. Parking shall be located at the side or rear of each principal structure or in a separate designated shared parking area.
      e. A shared open space containing a minimum of 10 percent of the project area shall be provided.
      f. Each tiny home dwelling unit shall be separated by a minimum of ten feet.
   2. **Operation and Ownership**
      a. Each tiny home dwelling unit shall be on a permanent foundation and shall be connected to public water and sanitary sewer.
      b. One accessory storage structure less than 100 square feet may be permitted for any unit that is part of a tiny home development approval.
      c. One accessory storage structure less than 600 square feet may be permitted as a shared maintenance storage facility for the tiny home development. Said structure shall be enclosed on all sides and separated from other structures by a minimum of five feet.
      d. Access drives within a tiny home dwelling development shall be constructed to city standards.
Subchapter 5: Use Regulations
5.3 Use-Specific Standards
5.3.3 Residential Uses

e. Tiny home projects shall be organized as condominium developments meeting all requirements of Texas state law.

f. Individual lots or portions of the site may not be subdivided for sale, except as allowed as part of a condominium development under Texas state law.

g. Applicants proposing tiny home dwellings shall enter into a development agreement with the city requiring the condominium or other property owner’s association to maintain all streets, utilities, and infrastructure that is not dedicated to and accepted by the city.

F. Work/Live Dwelling

1. Size and Location
   a. The residential component of a work/live dwelling shall not exceed 50 percent of the total gross floor area.
   b. The residential component shall be located above or behind nonresidential portions of the structure.
   c. The residential dwelling unit shall have a minimum of 400 square feet of living space floor area.

2. Ownership
   The nonresidential use shall be owned and operated by a resident of the work/live dwelling. Individuals that do not reside at the work/live dwelling may be employed by the owner.

G. Manufactured Home Development (HUD Code)

1. Dimensional and Design Standards
   a. The minimum lot area required for a manufactured home development (HUD Code) shall be 10 acres.
   b. Each stand shall provide a minimum area of 5,000 square feet; however, no such stand shall be less than 40 feet in width nor less than 100 feet in depth.
   c. The minimum front yard setback shall be 15 feet from the nearest corner of the manufactured home to the front line of the stand.
   d. No manufactured home shall be closer than 15 feet to any adjoining public right-of-way.
   e. For other structures, the minimum front yard setback shall be at least 15 feet.
   f. The minimum distance between manufactured homes shall be 20 feet on the side and 16 feet on the front and rear.
   g. The area beneath the manufactured home structure shall be concrete to provide adequate support for the placement of the structure.
   h. Manufactured home development (HUD code) shall comply with the perimeter fencing standards established in Subsection 7.7.8: Walls, Fences, and Screening.

2. Minimum Dwelling Size
   Each individual dwelling shall have a minimum of 400 square feet of living space floor area.

3. Parking
   a. Parking shall be located at the side or rear of the principal structure.
b. Required off-street parking shall be concrete, and all other parking areas shall be constructed of all-weather materials and located to eliminate interference with access to parking areas provided for other structures and for public parking within the development.

c. A minimum parking area of 160 square feet per manufactured home space shall be provided for the storage of boats or vehicles in excess of two per manufactured home unit to minimize on-street parking and to facilitate the movement of emergency vehicles into and through the development.

4. Recreation Area
   a. All manufactured home developments shall have at least one recreation area, located in an area that is free of traffic hazards, easily accessible to all residents of the development, and centrally located (where topography permits).
   b. Recreation areas and facilities, such as playgrounds, swimming pools and community buildings, shall be provided that will meet the anticipated needs of the clientele the development is designed to serve.
   c. Not less than eight percent of the gross development area shall be devoted to recreational facilities, generally in a central location. In large developments, this may be decentralized. Recreation areas include space for community buildings and community use facilities such as adult recreation and child play areas and swimming pools, but not including vehicle parking, commercial, maintenance and utilities areas.
   d. When playground space is provided, it shall be so designated and shall be protected from traffic, thoroughfares, and parking areas.

5. Accessory Uses
   Manufactured home developments may include accessory service buildings associated with the development including: utilities; management office; repair shop; equipment storage; sanitary facilities; laundry facilities; and recreation facilities.

6. Access and Traffic Circulation
   a. Internal streets in manufactured home developments shall be privately owned, built, and maintained, and shall be designed for safe and convenient access to all stands and parking spaces and to facilities for common use of residents of the development.
   b. An internal street or common access route shall be provided to each stand. All internal streets or common access routes shall be a minimum of 30 feet in width from back of curb to back of curb. The internal streets shall be continuous and connect with either outer streets in the development, public streets, or in the alternative, shall be provided with a cul-de-sac having a minimum radius of 40 feet. All other streets shall have a minimum radius at intersections of 30 feet. No internal street ending in a cul-de-sac shall exceed 1,000 feet in length.
   c. All streets shall be constructed of at least two inches of asphalt, six inches of lime subgrade and with standard or surmountable curbs. Alternative materials for street construction may be approved by the City Engineer as long as the alternative exceeds the standards in this section or those established in a city criteria manual.
d. Internal streets shall be maintained free of excessive cracks, potholes, and other hazards at the expense of the licensee. Inspection of the streets shall occur at least yearly in conjunction with other city inspections of the manufactured home development. The inspections shall be made by the City Engineer and shall cover the hazards listed in this subsection.

e. All streets within the development shall be numbered or named in an approved manner.

f. Interior streets shall intersect adjoining public streets at 90 degrees and at locations that will eliminate or minimize interference with the traffic on those public streets. Design of the interior streets shall be approved by the traffic engineer with respect to horizontal and vertical alignment, access points to city streets, parking locations, and internal access for emergency vehicles.

7. Utilities and Services

a. All utility lines shall be installed underground in manufactured home developments.

b. Water and sewer connections shall be made to the public supply of water in accordance with city standards.

c. All water piping, fixtures, and other equipment shall be constructed and maintained in accordance with state and city regulations and requirements.

d. Individual water meters shall be provided for each manufactured home dwelling.

e. All manufactured home developments shall comply with the city’s residential solid waste regulations.

H. Elderly Housing

1. In the R6, R7, and MN zoning districts, elderly housing shall be limited to a maximum of 55,000 square feet per lot.

2. Assisted living facilities may be subject to additional standards in Subsection 5.3.3I.

I. Group Home and Community Home

1. Purpose
The city supports the rights of handicapped persons to live in stable, affordable housing in settings that maximize community integration and opportunities for acceptance. The city desires to make reasonable accommodations in rules, policies, and practices to afford handicapped persons equal opportunity to use and enjoy a dwelling. The city supports decentralization as a method of assuring that handicapped persons are allowed to reside in a neighborhood, which retains its residential character. Unregulated and unlicensed homes for handicapped persons may not necessarily provide adequately for the health and safety of the residents. The city desires to protect the health and safety of its handicapped citizens and to provide a regulatory scheme for group homes for the handicapped.

2. Use and Operation
The use and operation of a Community Home for Disabled Persons that meets the qualifications of this subchapter is a use by right and is authorized in any residential zoning district as long as there is no more than six residents and two supervisors, regardless of the legal relationship of those persons to one another and the community home is not within one-half mile of an existing community home. The residents of the community home may
not keep, either on the premises of the home or on a public right-of-way adjacent to the home, motor vehicles in numbers that exceed the numbers of bedrooms in the home.

3. Qualification
To qualify as a Community Home for Disabled Persons the entity must comply with Chapter 123, of the Texas Human Resources Code and the following regulations:

a. Operation
A community based residential home may be operated by:
   i. The Texas Department of Mental Health and Mental Retardation;
   ii. A community center organized under Chapter A, Subchapter 534, of the Texas Health & Safety Code;
   iv. An entity certified by the Texas Department of Human Services as a provider under the medical assistance program serving persons in intermediate care facilities for persons with mental retardation; or
   v. An assisted living facility licensed under Chapter 247, of the Texas Health & Safety Code, provided that the exterior structure retains compatibility with the surrounding residential dwellings.

b. Licensing
The community home must meet all applicable federal, state, and local licensing requirements.

c. Site Plan Required
The community home must provide a site plan that clearly shows compliance with the following criteria:
   i. Any single-family dwelling unit proposed to be used as shared group housing for the handicapped shall provide the following:
      a. To house one handicapped person per bedroom, the dwelling unit shall provide 100 square feet of space per bedroom.
      b. To house two handicapped persons per bedroom, the dwelling unit shall provide 120 square feet of space per bedroom.
   ii. Any single-family dwelling unit proposed to be used as shared group housing for handicapped persons shall provide for a separate bedroom for the care provider(s).

4. Specific Use Permit Required
a. Permit Required
   It shall be unlawful for any person to occupy, construct, alter, extend, or expand any assisted living facility, group home for handicapped persons, or institution within the limits of the city without a valid permit issued by the city in the name of such person for the specific occupation, construction, alteration, or extension of the assisted living facility, group home, or institution proposed.
Subchapter 5: Use Regulations
5.3 Use-Specific Standards

5.3.3 Residential Uses

i. Transfer
   The permit shall be specific to the person named in the application for the permit and shall not be transferred without the prior written consent of the city through the issuance of a new permit.

ii. Expiration of Permit
   If the proposed occupation, construction, alteration, or extension is not commenced within one calendar year from the date the permit for such occupation, construction, alteration, or expansion was issued, said permit shall automatically expire, unless the city approves an extension of time or issues a new permit.

b. Application and Fee Requirements
   All applications and required fees for assisted living facilities, group home, or institution permits shall be made in accordance with the Application Criteria Manual and shall contain the following:
   i. Name and address of the applicant;
   ii. Location and legal description of the property where the assisted living facility or group home will be located; and
   iii. Documentation that the assisted living facility, group home for handicapped persons, or institution has met federal, state, and local licensing requirements.

Site Plan Requirements
   Any structure proposed to be used for shared group housing for the handicapped shall provide the square footage in each bedroom:
   i. To house one handicapped person per bedroom, the dwelling unit shall provide 100 square feet of space per bedroom.
   ii. To house two handicapped persons per bedroom, the dwelling unit shall provide 120 square feet of space per bedroom.
   iii. Any structure proposed to be used for an assisted living facility, group housing for handicapped persons, or institution shall provide for a separate bedroom for the care provider(s).

d. Issuance of Permit
   In considering the application, the city may take into account the proposed location of the assisted living facility, group home for handicapped persons, or institution in relation to the present and anticipated land use and development. After review of the application and, upon determining that the application and the proposed, assisted living facility, group home for handicapped persons, or institution complies with this subchapter and other applicable laws, codes, and regulations, the permit shall be issued.

e. Denial of Permit/Hearing
   Any person whose application for a permit under this subchapter has been denied, may, within 10 days of the denial, request, in writing, a rehearing on the matter and offer additional evidence if desired. A denial of a request for rehearing, or a denial upon rehearing, shall be final and binding. No new application for a permit shall be
accepted within one year of the denial, unless the denial upon rehearing, or the denial for rehearing, is without prejudice to the refilling of same.

f. **Permit Exemption**
The permit requirement is for the use and occupancy of assisted living facilities, group homes, or institutions and does not include community homes for disabled persons.

5. **Licenses**
It shall be unlawful for any person to establish, operate, or maintain, or permit to be established, operated, or maintained, upon any property owned or controlled by such person any assisted living facility, group home for handicapped persons, or institution within the limits of the city unless such person holds a valid license issued in accordance with the Administrative Criteria Manual.

6. **Location of Assisted Living Facility, Group Home for Handicapped Persons, or Institution**
No other assisted living facility, group home for handicapped persons, or institution shall be located within a radius of 600 feet of another licensed facility, home, or institution as determined by the city.

7. **Inspections**

a. **Compliance Inspection**
Any duly authorized inspector of the city, including, but not limited to the Building Official, Health Official, Fire Chief, Fire Marshal, Police Chief, or Tax Assessor-Collector shall be permitted to make reasonable inspections of any assisted living facility, group home, or institution to determine compliance with this DDC and other applicable city ordinances.

b. **Right of Entry**
Any duly authorized inspector of the city, as set forth in subsection, a shall have the power to enter at reasonable times upon any private or public property for the purpose of inspecting and investigating conditions relating to the enforcement of this subchapter. The inspector should seek the permission of a lawful adult occupant prior to entry. Upon refusal of entry, the city shall have all available remedies at law to gain entry, including but not limited to a court order showing probable violation of state or local law.

8. **Notices, Hearings, and Orders**

a. **Notice of Violations; Requirements of Notice; Suspension and/or Revocation**
Whenever it is brought to the attention of the city that there has been a violation of any provision of this subchapter, the city shall give notice of such alleged violation to the permittee or licensee, or their respective agent, and each resident of the facility as provided. The notice shall:

i. Be in writing;

ii. Include a statement of the reasons for its issuance;

iii. Allow a reasonable time of not less than 30 days nor more than one year, based upon the nature and severity of the violation and having due regard for the
5.3 Use-Specific Standards

5.3.4 Public, Institutional, Religious, and Civic Uses

Subchapter 5: Use Regulations

Denton, Texas – Denton Development Code

Print Date: December 12, 2019

safety and protection of the community, for the performance of the corrective measures required;

iv. Be served upon the permittee or licensee, or the permittee or licensee’s agent; provided, however, that the notice shall be deemed to have been properly served upon the permittee, licensee, or their respective agents, when a copy has been sent by mail to the permittee's, licensee's, or their respective agent's, last known address, or when the permittee or licensee, or respective agent, has been served with the notice by any method authorized or required by the laws of this state; and

v. Contain an outline of remedial action, when, if taken, will effect compliance with the provisions of this subchapter. If the violation is not remedied in accordance with the notice, and a breach of the subchapter continues, then the city, may suspend and/or revoke any permits or licenses issued in addition to any punishment provided. Residents of the facility shall be notified by mail of any notice of violations or orders by regular mail and/or posting of the notice in common areas of the facility.

b. Vacation of Residents/Cessation of Operations
The notice shall also specify vacation by the residents for the period of suspension or as ordered by the city upon revocation. The city may order the immediate vacation and cessation of operations if the same is found to be in the best interest of the health, safety, and general welfare of the citizens of the city.

9. Compliance Required
It shall be the responsibility of the permittee or licensee to ensure that all requirements of this subchapter are met and maintained. Any violation of any of the provisions of this subchapter shall subject the permittee or licensee to the general penalty provisions of this DDC.

5.3.4 Public, Institutional, Religious, and Civic Uses

A. Club or Lodge

1. Operation
Club or lodge facilities shall be owned or operated by a non-profit or social welfare organization that is tax-exempt as described in the Internal Revenue Code (IRC), Section 501(c)(4). Such facilities shall be for special educational or recreational purposes, but not primarily for profit or to render a service that is customarily carried on for gain.

2. R7 and MN Zoning District
a. Uses are limited to no more than 10,000 square feet of gross floor area per lot. A specific use permit is required for additional square footage for a club or lodge.
b. Drive-through service is prohibited.
c. Within a club or lodge, restaurant areas shall not exceed 5,000 square feet per lot.

3. MR Zoning District
a. Uses are limited to no more than 20,000 square feet of gross floor area per lot.
b. Drive-through service is prohibited.
c. Within a club or lodge, restaurant areas shall not exceed 5,000 square feet per lot.

4. **LI and HI Zoning Districts**
   Uses are limited to no more than 20,000 square feet of gross floor area per lot.

**B. Day Care, Adult or Child**
In the LI zoning district, day care is only allowed as an accessory use to the primary business within the same structure. Such accessory use shall be limited to serving only those employees or owners of the business or businesses within the same structure.

**C. Homeless Shelter**

1. **Separation**
   Unless municipal consent is granted under paragraph (3) below, a person may not construct or operate a homeless shelter within 1,000 feet of another homeless shelter or a public or private school. For purposes of this standard, distance is measured along the shortest straight line between the nearest property line of the homeless shelter and the nearest property line of another homeless shelter or a primary or secondary school, as appropriate.

2. **Notice**
   a. A person who intends to construct or operate a homeless shelter shall:
      i. Post notice of the proposed location of the shelter at that location; and
      ii. Provide notice of the proposed location of the shelter to the governing body of the municipality within the boundaries of which the shelter is proposed to be located.
   b. The person shall post and provide the notice required by paragraph (a) above before the 61st day before the date the person begins construction or operation of the homeless shelter, whichever date is earlier.

3. **Municipal Consent**
   a. Municipal consent to the construction or operation of a homeless shelter subject to paragraph (1) above is considered granted unless, before the 61st day after the date notice is received by the city under paragraph (0), the city determines by resolution after a public hearing that the construction or operation of a shelter at the proposed location is not in the best interest of the city.
   b. The City Council may rescind a resolution adopted under paragraph (a) above.

**D. Religious Assembly**
A religious assembly use may include accessory or subordinate uses and structures associated with its religious mission, such as: rectories, convents, meeting halls, offices for administration of the institution, schools, educational facilities, dormitories for students, parsonages, dwelling units for religious organization personnel, recreational facilities, day care facilities, arenas or production studios, or any combination of such optional uses, provided that:

1. Any accessory or subordinate uses are secondary to an active primary religious assembly use located on the same premises, regardless of whether such uses are owned, operated, managed, supported, or endorsed by, or otherwise affiliated with, any religious organization, mission or belief, and regardless of whether any religious message, teachings,
customs, celebrations, ceremonies, rituals, rites, worship, or content are provided in conjunction with such uses; and

2. Any uses having a residential component, such as rectories, convents, parsonages, dormitories and dwelling units, shall be located within an accessory structure, secondary to the main religious assembly use. The principal structure may not be used for any such residential use.

E. Business or Trade School

1. MN and MD Zoning Districts
   Uses are limited to no more than 5,000 square feet of gross floor area per lot.

2. MR and SC Zoning Districts
   Uses are limited to no more than 10,000 square feet of gross floor area per lot.

F. Hospital Services
   In the MR and SC zoning districts, main entries and ambulance loading zones shall not face residential zoning categories.

G. Medical Clinic
   1. In the MN, MD and SC zoning districts, uses are limited to no more than 10,000 square feet of gross floor area per lot.

   2. In the MN, MD, MR, and SC zoning districts, main entrances and ambulance loading zones shall not face residential zoning categories.

H. Medical Office

1. MN Zoning District
   Uses are limited to no more than 10,000 square feet of gross floor area per lot.

2. MD and SC Zoning Districts
   Medical office uses with more than 25,000 square feet per lot shall require a specific use permit pursuant to Subsection 2.5.2: Specific Use Permit (SUP).

5.3.5 Commercial Uses

A. General Agriculture
   The keeping of livestock and other animals shall be subject to the standards in Subpart A, Chapter 6: Animals, in the Municipal Code of Ordinances.

B. Commercial Stable
   In the R1 and R2 zoning districts, livestock are limited to two animals on parcels one to three acres in size. Additional animals may be added at a rate of one per each acre over three.

C. Kennel
   1. Enclosed Building Requirement
      The parts of a building where animals are boarded shall be fully enclosed, with solid core doors and no operable windows, and shall be sufficiently insulated so no unreasonable noise or odor can be detected off premises.
Subchapter 5: Use Regulations
5.3 Use-Specific Standards
5.3.5 Commercial Uses

2. Kennels with Outdoor Facilities
   Outdoor facilities, including outdoor runs, shall not be located within 150 feet of any
   adjacent property unless such adjacent property is owned by the operator of the kennel.

D. Veterinary Clinic
   In the MD zoning district, veterinary clinics are limited to no more than 5,000 square feet per lot.

E. RV Parks
   1. Generally
      a. Occupation by a single user shall not exceed a period of six months.
      b. The principal business of a RV park shall be to provide sites for RVs, camper vehicles,
         and travel trailers. Mobile homes designed to meet residential building codes are
         prohibited.
      c. Plumbed sanitary facilities shall include a minimum of one men’s and one women’s
         toilet, lavatory, and shower for each 25 RV spaces that provide water and sewer
         hookups, and one men’s and one women’s toilet, lavatory, and shower for each 15 RV
         spaces that do not provide water and sewer hookups.
      d. One sanitary dump station with water facilities shall be provided for every RV park.

2. Site Design Standards
   a. RV parks shall have a minimum land area of one-half acres.
   b. The maximum density for an RV park is 25 recreational vehicle stalls per one acre of
      gross land area.
   c. Recreational vehicles shall be separated from each other and from all other structures
      by a minimum of 10 feet. For the purposes of such measurement, any accessory to a
      recreational vehicle, such as an awning or individual storage facility, shall be
      considered as part of the recreational vehicle.
   d. No recreational vehicle shall be closer than 20 feet to the property line adjoining a
      public right-of-way nor closer than 15 feet to any residential zoning district as
      established in Table 3.1-A: Zoning District Designations.

3. Access and Circulation
   a. Entrances and exits may not be accessed through a residential zoning district as
      established in Table 3.1-A: Zoning District Designations, nor require traffic movement
      to or from the RV park through a residential zoning district.
   b. Access to a lot may be provided via a public access easement. There shall be no
      minimum required street frontage.
   c. Two-way and one-way traffic drive-aisle widths shall conform to the dimensional
      standards in this DDC and the Transportation Design Criteria Manual.

4. Parking
   Each RV space shall include parking for a recreational vehicle. Additional off-street parking
   shall be provided at community sanitary facilities.

5. Accessory Uses
   RV parks may include the following accessory uses: service buildings associated with the
   campground or RV park including utilities, management office, repair shop, equipment
storage, sanitary facilities, and laundry facilities; recreation facilities; equipment rentals; concessions; camping supply sales; and up to two residential dwelling units or permanent recreational vehicles for the purpose of housing a resident manager and caretaker.

F. Bar, Tavern, or Lounge
1. The storage of raw and/or spent materials associated with crafting of alcoholic beverages shall be kept in a fully enclosed structure, building, or container.
2. The distribution of manufactured or alcoholic beverage products is prohibited.

G. Mobile Food Court
1. Operation
   a. Participating mobile food businesses or other authorized vendors shall obtain a business license and any other permits or approvals as required by the Municipal Code of Ordinances prior to operation at a mobile food court.
   b. All activities associated with a mobile food court must comply with all health department requirements.
   c. All proposed activities shall be conducted on private property owned or otherwise controlled by the applicant.
   d. The proposed mobile food court shall not impede pedestrian or vehicular traffic in the public way.
   e. Live music shall conform to established noise standards in the City of Denton.
2. Design
   a. A minimum lot or parcel area of 2,000 square feet is required to operate a mobile food court.
   b. All dimensional and development standards of the underlying zoning district shall be met prior to approval of a mobile food court.
   c. Hard surface paving at the vehicular entrance to the mobile food court, and for each individual mobile food business is required. Alternatives to asphalt and cement may be approved as part of the specific use permitting process.
   d. The mobile food court shall not occupy required parking stalls of any principal use of the site.

H. Private Club
1. RR, MN, and MD Zoning Districts
   a. Private clubs shall be limited to sit down only, no more than 100 seats, and no more than 4,000 square feet of restaurant area.
   b. Drive up service is prohibited.
2. MR, SC, LI, and HI Zoning Districts
   Uses are limited to no more than 10,000 square feet of gross floor area.

I. Restaurant
1. In the MN zoning district, restaurants shall not exceed 10,000 square feet per lot.
2. The storage of raw and/or spent materials associated with crafting of alcoholic beverages shall be kept in a fully enclosed structure, building, or container.
3. The distribution of manufactured or alcoholic beverage products is prohibited.

J. Restaurant, with Drive-Through
   All drive-through facilities shall comply with the Transportation Design Criteria Manual; Subsection 7.9.7: Loading Areas and Drive-Throughs; and the off-street parking, loading, and stacking requirements established in Section 7.9: Parking and Loading.

K. Administrative, Professional, and Government Office
   1. R3, R4, R6, and R7 Zoning Districts
      Administrative, professional, and government office uses shall not exceed 10,000 square feet per lot.
   2. MN and MD Zoning Districts
      Administrative, professional, and government office uses with more than 25,000 square feet per lot shall require a specific use permit pursuant to Subsection 2.5.2: Specific Use Permit (SUP).

L. Bank or Financial Institution
   1. R7 Zoning District
      a. Drive-through facilities are prohibited.
      b. Banks or financial institutions shall only be allowed as part of a mixed-use building.
   2. MN, and MD Zoning Districts
      Drive-through facilities require a specific use permit approval pursuant to Subsection 2.5.2: Specific Use Permit (SUP).

M. Musician Studio
   Musician studios shall conform to established noise standards in the City of Denton.

N. Credit Access Business
   1. Credit access businesses shall not be located within 1,000 feet of another credit access business, measured in a direct line from property line to property line.
   2. Credit access businesses shall register with the city pursuant to City Ordinance 2013-073.

O. Laundry Facility, Self-Service
   1. R7 Zoning District
      Self-service laundry facilities shall only be permitted as an accessory use to multifamily dwellings, and such use shall be located within a multifamily structure.
   2. MN, MD, and MR Zoning Districts
      Individual self-service laundry facilities shall not exceed 2,500 square feet per lot.

P. Tattoo and Body Piercing Parlor
   Tattoo and body piercing parlors shall comply with licensing and certification requirements of the Texas Department of State Health Services.

Q. General Retail Unless Otherwise Specified, Less than 5,000 Square Feet
   In the R7 zoning district, general retail shall only be allowed as part of a mixed-use building.
R. General Retail Unless Otherwise Specified, More than 15,000 Square Feet
In the LI and HI zoning districts, general retail uses with more than 25,000 square feet per lot shall require a specific use permit pursuant to Subsection 2.5.2: Specific Use Permit (SUP).

S. Bed and Breakfast
1. Size and Number of Guest Units
   a. In the RR, R4, R6, R7, and MN zoning districts, the maximum number of guest units for any bed and breakfast establishment shall be five.
   b. In all other zoning districts, the maximum number of guest units for any bed and breakfast establishment shall be eight.

2. Location and Operation
   a. Bed and breakfast establishments shall be within 200 feet of a collector or arterial street. Distances shall be measured along a public street or alley access to the site from the arterial or collector street.
   b. The business owner or manager shall be required to reside on the property or on an adjacent property.

T. Short-Term Rental
1. Registration Requirements
   No person shall advertise, offer to rent, or rent, lease, sublease, license, or sublicense a residential property within the city as a short-term rental for which a registration has not been properly made and filed with the Development Services Department. Registration shall be made upon forms furnished by the city for such purpose and shall specifically require the following minimum information:
   a. Name, address, phone number and e-mail address of the property owner of the short-term rental property;
   b. Verification that the proposed short-term rental property is the applicant’s primary residence;
   c. Name, address, phone number and e-mail address of the designated local emergency contact;
   d. The maximum number of occupants permitted for the dwelling unit or sleeping room in accordance with Subsection 5.3.1D: Maximum Persons Occupying a Dwelling;
   e. A submission of a sketch floor plan of the dwelling with dimensional room layout; and
   f. A site plan/survey of the property indicating maximum number of vehicles that can be legally parked on the property, without encroaching onto streets, sidewalks or alleys, other public rights-of-way or public property.

2. Operation
   a. External Signage
      There shall be no external on-site or off-site advertising signs or displays indicating the property is a short-term rental.
b. **Limit on Occupants Allowed**
   No more than two adult guests per bedroom, plus no more than two additional adults shall be allowed when renting a property as a short-term rental, except that there shall be a maximum occupancy of 10 persons, adults and children.

c. **Limits on Number of Vehicles**
   There shall be a maximum of one vehicle per bedroom, or the maximum number of vehicles that can be accommodated within the garage and driveway, without extending over the public rights of way (alleys and sidewalks), whichever is less.

d. **Advertisements and Contracts**
   Any advertisement of the property as a short-term rental and all rental contracts must contain language that specifies the allowed maximum number of occupants and maximum number of vehicles.

e. **Other Restrictions**
   It is unlawful:

   i. To operate or allow to be operated a short-term rental without first registering, in accordance with this DDC, the property in which the rental is to occur;

   ii. To advertise or offer a short-term rental without first registering, in accordance with this DDC, the property in which the rental is to occur; documented advertisement of the subject property as a short-term rental, online or offline, shall be considered evidence of a violation of this DDC;

   iii. To operate a short-term rental in any location that is not the registrant’s primary residence;

   iv. To operate a short-term rental that does not comply with all applicable city and state laws and codes;

   v. To operate a short-term rental without paying the required hotel occupancy taxes;

   vi. To offer or allow the use of a short-term rental for the sole or primary purpose of having a party venue;

   vii. To fail to include a written prohibition against the use of a short-term rental for having a party in every advertisement, listing, or other publication offering the premises for rent; and

   viii. Permit the use of short-term rental for the purpose of: housing sex offenders; operating a structured sober, recovery or other purpose living home or similar enterprise; selling illegal drugs; selling alcohol or another activity that requires a permit or license under the Alcoholic Beverage Code; or operating as a sexually oriented business.

3. **Brochure and Safety Features**

   a. **Informational Brochure**
      Each registrant operating a short-term rental shall provide to guests a brochure that includes:

      i. The registrant’s 24-hour contact information;
Subchapter 5: Use Regulations
5.3 Use-Specific Standards
5.3.5 Commercial Uses

ii. A local responsible party’s 24-hour contract information if the owner is not within the city limits when guests are renting the premises;

iii. Pertinent neighborhood information including, but not limited to, parking restrictions, restrictions on noise and amplified sound, and trash collection schedules; and

iv. Information to assist guests in the case of emergencies posing threats to personal safety or damage to property, including emergency and non-emergency telephone numbers for police, fire, and emergency medical services providers and instructions for obtaining severe weather, natural or manmade disaster alerts and updates.

b. Safety Features
Each short-term rental registrant shall provide, in the premises, working smoke detectors in accordance with adopted codes, at least one working carbon monoxide detector and alarm, and one working fire extinguisher. The premises shall, otherwise comply with all applicable City regulations, including but not limited to Building and Fire Codes.

4. Notification of Approval of Short-Term Rental
Within 10 days of the approval of a short-term rental, the city shall send notice to all property owners within 100 feet of the subject property, and shall include the 24-hour complaint line, and pertinent information about standards regulating short-term rentals.

5. Registration Term, Fees, and Renewal
a. All short-term rental registrations approved under this DDC shall be valid for a period of one year from the date of its issuance.

b. The fee for registration of a short-term rental is identified in the Administrative Criteria Manual.

c. Upon receipt of an application for renewal of the registration, the Director may deny the renewal if there is reasonable cause to believe that:

i. The registrant has plead no contest to or been convicted of a violation of any ordinance of the city, or any state, or federal law on the premises or has permitted such a violation on the premises by any other person; or

ii. There are grounds for suspension, revocation, or other registration sanction as provided in this DDC or other applicable city codes.

6. Right to Inspect Premises
The City of Denton reserves the right, with reasonable notice to the owner, to inspect the residential premises to determine compliance with this DDC as well as other applicable city codes.

a. If only a portion of the premises is offered for rent, then that portion, plus shared amenities and points of access, may be inspected.

b. If, upon completion of an inspection, the premises are found to be in violation of one or more provisions of applicable city codes and ordinances, the city shall provide written notice of such violation and shall set a re-inspection date for a violation to be corrected prior to its occupancy.
U. **Automotive Fuel Sales**
   1. Storage of equipment, auto parts, and supplies used in servicing vehicles shall be maintained entirely within an enclosed structure.
   2. Open storage of wrecked or inoperable cars, discarded tires, auto parts, or similar materials shall be prohibited.

V. **Automotive Repair Shop, Major**
   1. All repairs, services, and storage shall be conducted within an entirely enclosed structure.
   2. Open storage of wrecked or inoperable cars, discarded tires, auto parts, or similar materials shall be prohibited.
   3. Sales of vehicles shall be prohibited.

W. **Automotive Repair Shop, Minor**
   1. Storage of vehicles on the premises shall not exceed 30 days.
   2. Storage of equipment, auto parts, and supplies used in servicing vehicles shall be maintained entirely within an enclosed structure.
   3. Open storage of wrecked or inoperable cars, discarded tires, auto parts, or similar materials shall be prohibited.
   4. Sales of vehicles shall be prohibited.

X. **Automotive Wrecking Service, Impound Lot, Junkyard, and Salvage Yard**
   1. Automotive wrecking services, impound lots, junkyards, and salvage yards shall comply with the Texas Administrative Code regarding vehicle storage facilities.
   2. Stored vehicles shall be screened from public view from all rights-of-way, residential zoning districts, and residential uses.
   3. Stored vehicles shall not be located within the floodplain, water-related habitat, riparian buffers, or other environmentally sensitive areas.
   4. Best management practices addressing stormwater quality must be implemented and maintained on-site. Management practices must attain the pollutant removal capabilities recommended for parking areas in the Integrated Storm Water Management (ISWM) Manual, as published by the North Central Texas Council of Governments, or similar practices consistent with low impact development (LID) approaches. This standard does not apply to automotive wrecking service, impound lot, junkyard, or salvage yard establishments that do not provide outdoor storage of vehicles, equipment, parts, or other materials.
   5. Any expansion of a nonconforming salvage yard shall require a specific use permit.

Y. **Equipment Sales and Rental**
   1. Maintenance of equipment shall be conducted entirely within an enclosed building.
   2. Unenclosed storage of inoperable or wrecked equipment or materials shall be prohibited.
   3. All other unenclosed stored equipment shall be screened from public view from all rights-of-way, residential zoning districts, and residential uses.
Z. Sexually Oriented Business

1. Purpose and Intent
   It is the purpose of this subsection to regulate sexually oriented businesses in order to promote the health, safety, morals, and general welfare of the citizens of the city, and to establish reasonable and uniform regulations to prevent the deleterious location and concentration of sexually oriented businesses within the city. The provisions of this subsection have neither the purpose nor effect of imposing a limitation or restriction on the content of any communicative materials, including sexually oriented materials. Similarly, it is not the intent nor effect of this subsection to restrict or deny access by adults to sexually oriented materials protected by the First Amendment, or to deny access by the distributors and exhibitors of sexually oriented entertainment to their intended market. Neither is it the intent nor effect of this section to condone or legitimize the distribution of obscene material.

2. Findings
   Based on evidence concerning the adverse secondary effects of adult uses on the community presented in hearings and in reports made available to the City Council, and on findings incorporated in the cases of City of Renton v. Playtime Theatres, Inc., 475 U.S. 41 (1986), Young v. American Mini Theatres, 426 U.S. 50 (1976), FW/PBS, Inc. v. City of Dallas, 493 U.S. 215 (1990); Barnes v. Glen Theatre, Inc., 501 U.S. 560 (1991), City of Erie v. Pap’s a.m., 120 C. Ct. 1382 (2000), and on studies in other communities including, but not limited to: Phoenix, Arizona; Minneapolis, Minnesota; St. Paul, Minnesota; Houston, Texas; Indianapolis, Indiana; Amarillo, Texas; Garden Grove, California; Los Angeles, California; Whittier, California; Austin, Texas; Seattle, Washington; Oklahoma City, Oklahoma; Cleveland, Ohio; Beaumont, Texas; Dallas, Texas; Newport News, Virginia; Bellevue, Washington; New York, New York; and St. Croix County, Wisconsin; and also on findings from the "Report of the Attorney General’s Working Group On The Regulation Of Sexually Oriented Businesses” (June 6, 1989, State of Minnesota), the City Council finds:

   a. Sexually oriented businesses lend themselves to ancillary unlawful and unhealthy activities that are presently uncontrolled by the operators of the establishments. Further, there is presently no mechanism to make the owners of these establishments responsible for the activities that occur on their premises.

   b. Certain employees of sexually oriented businesses, defined in this section as adult theaters and adult cabarets, engage in higher incidence of certain types of illicit sexual behavior than employees of other establishments.

   c. Sexual acts, including masturbation, and oral and anal sex, occur at sexually oriented businesses, especially those that provide private or semi-private booths or cubicles for viewing films, videos, or live sex shows.

   d. Offering and providing such space encourages such activities, which creates unhealthy conditions.

   e. Persons frequent certain adult theaters, adult arcades, and other sexually oriented businesses for the purpose of engaging in sex within the premises of such sexually oriented businesses.
5.3 Use-Specific Standards

5.3.5 Commercial Uses

f. At least 50 communicable diseases may be spread by activities occurring in sexually oriented businesses, including, but not limited to syphilis, gonorrhea, human immunodeficiency virus infection (HIV-AIDS), genital herpes, hepatitis B, Non A, Non B amebiasis, salmonella infections and shigella infections.

g. According to the best scientific evidence, AIDS and HIV infection, as well as syphilis and gonorrhea, are principally transmitted by sexual acts.

h. Sanitary conditions in some sexually oriented businesses are unhealthy, in part, because the activities conducted there are unhealthy, and, in part, because of the unregulated nature of the activities and the failure of the owners and the operators of the facilities to self-regulate those activities and maintain those facilities.

i. Numerous studies and reports have determined that semen is found in the areas of sexually oriented businesses where persons view "adult" oriented films.

j. The findings noted in paragraphs (a) through (f) raise substantial governmental concerns.

k. Sexually oriented businesses have operational characteristics that should be reasonably regulated in order to protect those substantial governmental concerns.

l. The general welfare, morals, health, and safety of the citizens of the city will be promoted by the enactment of this section.

3. Location of Sexually Oriented Businesses

The location regulations of this subsection are enacted pursuant to the authority of TLGC, Chapter 211. All other provisions of this subsection are enacted pursuant to the city’s police power and the authority of Article XI, Section 5, of the Texas Constitution. Sexually oriented businesses shall comply with the following separation requirements:

a. A sexually oriented business shall not operate adjacent to an arterial street and within 1,000 feet of the following uses:

   i. A school, church, adult or child day care, elderly housing facility, hospital, public park or playground, residential zoning district, or lot devoted to a residential use; or

   ii. Another sexually oriented business.

b. The distance between shall be measured in a straight line, without regard to intervening structures or objects, from the closest exterior walls of the structures in which the sexually oriented business is located to the nearest property line.

c. Only one sexually oriented business is allowed in a building, structure, or portion of a building or structure.

4. Additional Regulations for Escort Agencies

a. An escort agency shall not employ any person under the age of 18 years.

b. A person commits an offense if he or she acts as an escort or agrees to act as an escort for any person under the age of 18 years.

5. Additional Regulations for Nude Model Studios

a. A nude model studio shall not employ any person under the age of 18 years.
b. A person under the age of 18 years commits an offense if he or she appears in a state of nudity in or on the premises of a nude model studio. It is a defense to prosecution under this subsection if the person under 18 years was in a restroom not open to public view or view of persons of the opposite sex.

c. A person commits an offense if he or she appears in a state of nudity or knowingly allows another to appear in a state of nudity in an area of a nude model studio premises which can be viewed from the public right-of-way.

6. Additional Regulations for Adult Theaters and Adult Motion Picture Theaters

a. A person commits an offense if he or she knowingly allows a person under the age of 18 years to appear in a state of nudity in or on the premises of an adult theater or adult motion picture theater.

b. A person under the age of 18 years commits an offense if he or she knowingly appears in a state of nudity in or on the premises of an adult theater or adult motion picture theater.

c. It is a defense to prosecution under this section if the person under 18 years was in a restroom not open to public view or view of persons of the opposite sex.

7. Additional Regulations for Adult Motels

a. Evidence that a sleeping room in a hotel, motel, or similar commercial establishment has been rented and vacated two or more times in a period of time that is less than 10 hours creates a rebuttable presumption that the establishment is an adult motel as that term is defined in Subchapter 9: Definitions.

b. A person commits an offense if, as the person in control of a sleeping room in a hotel, motel, or similar commercial establishment that does not comply with the location requirements of this subsection, he or she rents or sub-rents a sleeping room to a person, and, within 10 hours from the time the room is rented, he or she rents or sub-rents the same sleeping room again. The terms "rent" or "sub-rent" mean that act of permitting a room to be occupied for any form of consideration.

8. Regulations Pertaining to Exhibition of Sexually Explicit Films or Videos

a. A person who operates or causes to be operated a sexually oriented business, other than an adult motel, which exhibits on the premises in a viewing room of less than 150 square feet of floor space, a film, video cassette, or other video reproduction distinguished or characterized by an emphasis on matter depicting "specified sexual activities" or "specified anatomical areas," shall comply with the following requirements:

i. The establishment shall provide for one or more manager’s stations, none of which shall exceed 32 square feet of floor area. The manager’s stations shall be designed to provide a monitoring location for the operators or employees of the establishment during business hours and to exclude members of the general public. The interior of the premises shall be configured so that there is an unobstructed view from a manager’s station of every area of the premises to which any patron is permitted access for any purpose, excluding restrooms. Restrooms may not contain video reproduction equipment. If the premises has two or more manager’s stations then the interior of the premises shall be configured in such a manner that there is an unobstructed view of each area of the premises to which
any patron is permitted access for any purpose from at least one of the manager’s stations. The view required in this subsection must be by direct line of sight from the manager’s station.

ii. It is the duty of the owners and operator of the premises to ensure that at least one employee is on duty and situated in each manager’s station at all times that any patron is present inside any part of the premises.

iii. It shall be the duty of the owners and operator, and it shall also be the duty of any agents and employees present in the premises, to ensure that the view area specified (a)(i) above, remains unobstructed by any doors, walls, merchandise, display racks, or other materials at all times that any patron is present in the premises and to ensure that no patron is permitted access to any area of the establishment that does not have an unobstructed view from a manager’s station.

iv. The premises shall be equipped with overhead lighting fixtures of sufficient intensity to illuminate every place in which patrons are permitted access at an illumination of not less than one footcandle as measured at the floor level.

v. It shall be the duty of the owners and operator, and it shall also be the duty of any agents and employees present in the premises, to ensure that the illumination described above is maintained at all times that any patron is present in the premises.

b. A person having a duty as provided in (a)(i) through (a)(v) above commits an offense if he or she knowingly fails to fulfill that duty.

9. **Defenses to Enforcement**

It is a defense to prosecution under this subsection that the person appearing in a state of nudity did so in a modeling class operated:

a. By a proprietary school licensed by the State of Texas;

b. By a college, junior college, or university supported entirely or partly by taxation;

c. By a private college or university which maintains and operates educational programs in which credits are transferable to a college, junior college, or university supported entirely or partly by taxation; or

d. In a structure:

i. Which has no sign visible from the exterior of the structure and no other advertising that indicates a nude person is available for viewing; and

ii. Where in order to participate in a class a student must enroll at least three days in advance of the class; and

iii. Where no more than one nude model is on the premises at any one time.

e. It is a defense to prosecution under this subsection that each item of descriptive, printed, film, or video material offered for sale or rental, taken as a whole, contains serious literary, artistic, political, or scientific value.

f. Each day on which a violation occurs shall be separate and distinct violation.

### 5.3.6 Industrial Uses

#### A. Craft Alcohol Production

In the MD, MR, and SC zoning districts:
1. On-premise consumption or retail sales shall be required to operate a craft alcohol production establishment.

2. Areas used for production, bottling, packaging, storing, and other manufacturing related activities shall not exceed 10,000 square feet of gross floor area per lot. Additional square footage shall require specific use permit approval pursuant to Subsection 2.5.2: Specific Use Permit (SUP).

3. The storage of raw and/or spent materials shall be kept in a fully enclosed structure, building, or container.

4. The establishment shall operate in full compliance with all rules and regulations of the Texas Alcoholic Beverage Commission.

B. Food Processing, Less than 2,500 Square Feet
   1. MN, MD, MR, and SC Zoning Districts
      Only on-premises sales shall be allowed. Distribution, warehousing, or wholesaling activities are prohibited.
   2. All Zoning Districts
      If the proposed use is within 200 feet of a residential zoning district, approval is subject to a specific use permit pursuant to Subsection 2.5.2: Specific Use Permit (SUP).

C. Food Processing, More than 2,500 Square Feet
   1. MN, MD, MR, and SC Zoning Districts
      Only on-premises sales shall be allowed. Distribution, warehousing, or wholesaling activities are prohibited.
   2. All Zoning Districts
      If the proposed use is within 200 feet of a residential zoning district, and greater than 5,000 square feet per lot, then approval of a specific use permit shall be required pursuant to Subsection 2.5.2: Specific Use Permit (SUP).

D. Manufacturing, Artisan
   In the MN and MD zoning districts:
   1. Artisan manufacturing uses shall be limited to 10,000 square feet per lot.
   2. If within 200 feet of a residential zoning district or residential use, artisan manufacturing uses shall be limited to 5,000 square feet per lot, unless a specific use permit is approved pursuant to Subsection 2.5.2: Specific Use Permit (SUP), and permits the use to exceed 5,000 square feet per lot.
   3. All activities shall occur entirely within an enclosed structure.

E. Manufacturing, Low-Impact
   1. Distribution, warehousing, or wholesaling activities are prohibited.
   2. Uses are limited to a maximum of 5,000 square feet of gross floor area per lot.
   3. All activities shall occur entirely within an enclosed structure.
Subchapter 5: Use Regulations
5.3 Use-Specific Standards
5.3.7 Public and Semi-Public Utility Uses

F. Outdoor Storage

1. Generally
   No outdoor storage use shall constitute an automotive wrecking service, impound lot, junkyard, or salvage yard.

2. Location and Screening of Storage
   a. No outdoor storage operation shall be located in front of a principal building.
   b. Materials stored outdoors shall be setback at least five feet from all property lines.
   c. Materials shall not be stored in areas intended for vehicular or pedestrian circulation.
   d. Outdoor storage shall be opaquely screened from public view pursuant to screening standards in Subsection 7.7.8: Walls, Fences, and Screening.

G. Self-Service Storage

1. Building Materials
   a. Except for fenestrations, as noted in (1)(b) below, each elevation shall be constructed of 100 percent masonry, stone, architectural concrete block with integrated color (split-face CMU), stucco, or concrete tilt-wall (colored or stamped).
   b. The materials in subsection (1)(a) above shall not apply to fenestrations such as doors, windows, glass, and entryway treatments.
   c. Glass shall not account for more than 70 percent of the exterior wall area.

2. Doors
   Overhead bay doors and/or storage unit doors shall not be visible from adjacent properties or public right-of-way.

3. Fencing and Buffers
   a. Fencing materials shall be limited to masonry and wrought iron and shall comply with Subsection 7.7.8: Walls, Fences, and Screening.
   b. Landscape buffers shall be provided in accordance with Section 7.7.6: Compatibility Landscape Buffer Requirements.

4. Other Activities
   a. No business activity other than the rental of storage units shall be conducted on the premises.
   b. Outdoor storage is prohibited.

H. Warehouse and Wholesale Facility
   In the MR and SC zoning districts, uses shall be limited to a maximum of 55,000 square feet of gross floor area per lot.

5.3.7 Public and Semi-Public Utility Uses

A. Power Stations, Electric Substations, Interchanges, and Switch Stations

1. Compliance with Electric Standards
   Electric substations and switch stations shall comply with the standards in Section 7.13: Electric Standards. A site plan demonstrating substantial conformance with all the
applicable design standards identified in Section 7.13: Electric Standards, shall be submitted.

2. Procedures for Review
   An applicant shall submit an application for a specific use permit pursuant to Subsection 2.5.2: Specific Use Permit (SUP), unless it is able to meet all the following requirements:
   a. Use of the property is associated with a City Council approved Capital Improvements Plan (CIP) or other City Council approved Master Plan.
   b. A public hearing was held at the City Council for the selection of the site to include:
      i. Written notice of the public hearing was provided to property owners within 200 feet and physical addresses within 500 feet of the subject property at least 12 days prior to the public hearing; and
      ii. A sign advertising the public hearing was posted on or adjacent to the property at least 12 days prior to the public hearing; and
      iii. Proposed screening wall location and design were reviewed and approved by the City Council.
   c. A neighborhood meeting was held at least 15 days prior to the public hearing at City Council for the acquisition of the site.

B. Solar Collector as a Principal Use
   Solar collectors shall conform to all height, setback, and landscaping requirements within their respective zoning district. The following additional standards apply to all solar collectors:
   1. All solar collector systems shall be in compliance with all currently adopted building codes;
   2. Solar collector systems that use concentrator technologies and have not incorporated anti-glare measures into the system or installation shall be placed in areas so that the concentrated solar glare shall not be directed onto inhabited adjacent properties or roadways; and
   3. The design of the solar collector system shall use materials, colors, textures, screening, and landscaping similar to their background or the existing natural environment to the most reasonable extent possible without prohibiting the installation.

C. Wind Energy Conversion System (WECS)
   1. For All Wind Energy Systems
      a. No tower shall be lit, except to comply with Federal Aviation Authority (FAA) standards.
      b. All wiring between the wind system and the substation shall be buried underground.
      c. All proposed wind systems shall conform to established noise standards in the City of Denton.
   2. For Large Wind Energy Systems
      a. The minimum acreage for a large wind system shall be established based on the setbacks of the turbine(s) and the height of the turbine(s);
      b. All turbines located within the same large wind system property shall be of a similar tower design, including the type, number of blades, and direction of blade rotation;
Subchapter 5: Use Regulations
5.4 Accessory Uses and Structures
5.4.1 Purpose

The purpose of this section is to establish minimum standards for accessory uses and structures that are incidental and subordinate to principal uses. These standards are intended to minimize adverse impacts on surrounding properties and the community.

5.4.2 Accessory Uses and Structures Allowed

All principal uses allowed in a zoning district pursuant to Table 5.2-A: Table of Allowed Uses, shall be deemed to include those accessory uses, structures, and activities typically associated with that use, unless specifically prohibited in this section. Accessory uses and structures are subject to the standards in this section and any applicable use-specific standards for the associated principal use in Section 5.3: Use-Specific Standards. Typical accessory uses are included in the use definitions in Subchapter 9: Definitions.

5.4.3 General Standards for Accessory Uses and Structures

A. The combined square footage of the principal structure and accessory structure(s) shall not exceed the zoning district maximum building coverage specified in Subchapter 3: Zoning Districts.

B. Accessory structures, with the exception of non-residential detached carports, gas station canopies, gas station car wash facilities, and security/entry booths, are prohibited in front and side yards. Accessory structures for public or private schools may be located in side yards, but shall not be located in front yards.

C. Where permitted, accessory structures shall be set back a minimum of three feet from all property lines.

D. No portion of an accessory structure may be located in, or encroach upon, any easement.

E. All accessory structures that require a building permit shall be architecturally compatible with its associated principal structure and/or screened from view of abutting properties and public rights-of-way.

F. Where permitted, accessory outdoor storage shall be located to the rear of the principal structure, shall be subject to the screening standards in Subsection 7.7.8: Walls, Fences, and Screening, and shall be limited to goods or materials sold or used on the premises as part of the principal use of the property.

5.4.4 Additional Standards for Specific Accessory Uses

A. Accessory Dwelling Unit

Accessory dwelling units ("ADUs") shall comply with the following standards:

c. Large wind systems shall be setback at least one and one-half times the height of the turbine and rotor diameter from the property line. Large wind systems shall also be setback at least one and one-half times the height of the turbine from above ground telephone, electrical lines, and other uninhabitable structures;

d. Towers shall not be climbable up to 15 feet above ground level.
1. **Generally**
   a. Only one ADU shall be allowed per lot.
   b. ADUs shall only be permitted on lots where the principal use is a single-family detached dwelling.

2. **Size**
   a. **ADUs on Lots Smaller than 10,000 Square Feet**
      i. ADUs shall not exceed 50 percent of the square footage of the principal dwelling unit on the lot.
      ii. ADUs shall not exceed 1,000 square feet per lot.
   b. **ADUs on Lots 10,000 Square Feet or Larger**
      ADUs shall not exceed 50 percent of the square footage of the principal dwelling unit on the lot.

3. **Location and Design**
   a. ADUs may be attached or detached units.
      i. Attached ADUs shall be fully attached to or within the principal structure on the lot. "Attached" shall mean at least one-quarter of the total wall area or the floor or ceiling of the ADU shall be fully connected to a wall, floor, or ceiling of the principal residential structure.
      ii. Detached ADUs shall be located to the side or rear of the principal dwelling unit.
   b. ADUs shall have a separate exterior entrance from the principal dwelling unit and shall contain cooking, sleeping, and sanitary facilities.

4. **Public Services and Utilities**
   Separate water or sewer service for the ADU shall not be allowed. Separate metering of other utilities is allowed.

5. **Ownership Requirements**
   Ownership of the ADU may not be legally severed from ownership of the associated lot and any other structures on such lot.

B. **Donation Box**
   A donation box shall not restrict the use or access to any parking spaces that are required for the principal use on the lot.

C. **Home Occupations**
   Home occupations shall comply with the following:
   1. **General**
      a. A home occupation shall be permitted only when it is an accessory use to a single-family detached, duplex, or townhome dwelling unit.
      b. A home occupation shall not involve any external structural alteration of the dwelling unit.
2. **Employees**  
The home occupation shall be operated by the person(s) residing in the principal dwelling. No more than two employees that do not reside on the property shall be allowed on the premises at any given time.

3. **Patrons**  
No more than four patrons shall be allowed on the premises at one time.

4. **Hours of Operation**  
No home occupation shall remain open for visitation by patrons between the hours of 8:00 p.m. and 8:00 a.m.

5. **No External Display of Products**  
There shall be no external display of products or any other externally visible evidence of the home occupation.

6. **Outdoor Storage and Activities**  
   a. No outdoor storage of materials, goods, supplies, or equipment associated with a home occupation shall be allowed.
   b. All activities related to the home occupation shall be operated entirely within the principal dwelling unit. Outdoor activities are strictly prohibited.

7. **Signage**  
Home occupations shall not be allowed to place an advertisement, sign, or display on or off the premises.

8. **Product Sales**  
A home occupation may include the sale of products on the premises, provided compliance is maintained with all other standards in this subsection.

9. **Prohibited Equipment and Materials**  
There shall be no chemical, mechanical, or electrical equipment on the premises, other than that normally found within a dwelling unit.

10. **Parking and Business-Related Vehicles (Vehicles Marked or Equipped Commercially)**  
No on-street parking of business-related vehicles shall be allowed at any time. No business vehicles larger than a van, panel truck, or pickup truck shall be permitted to park overnight on the premises. The number of business-related vehicles shall be limited to one.

11. **Allowable Home Occupations**  
Any use not listed in (C)(12) below shall be deemed an allowable home occupation so long as the use is allowed pursuant to Table 5.2-A: *Table of Allowed Uses*, and complies with the standards of this DDC.

12. **Prohibited Home Occupations**  
The following uses are examples of home occupations that shall be prohibited:
   a. Retail sales;
   b. Medical doctors, or any practice of physical and/or medical application, including chiropractors;
   c. Dentists;
d. Minor or major automobile or equipment repair;
e. Commercial greenhouses or nurseries; and
f. Animal grooming.

D. **Outside Storage, Accessory**
   In addition to complying with all EPA regulations, the International Fire Code, and all other applicable ordinances, statutes, rules and regulations, outdoor storage:
   1. Shall be confined to the side or rear yard only, and shall be opaquely screened from public view, using screening materials pursuant to Subsection 7.7.8: *Walls, Fences, and Screening*; and
   2. Shall be set back at least five feet from the property line, and maintained so as to not create a nuisance to the public or any adjoining property.

E. **Sale of Produce and Plants Raised on Premises**
   1. **Permitted Sales**
      Only the sale of produce or plants grown on-site shall be sold.
   2. **Hours of Operation**
      The sale of produce and plants shall only be permitted between the hours of 7:00 a.m. and 7:00 p.m.
   3. **Structures**
      No permanent structures shall be erected for the sale of produce and plants.

F. **Solar Collector, (Ground- or Building-Mounted)**
   1. If the solar collector is not flush with the roof, the applicant shall minimize the visibility of the collector from a public street, park, or open space to the most reasonable extent possible without prohibiting the installation.
   2. Ground-mounted collectors are allowed as an accessory structure and shall only be located outside of required setbacks.
   3. Ground-mounted accessory solar collectors shall not exceed the height of the principal structure on the lot or parcel.

G. **Wind Energy Conversion System (WECS), Small (Ground-Mounted)**
   1. **Generally**
      a. An individual ground-mounted WECS shall be set back from the property line and the principal structure at least one and one-half times the height of the WECS structure.
      b. The height limit for an accessory WECS shall be the height limit in the underlying zoning district, as long as the WECS meets the setback established in (1)(a) above.
      c. The distance between the ground and the rotor blade (when the rotor blade in its lowest position) shall be a minimum of 20 feet.
   2. **RR and R1 Zoning Districts**
      a. Lots where the proposed WECS will be located shall have a minimum lot area of two acres.
b. A maximum of one WECS per lot is permitted by right; more than one WECS per lot shall require approval of a specific use permit pursuant to Subsection 2.5.2, Specific Use Permit (SUP).
H. Wind Energy Conversion System (WECS), Small (Building-Mounted)
Rooftop WECS shall be considered an accessory use if the following are satisfied:

1. The maximum height of the rooftop WECS does not exceed a height of 10 feet above the roof or the top of a parapet, whichever is higher. The height shall be measured from the base of the WECS where it is mounted on the building to the highest point of the arc of the blades’ elevation. If the WECS does not use blades, then height is measured from the base of the WECS where it is mounted on the building to the highest point of the WECS;

2. The WECS is securely attached to the structure in compliance with all currently adopted Building Codes; and

3. The blade rotor plane shall be at least four feet away from any window and at least 12 feet above any patio with human access.

5.4.5 Additional Standards for Specific Accessory Structures

A. Swimming Pools
Discharge of swimming pools and backwash filters must be plumbed to the sanitary sewer.

5.5 Temporary Uses and Structures

5.5.1 Purpose
The purpose of this section is to allow certain uses and structures of a limited duration subject to specified conditions. This section is intended to ensure that such uses or structures do not negatively impact surrounding properties and are discontinued upon the expiration of a set time period.

5.5.2 Temporary Uses and Structures Allowed
The Director may permit temporary uses in accordance with Table 5.2-A: Table of Allowed Uses, and according to any applicable use-specific standards.
5.5.3 Approval Process for Temporary Uses and Structures

A. General

1. Prior to establishing a temporary use or structure, a temporary use permit shall be approved pursuant to Subsection 2.5.3: Temporary Use Permit.

2. Neither the granting of a temporary use permit, nor compliance with its terms, shall constitute a defense to prosecution under any law or ordinance, other than as stated in this section. A temporary use permit serves only to conditionally permit the temporary use of property, provided that the permittee strictly complies with all permit requirements and restrictions.

B. Conditions

1. The Director may prescribe reasonable conditions upon a temporary use permit to protect the public health, safety, and general welfare of the community, with particular attention to areas proximately located to the permitted temporary use. Such conditions may include specific performance standards, noise mitigation measures, lighting restrictions, restrictions on hours of operation, odor control measures, off-street parking requirements, traffic restrictions, and other standards designed to minimize adverse impacts on surrounding areas.

2. The Director may condition issuance of a temporary use permit upon either or both of the following:
   a. The applicant’s demonstration of full compliance with all applicable permitting, licensing, surety, insurance, and performance standards of any governmental, administrative, or regulatory body exercising jurisdiction over the requested temporary use; and/or
   b. The applicant’s posting of bonds or other securities in an amount, and of a type, reasonably sufficient to remediate, repair, and restore any public lands, infrastructure, or easements, or any public or private floodplains or environmentally sensitive areas, which could foreseeably suffer damage, directly or indirectly, as a consequence of the requested temporary use, regardless of whether such damages are actually caused by the applicant or by third-party participants in the temporary activity.

C. Posting the Temporary Use Permit

The applicant shall post the permit issued by the city in a prominent location on the site where the temporary use is established.

D. Revocation of a Temporary Use Permit

The Director may revoke a temporary use permit if it is determined that:

1. The applicant misrepresented any material fact on his or her application, or supporting materials;

2. The temporary use fails or ceases to comply with applicable standards or criteria for issuance of a permit;

3. The operation of the temporary use violates any applicable statute, law, ordinance, or regulation; or

4. The operation of the temporary use constitutes a nuisance or poses a real or potential threat to the health, safety, or welfare of the public.
5.5.4 General Standards for Temporary Uses and Structures

A. Compliance with this DDC
   Temporary uses and structures are subject to the dimensional standards in Subchapter 3: Zoning Districts, and the development standards in Subchapter 7: Development Standards, unless otherwise stated in this section.

B. Compatibility
   Temporary uses shall be compatible in intensity, characteristics, and appearance with existing land uses in the surrounding area of the proposed location. Factors such as location, access, traffic generation, noise, light, dust control, and hours of operation shall be considered.

C. Required Licenses
   The applicant shall obtain all necessary licenses required by this DDC and by state law.

D. Operation and Development
   All temporary uses, except occasional sales, shall comply with the following:
   
   1. Location
      a. Temporary uses shall comply with applicable setback requirements. In situations where temporary storage containers and other portable storage units are used for loading and unloading purposes and the only placement location is on an existing driveway, temporary storage containers and other portable storage units may encroach into a required setback.
      b. Display, sales, and other temporary use-related activities shall be conducted on private property and not on public land or rights-of-way, unless specifically permitted in writing by the Director.
   
   2. Access and Circulation
      a. Vehicular access points, public roads and rights-of-way, and pedestrian or bicycle paths shall not be damaged or obstructed. Public roads may be closed for a temporary special event where specifically authorized by the City Council.
      b. Temporary structures and all associated devices shall be of a temporary nature, movable, and shall not block visibility for vehicles or pedestrians on or off the lot so as to create a safety hazard.
      c. Temporary uses and structures may occupy required off-street parking only if specified and approved as part of a temporary use permit.
   
   3. Hours of Operation
      Hours of operation shall be compatible with the adjacent land uses.

   4. Maintenance and Clean Up
      The applicant shall guarantee that all trash and debris generated by the temporary use will be removed within 24 hours at no expense to the city.

   5. Signs
      Signs shall comply with Subpart B, Chapter 33, Signs and Advertising Devices, in the Municipal Code of Ordinances.
E. **Occasional Sales**
   No more than three occasional sales may be allowed upon the premises of a residential dwelling in any 12-month period (limited to one sale every four months), with a limit of three days per time, per lot.

5.5.5 **Annual Permit Allowance and Renewal Periods**

A. An applicant may renew, or receive a new temporary use permit for the same activity on the same lot in accordance with the following limitations:

<table>
<thead>
<tr>
<th>Temporary Use</th>
<th>Permits Per Year</th>
<th>Days Per Permit</th>
</tr>
</thead>
<tbody>
<tr>
<td>Storage Containers and Other Portable Storage Units [1]</td>

<td>60 days</td>
</tr>
</tbody>
</table>

Notes:
[1] Temporary storage containers and other portable storage units located within a nonresidential zoning district are allowed one permit per calendar year, with a limit of 180 days per lot.
[2] Field or construction offices may be approved no sooner than 30 days prior to the start of construction and shall be removed within 30 days after completion of the work for which the construction permit has been issued.

B. All uses not specifically listed in the table above shall be permitted for a maximum period of 30 days per calendar year, per lot, subject to Director approval. Applicants may not obtain a permit for a temporary use for the same lot if that site has exceeded the time limitation for that calendar year.

5.5.6 **Additional Standards for Specific Temporary Uses and Structures**

A. **Temporary Storage Containers and Other Portable Storage Units**
   1. Temporary storage containers and other portable storage units shall be located on an improved surface, but may not be located in any part of a fire lane, required parking space, maneuvering lane, public right-of-way, or visibility triangle.
   2. The property where the temporary storage container or other portable storage unit is located shall contain a principal structure, and the storage container or other portable storage unit will be considered accessory to the principal structure.
   3. Storage containers and other portable storage units that are less than 120 square feet, located in a rear yard, and are screened from public view are not required to obtain a temporary use permit.
B. Concrete or Asphalt Batching Plant, Temporary

1. Permit Requirements
   Applicants for a permit to operate a temporary concrete or asphalt batching must submit a letter from the Texas Commission on Environmental Quality (TCEQ) indicating that the proposed facility is exempt from the permitting procedures under the standard exemption, as amended.

   a. Concrete Batching Plants
      i. When both wastewater and stormwater discharges will be generated on-site, concrete batch plants must be permitted under TCEQ discharge permit TXG110000.
      ii. When only stormwater discharges will be generated on-site, concrete batch plants may be included in construction stormwater permit TXR150000 for the construction site, if located at the construction site.

2. Location
   a. Temporary concrete batching plants (including associated stationary equipment and stockpiles) shall be located at least 300 feet from any recreational area, school, residence or other structure not occupied or used solely by the owner of the property upon which the facility is located. This distance limitation does not apply to structures within the boundaries of the project for which the facility is to pour concrete, provided that the facility is located on or contiguous to the project.
   b. Temporary asphalt batching plants shall be located at least one-half mile from any recreational area, school, or residence, or any other structure not occupied or used exclusively by the owner of the property upon which the facility is located.

3. Operational Standards
   a. The facility shall be operated in a manner that eliminates unnecessary dust, noise, and odor (including, with limitation, covering trucks, hoppers and chutes, loading and unloading devices, mixing operation and maintaining driveways and parking areas free of dust).
   b. All stockpiles shall be sprinkled with water or dust suppressant chemicals, or both, as necessary to achieve maximum control of dust emissions. The stockpile sprinkler system shall be operable at all times.
   c. Spilled cement and fly ash used in the batch shall be cleaned up immediately and contained or dampened to minimize dust emissions due to wind erosion and vehicle traffic.
   d. All open-bodied vehicles transporting material from a dry batch plant to the paving mixer shall be loaded with a layer of sand on top, and the truck shall be covered with a tarp to minimize the emission of dust under existing conditions.
   e. The applicant shall clear the site of all equipment, material, and debris upon completion of the project.

4. Hours of Operation
   The facility may operate only between the hours of 6:00 a.m. and 8:30 p.m., Monday through Friday, from June 1 to September 30; 7:00 a.m. and 8:30 p.m., Monday through
Friday, from October 1 to May 31; 8:00 a.m. and 8:30 p.m. on Saturdays; and 1:00 p.m. and 8:30 p.m. on Sundays.

5. **Revocation of Permit**
   In addition to the criteria established in Subsection 5.5.3D, the Director may terminate or revoke a temporary use permit for a concrete or asphalt batching plant for any of the following reasons:
   a. The facility fails to comply with any of the requirements as listed in this subsection; or
   b. The facility violates any of the standards as listed on the standard exemption list adopted by the Texas Commission on Environmental Quality (TCEQ), as amended.

C. **Field or Construction Office**
   1. Field or construction offices may only be approved for licensed contractors working on construction projects for which permits have been issued. They shall be located on the same property and within the same project area where the work is being performed and shall not encroach into any public right-of-way. Field or construction offices shall be required to meet all applicable state and local building and set-up codes.
   2. Field or construction offices may not be used as a dwelling unit or residence.

---

5.6 **Wireless Telecommunications Facilities**

5.6.1 **Purpose and Goals**

A. The purpose of this section is to establish guidelines regulating the location of telecommunication towers and antennas with the objective of minimizing their number, to protect and promote public safety, and to mitigate any adverse visual impacts on the community, while promoting the provision of telecommunications service to the public.

B. The goals of these regulations are to:
   1. Protect residential areas and land uses from potential adverse impacts of towers and antennas;
   2. Encourage the location of towers in non-residential areas;
   3. Minimize the total number of towers throughout the community;
   4. Encourage the joint use of new and existing tower sites as a primary option, rather than construction of additional single-use towers;
   5. Encourage users of towers and antennas to locate them, to the extent possible, in areas where the adverse impact on the community is minimal;
   6. Encourage users of towers and antennas to configure them in a way that minimizes the adverse visual impact through careful design, siting, landscape screening, and innovative camouflaging techniques;
   7. Enhance the ability of providers of telecommunications services to provide such services to the community quickly, effectively, and efficiently; and
   8. Avoid potential damage to adjacent properties from tower failure through engineering and careful siting of tower structures.
5.6.2 Compliance with Telecommunications Act

A. The regulations contained in this DDC have been developed under the following general guidelines as provided in the federal Telecommunications Act of 1996:
   1. Cities have local authority over "placement, construction, and modification" of cellular telephone facilities and other personal wireless telecommunication service facilities;
   2. Regulations "shall not unreasonably discriminate among providers of functionally equivalent services;"
   3. Regulations "shall not prohibit or have the effect of prohibiting the provision of personal wireless services;"
   4. "Denial shall be in writing and supported by substantial evidence;" and
   5. Cities may not "regulate the placement, construction, and modification of personal wireless service facilities on the basis of environmental or radio frequency emissions to the extent that such facilities comply with the Federal Communication Commission regulations concerning such emissions."

B. Notwithstanding any other provision of this section, telecommunications towers and antennas, when permitted by federal law and the laws of the State of Texas, shall be regulated and governed by the use regulations and requirements of this section.

5.6.3 Applicability

All new towers and antennas within the corporate limits of the city shall be subject to these regulations, except as provided in paragraphs (A) and (B) below:

A. Amateur Radio Station Operators/Receive Only Antennas
   This section shall not govern any tower or installation of any antenna that is under 70 feet in height and that is owned and operated by a federally-licensed amateur radio station operator or is used exclusively for receive only antennas.

B. Pre-Existing Towers or Antennas
   Pre-existing towers and pre-existing antennas shall not be required to meet the requirements of this DDC, except the requirements of subsections 5.6.7A, B, and H.

5.6.4 General Provisions

A. Applications
   All applications for rezoning or a specific use permit for a telecommunications tower, antenna, or other facility to provide a telecommunications service shall include a completed supplemental information form provided by the city regarding said facilities. In addition to any information required for applications for a specific use permit, applicants shall submit the following information:
   1. A detailed master antenna plan, clearly indicating the location of the proposed tower, on-site land uses and zoning, adjacent land uses and zoning, and other information deemed necessary by the Director.
   2. A legal description of the property and leased land, if applicable.
   3. The setback distance between the proposed tower and the nearest residential unit, platted residentially zoned properties, and unplatted residentially zoned properties.
Subchapter 5: Use Regulations

5.6 Wireless Telecommunications Facilities

5.6.4 General Provisions

4. The separation distance from other towers shown on an updated site plan or map.
5. A landscape plan showing specific landscape materials.
6. Method of fencing and finished color and, if applicable, the method of camouflage and illumination.

B. Platted Lots

Unless an exception is granted by the Planning and Zoning Commission, telecommunications facilities requiring rezoning or a specific use permit, including towers and related equipment buildings, shall be located on a platted lot.

C. Technical Assistance

When a rezoning or specific use permit is required to comply with the provisions of this section, and when the technical information provided by the applicant is beyond the technical capacity of city staff to review, the applicant, in addition to the usual application fee, shall reimburse the city for the actual cost to the city for the services of a technical expert to review the application and/or information supplement, up to a maximum of $5,000.

D. Pre-Application Meetings

Prior to leasing or purchasing facilities, the telecommunications service provider is encouraged to meet with the Director or his or her designee to determine if the location will require a specific use permit or other approvals, and to review the merits of potential locations.

E. Master Antenna Plan

To facilitate co-location and coordination of telecommunication sites, the city shall, within 30 days of its effective date, notify the providers of telecommunications services, as that term is defined by federal law, of the enactment of this section. Said providers shall, within 90 days of the date of such notice, provide the city with their respective master antenna plans. Said plans shall include detailed maps, showing the locations and characteristics of all telecommunications towers and antennas serving any portion of the city and indicating coverage areas for current and, to the extent possible, future telecommunications towers and antennas. Providers shall also provide the city with any updates to the above documents within 90 days of their creation.

#### 5.6.6 Telecommunications Use-Specific Standards

##### A. Building-Mounted Panels

1. **MD Zoning District**
   a. Panels shall be mounted to a nonresidential or multifamily structure.
   b. Panels shall be designed as “stealth” or otherwise camouflaged or concealed from view from a public or private right-of-way or residential zoning district.

2. **MN, MR, and GO Zoning Districts**
   Panels shall be designed as “stealth” or otherwise camouflaged or concealed from view from a public or private right-of-way or residential zoning district.
Subchapter 5: Use Regulations
5.6 Wireless Telecommunications Facilities
5.6.7 Telecommunications Towers

B. Building-Mounted Whips
   1. RR Zoning District
      a. Whips shall be mounted to a nonresidential or multifamily structure.
      b. Whips shall be designed as “stealth” or otherwise camouflaged or concealed from view from a public or private right-of-way or residential zoning district.
   2. MD Zoning District
      Whips shall be mounted to a nonresidential or multifamily structure.

C. Roof-Mounted Arrays
   Arrays shall be mounted to a nonresidential structure with more than 5,000 square feet of floor area.

D. Building/Roof-Mounted Under 2m Diameter
   1. MD Zoning District
      Antenna shall be mounted to a nonresidential or multifamily structure.
   2. MN, MR, and GO Zoning Districts
      Antenna shall be mounted to a nonresidential structure with more than 5,000 square feet of floor area.

E. Building/Roof-Mounted Over 2m Diameter
   In the MD, MR, and GO zoning districts, antenna shall be mounted to a nonresidential structure with more than 100,000 square feet of floor area.

F. Ground-Mounted Over 3m Diameter
   In the MD zoning district, antenna shall be mounted to a nonresidential structure with more than 5,000 square feet of floor area.

5.6.7 Telecommunications Towers

A. Applicable Federal and State Standards
   All telecommunications towers and antennas shall be erected and operated in compliance with current FCC and FAA rules and regulations and other applicable federal, state, and local standards. If such standards and regulations are changed, then the owners of the towers and antennas governed by this section shall bring such towers and antennas into compliance with such revised standards and regulations within six months of the effective date of such standards and regulations, unless a different compliance schedule is mandated by the controlling state or federal agency.

B. Structural Standards
   Telecommunications tower structures must conform to the most current revision of EIA 222 standards. Guyed telecommunications towers shall be designed and located so that if the structure should fall it would avoid habitable structures and public streets. To insure structural integrity, the owners of the tower shall ensure that it is maintained in compliance with all applicable provisions of Subpart B, Chapter 28: Building and Building Regulations, of the Municipal Code of Ordinances, and all applicable state or local building codes and safety regulations, as well as the regulations published by the Electronic Industries Association (EIA) as amended from time to time. If, upon inspection, the city concludes that a tower fails to comply with such codes and standards and constitutes a danger to persons or property, then, upon notice being provided to
Co-Location
Towers shall be designed and built to accommodate a minimum of two cellular or PCS providers, if over 75 feet in height. The owner of the tower must certify to the city that the tower is available for use by other telecommunications service providers on a reasonable and nondiscriminatory basis.

Fencing
Security fencing shall be installed by a wrought iron or steel chain link fence with evergreen hedge, or a masonry wall, each not less than six feet in height. The exterior of equipment buildings and/or metal equipment cabinets visible from residential areas or public rights-of-way must have a neutral aggregate finish or be painted to reflect the color and character of adjoining structures or blend with adjacent landscaping and other surroundings.

Setbacks
All telecommunication towers as well as guys and guy anchors shall be located within the buildable area of the lot and not within required front, rear, or side setbacks. Telecommunication towers in excess of 400 feet in height shall be set back a minimum of 2,600 feet from the right-of-way of all controlled access federal and state roadways designated as freeways to provide unobstructed flight paths for helicopters.

Signage
Except as otherwise permitted in this section, no signage, lettering, symbols, images, or trademarks in excess of 200 square inches shall be placed on or affixed to any part of a telecommunications tower, antenna, antenna array, equipment building, or security fencing other than as required by FCC regulations or other applicable law.

Lighting
Except as otherwise permitted in this DDC, no signals, lights, or illumination of any kind shall be permitted on or directed toward any tower unless required by the FCC, the FAA, or other appropriate public authority.

Abandonment
1. In the event the use of any wireless communication facility, which would include any telecommunications tower or other antenna support structure, has been discontinued for a period of 360 days, the antenna support structure shall be deemed to be abandoned. Determination of the date of abandonment shall be made by the Building Official, who shall have the right to request documentation from the owner/operator regarding the issue of usage.

2. Upon determination of abandonment, the owner/operator of the antenna support structure shall remove same within 90 days of receipt of notice from the Building Official notifying the owner/operator of such abandonment. If said antenna support structure is not removed within 90 days, the Building Official may cause it to be removed at the owner’s expense.
5.6.8 Tower Location

A. Historical/Cultural
   Except for compatible alternative mounting structures that effectively camouflage or conceal the presence of telecommunications antennas, telecommunications facilities should not be located on or within 300 feet of property zoned historic or property included in a national or local historic zoning district. In addition, said facilities should, wherever possible, be located so as to ensure that historic or culturally significant vistas, and landscapes are protected and that the views of and vistas from architecturally and/or historically significant structures are not impaired or diminished.

B. Residential Zoning
   Except as provided in Table 5.6-E, telecommunications towers are not permitted in any residential zoning district and must be a minimum of a three to one distance to height ratio from a single-family residential use and one to one distance to height ratio from a multifamily use.

C. Towers Permitted by Right
   Free standing monopole telecommunications towers 85 feet or less in height are permitted except as provided in Table 5.6-E, except for the MD zoning district and other applicable sections of this subchapter.

D. Towers Requiring a Specific Use Permit
   All telecommunication towers to be located in the MD zoning district are permitted with a specific use permit. Telecommunication towers in excess of 50 feet in height and monopole towers in excess of 85 feet in height are permitted, except as provided in Table 5.6-E.

E. Tower Spacing
   Any new telecommunications tower in excess of 180 feet in height must be located a minimum of one mile from any existing tower in excess of 180 feet in height.

F. Alternative Mounting Structures
   1. New alternative mounting structures 100 feet or less in height are permitted, except as provided in Table 5.6-E, and other applicable subsections of this section.
   2. New alternative mounting structures in excess of 100 feet in height are permitted, except as provided in Table 5.6-E, and other applicable subsections of this section.
   3. Alternative mounting structures must be similar in color, scale, and character to adjoining buildings or structures, or blend with the landscaping and other surroundings immediately adjacent to them so as to generally avoid the creation of unique visual objects that stand out in the environment.

5.6.9 Antenna Mounting

A. Purpose
   The purpose of this subsection is to promote public safety and maintain order and harmony within the city's business, cultural, and residential zoning districts by restricting the size and location of telecommunication antennas. The objective is to avoid the creation of visual distractions, prevent obstructions to the view of pedestrians and motorists on public thoroughfares, and to insure the structural integrity of supporting structures.
Subchapter 5: Use Regulations
5.6 Wireless Telecommunications Facilities
5.6.9 Antenna Mounting

B. Whip and Panel Antenna Mounting
1. Individual telecommunications antennas are allowed on existing electric distribution poles, light standards, and telecommunication towers in excess of 40 feet in height, provided that:
   a. A joint use agreement is executed; and
   b. The antenna is not located within the power zone of the electric distribution pole.
2. Antennas shall not be placed on electric transmission towers.
3. The total length of any antenna does not exceed 15 percent of the height of the structure. The height of a telecommunications tower is determined by the highest point of any and all components of the structure, including antennas.
4. Existing structures in excess of 50 feet in height may, as a matter of right, be rebuilt, if necessary, to support or contain a new antenna, provided that the new structure is the same height and substantially the same in appearance as the structure it replaces.
5. Building-mounted panel antennas are permitted on non-residential buildings and multifamily dwellings in all zoning districts; provided that they are mounted flush with the exterior of the building and that they do not project above the roof line, nor more than 30 inches from the surface of the building to which they are attached. The antenna's appearance shall be such that its color and texture blends with the surrounding surface of the building.
6. Whip antennas are permitted on non-residential buildings and multifamily dwellings in all zoning districts, provided that the total length of said whip antennas, regardless of mounting method or location, does not exceed 15 percent of the height of the building.
7. Only one building/roof-mounted antenna support structure, less than 100 square feet in area, is permitted per 5,000 square feet of building floor area.

C. Dish Antenna Mounting
1. Dish antennas shall not be permitted in any front setback area or side yard setback adjacent to any roadway.
2. Ground-mounted dish antennas in excess of five feet in height shall be screened from roadways and adjacent property by a minimum six foot high screening fence, evergreen hedge, or masonry wall.
3. Dish antennas in excess of 10 feet in height or more than 10 feet in diameter are permitted, except as provided in Table 5.6-E.
4. Building/roof-mounted dish antennas that are one meter or less in diameter are permitted, except as provided in Table 5.6-E, and other applicable regulations of this section.
5. Building/roof-mounted dish antennas two meters or less in diameter are permitted on all buildings in excess of 5,000 square feet of building floor area except as provided in Table 5.6-E, and other applicable regulations of this section.
6. Only one building/roof-mounted dish antenna that is two meters or less in diameter, is permitted per 5,000 square feet of building floor area, except as provided in Table 5.6-E, and other applicable regulations of this section.
7. Building/roof-mounted dish antennas in excess of two meters in diameter may be permitted on buildings in excess of 100,000 square feet of building floor area, except as provided in Table 5.6-E, and other applicable regulations of this section.
8. Building/roof-mounted dish antennas in excess of one meter in diameter in residential zoning districts shall be painted to have an appearance that blends with the building on which they are located, or to be located so that they are not visible from any adjacent roadway.

9. Building/roof-mounted dish antennas in excess of two meters in diameter in non-residential zoning districts shall be painted or screened with enclosures so as to have an appearance that blends with the building on which they are located, or to be located so that they are not visible from any adjacent roadway.

**5.6.10 Structural Certification**

Prior to the installation of any building/roof-mounted telecommunications antenna, antenna array, or support structure the Building Official shall be provided with an engineer’s certification that the structure will support and not be adversely affected by the proposed antenna and associated equipment.

**5.6.11 Appeal**

Any entity that desires to erect or use telecommunication facilities that wishes to present evidence that such entity would be limited by the current ordinances or regulations of the city dealing with zoning and land use may apply for such use under this section. The City Council shall, upon a showing that strict application of regulations would prohibit or have the effect of prohibiting personal wireless service, as defined by federal law, modify the subject regulations, consistent with the spirit and intent of this subchapter and section, to the extent necessary to prevent the prohibition.
Subchapter 6: Gas Wells

6.1 Integrated Provisions

6.1.1 Sections 6.2: Gas Well Development, and 6.3: Gas Well Drilling and Production, relating to gas well development are intended as a set of integrated regulations. Each section may incorporate by reference other applicable provisions of this DDC that pertain to gas well development.

6.1.2 Section 6.3: Gas Well Drilling and Production, contains definitions that apply to all provisions regulating gas well development, and identifies impact mitigation standards and other general standards that apply to gas well development.

6.1.3 In addition to this Subchapter, Subchapter 5: Use Regulations, establishes zoning classifications for gas well development and Section 2.6.6, Gas Well Development Plat, establishes platting requirements and procedures for gas well development.

6.2 Gas Well Development

6.2.1 Purpose, Authority and Applicability

A. Purpose
The drilling and production of gas and the development of gas well facilities within the corporate limits of the City necessitate promulgation of reasonable regulations to prevent devaluation of property; to protect watersheds; to ensure that Gas Well Drilling and Production Activities are compatible with adjacent land uses throughout the duration of such activities; and to assure that such activities conform to The Denton Plan. The regulations contained in Section 6.2: Gas Well Development; Subchapter 8: Subdivisions; and Section 6.3: Gas Well Drilling and Production, are designed to protect the health, safety, and general welfare of the public and to assure that the orderly and practical development of mineral resources is compatible with the quiet enjoyment of affected surface estates. The regulations contained in Section 6.2: Gas Well Development; Subchapter 8: Subdivisions; and Section 6.3: Gas Well Drilling and Production, are designed to implement the purposes set forth in this subsection and are supported by the following findings of fact:

1. Gas Well Drilling and Production Activities create externalities that potentially threaten the health, safety and general welfare of persons residing or working on property in proximity to such operations.

2. Gas Well Drilling and Production Activities, in the absence of local regulatory controls, may emit high noise levels, produce large volumes of dust, congest local streets, present fire hazards and produce other deleterious effects, all of which fall disproportionately on adjacent land uses, and which can result individually or cumulatively in injury to persons, destabilization of property values, and inhibit the quiet peace and enjoyment of surface uses of real property in the vicinity of such operations.

3. The City of Denton recognizes that the United States and the State of Texas primarily regulate Gas Well Drilling and Production Activities. Moreover, with the enactment of House Bill 40 on May 18, 2015 (Texas Natural Resources Code, Sec. 81.0523), the State of Texas has exclusive jurisdiction over Gas Well Drilling and Production Activities. Municipalities are preempted from regulating said activities except as allowed in Sec. 81.0523(c), which expressly provides that a municipality has authority to regulate certain
aspects of aboveground activity related to oil and gas operations. The regulations in this Subchapter are intended to regulate under such authority, in order to implement compatible local objectives that assure the health, safety and general welfare of the City’s residents and businesses.

4. The proliferation of gas wells and Drilling and Production Sites within the City of Denton creates conflicts between such developments and other existing and future surface uses of the property. In order to assure the compatibility of residential, commercial and industrial uses with gas well development, it is necessary for the City to separate Gas Well Development from other surface uses within the City.

B. Authority
This Subchapter 6: Gas Wells, is adopted pursuant to authority vested under the constitution and laws of the United States, the State of Texas and the City of Denton. Each authorization identified in this Subchapter 6: Gas Wells, shall be construed as an exercise of the City’s zoning powers, pursuant to the Denton City Charter, TLGC Chapters 211 and 212 and the provisions of Subchapter 3: Zoning Districts of this DDC, as well as an exercise of its authority granted by Section 81.0523(c) of the Texas Natural Resources Code.

C. Applicability
The provisions of Section 6.2: Gas Well Development and Section 6.3: Gas Well Drilling and Production, apply only within the corporate limits of the City of Denton, except as otherwise expressly stated therein.

6.2.2 Required Authorization for Gas Well Development in City Limits

A. Zoning District Classifications for Gas Well Development
1. Gas well development is classified as an industrial land use in all zoning districts.

2. Gas well development is permitted as set forth in Table 5.2-A: Table of Allowed Uses of the DDC, subject to the use-specific standards in Section 5.3: Use-Specific Standards, of the DDC and the standards in Section 6.3: Gas Well Drilling and Production. Gas well development also is permitted if authorized by a Master Planned Community ("MPC") or Planned Development ("PD") District.

3. In order to foster compatible land use within zoning districts, Gas Well Development within the corporate limits of the City will be subject to reasonable setbacks from Protected Uses and Residential Subdivisions, which vary according to the types of uses authorized in each district. Because many gas wells are already in close proximity to existing Protected Uses or Residential Subdivisions, setbacks standards within districts will vary according to whether the proposed Gas Well Development takes place on an Existing Site or a new site.

4. A Drilling and Production Site Setback is the distance that the site must be separated by an Operator from an existing Protected Use or Residential Subdivision. A Reverse Setback is the minimum distance that a Protected Use or Residential Subdivision must be separated by a surface owner from an approved Drilling and Production Site. A Minimum Setback is the minimum distance a Drilling and Production Site must be separated by an Operator from a Protected Use or Residential Subdivision after a waiver or variance is granted to reduce the setback requirement.
Subchapter 6: Gas Wells
6.2 Gas Well Development
6.2.2 Required Authorization for Gas Well Development in City Limits

B. Setbacks by Zoning District Classification

New Gas Well Drilling and Production Sites. Setbacks from Protected Uses and Residential Subdivisions for new Drilling and Production Sites, Reverse Setbacks and Minimum Setbacks shall be as follows. In order to reduce Drilling and Production Site Setbacks, the procedures outlined in Subsection 6.2.3, General Permit Requirements for New and Existing Gas Well Sites, shall be followed.

1. For new Drilling and Production Sites authorized in the RR, R1, R2, R3, R4, R6, R7, MN, MD, MR, SC, HC, GO, and PF districts, except in MPC or PD Districts:
   a. Drilling and Production Site Setbacks: 1,000 feet.
   b. Minimum Setbacks: 500 feet.
   c. Reverse Setbacks: 250 feet.

2. For new Drilling and Production Sites authorized in the LI and HI zoning districts:
   a. Drilling and Production Site Setbacks: 250 feet.
   b. Minimum Setbacks: 250 feet.
   c. Reverse Setbacks: 250 feet.

Where a proposed Drilling and Production Site in the LI or HI zoning district is contiguous to the boundary of a district subject to the setbacks in Subsection B(1) above, the Drilling and Production Site Setback shall be 500 feet from Protected Uses or Residential Subdivisions within the adjacent district and the Reverse and Minimum Setbacks shall be 250 feet.

3. For new Drilling and Production Sites in PD Districts and MPC Districts, Drilling and Production Site Setbacks and Reverse Setbacks shall be as provided in the PD District or MPC District regulations or as provided in subsequent site-specific applications approved prior to August 4, 2015. The Drilling and Production Site Setbacks and Reverse Setbacks in Subsection B(1) above shall apply to any setback not specified in the MPC or PD District regulations or in subsequent site-specific applications approved prior to August 4, 2015.

C. Setbacks for Existing Gas Well Sites

1. For Existing Drilling and Production Sites in the LI or HI zoning district:
   a. Drilling and Production Site Setbacks: 250 feet.
   b. Minimum Setbacks: 250 feet.
   c. Reverse Setbacks: 250 feet.

2. For Existing Drilling and Production Sites in all other districts, except in MPC or PD Districts:
   a. Drilling and Production Site Setbacks: 500 feet.
   b. Minimum Setbacks: 250 feet.
   c. Reverse Setbacks: 250 feet.

3. For Existing Drilling and Production Sites in MPC or PD Districts, setbacks shall be as provided in the MPC or PD District regulations, or as provided in subsequent site-specific applications approved prior to August 4, 2015. The Drilling and Production Site Setbacks and Reverse Setbacks in Subsection C(2) above shall apply to any setback not specified in the MPC or PD District regulations, or in subsequent site-specific applications approved prior to August 4, 2015.
Subchapter 6: Gas Wells
6.2 Gas Well Development

6.2.2 Required Authorization for Gas Well Development in City Limits

In order to reduce Drilling and Production Site Setbacks, the procedures outlined in Subsection 6.2.3, General Permit Requirements for New and Existing Gas Well Sites shall be followed.

D. Measurement of Setbacks

1. A Drilling and Production Site Setback shall be measured from the actual or proposed boundaries of the Drilling and Production Site in a straight line, without regard to intervening structures or objects, to the closest exterior point of any structure occupied by a Protected Use or any residential lot boundary line on an approved Residential Subdivision plat when not currently occupied by a Protected Use.

2. The Reverse Setback shall be measured from the closest exterior point of the proposed structure to be occupied by a Protected Use, in a straight line, without regard to intervening structures or objects, to the closest boundary designated for the approved Gas Well Development Site Plan, or, if no Gas Well Development Site Plan has been approved for the site, from the closest boundary of the Existing Drilling and Production Site. For a proposed Residential Subdivision plat, the Reverse Setback shall be measured from any undeveloped residential lot boundary to the closest boundary designated for the approved Gas Well Development Site Plan, or, if no Gas Well Development Site Plan has been approved for the site, from the closest boundary of the Existing Drilling and Production Site.

3. The Reverse Setback for all other proposed Habitable Structures shall be the distance prescribed by the Fire Code. No permanent Habitable Structure, however, shall be located within the boundaries of a Drilling and Production Site.

E. Compliance with Fire Code Setbacks

In the event of any conflict between the setback provisions established by this Section 6.2: Gas Well Development, and any setback provisions established by the Fire Code, as now adopted or hereafter amended by the City of Denton, whichever provision provides for the larger setback shall control.

F. Protected Use Setbacks

After the effective date of this amendatory ordinance, a property owner who constructs a Protected Use must maintain a distance of 300 feet between the closest exterior point of the proposed structure to be occupied by the Protected Use and any equipment on a Drilling and Production Site that produces or stores flammable or combustible liquid or gas, to assure efficient emergency response operations. After such date, an Operator who locates any equipment that produces or stores flammable or combustible liquid or gas on a Drilling and Production Site must maintain a distance of 300 feet between such equipment and the closest exterior point of a structure occupied by a Protected Use.
6.2.3 General Permit Requirements for New and Existing Gas Well Sites

A. Permit Procedure Tracks

1. Gas Well Development Site Plan Required for Authorization of Multiple Wells
   a. Other than for pending permit applications excepted from these regulations under Subsection 6.2.3E: Legal Non-Conformity; Exceptions, no Gas Well Permit shall be issued until a Drilling and Production Site has been established through approval of a Gas Well Development Site Plan for the well site. For an Existing Drilling and Production Site for which no Gas Well Development Site Plan has been approved, an Operator must obtain approval for a Gas Well Development Site Plan under these regulations before any additional wells may be permitted on the site, except as provided in Subsection 6.2.4A.1.b.
   b. In order to satisfy the setback requirements of Subsection 6.2.2, Required Authorization for Gas Well Development in City Limits, an Operator must use the procedures for approval of a Gas Well Development Site Plan set forth in subsections A(2), A(3), or A(4) of this Section.
   c. Once a Gas Well Development Site Plan has been approved, Drilling and Production Site Setback requirements will not apply to individual Gas Well Permit applications authorized by the approved Gas Well Development Site Plan. No variance or waiver from the setback for the Drilling and Production Site shall be required for subsequent wells.
   d. A new Gas Well Permit must be obtained for each well authorized by an approved Gas Well Development Site Plan.
   e. Once a Gas Well Development Site Plan has been approved for an Existing Drilling and Production Site shown on a gas well development plat, such plat shall have no further force and effect with respect to that Drilling and Production Site.

2. Procedures for Drilling and Production Sites that Meet Setback Requirements
   For a New or Existing Drilling and Production Site that meets the setback requirements in Subsection 6.2.2, Required Authorization for Gas Well Development in City Limits, an Operator may apply for a Gas Well Development Site Plan pursuant to Subsection 6.2.4: Gas Well Development Site Plans.

3. Procedures for Drilling and Production Sites That Do Not Meet Setback Requirements
   For a New or Existing Drilling and Production Site that does not meet the setback requirements in Subsection 6.2.2, Required Authorization for Gas Well Development in City Limits, the Operator may seek a waiver from 100 percent of the owners of Protected Uses and the owners of lots in Residential Subdivisions within the Drilling and Production Site Setback pursuant to Subsection 6.2.6A. In the alternative, the Operator may apply for a variance from the setback requirement from the Board of Adjustment pursuant to Subsection 6.2.6B. In the alternative, for qualified Drilling and Production Sites, the Operator may obtain a reduction in the site setback using incentive procedures in Subsection 6.2.6C. The Minimum Setback requirements under Subsection 6.2.2, Required Authorization for Gas Well Development in City Limits, shall apply. The notice provisions of Subsection 6.3.7B apply to proceedings under this subsection. Once a setback has been
reduced through waivers or variance procedures, the Operator may apply for a Gas Well Development Site Plan pursuant to Subsection 6.2.4.

4. **Special Procedures for Setbacks in PD and MPC Districts**
   a. The Operator and the surface owner of land in a PD or MPC District may present a unified plan that assures the compatibility of surface development and Gas Well Development of the property, taking into consideration setbacks from Protected Uses and Residential Subdivisions, traffic circulation and access, fire safety and emergency response, noise and light mitigation and other factors necessary to achieve compatibility of land uses. The plan may establish different Drilling and Production Site and Reverse Setbacks that vary from those prescribed in Subsection 6.2.2, *Required Authorization for Gas Well Development in City Limits*. The plan if approved by the City Council shall be incorporated into the zoning district regulations.

   b. Where the Drilling and Production Site and Reverse Setbacks for Existing Sites within a PD or MPC district are less than the minimums set forth in Subsection 6.2.2, *Required Authorization for Gas Well Development in City Limits*, no amendments to the zoning district regulations for surface development or gas well development shall be approved by the City Council unless the setbacks are conformed to the requirements of this Section or a compatibility plan is presented and approved pursuant to paragraph (4)(a) above.

B. **Sequence of Gas Well Permits**
   The Operator must comply with all rules and regulations of the Fire Code and all other law, rules and regulations applicable to gas well operations, including, but not limited to, the following provisions. No Drilling or Production Activities may commence within the City limits until the following authorizations have been obtained, in the following sequence:

   1. Approval of a Gas Well Development Site Plan pursuant to Subsection 6.2.4, for new sites. Upon approval of a Gas Well Development Site Plan, the Operator may commence construction of a Drilling and Production Site. No disturbance of the land is allowed until a Gas Well Development Site Plan is obtained.

   2. The Operator shall obtain a Gas Well Permit for each new gas well on such site pursuant to the application requirements and standards of Subsection 6.2.5.

   3. Approval of a Temporary Above-Ground Storage Tank Permit from the Denton Fire Department.

   4. Approval of Gas Well Operational Permit from the Denton Fire Department.

   5. When all approvals contained in paragraphs (1) through (4) above have been obtained, applicant may commence Initial Drilling Activities.

   6. Approval of a Flammable and Combustible Liquids Construction Permit from the Denton Fire Department.

   7. Approval of a Flammable and Combustible Liquids Operational Permit from the Denton Fire Department.

   8. When all approvals contained in paragraphs (1) through (7) above have been obtained, applicant may commence Completion Operations and Production Activities.

   9. Approval of an Open Flame Operational Permit from the Denton Fire Department for flaring activities during any stage of operation.
10. New Drilling or Production Activities on an existing Drilling and Production Site that is subject to an approved Watershed Permit, or on sites which required a Watershed Permit under prior regulations, but for which site no Watershed Permit was issued, are subject to the requirements of Subsection 6.3.9D.

11. The applications for any authorization for gas well drilling and production listed in this Subsection B must be submitted and approved in the numerical order listed. No subsequent application shall be determined to be complete and hereby is deemed to be incomplete until all required prior applications have been approved, and no completeness determination shall be made until such prior applications have been approved.

C. **Expiration of Permits, Plans**

Applications for gas well drilling and production shall expire under the following circumstances:

1. A Specific Use Permit which was approved under prior gas well regulations expires according to its terms, or pursuant to DDC, paragraph 2.5.2C.6: Step 6: Post-Decision Actions and Limitations.

2. A Watershed Protection Permit, if applicable, expires with the expiration of a Gas Well Development Site Plan.

3. A Gas Well Development Site Plan for a new Drilling and Production Site expires unless a complete application for a Gas Well Permit has been filed within one year of the date of approval of the Site Plan, or no drilling and production activities have occurred on the Drilling and Production Site for a period of three years. A Gas Well Development Site Plan for an Existing Site does not expire, unless no drilling and production activities have occurred on the site for a period of two years after all wells on the site have been plugged and abandoned.

4. A Gas Well Permit expires if Initial Drilling Activities have not commenced within one year of the date of approval of the Gas Well Permit.

5. Following expiration of an approved application for gas well drilling and production, a new application must be submitted.

D. **Requirements are in Addition to Other Permits**

The authorizations required by this Subchapter are in addition to, and not in lieu of, any permits that may be required by any other provision of the Denton City Code, DDC or any other government agency.

E. **Legal Non-Conformity; Exceptions**

1. **Non-Conformities**

   The provisions of Section 1.5, Nonconformities, are applicable to gas well drilling and production activities, except as provided hereinafter.

   a. For purposes of Section 1.5, Nonconformities, the drilling of a new gas well and associated Production Activities do not constitute an existing lawful use.
b. The amendment of Table 5.2-A: Table of Allowed Uses and use-specific standards in Section 5.3: Use-Specific Standards, to provide for gas well Drilling and Production Activities shall not render non-conforming any Workover Operations, Drilling Activities or Production Activities for an existing well conducted on an Existing Drilling and Production Site, if such activities were authorized under a gas well permit that was approved by the Gas Well Administrator pursuant to gas well regulations in effect prior to the effective date of this amendatory ordinance.

c. The adoption of this amendatory ordinance or the application of such regulations to an Existing Drilling and Production Site shall not render non-conforming any Workover Operations, Drilling Activities or Production Activities for an existing well on such site, if such activities were authorized under a gas well permit that was approved by the Gas Well Administrator prior to the effective date of this amendatory ordinance.

2. General Exceptions
The standards or procedures implemented by this amendatory ordinance shall not affect the processing and approval or disapproval of an application for a gas well permit that was pending for decision on the effective date of this amendatory ordinance, or any subsequent permit applications for the same gas well, or for a gas well for which a gas well permit was approved prior to the effective date of this amendatory ordinance, except to the extent necessary to give effect to Subsection 6.2.3E. For purposes of Subsection 6.2.3E.2, an amended Gas Well Development Site Plan application is not a subsequent permit application.

a. Authorizations or applications excepted under Subsection 6.2.3E.2. are subject to all gas well drilling and production standards in effect immediately prior to the effective date of this amendatory ordinance.

b. To the extent that any exception provided under Subsection 6.2.3E.2 is dependent an application pending on the effective date of an amendatory ordinance, such application must have been approved subsequently in order for the exception to apply.

c. City shall, prior to annexation, provide notice of the City’s intent to annex to each Operator affected by the annexation. Every Operator of a Drilling and Production Site that has been annexed into the City shall register the Drilling and Production Site not later than three days after the effective date of the annexation by contacting the Gas Well Administrator to ensure that gas well development plats and gas well locations are on file with the City. If they are not, the Operator shall provide the City with a copy of a gas well development plat and gas well location information.

F. General Application Standard
In additional to any other remedies available at law or in equity, the City may initiate proceedings to revoke any site plan, permit, variance or special exception approved pursuant to this Section 6.2: Gas Well Development, upon discovery that the applicant supplied false, fraudulent or misleading information that was material to approval of the application under the standards applicable to the permit, variance or special exception. All site plan or permit applications or requests for relief to the Board of Adjustment or requests for waivers shall be verified.
6.2.4 Gas Well Development Site Plans

A. Gas Well Development Site Plan

1. Applicability
   a. A Gas Well Development Site Plan approved under this amendatory ordinance is required to authorize multiple gas wells on a Drilling and Production Site and must be approved prior to issuance of any Gas Well Permit for any new well on the site.
   b. Notwithstanding subsection A, new wells identified on an approved Existing Gas Well Development Site Plan may be permitted in accordance with the gas well ordinance regulations in effect immediately prior to the effective date of this amendatory ordinance.
   c. A gas well development plat is not an Existing Gas Well Development Site Plan.
   d. A Gas Well Development Site Plan is not required to authorize Workover Operations, Drilling Activities or Production Activities for an existing gas well for which a gas well permit was issued prior to the effective date of this amendatory ordinance.

2. Application Requirements
   a. A cover page that includes a vicinity map of the Drilling and Production Site; a Sheet Index that identifies the number of Exhibits with titles for each (exhibit titles shall begin with the word ‘Exhibit’ and include the respective letter); the Project Title; the date of preparation; the preparer, Operator, and property owner’s names; space for the City project number; and a signature block for both the Gas Well Administrator and the City Secretary.
   b. A mapping exhibit with an accurate legal description of the Drilling and Production Site that was prepared and certified by a Registered Professional Land Surveyor of the State of Texas. Provide closure sheet of bearings and distances used in legal description. The exhibit shall include exact location, dimension, and description of all existing public, proposed, or private easements, and public rights-of-way within the lease area, intersecting or contiguous with its boundary, or forming such boundary. Describe and locate all permanent survey monuments, pins, and control points and tie and reference the survey corners to the Texas State Plane Coordinate System North Central Zone 1983-1999 datum. Provide proposed pipeline route—note that a separate application may be necessary if the proposed route encroaches onto any public easement, right-of-way or land owned by the City of Denton.
c. The maximum size of a proposed Drilling and Production Site shall be three acres, unless the Operator can demonstrate to the City at the time of filing of a Gas Well Development Site Plan application that: (i) the surface owner(s) has agreed to a larger site via a written agreement that will be recorded by the Operator in the Denton County records, (ii) the surface owner is subject to a covenant in a written instrument, or memorandum thereof, recorded prior to August 4, 2015, that authorizes a larger site, or (iii) the Operator can demonstrate that a larger site is needed to accommodate the planned gas well operations based upon the acreage that the Operator presently has under the mineral lease; provided that no new Drilling and Production Site authorized under (i), (ii) or (iii) may exceed seven acres, unless authorized by the Board of Adjustment. For a Gas Well existing on the effective date of this amendatory ordinance, evidence that the current Drilling and Production Site is greater than the maximum size shall be sufficient proof to demonstrate that a larger site is needed to accommodate the planned gas well operations proposed by the Gas Well Development Site Plan. A gas well development plat is neither a written agreement nor a written instrument or memorandum within the meaning of this subsection.

d. A map showing the distance from the boundaries of the Drilling and Production Site from all Protected Uses and Residential Subdivisions. If the separation distance(s) from Protected Uses and Residential Subdivisions do not meet the setback requirements of Subsection 6.2.2, the application also must include a copy of the waivers approved pursuant to Subsection 6.2.6A, or the approval of a setback variance approved by the Board of Adjustment pursuant to Subsection 6.2.6B. If the Operator seeks to qualify the proposed Drilling and Production Site for an administrative waiver pursuant to Subsection 6.2.6C, the information therein required shall be submitted with the application for site plan approval.

e. A site plan of the Drilling and Production Site, capable of being recorded, showing clear site boundary lines and the location of all on-site improvements and equipment, including: tanks, pipelines, compressors, separators, and other appurtenances in relation to the boundaries of the site.

f. A legal description of the proposed Drilling and Production Site.

g. An Erosion and Sediment Control Plan. Such exhibit must include contact information, a physical site description including: land uses; general vegetation and surface water in near proximity; topography/contour lines both pre- and post-construction; hydrologic analysis including: stormwater directional flow, outfalls, water well related structures and water sources; receiving waters; soils; project narrative with general timeline; well pad site plan including: fueling areas, waste disposal containers, hazardous materials storage, and product and condensate storage tanks, soil stabilization and erosion control measures including: list of selected stormwater measures, site map of selected stormwater measures, locations and final stabilization plans; solid waste management plan, septic/portolet location; and maintenance plan for stormwater controls including schedule and transfer of ownership provision. See Gas Well Erosion and Sediment Control Plan Guidance Document for details.
Subchapter 6: Gas Wells
6.2 Gas Well Development
6.2.4 Gas Well Development Site Plans

h. An Access and Transportation Plan identifying the points of access and routes to be followed on the road network supporting gas well development on the Drilling and Production Site over time, and the internal circulation plan for the property containing the proposed site, including provisions to protect vehicle access to Neighborhood Streets. The Plan shall contain specifications for construction of the access road(s) and on-site fire lanes that meet the standards for emergency access set forth in paragraph 6.3.2E. A map showing transportation route and road for equipment, supplies, chemicals, or waste products used or produced by the gas well operation shall be included. The map shall illustrate the length of all public roads that will be used for site ingress and egress. The water source proposed for both the drilling and fracturing stages shall be identified in the Plan, together with a designation whether the water is to be hauled or piped to the site.

i. A Landscape Plan. The project review planner will determine if a buffer is required based on the adjacent land use(s). If the planner determines a buffer is required, then a landscape plan must be submitted in accordance with the City of Denton’s Landscape Plan Checklist. Not every Drilling and Production Site requires a landscape plan.

j. A Tree Inventory and Preservation and Mitigation Plan. For sites with trees, a Tree Inventory and a Preservation Plan and Mitigation Plan pursuant to DDC, Subsection 7.7.4: Tree Preservation will be submitted.

k. A copy of any prior approvals required, including conditions imposed, such as a specific use permit (SUP) or watershed protection permit;

l. A Noise Management Plan, prepared in accordance with paragraph 6.3.2F.2; and

m. Proof of issuance of Notice of Activities pursuant to paragraph 6.3.7A.1.

3. Procedures and Criteria

a. Processing of Application

An application for a Gas Well Development Site Plan shall be processed in accordance with the requirements of Subsection 2.6.6: Gas Well Development Plat, and shall be decided by the Gas Well Administrator.

b. Criteria

The Gas Well Administrator shall approve the application if it meets the following standards:

i. The site meets the setback requirements of Subsection 6.2.2, a waiver has been granted or a variance from such standards has been approved by the Board of Adjustment or the Gas Well Administrator.

ii. The application is consistent with any applicable SUP, MPC or PD site specific authorization, or Watershed Protection Permit and any conditions incorporated therein.

iii. The application meets applicable requirements of Subsection 6.3.2.

iv. The size of the Drilling and Production Site can accommodate the number of wells proposed.

v. The site is adequately served by a road network, does not take access from any Neighborhood Street, and road remediation fees have been paid.
vi. Notice of the application has been posted pursuant to Subsection 6.3.7.

c. Conditions
The Gas Well Administrator may impose conditions that assure compliance with the terms of the prior approvals or standards of this Subchapter.

4. Effect
The approval of a Gas Well Development Site Plan authorizes the Operator to apply for a Gas Well Permit for each well authorized by the Site Plan and other permits required before commencement of Drilling Activities on the Drilling and Production Site.

5. Recordation
An approved Gas Well Development Site Plan must be recorded by the Operator in the Denton County Records prior to the issuance of a Gas Well Permit.

B. Amended Gas Well Site Plan
1. If the Operator proposes to do any of the following, an Amended Gas Well Development Site Plan shall be required. The applications shall be reviewed and decided in the same manner as the original application.
   a. Relocate the boundaries of the Drilling and Production Site.
   b. Expand the boundaries of the Drilling and Production Site.
   c. Change the layout of the structures or appurtenances within the boundaries of the approved Drilling and Production Site.
   d. Change the access road(s) or the location of the access road(s).
2. The application shall be reviewed and decided in the same manner as the original application for the Drilling and Production Site.
3. The setback requirements of Subsection 6.2.2 shall apply to activities described in paragraphs 6.2.4B.1.a and 6.2.4B.1.b above.
4. An approved Amended Gas Well Development Site Plan shall be recorded as required by paragraph 6.2.4A.5 above.

C. Expiration and Extension of Gas Well Development Site Plans
1. A Gas Well Development Site Plan for a new Drilling and Production Site expires unless a complete application for a Gas Well Permit has been filed within one year of the date of approval of the Site Plan, or no drilling and production activities have occurred on the Site for a period of three years.
2. A Gas Well Development Site Plan for an Existing Site does not expire, unless no drilling and production activities have occurred on the site for a period of two years after all wells on the site have been plugged and abandoned.
3. An Operator may seek a special exception from the Board of Adjustment pursuant to paragraph 6.2.6B for a one-year extension of the expiration date for a Gas Well Development Site Plan for a new Drilling and Production Site.
6.2.5 Gas Well Permits

A. Applicability and Exceptions

1. Any person, acting for himself or acting as an agent, employee, independent contractor, or servant for any person, shall not engage in Initial Drilling Activities within the corporate limits of the City without first obtaining a Gas Well Permit.

2. A Gas Well Permit shall be required for each well. No Gas Well Permit shall be issued for multiple wells.

3. A Gas Well Permit shall not be required for exploration for gas. Exploration of gas means geologic or geophysical activities, including, but not limited to surveying and seismic exploration not involving explosive charges, related to the search for oil, gas, or other sub-surface hydrocarbons. A seismic permit is required for impact-based exploration.

4. A Gas Well Permit shall constitute authority for Initial Drilling Activities, Completion Operations, Production Operations, Workover Operations and Redrilling with proper notice pursuant to Subsection 6.3.7.

5. By acceptance of any Gas Well Permit issued pursuant to this section, the Operator expressly stipulates and agrees to be bound by and comply with the provisions of this Section 6.2: Gas Well Development and Section 6.3: Gas Well Drilling and Production, of this DDC. The terms of such provisions shall be deemed to be incorporated in any Gas Well Permit issued pursuant to this section with the same force and effect as if such gas well development regulations were set forth verbatim in such Gas Well Permit.

6. A Gas Well Permit is not required to authorize Workover Operations, Drilling Activities or Production Activities for an existing well conducted on an Existing Site, if such activities were authorized under a gas well permit approved by the Gas Well Administrator pursuant to gas well regulations in effect prior to the effective date of this amendatory ordinance; provided that nuisance and sound mitigation requirements under paragraph 6.3.2F.1 and paragraph 6.3.2F.2 and notice requirements under Subsection 6.3.7C shall apply to such activities. An Operator is not relieved from the obligation to obtain additional Fire Code permits for such activities.

B. Application Requirements

Applications for Gas Well Permits shall include the following:

1. File marked copy of recorded Gas Well Site Development Plan;

2. A completed application and permit form provided by the City that is signed by the applicant;

3. The application fee;

4. Upon completion of construction of the Drilling and Production Site, a copy of the As-built Gas Well Development Site Plan;

5. A copy of the permit issued by the RRC and corresponding API number;

6. Well and Operator information;

7. Description of work to be performed;

8. Anticipated start date;

9. Water source to be used for Completion Operations;

10. Verification that notices were provided in accordance with Subsection 6.3.7B; and
11. Proof of insurance and security.

C. Procedures and Criteria

1. Filing of Application
   All applications for Gas Well Permits shall be filed with the Department. Incomplete applications shall be returned to the applicant, in which case the City shall provide a written explanation of the deficiencies. The City shall retain a processing fee determined by ordinance. The City may return any application as incomplete if there is a dispute pending before the Railroad Commission regarding the identity or authority of the Operator for the gas well.

2. Criteria
   The Gas Well Administrator shall approve the application if it meets the following standards:
   a. The application is consistent with the approved Gas Well Development Site Plan and any conditions incorporated therein.
   b. The application meets applicable standards of Section 6.3.
   c. The application is in conformance with the insurance and security requirements set forth in Subsection 6.3.3 and Subsection 6.3.4.

3. Conditions
   The Gas Well Administrator shall not approve a Gas Well Permit until after the Operator has provided:
   a. The security and insurance required by Subsections 6.3.3 and 6.3.4;
   b. Payment of the required Road Damage Remediation Fee that will obligate the Operator to repair damage excluding ordinary wear and tear, if any, to public streets, including but not limited to, damage to bridges caused by the Operator or by the Operator’s employees, agents, contractors, subcontractors or representatives in the performance of any activity authorized by or contemplated by the approved Gas Well Permit.

4. An Operator may obtain a conditional Gas Well Permit contingent upon the submittal of an As-Built Gas Well Development Site Plan that conforms to the approved Gas Well Development Site Plan. The Gas Well Administrator shall review the As-Built submittal within three business days. Upon the written determination of the Gas Well Administrator that the As-Built Gas Well Development Site Plan conforms to the legal description as approved in the Gas Well Development Site Plan, the Operator may commence Drilling Activities.

5. Contents of Permit
   Each Gas Well Permit issued by the Gas Well Administrator shall:
   a. Identify the name of each well and its Operator;
   b. Specify the date on which the Gas Well Administrator issued each Permit;
   c. Specify the Permit expiration date;
   d. Specify that if drilling is commenced before the Permit expires, the Permit shall continue until the well covered by the Permit is abandoned and the site restored;
Subchapter 6: Gas Wells

6.2 Gas Well Development

6.2.5 Gas Well Permits

Incorporate, by reference, the insurance and security requirements set forth in Subsections 6.3.3 and Subsection 6.3.4;

Incorporate, by reference, the requirement for periodic reports set forth in Subsection 6.3.6 and for Notice of Activities set forth in Subsection 6.3.7;

Incorporate the full text of the release of liability provisions set forth in Subsection 6.3.3A;

Incorporate, by reference, the conditions of the applicable Watershed Protection Permit to which the Gas Well Permit is subject;

Incorporate, by reference, the information contained in the Permit application;

Include the statement that all Drilling and Production Activities are subject to the applicable rules and regulations of the RRC, including the applicable "Field Rules," TCEQ and United States Army Corps of Engineers;

Contain the name, address, and phone number of the person designated to receive notices from the City;

Contain the name, address and phone number of the person designated to receive service of process from the City, which person shall be a resident of Texas that can be served in person or by registered or certified mail;

Incorporate the well's RRC permit number and the American Petroleum Institute (API) number;

Incorporate, by reference all other applicable provisions set forth in the DDC;

Contain a notarized statement signed by the Operator, or designee, that the information is, to the best knowledge and belief of the Operator or designee, true and correct;

Contain a statement that the Operator acknowledges and voluntarily consents to be inspected by the City to ensure compliance with this section, Section 6.3: Gas Well Drilling and Production, and applicable provisions of the DDC, and the Municipal Code of Ordinances; and

If the Drilling and Production Site has not been constructed, an As-Built Gas Well Development Site Plan must be approved prior to commencement of Drilling Activities.

6. Denial of Permit

a. The decision of the Gas Well Administrator to deny an application for a Gas Well Permit shall be provided to the Operator in writing within 10 days after the decision, including an explanation of the basis for the decision.

b. If an application for a Gas Well Permit is denied by the Gas Well Administrator, nothing herein contained shall prevent a new Gas Well Permit application from being re-submitted.

D. Expiration of Gas Well Permit

1. A Gas Well Permit is valid for a period of one year and shall automatically expire, unless Initial Drilling Activities have commenced prior to such date.

2. If a Gas Well Permit has been issued by the City but Initial Drilling Activities have not commenced prior to the expiration date of the Permit, the Permit shall not be extended.
unless a special exception has been approved by the Board of Adjustment pursuant to
Subsection 6.2.6; however, the Operator may reapply for a new Permit, as long as the Gas
Well Development Site Plan remains in effect.

E. Transfer of Gas Well Permit
A Gas Well Permit may be transferred by the Operator with the written consent of the City if the
transfer is in writing signed by both parties, if the transferee agrees to be bound by the terms and
conditions of the transferred Permit, if all information previously provided to the City as part of
the application for the transferred Permit is updated to reflect any changes, and if the transferee
provides the insurance and security required by Subsections 6.3.3 and Subsection 6.3.4. The
insurance and security provided by the transferor shall be released if a copy of the written transfer
is provided to the City and all other requirements provided in this subsection are satisfied. The
transfer shall not relieve the transferor from any liability to the City arising out of any activities
conducted prior to the transfer.

6.2.6 Relief Measures

A. Waiver Procedures for Setback Reductions

1. Property Owner Waivers for Drilling and Production Sites
An Operator may obtain a reduction in the Drilling and Production Site Setback
requirements of Subsection 6.2.2 by procuring written, notarized waivers from 100 percent
of the owners of Protected Uses and the owners of lots in Residential subdivisions that are
within the required setback.

   a. Property owner waivers must be in a format approved by the City and shall include an
      aerial exhibit attached clearly depicting the boundaries of the proposed Drilling and
      Production Site where well development could occur and the closest dimension to
each Protected Use and each lot in the Residential Subdivision for which the waiver is
being requested. Signatures are required on both the form and exhibit.

   b. Written notarized waivers granted by all the property owners within the prescribed
      setback distance from a Drilling and Production Site must be filed, at the expense of
      the Operator, in the Denton County records. All waivers must identify the property
      address, block and lot number, subdivision name and plat volume and page number.
      Copies of filed property owner waivers must be submitted with the filing of a
      complete application for a Gas Well Development Site Plan.

   c. If the Operator fails to obtain written waivers from all property owners within the
      prescribed Drilling and Production Site Setback, the Operator may submit a request
      for a variance to the Board of Adjustment pursuant to Subsection 6.2.6B, or a request
      for an administrative variance, pursuant to Subsection 6.2.6C.

2. Effect of Surface Development on Drilling and Production Site Setback Waivers
After the effective date of this amendatory ordinance, when a property owner constructs a
Protected Use or develops a Residential Subdivision within the Drilling and Production Site
Setback for an Existing Site prescribed by Subsection 6.2.2C, such property owner shall be
deemed to have granted the Operator a waiver in satisfaction of paragraph (1)
requirements above for that property containing the Protected Use or constituting the
Residential Subdivision. This waiver shall apply to all successor property owners. This does
not relieve an Operator from obtaining waiver(s) from all other property owners located within the Drilling and Production Site Setback for the Existing Site.

3. The notice provisions of Subsection 6.3.7B apply to procedures under this subsection (A).

B. Board of Adjustment Proceedings

1. The Board of Adjustment shall hear and decide appeals of orders, decisions, or determinations made by the Gas Well Administrator relative to the application and interpretation of this Section 6.2: Gas Well Development, except for vested rights appeals and matters described in paragraph 6.3.8F: Permit Suspension or Revocation, furthermore, the Board of Adjustment shall hear and decide requests for variances to the provisions of this Section 6.2: Gas Well Development, under the relevant criteria set forth below. The Board may also grant special exceptions extending the expiration date of a Gas Well Development Site Plan or a Gas Well Permit for a period not to exceed one year. Any Operator or surface owner who desires to appeal the decision of the Gas Well Administrator, request a variance or request a special exception may file the appeal or request to the Board of Adjustment pursuant to Subsection 2.8.1: Variance of the DDC. Appeal fees shall be required for every appeal variance or special exception request. For purposes of this Section, the Gas Well Administrator has designated authority from the Director of Planning to make final orders, decisions, or determinations.

a. Standard of review for appeals. The members of the Board of Adjustment shall have and exercise the authority to hear and determine appeals where it is alleged there is error or abuse of discretion regarding the approval or denial of a Gas Well Development Site Plan or Gas Well Permit. The Board of Adjustment may reverse or affirm, in whole or in part, or modify the Gas Well Administrator’s order, requirement, decision or determination from which an appeal is taken.

b. General criteria for review of variances. In deciding requests for variances, the Board of Adjustment shall consider, where applicable, the following relevant criteria:

i. Whether there are special circumstances existing on the property on which the application is made related to size, shape, area, topography, surrounding conditions and location that do not apply generally to other property in the vicinity;

ii. Whether a variance is necessary to permit the applicant the same rights in the use of his property that are presently enjoyed by other similarly situated properties, but which rights are denied to the property on which the application is made;

iii. Whether the granting of the variance on the specific property will adversely affect any other feature of the comprehensive master plan of the City;

iv. Whether the variance, if granted, will be of no material detriment to the public welfare or injury to the use, enjoyment, or value of property in the vicinity;

v. Whether the operations proposed are reasonable under the circumstances and conditions prevailing in the vicinity considering the particular location and the character of the improvements located there; and

vi. Whether the operations proposed are consistent with the health, safety and welfare of the public when and if conducted in accordance with the Gas Well Development Site Plan or Gas Well Permit conditions to be imposed.
2. **Standard of Review for Setback Variances**

   a. In deciding requests for variances to Drilling and Production Site Setbacks, the Board of Adjustment shall consider, where applicable and in addition to the general criteria stated in paragraph (1.b) above, the following relevant criteria:

      i. Whether there is reasonable access for City fire personnel and firefighting equipment, including the ability to safely evacuate potentially affected residents.

      ii. The extent to which the Operator and the surface owner(s) are in agreement on a plan for development of the property, have provided for adequate access and traffic circulation, and taken measures to promote compatibility of gas well development and other surface development of the property.

      iii. For a request by an Operator to reduce Drilling and Production Site Setbacks, whether the impact upon adjacent property and the general public from gas well development under the requested setback will be substantially increased, considering:

         a. The reasonable use of the mineral estate by the mineral estate owner(s) to explore, develop, and produce the minerals;

         b. The availability of alternative drilling sites; and

         c. The number of owners of Protected Uses or lots in a Residential Subdivision who are willing to waive the Drilling and Production Site Setback as requested or in modified form.

   b. In deciding the request for a variance to setback requirements, the Board may approve the request as granted, modify the request or deny the request. In granting a variance for reduction of a Drilling and Production Site Setback, the Board may impose such conditions as are necessary to mitigate the impacts of the reduced setbacks and to preserve the public health and safety, including but not limited to, the enhanced mitigation standards contained in Subsection 6.3.2G.

   c. In no event shall the Board of Adjustment reduce the Minimum Setbacks set forth in Subsection 6.2.2.

3. The Board of Adjustment shall determine whether to grant an extension of the expiration for a Gas Well Development Site Plan or Gas Well Permit based upon whether there are circumstances reasonably beyond the control of the Operator, including any delay on the part of the City in issuing subsequent permits, that justify an extension of the Site Plan or Permits, in order that the Operator may enjoy the same rights in the use of the property that are presently enjoyed by other similarly situated properties, but which rights are denied to the property for which the Site Plan or Permits have expired or are suspended.

4. Any action under this subsection B shall require a three-fourths majority vote of the entire Board of Adjustment.

5. Any Operator or other person aggrieved by any decision of the Board of Adjustment may present to a court of record a petition, duly verified, stating that such decision is illegal, in whole or in part, and specifying the grounds of the alleged illegality. Such petition shall be presented within 10 days after the date on which the decision of the Board of Adjustment was rendered and not thereafter, and judicial review of the petition shall be pursuant to TLGC, § 211.011, as amended.
C. **Administrative Variance Procedures**
   An Operator may request an administrative variance to the Drilling and Production Site Setback requirements of Subsection 6.2.2 for a New or Existing Site from the Gas Well Administrator under the following circumstances:
   1. The Operator has at least one Existing Site on the property under mineral lease for the property or for contiguous leased property;
   2. Such Existing Site(s) is located closer to Protected Uses or Residential Subdivisions than is the proposed Drilling and Production Site to such uses; and
   3. The Operator agrees in a written instrument capable of recording to limit gas well development on such Existing Site(s) to existing Gas Well Drilling and Production Activities.
   For each Existing Site so restricted, the Gas Well Administrator may reduce the Drilling and Production Site Setback by an amount calculated as follows: 50 percent of the difference between the Drilling and Production Site Setback and the Minimum Setback. As a condition of granting the administrative variance, the Gas Well Administrator shall require that the Operator’s written agreement be recorded in the Denton County records at the Operator’s expense.

D. **Vested Rights Appeals**
   Any person who claims that he has obtained a vested right pursuant to TLGC, Chapter 245, or other applicable vesting law under prior gas well development regulations from the requirements of Section 6.2: Gas Well Development and Section 6.3: Gas Well Drilling and Production, as they pertain to gas well development, may request a determination pursuant to Subsection 2.5.6: Vested Rights. For proposed gas wells to be located inside the City limits, the petitioner shall include a statement of the reasons why the regulations contained in Section 6.3: Gas Well Drilling and Production or Section 6.2: Gas Well Development are not exempt pursuant to TLGC section 245.004.

### 6.3 Gas Well Drilling and Production

#### 6.3.1 Definitions

For the purpose of this Subchapter 6: Gas Wells, certain words and terms shall be defined and interpreted as follows. Interpretations of meaning shall be made by the Director of Planning and Development based on the provisions of Subsection 2.8.6, Interpretations. Appeals of staff interpretations of this Subchapter shall be heard as a Board of Adjustment proceeding in accordance with Subsection 2.8.1: Variance.

**As-Built Gas Well Development Site Plan**
A Gas Well Development Site Plan depicting the boundaries of the subject Drilling and Production Site as constructed.

**Completion Operations**
The term used to describe the events and equipment necessary to bring a wellbore into production once drilling operations have been concluded, including, but not limited to, well stimulation activities, the assembly of downhole tubular, or installing equipment in the well to allow a safe and controlled flow of petroleum or hydro carbons from the well. This definition describes all events performed and equipment used for completion of a well, whether performed the first time on a well or as subsequent treatments to an existing well.

**Compressor**
A device that raises the pressure of natural gas.
Contaminant
Any substance capable of contaminating a non-related homogeneous material, fluid, gas or environment.

Cure Period
The amount of time granted to remedy a violation of this Chapter.

Daytime
The hours between 7:00 a.m. and 7:00 p.m. CST on any given day.

Drilling
Term used to typically describe the means by which the earth is bored to create a pathway to formations containing hydrocarbons to allow for their production to the surface. It can employ various types of mobilized drilling equipment to create a wellbore while incorporating drilling fluids to cool the bit, to condition the hole, to remove drilled cuttings and to maintain an overbalanced pressure gradient against the formation that may contain inherently pressurized well fluids.

Drilling Activities
Those activities commonly performed at a Drilling and Production Site necessary or incidental to getting hydrocarbons to market; including but not limited to a well redrill or any hydraulic refracturing, initial drilling and completion operations, but not including Production Activities.

Drilling and Production Site
The area dedicated to all authorized above ground gas well drilling and production activities related to an oil and gas operation on an improved area and containing all wells, structures, dehydrators, parking areas, security cameras, lighting, tanks, tank battery (or any other tank grouping area), drilling rigs, separators, lift compressors, perimeter walls, utilities, and all other features or objects used during and after gas well drilling or production activities, as depicted on a Gas Well Development Plat or Gas Well Development Site Plan, but excluding pits, gathering and transmission lines and compressor stations. Drilling and Production Site includes the terms gas well park, gas well pad site, pad site, and drilling and production area.

Drilling and Production Site Setback
The distance that the site must be separated by an Operator from an existing Protected Use or from a Residential Subdivision.

Existing Drilling and Production Site or Existing Site
A Drilling and Production Site that was specifically depicted and approved on a Gas Well Development Site Plan, or a gas well development plat, prior to August 18, 2015, and on which one or more gas wells exist. Where the boundaries of such site have not been defined by metes and bounds or lot/block description on an approved gas well development plat, this term describes the improved surface area incorporating all facilities and appurtenances currently contained on the developed Drilling and Production Site. An Existing Site also includes a Drilling and Production Site designated in a MPC or PD District, and approved via a site-specific authorization, whether or not one or more wells exist on the site, provided that the site-specific authorization includes a metes and bounds description or a metes and bounds description is provided within three months of this amendatory ordinance.

Existing Gas Well Development Site Plan
A Gas Well Development Site Plan that was approved by the City after August 4, 2010 that established setback boundaries and identified a specific number of wells to be constructed on the subject Drilling and Production Site.
Subchapter 6: Gas Wells
6.3 Gas Well Drilling and Production
6.3.1 Definitions

**Exploration**
Geologic or geophysical activities, including, but not limited to surveying and seismic exploration, related to the search for oil, gas, or other sub-surface hydrocarbons.

**Floodplain**
See Subchapter 9: Definitions, for definition.

**Flood Fringe**
See Subchapter 9: Definitions, for definition.

**Floodway**
See Subchapter 9: Definitions, for definition.

**Flowback**
The process of allowing fluids to flow from a well following a treatment, either in preparation for a subsequent phase of treatment or in preparation for cleanup and returning the well to production. The flowback period occurs as a stage within Completion Operations.

**Freshwater Well**
A private water well used by a Protected Use.

**Gas**
A naturally-occurring gaseous substance, including substances primarily composed of methane and other light, gaseous hydrocarbons.

**Gas Processing Plant**
A facility, separate and distinct from a Drilling and Production Site, engaged in the extraction of natural gas liquids from field natural gas, or the fractionation of mixed natural gas liquids to natural gas products, or a combination of both.

**Gas Well**
A hole or bore drilled to any horizon, formation, or strata for the purpose of producing or storing natural gas, or other liquid hydrocarbons.

**Gas Well Administrator**
The administrative official designated by the City of Denton that is responsible for evaluating the impacts of exploration, development, and production of oil and/or gas wells. Responsibilities include environmentally sensitive areas review, erosion control inspection, monitoring, and evaluating compliance with federal, state, and local regulations.

**Gas Well Development**
Any drilling activity or production activity performed on an approved Drilling and Production Site.

**Gas Well Development Site Plan**
The initial approval authorizing wells to be drilled at one Drilling and Production Site that sets the boundaries used for setback measurements and contains all the information required by this Subchapter 6: Gas Wells.

**Gas Well Drilling and Production Activities**
(A/K/A drilling and production activity(ies), drilling and production) As used in this Chapter, gas well drilling and production activities encompasses all three of the following: Initial Drilling Activities, Completion Operations and Production Activities.
Gas Well Permit
A written license that is granted by the City of Denton pursuant to Subsection 6.2.5: Gas Well Permits. A Gas Well Permit is required for each separate well. The term “gas well permit” in lower case letters refers to a permit approved by the City of Denton under gas well regulations in effect prior to the effective date of this amendatory ordinance, as the context may indicate, which authorized drilling and production activities on a gas well existing on such effective date.

Habitable Structure
Structures suitable for human habitation or occupation for which a Certificate of Occupancy or Final Inspection Certificate is required, including but not limited to, public buildings and enclosed buildings used for commercial or industrial purposes. A habitable structure shall not include accessory buildings, barns, garages and sheds.

Hazardous Materials Management Plan
The hazardous materials management plan and hazardous materials inventory statements required by the Fire Code.

Hydraulic Fracturing
A well stimulant treatment that involves the process of directing pressurized fluids containing any combination of water, propellant, and any added chemicals to penetrate tight formations, such as shale or coal formations, that subsequently require high rate, extended flowback to expel fracture fluids and solids during completions. Hydraulic Fracturing occurs as a stage within Completion Operations.

Initial Drilling Activities
The portion of the Drilling Activities that includes the means by which a portion of the earth is originally bored in order to create a pathway to formations containing hydrocarbons to allow for their production to the surface.

Lightning Protection System
An integrated system designed to ground metal equipment on a rig, well pad or at a tank battery location for protection against electrical shock, fire or explosion due to lightning.

Liner
In pit construction, a liner is an impervious material, either synthetic or natural, that is used to line the interior of a pit to prevent pit fluids from leaking or leaching into the environment.

Minimum Setback
The minimum distance a Drilling and Production Site must be separated by an Operator from a Protected Use or from a Residential Subdivision after a waiver or variance is granted to reduce the setback requirement.

New Drilling and Production Site or New Site
A proposed Drilling and Production Site that is other than an Existing Site.

Operator
The person(s) in charge and in control of drilling, maintaining, operating, pumping, or controlling any well or pipeline including without limitation, a unit Operator.

Plugging and Abandonment
Includes the plugging of the well, abandoned, orphaned or otherwise, in accordance with RRC Statewide Rule 3.14 or its successor regulation and restoration of the Drilling and Production Site as required by the RRC.
Production Activities (A/K/A Production)
The phase that occurs after Exploration, Initial Drilling Activities and Completion Operations and during which time hydrocarbons are stored or drained from an underground reservoir involving operations performed on a Drilling and Production Site, excluding those operations and facilities as defined and regulated by the Pipeline Safety Act of 1994, 49 U.S.C. §§ 60101-60137.

Protected Use
Any dwelling, church, public park, public library, hospital, pre-kindergarten, kindergarten or elementary, middle or high school, public pool, public transit center, senior center, public recreation center, hotel or motel.

Railroad Commission (RRC)
The Railroad Commission of Texas.

Redrill
Any work to an existing well bore or an existing surface hole location after Initial Drilling Activities that requires a new permit from the Texas Railroad Commission. This definition includes, but is not limited to, drilling into a new horizon or drilling multiple directionals from the same surface hole location or using the same vertical wellbore.

Residential Subdivision
A subdivision designated for residential use for two or more dwellings.

Reverse Setback
The minimum distance that a Protected Use or Residential Subdivision must be separated by a surface owner from an approved Drilling and Production Site or from a gas well within such site.

Site Access Road
The route depicted and approved on the Gas Well Development Site Plan or Gas Well Development Plat that identifies the ingress and egress point used to access the Drilling and Production Site from an existing City, County, or State maintained roadway.

Site Preparation
To ready a Drilling and Protection Site for Initial Drilling Activities by installing erosion and sediment control practices, performing clearing and grading activities of the Drilling and Production Site or Site Access Road.

Site-specific Authorization
The prior approval by ordinance of the City Council, of one or more specifically located and defined gas well site locations, subject to further site design, development, regulatory and permitting requirements, as set forth in this DDC or as specified within the site approval ordinance (or both), as applicable.

Spud
The start of the well drilling process by removing rock, dirt, or other sedimentary material with the drill bit.

Tank
Any storage vessel that contains an accumulation of crude oil, condensate, intermediate hydrocarbon liquids, or produced water; is constructed primarily of non-earthen materials (such as wood, concrete, metal, fiberglass, steel or plastic) which provide structural support; is not skid-mounted or permanently attached to something that is mobile; and is intended to be located at the Drilling and Production Site for more than 90 consecutive days.
Well Stimulation
A treatment performed to restore or enhance the productivity of a well by opening new channels in the rock for the oil and gas to flow through; including, but not limited to fracturing, hydraulic or otherwise, injection of acid, or the use of charges to break up the rock.

Workover Operation
Work performed on a well after its initial completion to secure production where there has been none, to restore production that has ceased, or to enhance or increase production within the zone originally completed or to repair the well. Workover operations do not include redrills or completion activities.

6.3.2 Standards for Gas Well Drilling and Production
The drilling and production of gas wells within the City limits shall be subject to the following standards.

A. Prohibited or Restricted Locations, Uses and Activities
1. No gas well Drilling and Production Sites shall be allowed on slopes greater than 10 percent.
2. No Drilling and Production Site shall be located within any of the streets or alleys of the City or streets or alleys shown by the current Comprehensive Plan of the City of Denton. No street shall be blocked or encumbered or closed due to any exploration, drilling, or production activities unless prior consent is obtained from the City Manager, and then only temporarily.
3. Nothing in this Section is intended to prevent an Operator from drilling directionally to reach a target or bottom hole that is located beneath a prohibited or restricted site. Gas wells may have a target location or bottom-hole location that is under the floodway, an ESA or within 1,200 feet of the flood pool elevation of Lake Ray Roberts or Lake Lewisville when the gas well is drilled directionally from a location outside such areas.
4. No refining process, or any process for the extraction of products from gas, shall be carried on at a Drilling and Production Site, except that a dehydrator and separator, in accordance with federal and/or state law, may be maintained on a Drilling and Production Site for the separation of liquids from gas. Any such dehydrator or separator may serve more than one well. Gas Processing Facilities shall require a Specific Use Permit.
5. No person shall place, deposit, or discharge (or cause or allow to be placed, deposited, or discharged) any oil, naphtha, petroleum, diesel, gasoline, asphalt, tar, hydrocarbon substance, or any refuse, including wastewater or brine, from any gas operation or the contents of any container used in connection with any gas operation in, into, or upon any public right-of-way, storm drain, ditch or sewer, sanitary drain or sewer, any body of water, or any private property within the corporate limits of the City of Denton.
6. No Operator shall excavate or construct any lines for the conveyance of fuel, water, or minerals on, under, or through the streets or alleys or other land of the City without an easement or right-of-way license from the City, at a price to be agreed upon, and then only in strict compliance with this Subchapter 6: Gas Wells, with other ordinances of the City, and with the specifications established by the Engineering Department.
7. The digging up, breaking, excavating, tunneling, undermining, breaking up, or damaging of any public street or leaving upon any public street any earth or other materials is prohibited. Construction activities or deposition of any materials or objects creating an
Subchapter 6: Gas Wells
6.3 Gas Well Drilling and Production
6.3.2 Standards for Gas Well Drilling and Production

obstruction within public rights-of-way or easements are prohibited unless the Operator has first obtained written approval from the Engineering Department and, if applicable, has filed a right-of-way use agreement, and then only if in compliance with specifications established by the Department.

B. Site Layout, Design, and Compatibility Requirements
The following requirements apply only within City limits.

1. Entrance Gate
An entrance gate to the Drilling and Production Site shall be required and a sign identifying the entrance to the Drilling and Production Site or operation site shall be light reflective.

2. Fencing, Screening and Landscaping
   a. Fencing, buffering, landscaping and screening shall be required on Drilling and Production Sites. All required fencing, landscaping, buffering and screening must be installed in accordance with the approved Landscape Plan within 180 days after initial drilling of the first approved well. Landscaping and screening shall also be required for Compressors. Landscaping and screening shall comply with the same requirements for Drilling and Production Sites as set forth in this Subchapter 6: Gas Wells, and in the DDC. Should the Operator decide to fence in gathering and transmission lines or compressor stations, or both, Operator shall install the fencing in accordance with Subchapter 7: Development Standards.
      i. All Drilling and Production Sites in Residential Districts shall be screened with an opaque decorative masonry fence that shall be no less than eight feet in height.
      ii. In lieu of this requirement, an alternative fence that is compatible with the area surrounding the Drilling and Production Site may be approved by the Director of Planning and Development.
      iii. Required fencing must be located within 300 feet of all equipment necessitating fencing requirements under this Subchapter 6: Gas Wells.
   b. Fencing in all other districts shall be screened with a fence at least eight feet in height that is compatible with the area surrounding the Drilling and Production Site. Required fencing must be located within 300 feet of all equipment necessitating fencing requirements under this Subchapter 6: Gas Wells.

3. Signage
   a. A sign shall be immediately and prominently displayed on each side of the fence that surrounds the Drilling and Production Site. Such sign shall be made of durable material and shall be maintained in good condition. The sign shall have a surface area of not less than 2 ½ feet by 2 ½ feet or more than 4 by 4 feet and shall be lettered in minimum four-inch lettering and shall include the following information:

   "THIS IS A GAS WELL DRILLING AND PRODUCTION SITE. THIS SITE MAY BE THE SUBJECT OF FURTHER DRILLING AND PRODUCTION AND/OR HYDRAULIC FRACTURING."

   b. Additional signs shall be posted on each Drilling and Production Site which contain the following information:
      i. The Well Identification Number(s), American Petroleum Institute well number(s) and any other well designation(s) required by the RRC;
Subchapter 6: Gas Wells
6.3 Gas Well Drilling and Production
6.3.2 Standards for Gas Well Drilling and Production

ii. Name of Operator;
iii. Operator’s telephone number which will be answered 24 hours a day by a live, in-person, non-automated response system so as to ensure that in cases of emergency the Operator is made immediately aware;
iv. Operator’s business mailing address;
v. Address of Drilling and Production Site;
vi. The number for emergency services (911);
vii. The telephone number of the City’s Gas Well Division for citizens to call with questions, concerns or complaints;
viii. The telephone number of the TCEQ’s Regional Office where air quality complaints may be reported; and
ix. Any additional information required by RRC.

c. A permanent weatherproof sign shall be posted on each Drilling and Production Site reading “DANGER NO SMOKING ALLOWED,” in both English and Spanish, at the entrance of each Drilling and Production Site or in any other location approved or designated by the Fire Marshal. Sign lettering shall be four inches in height and shall be red on white background or white on red background. Each sign shall include the emergency notification numbers of the City Fire Department and the Operator, well and lease designations required by the RRC.

4. Painting
All installed, mounted, and/or permanent equipment on Drilling and Production Sites shall be coated, painted, and maintained at all times, including the wellhead, gas processing units, pumping units, storage tanks, above-ground pipeline appurtenances, buildings, and structures, in accordance with applicable guidelines adopted by The Society for Protective Coatings (SSPC). In addition, the following standards are applicable:

a. Protective coatings and paints shall comply with any applicable State or City requirements. In absence of any such requirement, protective coatings and paints shall be of a neutral color that is compatible with the surrounding environment.
b. All exposed surfaces of the identified equipment must be coated and painted, and free from rust, blisters, stains, or other defects.

5. Electric Lines
All electric lines to permanent production facilities shall be located in a manner compatible to those already installed in the surrounding areas or subdivision.

6. Lift Compressor Location
Any lift compressor which is installed within an approved Drilling and Production Site shall be located at least 24 feet from the outer boundary of the site.

7. Storage Tanks and Separators
a. An Operator is allowed to construct, use, and operate such storage equipment and separation equipment as shown on the approved Gas Well Development Site Plan, except that permanent storage equipment and separation equipment may not exceed eight (8) feet in height.
b. The use of centralized tank batteries is permitted if shown and approved by the applicable Gas Well Development Site Plan.

8. **Trash Removal**
   Any rubbish or debris that might constitute a fire hazard shall be promptly removed from the Drilling and Production Site.

9. **Debris**
   The Drilling and Production Site and site access road shall at all times be kept free of debris, pools of water or other liquids, contaminated soil, weeds, brush, trash or other waste material.

C. **Site Development Standards**
   1. **Water Conservation Plan**
      In cases where the City activates its drought contingency plan, each Operator must submit to the City a water conservation plan for uses of water. The plan must provide information in response to each of the following elements.
      a. A description of the use of the water in the production process, including how the water is diverted and transported from the source(s) of supply, how the water is utilized in the production process, and the estimated quantity of water consumed in the production process and therefore unavailable for reuse, discharge, or other means of disposal;
      b. If long-term, five to 10 years, water storage is anticipated, quantified five-year and 10-year targets for water savings and the basis for the development of such goals;
      c. A description of the device(s) and/or method(s) within an accuracy of plus or minus five percent to be used in order to measure and account for the amount of water diverted from the source of supply;
      d. Leak-detection, repair, and accounting for water loss in the water distribution system;
      e. Application of state-of-the-art equipment and/or process modifications to improve water use efficiency; and
      f. Any other water conservation practice, method, or technique which the user shows to be appropriate for achieving the stated goal or goals of the water conservation plan.

   2. **Erosion and Sediment Controls**
      Erosion and sediment control practices shall be conducted for all gas wells. The Operator shall comply with the Erosion and Sediment Control Plan as approved by the City.

   3. **Site Access Restriction**
      Access to a Drilling and Production Site shall not be taken from Neighborhood Streets.

D. **Operations and Equipment Standards**
   The following requirements apply only within City limits.
   1. **Compliance with Federal and State Laws, Rules and Regulations**
      The Operator shall at all times comply with the applicable federal and state laws, rules and regulations, and Field Rules, including but not limited to those addressing the following subjects:
      a. Vapor recovery equipment;
b. Venting and flaring;
c. Soil sampling;
d. Pit design and use;
e. Hydraulic fracturing;
f. Plugging and abandonment of gas wells;
g. Reclamation of Drilling and Production Sites;
h. U.S. Army Corps of Engineers setback requirements from water bodies; and
i. Surface casing procedures.

2. **Time of Fracturing**
   Fracturing operations shall be scheduled to occur during daytime unless the Operator has notified the Gas Well Administrator that fracturing will occur before or after daytime to meet safety requirements.

3. **Clean-up After Completion**
   After the well has been completed the Operator shall clean and repair all damage to public property caused by such operations within 30 days.

4. **Plugged and Abandoned Wells**
   All wells shall be plugged and abandoned in accordance with the rules of the RRC. In addition, the Operator shall:
   a. Submit a copy of its RRC Form W-3A (Notice of Intention to Plug and Abandon) and Form W-3 (Plugging Record) to the Inspector within two business days of filing with the RRC;
   b. Notify the Gas Well Administrator of the intention to plug and abandon a well at least 24 hours prior to commencing activities; and
   c. Submit to the Gas Well Administrator the surface hole locations in an acceptable Geographic Information System (GIS) format to accurately map and track well locations. The GIS data may be submitted with an initial Gas Well Permit application or with the annual administrative report. Submission of GIS location data is only required once.

E. **Fire Safety and Emergency Response Requirements**
   The provisions of this section shall apply within the corporate limits of the City of Denton.

   1. **State, Federal, and Local Compliance**
      The drilling and production of gas and accessing the Drilling and Production Site shall be in compliance with all state, federal and local safety regulations.

   2. **Gathering Lines**
      a. Each Operator shall place a pipeline marker sign at each point where a flow line or gathering line crosses a public street or road.
      b. Each Operator shall place a warning sign for lines carrying H2S (Hydrogen Sulfide) gas as required by the Railroad Commission.
6.3 Gas Well Drilling and Production

6.3.2 Standards for Gas Well Drilling and Production

Denton, Texas – Denton Development Code

All flow lines and gathering lines within the corporate limits of the City (excluding City utility lines and franchise distribution systems) that are used to transport oil, gas, and/or water shall be limited to the maximum allowable operating pressure applicable to the pipes installed and shall be installed with at least the minimum cover or backfill specified by the American National Safety Institute Code, as amended.

3. Operating Pressure
   Each well shall be equipped with an automated valve that closes the well in the event of an abnormal change in operating pressure. All wellheads shall contain an emergency shut off valve to the well distribution line.

4. Control Device
   Each storage tank shall be equipped with a level control device that will automatically activate a valve to close the well in the event of excess liquid accumulation in the tank.

5. Storage Tanks
   Each storage tank requires a permit by the Fire Department and shall meet the requirements of the Fire Code.

6. Outdoor Storage Areas
   Outside storage areas shall be equipped with a secondary containment system designed to contain a spill from the largest individual vessel. If the area is open to rainfall, secondary containment shall be designed to include the volume of a 24-hour rainfall as determined by a 25-year storm and provisions shall be made to drain accumulations of ground water and rainfall.

7. Lightning System
   Drilling and Production Sites shall be equipped with a lightning protection system, in accordance with the City's Fire Code and the National Fire Association's NFPA-780. In addition, tank battery facilities shall be equipped with a lightning arrestor system.

8. Remote Foam Line
   Drilling and Production Sites shall be equipped with a remote foam line that meets the requirements of NFPA-11.

   An Operator shall prepare and provide to the Fire Marshal a Hazardous Materials Management Plan. Any updates or changes to this plan shall be provided to the Fire Marshal within three business days of the change. All chemicals and/or hazardous materials shall be stored in such a manner as to prevent, contain, and facilitate rapid remediation and cleanup of any accidental spill, leak, or discharge of a hazardous material. Operator shall have all material safety data sheets (MSDSs) for all hazardous materials on-site. All applicable federal and state regulatory requirements for the proper labeling of containers shall be followed. Appropriate pollution prevention actions shall be required and include, but are not limited to, chemical and materials raised from the ground (e.g., wooden pallets), bulk storage, installation and maintenance of secondary containment systems, and protection from stormwater and weather elements.

10. Emergency Response Plan
    An Operator shall prepare and provide to the Fire Marshal an Emergency Response Plan which includes the following information: (i) a detailed site plan showing the location of the
access road, all buildings and structures, well head, tank batteries, above ground pipe and underground transmission pipe; (ii) a list of all on-site safety features, equipment and its location; (iii) the name, address and a twenty-four-hour, in-person response, phone number of the Operator to be notified in case of emergency; and (iv) the name, phone number and address of the surface property owner. The Emergency Response Plan should describe the personnel, procedures and equipment that the Operator has available for responding to any irregular release or a threatened release of materials on the site. The Emergency Response Plan may be included in the Hazardous Materials Management Plan.

11.  Testing/Record Keeping
Operator shall perform periodic testing to verify that all equipment is operating properly. Maintenance and testing shall be under the supervision of a responsible person who shall ensure that such maintenance and testing are conducted in accordance with the manufacture’s specifications. Test and inspection records must be available to the Fire Marshal or Gas Well Administrator for review upon request.

12.  Access by Emergency Vehicles
All Drilling and Production Sites will be designed to provide road access for emergency vehicles in accordance with the provisions of the Fire Code. All access roads for fire apparatus must be unobstructed and be at least 20 feet in width, or shall have a design determined by the Fire Marshall as functionally equivalent to this standard. In addition, all access roads shall have an all-weather surface as provided for in the Fire Code. All dead ends and turning radii shall meet adopted Fire Code standards.

13.  Pit Fencing
For safety reasons, fencing shall be installed to restrict access to a reserve pit or other type of open pit containing a synthetic liner and used in gas well drilling operation at a Drilling and Production Site within the corporate limits of the City.

14.  Catchment Basins
Drip pans, catchment basins and other secondary containment devices or oil absorbing materials shall be placed or installed underneath all tanks, containers, pumps, lubricating oil systems, engines, fuel and chemical storage tanks, system valves, connections, and any other areas or structures that could potentially leak, discharge, or otherwise spill hazardous or solid materials.

15.  Clean-up Operations
After any spill, leak or discharge, the Operator shall remove or cause to be removed all contamination and associated waste materials. Clean-up operations shall begin immediately.

16.  Immediate Notification
Upon the occurrence of a fire, blowout, release of hazardous materials, injury or other incident outside normal operating events, the Operator will immediately notify the Fire Department and a representative of the Operator will be on-site within 60 minutes to assist the City’s Emergency Response Team and provide any information necessary regarding the site. The Operator shall also, at its own expense, contact and deploy any well containment specialists or other specialists necessary to contain and suppress the emergency situation.
17. **Storage**  
No pit shall be used or maintained for storage of oil or oil products or oil field fluids, or for storage or disposal of oil and gas wastes.

**F. Nuisance Prevention and Impact Mitigation Standards**

1. **Nuisances**  
Adequate nuisance prevention measures shall be taken to prevent or control offensive odor, fumes, dust and vibration. All drilling and production operations shall be conducted in such a manner as to minimize, so far as practicable, dust, vibration or noxious odors, and shall be in accordance with the best accepted practices incident to drilling for the production of gas and other hydrocarbon substances in urban areas. All equipment used shall be constructed and operated so that vibrations, dust, odor or other harmful or annoying substances or effects are minimized by the operations carried on at any drilling or production site or from anything incident thereto to avoid injury to or annoyance of persons living in the vicinity. The site or structures shall not be permitted to become dilapidated, unsightly or unsafe. Proven technological improvements in industry standards of drilling and production in this area shall be adopted as they become available if capable of reducing factors of dust, vibration and odor.

2. **Sound Mitigation**
   
a. A noise management plan, prepared by a professional qualified in the area of noise mitigation, and approved by the Gas Well Administrator, detailing how the equipment used in the drilling, completion, transportation or production of a well complies with the maximum permissible noise levels of this section will be submitted with the Gas Well Site Plan Application. The noise management plan must:
   
i. Identify operation noise impacts;
   
ii. Provide documentation establishing the ambient noise level prior to construction of any wellhead, compressor or compression facility; and
   
iii. Detail how the impacts will be mitigated. In determining noise mitigation, specific site characteristics shall be considered, including but not limited to the following:
   
a. Nature and proximity of adjacent development, location and type;
   
b. Seasonal and prevailing weather patterns, including wind directions;
   
c. Vegetative cover on or adjacent to the site; and
   
d. Topography.
   
iv. The Operator shall be responsible for verifying compliance with this section and the noise management plan after the installation of the noise mitigation equipment.
   
b. No well shall be drilled, re-drilled or any equipment operated at any location within the City in such a manner so as to create any noise, including low-frequency outdoor noise levels, which causes the exterior noise level when measured at the Protected Use receiver's/receptor's property line or from the closest exterior point of the Protected Use structure or inside the Protected Use structure if access to the property is granted by the receiver/receptor, that:
   
i. Exceeds the ambient noise level by more than five decibels during daytime hours and more than three decibels during nighttime hours;
ii. Exceeds the ambient noise level by more than 10 decibels over the daytime average ambient noise level during fracturing operations during daytime hours;

iii. Exceeds the ambient noise level by more than three decibels during flowback operations during nighttime hours;

iv. Creates pure tones where one-third octave band sound-pressure level in the band with the tone exceeds the arithmetic average of the sound-pressure levels of two contiguous one-third octave bands by five dB for center frequencies of 500 Hertz and above, and by eight dB for center frequencies between 160 and 400 Hertz, and by 15 dB for center frequencies less than or equal to 125 Hertz.

c. The Operator shall be responsible for establishing and reporting to the City a continuous 72-hour pre-drilling ambient noise level prior to the issuance of a Gas Well Permit. The 72-hour time span shall include at least one 24-hour reading during either a Saturday or Sunday. The Operator shall use the prior established ambient noise level for the installation of any new noise generation equipment unless the Operator can demonstrate that the increase in the ambient noise level is not associated with drilling and production activities located either on or off-site.

d. Adjustments to the noise standards as set forth above in subsections b(i), b(ii) and b(iii) of this section may be permitted intermittently in accordance with the following:

<table>
<thead>
<tr>
<th>Permitted Increase (dBa)</th>
<th>Duration of Increase (minutes) [1]</th>
</tr>
</thead>
<tbody>
<tr>
<td>10</td>
<td>5</td>
</tr>
<tr>
<td>15</td>
<td>1</td>
</tr>
<tr>
<td>20</td>
<td>Less than one</td>
</tr>
</tbody>
</table>

Notes:

[1] Cumulative minutes during any one hour.

e. All workover operations shall be restricted to daytime hours.

f. The exterior noise level generated by the drilling, redrilling or other operations of all gas wells located within the applicable Drilling and Production Site Setback as set forth in Subsection 6.2.2 shall be continuously monitored, to ensure compliance. The cost of such monitoring shall be borne by the Operator. If a complaint is received by either the Operator or the gas inspector from any Protected Use the Operator shall, within 24 hours of notice of the complaint, continuously monitor for a 72-hour period the exterior noise level generated by the drilling, redrilling or other operations to ensure compliance. At the request of the Gas Well Administrator, the Operator shall monitor the exterior noise level at the source of the complaint.

g. Acoustical blankets, sound walls, mufflers or other alternative methods as approved by the Gas Well Administrator may be used to ensure compliance. All soundproofing shall comply with accepted industry standards.

h. The sound level meter used in conducting noise evaluations shall meet the American National Standard Institute's Standard for sound meters or an instrument and the associated recording and analyzing equipment which will provide equivalent data.
i. A citation may be immediately issued for failure to comply with the provisions of this section. However, if the Operator is in compliance with the approved noise management plan, and a violation still occurs, the Operator will be given 24 hours from notice of noncompliance to correct the violation from an identified source before a citation is issued. Additional extensions of the 24-hour period may be granted in the event that the source of the violation cannot be identified after reasonable diligence by the Operator.

3. **Lighting**

No Operator shall permit any lights located on any site to be directed in such a manner so that they shine directly on public roads, adjacent property or property in the general vicinity of the site. To the extent practicable, and taking into account safety considerations, site lighting shall be directed downward and internally so as to avoid glare on public roads and adjacent dwellings and buildings within 300 feet.

G. **Enhanced Nuisance Mitigation Standards**

1. **Enhanced Standards for Operators**

When an Operator, either by waiver procedure or variance, receives a reduction to the setback requirements of Subsection 6.2.2 for a Drilling and Production Site, the Operator shall comply with the following Enhanced Nuisance Mitigation Standards for that site:

a. **Sound Mitigation**

   The Drilling and Production Site shall be surrounded on all four sides with sound wall noise barriers that comply with accepted industry standards and are at least 30 feet in height during all Drilling Activities and Completion Operations and shall be removed by the Operator no later than 60 days after concluding the respective activity. In the alternative, if the Operator’s noise management plan provides equally effective sound mitigation to the Protected Uses within 1,000 feet of the Drilling and Production Site boundary, then the Operator may follow the recommendations set forth in the noise management plan. If the Operator chooses the alternative, the Operator shall provide notice of its intent together with its Notice of Activities as required by Subsection 6.3.7C.1.

b. **Production Monitoring**

   Periodic evaluations will be conducted by the City for the Drilling and Production Site during production to determine if equipment is functioning as designed or may be producing fugitive emissions.

   i. A third party contractor may be retained by the City to perform such inspections, and cost of services and charges assessed by the third party contractor shall be borne by the Operator. Any third party contractor shall act at the City’s direction and report directly to the City, and shall have the same authority as the Gas Well Administrator for purposes of inspections under this Section.

   ii. The City shall notify the Operator in writing, as well as to the state and federal regulatory agencies having jurisdictional authority, of any malfunctioning equipment producing fugitive emissions.

   iii. Quarterly reporting of the monitoring results to the City’s Gas Well Administrator is required with all laboratory data sheets, field logs, data summaries, and actions taken in the previous quarter.
iv. Upon showing documented compliance for a period of 12 months, the Operator shall thereafter employ best management practices to eliminate any emissions in violation of state and federal regulations.

c. An Operator is exempt from the inspection requirements included in Subsection b. above, and any associated fees, on any well site equipped with an equivalent automated system that meets the following requirements and is approved by the Inspector.

i. Any such alternative must include a screening for the presence of leaks, releases, or emissions, and other conditions that could identify potential malfunctions in the efficient operation of on-site equipment, such as the monitoring of line pressures and storage tank levels.

ii. The automated system alternative shall include:

a. A 24-hour remote alert system designed to notify appropriate personnel of excess storage tank levels or abnormal changes in line pressure; and

b. An emergency automated shutdown of the well(s) when monitoring indicates irregular storage tank levels and functioning of valves. All emergency situations shall be immediately reported to the City via 911.

iii. If malfunctions are identified, the point of concern shall be noted and a repair confirmation provided to the Gas Well Administrator. The repair confirmation shall include a statement indicating that the component is working within manufacturer and regulatory requirements.

iv. Data shall be compiled over the life of the well(s) and available to the Gas Well Administrator for review.

### 6.3.3 Indemnification and Insurance

#### A. Indemnification and Express Negligence Provisions

Each Gas Well Permit issued by the City shall include the following language:

OPERATOR DOES HEREBY EXPRESSLY RELEASE AND DISCHARGE ALL CLAIMS, DEMANDS, ACTIONS, JUDGMENTS, AND EXECUTIONS WHICH IT EVER HAD, OR NOW HAS OR MAY HAVE, OR ASSIGNS MAY HAVE, OR CLAIM TO HAVE, AGAINST THE CITY OF DENTON, AND/OR ITS DEPARTMENTS, AGENTS, OFFICERS, SERVANTS, SUCCESSORS, ASSIGNS, SPONSORS, VOLUNTEERS, OR EMPLOYEES (COLLECTIVELY REFERRED TO AS THE “INDEMNIFIED PARTIES”), RELATING TO OR ARISING OUT OF BODILY INJURY, KNOWN OR UNKNOWN, AND INJURY TO PROPERTY, REAL OR PERSONAL, OR IN ANY WAY INCIDENTAL TO OR IN CONNECTION WITH THE PERFORMANCE OF THE WORK PERFORMED BY THE OPERATOR UNDER A GAS WELL PERMIT. TO THE FULLEST EXTENT PERMITTED BY LAW, OPERATOR SHALL DEFEND, PROTECT, INDEMNIFY, AND HOLD HARMLESS THE INDEMNIFIED PARTIES FROM AND AGAINST EACH AND EVERY CLAIM, DEMAND, OR CAUSE OF ACTION AND ANY AND ALL LIABILITY, DAMAGES, OBLIGATIONS, JUDGMENTS, LOSSES, FINES, PENALTIES, COSTS, FEES, AND EXPENSES INCURRED IN DEFENSE OF THE INDEMNIFIED PARTIES, INCLUDING, WITHOUT LIMITATION, BODILY INJURY AND DEATH IN CONNECTION THERewith WHICH MAY BE MADE OR ASSERTED BY OPERATOR, ITS AGENTS, ASSIGNS, OR ANY THIRD PARTIES ON ACCOUNT OF, ARISING OUT OF, OR IN ANY WAY INCIDENTAL TO OR IN CONNECTION WITH THE PERFORMANCE OF THE WORK PERFORMED BY THE OPERATOR UNDER A GAS WELL PERMIT. THE OPERATOR AGREES TO INDEMNIFY AND

B. Insurance

1. General Requirements

a. The Operator shall provide or cause to be provided the insurance described below for each well for which a Gas Well Permit is issued, and shall maintain such insurance until the well is abandoned and the site restored, except as otherwise required in this Section. The Operator may provide the required coverage for multiple wells on a "blanket basis." Such coverage shall be approved by the Risk Manager for the City of Denton.

b. Prior to issuance of the Gas Well Permit, the Operator shall furnish the City with a certificate(s) of insurance, executed by a duly authorized representative of each insurer, showing compliance with the insurance requirements set forth in this Section. A copy of the endorsements or other policy provisions adding the City as an additional insured to the insurance policies, endorsements providing the City 30 days' written notice of cancellation or material change in coverage, and all waivers of subrogation shall be attached to the certificate(s) of insurance. Upon request, certified copies of the insurance policies shall be furnished to the City. The City's acceptance of documents that do not reflect the required insurance, or the City's failure to request the required insurance documents, shall not constitute a waiver of the insurance requirements set forth in this Section.

c. In the event any insurance required by this Section is cancelled, the Gas Well Permit shall be suspended on the date of cancellation and the Operator's right to operate under the Gas Well Permit shall immediately cease until the Operator obtains the required insurance.

d. The Operator shall provide the City 30 days' written notice of any cancellation, non-renewal, or material change in policy terms or coverage, and the policies shall be endorsed to provide the City such notice.

e. All insurance policies shall be written by an insurer authorized to do business in Texas and with companies with A: VIII or better rating in accordance with the current Best's Key Rating Guide, or with such other financially sound insurance carriers approved by the City.
f. All insurance policies, with the exception of the workers compensation policy, shall be endorsed to name the City, its officials, employees, agents and volunteers as additional insureds on the policies. The additional insured coverage shall apply as primary insurance with respect to any other insurance or self-insurance programs maintained by the City, its officials, employees, agents and volunteers. A copy of each endorsement shall be provided to the City as evidence of coverage.

g. All insurance policies shall be endorsed with a waiver of subrogation in favor of the City, its officials, employees, agents and volunteers. A copy of each endorsement shall be provided to the City.

h. All insurance policies shall be written on an occurrence basis where commercially available.

i. During the term of the Gas Well Permit, the Operator shall report, in a timely manner, to the Gas Well Division any known loss or occurrence which has caused, or may in the future cause, bodily injury or property damage.

2. Required Insurance Coverages
   
a. Commercial General Liability Insurance
      Operator shall maintain commercial general liability (CGL) insurance with a limit of not less than $1,000,000 each occurrence with a $2,000,000 aggregate. This insurance shall cover liability including, but not limited to, liability arising from premises, operations, blowout or explosion, products-completed operations, contractual liability, underground property damage, broad form property damage, and independent contractors. This insurance shall also include coverage for underground resources and equipment hazard damage. In addition to the additional insured requirements set forth above, the additional insured coverage provided to the City, its officials, employees, agents and volunteers shall include coverage for products-completed operations.

b. Environmental Impairment (or Pollution Liability) Insurance
   Operator shall maintain environmental impairment or pollution liability insurance with a limit of not less than $5,000,000. Such coverage shall not exclude damage to the lease site. If coverage is written on a claims-made basis, the Operator shall maintain continuous coverage or purchase tail coverage for four years following the expiration or suspension of the Gas Well Permit, and the retroactive date(s) applicable to such coverage shall precede the date of issuance of the Gas Well Permit. Coverage shall apply to sudden and accidental pollution conditions resulting from the escape or release of smoke, vapors, fumes, acids, alkalis, chemicals, liquids or gases, waste material or other irritants, contaminants or pollutants. Where commercially available, Operator shall also maintain such coverage for gradual pollution incidents.

c. Automobile Liability Insurance
   Operator shall maintain automobile liability insurance with a limit of not less than $1,000,000 each accident. Such insurance shall cover liability arising out of any auto (including owned, non-owned, and hired autos).
d. **Worker’s Compensation Insurance**
   Operator shall maintain workers compensation and employers liability insurance. The workers compensation limits shall be as required by statute and employers liability limits shall not be less than $1,000,000 each accident for bodily injury by accident and $1,000,000 each employee for bodily injury by disease.

e. **Excess (or Umbrella) Liability Insurance**
   Operator shall maintain excess (or umbrella) liability insurance with a limit of not less than $24,000,000 per occurrence with a $24,000,000 aggregate. Such insurance shall be excess of the commercial general liability insurance, automobile liability insurance and employers liability insurance as specified above.

f. **Control of Well Insurance**
   Operator shall maintain control of well insurance with a limit of not less than $5,000,000 per occurrence. The policy shall provide coverage for the cost of controlling a well that is out of control, re-drilling or restoration expenses, seepage and pollution damage. A $500,000 sub-limit endorsement may be added for damage to property for which the Operator has care, custody, and control.

### 6.3.4 Security

**A. Generally**

Prior to the issuance of a Gas Well Permit the Operator shall provide the Gas Well Administrator with a security instrument in the form of a bond or an irrevocable letter of credit in accordance with Subsection 6.3.4B below. Evidence of the execution of a letter of credit shall be submitted to the Gas Well Administrator by submitting an original signed letter of credit from the banking institution, with a copy of the same provided to the City Secretary.

1. **During Initial Drilling Activities**
   An Operator drilling between one and five wells in the City at any time shall provide a blanket bond or letter of credit that meets the requirements with Subsection 6.3.4B below in the principal minimum amount of $150,000. Such blanket bond or letter of credit shall be increased by $50,000 for the sixth and each additional well being drilled in the City.

2. **During Completion and Production Activities**
   An Operator with wells that are producing and for which all drilling operations have ceased shall provide a blanket bond or letter of credit that meets the requirements with Subsection 6.3.4B below in the principal minimum amounts as follows:
   a. Up to 75 wells: $100,000;
   b. Between 76 and 150 wells: $150,000; and
   c. More than 150 wells: $250,000.

**B. Drawing of a Bond or Letter of Credit**

1. The City shall be authorized to draw upon such bond or letter of credit to:
   a. Recover any fines or penalties assessed under this Section 6.3: *Gas Well Drilling and Production* or Section 6.2: *Gas Well Development*; or
b. To pay the City for the cost of doing any work required to remedy any default by the Operator under any provision of this Section 6.3: Gas Well Drilling and Production or Section 6.2: Gas Well Development.

2. If the City determines that a default has occurred in the performance of any requirement or condition imposed by this Section 6.3: Gas Well Drilling and Production or Section 6.2: Gas Well Development, a written notice shall be given to the Operator. Such notice shall specify the work to be done, the estimated cost and the period of time deemed to be reasonably necessary for the completion of such work. After receipt of such notice, the Operator shall, within the time therein specified, either cause or require the work to be performed, or failing to do so, shall pay over to the City 125 percent of the estimated cost of doing the work as set forth in the notice. In no event, however, shall the Cure Period be less than 10 days unless the failure presents a risk of imminent destruction of property or injury to persons or unless the failure involves the Operator’s failure to provide periodic reports as required by this Section 6.3: Gas Well Drilling and Production or Section 6.2: Gas Well Development.

3. The City shall be authorized to draw against the bond or letter of credit provided hereunder to recover such amount due from the Operator. Upon receipt of such moneys, the City shall proceed by such mode as deemed convenient and necessary to cause the required work to be performed and completed, but no liability shall be incurred other than for the expenditure of said sum in hand. In the event that the well has not been properly abandoned under the regulations of the commission, such additional money may be demanded from the Operator as is necessary to properly plug and abandon the well and restore the drill site in conformity with the regulations of this Section 6.3: Gas Well Drilling and Production or Section 6.2: Gas Well Development. In the event the Operator does not cause the work to be performed and fails or refuses to pay over to the City the estimated cost of the work to be done as set forth in the notice, or the issuer of the security instrument refuses to honor any draft by the City against the applicable irrevocable letter of credit or bond the City may proceed to obtain compliance and abate the default by way of civil action against the Operator, or by criminal action against the Operator, or by both such methods.

C. Requirements for Bonds
   A bond shall be executed by a reliable bonding or insurance institution authorized to do business in Texas, acceptable to the City. The bond shall become effective on or before the date the Gas Well Permit is issued and shall remain in force and effect for at least a period of six months after the expiration of the Gas Well Permit term or until the well is plugged and abandoned and the site is restored, whichever occurs first. The Operator shall be listed as principal and the instrument shall run to the City, as obligee, and shall be conditioned that the Operator will comply with the terms and regulations of this Section 6.3: Gas Well Drilling and Production or Section 6.2: Gas Well Development, and the City. The original bond shall be submitted to the Gas Well Administrator with a copy of the same provided to the City Secretary.

D. Requirements for Letters of Credit
   A letter of credit shall be issued by a reliable bank authorized to do business in Texas and shall become effective on or before the date the Gas Well Permit is issued. The letter of credit shall remain in force and effect for at least a period of six months after the expiration of the Gas Well Permit term. If the letter of credit is for a time period less than the life of the well as required by
Subchapter 6: Gas Wells
6.3 Gas Well Drilling and Production

6.3.5 Inspection

Denton, Texas – Denton Development Code
Print Date: December 12, 2019

this Section 6.3: Gas Well Drilling and Production or Section 6.2: Gas Well Development, the Operator must agree to either renew the letter of credit or replace the letter of credit with a bond in the amount required by this Section 6.3: Gas Well Drilling and Production or Section 6.2: Gas Well Development, on or before 60 days prior to the expiration date of the letter of credit. If the Operator fails to deliver to the City either the renewal letter of credit or replacement bond in the appropriate amount on or before 60 days prior to the expiration date of the letter of credit, the City may draw the entire face amount of the attached letter of credit to be held by the City of Denton as security for Operator’s performance of its obligations under this Section 6.3: Gas Well Drilling and Production or Section 6.2: Gas Well Development.

E. Abandoned Wells
When the well or wells covered by said irrevocable letters of credit or bond have been properly abandoned in conformity with all regulations of this Section 6.3: Gas Well Drilling and Production or Section 6.2: Gas Well Development, and in conformity with all regulations of the commission and notice to that effect has been received by the City, or upon receipt of a satisfactory substitute, the irrevocable letter of credit or bond issued in compliance with these regulations shall be terminated and cancelled.

6.3.5 Inspection

A. In accordance with federal and state law, the Gas Well Administrator and Fire Marshal shall have the authority to enter and inspect any premises covered by the provisions of this Section 6.3: Gas Well Drilling and Production; and Section 6.2: Gas Well Development, and Gas Well Permit, to determine compliance with its provisions, and all applicable laws, rules, regulations, standards, or directives of any local, state or federal authority.

B. Pursuant to inspection authority granted by this Subchapter 6: Gas Wells, the Fire Code, the Texas Clean Air Act, and the Texas Water Code, the Gas Well Administrator and the Fire Marshal shall conduct periodic inspections of all Drilling and Production Sites, Gas Wells and well-related equipment permitted under this Section 6.3: Gas Well Drilling and Production and Section 6.2: Gas Well Development.

C. Inspections will also include an evaluation of the Operator’s conformance with their Hazardous Materials Management Plan and other applicable requirements to their site. Any deviations from, or violations of, the Hazardous Materials Management Plan shall be referred to the Fire Marshal for further inspection and enforcement in accordance with the Fire Code.

D. Inspection fees will be assessed for all inspections in an amount set by separate ordinance. Failure to timely remit payment for inspection fees is a violation of this Section 6.3: Gas Well Drilling and Production and Section 6.2: Gas Well Development; however, nothing herein shall be deemed to limit the City’s remedies in equity or law in the collection of any past due fees.

6.3.6 Periodic Reports

A. The Operator shall notify the Gas Well Administrator and the Fire Marshal of any changes to the following information within one business day after the change occurs.

1. The name, address, and phone number of the Operator;
2. The name, address, and twenty-four-hour, in-person response, phone number of the person(s) with supervisory authority on behalf of the Operator over the Drilling and Production Site;
3. The name, address, and phone number of the person designated to receive notices from the City, which person shall be a resident of Texas that can be served in person or by registered or certified mail; and

4. The Operator's Emergency Action Plan if required to file one pursuant to federal or state law.

B. The Operator shall, upon request of the Gas Well Administrator, promptly make available a copy of any "incident reports" or written complaints submitted to the RRC or any other state or federal agency.

C. Beginning a year after a well is spud, and thereafter until the Operator notifies the Gas Well Administrator that the well has been plugged and abandoned and the Drilling and Production Site restored, the Operator shall prepare a written report to the Gas Well Administrator identifying any changes to the information that was included in the application for the applicable Gas Well Permit that have not been previously reported to the City provided that changes have been made.

D. The Operator must provide a copy to the Gas Well Administrator of all reports otherwise filed with the TCEQ in connection with an installed vapor recovery unit as described in this Section 6.3: Gas Well Drilling and Production or Section 6.2: Gas Well Development. The Operator shall also provide the City with copies of any responses provided by TCEQ. Such reports and responses shall be kept on the Drilling and Production Site and shall be available for inspection when requested by the Gas Well Administrator.

E. The Operator shall provide the City with copies filed with the RRC of the respective reports for setting surface casing, blowout preventer (BOP) pressure testing, bridge plug testing, pressure relief valve testing, and level control testing. The Operator shall also provide the City with copies of any responses provided by the RRC. Copies of such reports and responses shall be kept on the Drilling and Production Site and shall be available for inspection when requested by the Gas Well Administrator.

F. In addition to the records listed in this chapter, the Operator shall provide the City with a copy of all records filed with the RRC and TCEQ by the Operator or by third parties. Copies of such records shall be kept on the Drilling and Production Site and shall be available for inspection when requested by the Gas Well Administrator.

6.3.7 Notice of Activities

A. Notice Applicable to Setback Waivers and Variances

1. An Operator who seeks to reduce Drilling and Production Site Setbacks for a proposed Drilling and Production Site below those prescribed in Subsection 6.2.2, pursuant to the procedures in Subsection 6.2.6, shall give the notice prescribed by this subsection to each owner of surface property within the Drilling and Production Site Setback and to all registered neighborhood associations within one-half mile of the proposed Drilling and Production site at least 20 days prior to filing an application for approval of a Gas Well Development Site Plan for the proposed Drilling and Production Site. The notice shall describe which procedure(s) under Subsection 6.2.6 will be utilized by the Operator to obtain a reduction in the setback and the date of any hearing scheduled before the Board of Adjustment on a variance request. Such notice shall be in addition to any notices required for Board of Adjustment proceedings.
2. The notice shall identify the Operator and give the address and phone number of the Operator’s representative, an internet link for information on the proposed request for reduction of setbacks, and contact telephone numbers for the City staff. The notice shall be accompanied by an aerial photograph containing the information in paragraph 6.2.6A.1.a.

3. Notices required by this subsection shall be by depositing the same, properly addressed and postage paid, in the United States mail.

B. Notice Applicable to Applications for Gas Well Development Site Plans

1. At least 20 days prior to the date of filing of an application for approval of an original or amended Gas Well Development Site Plan with the Gas Well Administrator, the Operator shall notify, at the expense of the Operator, each surface owner of property within 1,000 feet of the proposed Drilling and Production Site. Such notice, as outlined below, shall be by depositing the same, properly addressed and postage paid, in the United States mail.

2. The notice shall expressly state whether waivers or variances from the Drilling and Production Site Setback have been granted pursuant to Subsection 6.2.6. The notice shall identify the Operator and give the address and phone number of the Operator’s representative, an internet link for information on the proposed request for reduction of setbacks, and contact telephone numbers for the City staff. The notice shall be accompanied by an aerial photograph containing the information in paragraph 6.2.6A.1.a.

3. At least 20 days prior to the date of filing of an application for an original or amended Gas Well Development Site Plan with the Gas Well Administrator, the Operator shall publish a notice containing the information in paragraph (B)(2) above, at the expense of the Operator, in one issue of the local section of a newspaper of general circulation in the City for 10 consecutive days. An affidavit by the printer or publisher of the newspaper indicating publication of the notice shall be filed with the application and will be prima facie evidence of such publication. All notices shall follow a format required by the City.

4. No later than five days after filing of an application for an original or amended Gas Well Development Site Plan with the Gas Well Administrator, the Operator, at Operator’s expense, shall erect at least one sign, as approved by the Gas Well Administrator, no less than three feet by three feet, upon the premises upon which a Gas Well Development Site Plan has been proposed. The sign or signs shall be located in a conspicuous place or places upon the property at a point or points nearest right-of-way, street, roadway or public thoroughfare adjacent to such property. The Gas Well Administrator may require additional signage if the premises fronts on more than one right-of-way, street, roadway or public thoroughfare. The sign(s) shall state that a Gas Well Development Site Plan has been requested, which if approved, would authorize the drilling of multiple gas wells for the site. The sign shall further set forth that additional information can be acquired by telephoning the Operator at the number indicated on the sign. The sign shall remain posted at the Drilling and Production Site for the duration of the Gas Well Development Site Plan.

C. Notice Applicable to Activities

1. Any Operator who intends to perform the following activities: (1) Drilling Activities; (2) Workover Operations; (3) perform Completion or Re-Completion Operations; (4) plug and abandon a well; (5) perform any other maintenance activities that involve removal of the well head at a Drilling and Production Site; or (6) conduct seismic exploration not involving explosive charges; shall give written notice to the City no sooner than 30 days and no later than 10 days before the activities begin, except in instances where immediate Operator
response is necessary, provided that the Operator has first obtained all necessary authorizations required by this Subchapter 6: Gas Wells, and the Fire Code. Road Damage Remediation Fees shall be paid to the City and submitted with the Notice of Activities.

2. Except in instances where immediate Operator response is necessary, all dwellings within 1,000 feet from the boundary of a Drilling and Production Site shall be notified no sooner than 30 days and no later than 10 days prior to the activities listed in Subsection C(1) above, excluding Workover Operations. Such notice shall be by depositing the same, properly addressed and postage paid, in the United States mail.
   a. The notice shall identify where the activities will be conducted and shall describe the activities in reasonable detail, including but not limited to the duration of the activities and the time of day they will be conducted.
   b. The notice shall also provide the address and the 24 hour, in-person response, phone number of the Operator responsible for the well concerning the activities.

3. The Operator responsible for the activities shall post a sign at the entrance of the Drilling and Production Site giving the public notice of the activities, including the date and time the activities will begin, and the name, address, and 24-hour, in-person response, phone number of the Operator conducting the activities.

4. If upon receipt of the notice the City determines that an inspection by the Gas Well Administrator is necessary, the Operator will pay the City’s fee for the inspection as set forth in amount as established by separate ordinance.

5. The Operator shall notify the Gas Well Administrator within 24 hours of setting surface casing.

6.3.8 Remedies, Enforcements and Right of Entry

A. The Fire Marshal and the Gas Well Administrator are authorized and directed to enforce this Section 6.3: Gas Well Drilling and Production; Section 6.2: Gas Well Development; and the provisions of any Gas Well Permit. Whenever necessary to enforce any provision of this Section 6.3: Gas Well Drilling and Production; Section 6.2: Gas Well Development; or a Gas Well Permit, or whenever there is reasonable cause to believe there has been a violation of this Section 6.3: Gas Well Drilling and Production; Section 6.2: Gas Well Development; or a Gas Well Permit, the Fire Marshal or Gas Well Administrator, may, consistent with federal and state law, enter upon any property covered by this Section 6.3: Gas Well Drilling and Production; Section 6.2: Gas Well Development; or a Gas Well Permit at any reasonable time to inspect or perform any duty imposed by this Subchapter 6: Gas Wells. If entry is refused, the City shall have recourse to every remedy provided by law and equity to gain entry.

B. It shall be unlawful and an offense for any person to do the following:
   1. Engage in any activity not permitted by the terms of a Gas Well Permit issued under this Section 6.3: Gas Well Drilling and Production or Section 6.2: Gas Well Development;
   2. Fail to comply with any conditions set forth in a Gas Well Permit issued under this Section 6.3: Gas Well Drilling and Production or Section 6.2: Gas Well Development; or
   3. Violate any provision or requirement set forth under this Section 6.3: Gas Well Drilling and Production or Section 6.2: Gas Well Development.

C. The enforcement and penalty provision under Section 1.6, Enforcement, shall apply to a violation of this Section 6.3: Gas Well Drilling and Production or Section 6.2: Gas Well Development.
D. The Gas Well Administrator is authorized to issue citations into municipal court for violations of this Section 6.3: *Gas Well Drilling and Production*; Section 6.2: *Gas Well Development*; or Gas Well Permit.

E. The City may also notify the EPA, TCEQ, RRC or other applicable federal or state agency in connection with violations of this Section 6.3: *Gas Well Drilling and Production* or Section 6.2: *Gas Well Development*.

F. **Permit Suspension or Revocation**

1. If an Operator (or its officers, employees, agents, contractors, subcontractors or representatives) fails to comply with any requirement of any Gas Well Permit issued by the City in connection with any Gas Well Drilling and Production activity, the Fire Marshal or Gas Well Administrator may give written notice to the Operator specifying the nature of the alleged failure and giving the Operator a reasonable time to cure, taking into consideration the nature and extent of the alleged failure, the extent of the efforts required to remedy the failure, and the potential impact on the health, safety, and welfare of the community. The Operator shall notify the Gas Well Administrator within 48 hours indicating how the violation(s) shall be remedied. Unless otherwise provided by this Section 6.3: *Gas Well Drilling and Production* or Section 6.2: *Gas Well Development*, in no event, however, shall the Cure Period be less than 10 days unless the alleged failure presents a risk of imminent destruction of property or injury to person. The Fire Marshal may issue a Stop Work Order under the Fire Code.

2. If the Operator does not cure the alleged failure within the time specified by the Fire Marshal and/or Gas Well Administrator, the Fire Marshal and/or Gas Well Administrator may notify the appropriate state or federal agency with jurisdiction over the alleged violation and request that the state or federal agency take appropriate action (with a copy of such notice provided to the Operator), and the City may pursue any other remedy available.

3. If the Operator does not cure the alleged failure within the time specified by the Fire Marshal and/or Gas Well Administrator, the Gas Well Administrator may recommend to the Board of Adjustment:
   a. That the Gas Well Permit at issue shall be suspended until the alleged failure is cured; or,
   b. If the Gas Well Permit at issue was under suspension at any time during the prior two-year period, that the Permit at issue shall be revoked.

4. The decision of the Fire Marshal and/or Gas Well Administrator to recommend suspension or revocation of a Gas Well Permit shall be provided to the Operator in writing at least 10 days before the hearing to be held by the Board of Adjustment.

5. If a Gas Well Permit is revoked, the Operator may submit information to the Gas Well Administrator evidencing that the alleged failure resulting in the revocation of the Gas Well Permit has been corrected, and an application for a new Gas Well Permit may be submitted for the same well.
6.3.9 Watershed Permits for Gas Well Developments

A. Applicability

1. A Watershed Protection Permit shall be approved prior to approval of any Gas Well Development Site Plan, Gas Well Development Plat, or Gas Well Permit that includes land in any flood fringe area or ESA within the corporate limits or ETJ of the City, and for any proposed site that is within 1,200 feet of the flood pool elevation of Lake Ray Roberts or Lake Lewisville. Approval of a Watershed Protection Permit authorizes the processing of a complete application for a Gas Well Development Site Plan or Gas Well Development Plat, as the case may be, that includes land in a flood fringe area or ESA, or for a site that is within 1,200 feet of the flood pool elevation of Lake Ray Roberts or Lake Lewisville. No gas well development is allowed in the floodway, including the area of an ESA located in a floodway.

2. Inside the City limits, a Watershed Protection Permit for gas well development can be approved only if the City Council authorizes a Specific Use Permit. In making a recommendation for the SUP, the Director shall apply those standards set forth in Subsection 6.3.9D below. In the City’s ETJ, a Watershed Protection Permit may be approved by the Director of Environmental Services, or designee pursuant to the procedures in Subsection 6.3.9C below.

3. A Watershed Protection Permit application may be submitted simultaneously with an application for a Specific Use Permit.

B. Application Requirements and Processing

A Watershed Protection Permit shall be processed in accordance with the following:

1. An application for a Watershed Protection Permit shall contain the following information and such information as may be required by the Development Review Committee and the Environmental Services Department, which is reasonably necessary to review and determine whether the proposed development and required facilities meet the requirements of this Section 6.3: Gas Well Drilling and Production; Section 6.2: Gas Well Development; and as required by the Application Criteria Manual. In addition the information shall include the following:

   a. A Tree Inventory Plan shall show the location of ESAs on any proposed Drilling and Production Site.

   b. Show location of ESAs on proposed Drilling and Production Sites.

2. All applications for Watershed Protection Permits shall be filed with the Development Services Department, who shall immediately forward all applications to the DRC for review. Incomplete applications shall be returned to the applicant, in which case the City shall provide a written explanation of the deficiencies. The City shall retain a processing fee determined by the City Council. The City may return any application as incomplete if there is a dispute pending before the Railroad Commission regarding the determination of the Operator. No application shall be deemed accepted for filing until the application is complete.
C. Procedures

1. Each application for a Watershed Protection Permit for gas well development in the ETJ shall be approved or denied by the Director of Environmental Services or designee following DRC review.

2. Criteria for Approval for Watershed Protection Permit for Gas Well Development in the City limits. In reviewing the application for a Watershed Protection Permit, the Director shall apply those standards set forth in Subsection 6.3.9D below. The Director may attach such conditions to approval of a Watershed Protection Permit as are necessary to assure that the requirements of Subsection 6.3.9D below and any other applicable requirements contained in this Section 6.3: Gas Well Drilling and Production and Section 6.2: Gas Well Development, are met.

3. Criteria for Approval for Watershed Protection Permits for gas well developments within the ETJ. In deciding the application for a Watershed Protection Permit, the Director shall apply those standards set forth in paragraph 6.3.9D.1; paragraph 6.3.9D.2 for riparian buffers within floodplains; and paragraph 6.3.9D.5. The Director may attach such conditions to approval of a Watershed Protection Permit as are necessary to assure that the requirements of these components of Subsection 6.3.9D below and any other applicable requirements in this Section 6.3: Gas Well Drilling and Production and Section 6.2: Gas Well Development, are met.

4. Each Watershed Protection Permit shall:
   a. Identify each well subject to the Permit;
   b. Specify the date on which the Permit was issued;
   c. Incorporate by reference all applicable standards of approval; and
   d. Incorporate by reference all applicable conditions of approval.

5. The applicant may appeal the Director's denial or conditional approval of a Watershed Protection Permit in the ETJ on grounds pertaining to the standards in Subsection 6.3.9C.3 below to the City Council within 10 calendar days of the decision by the Director. The Council shall decide the petition based upon the criteria in Subsection 6.3.9C.3 below and any other applicable requirements contained in this Section 6.3: Gas Well Drilling and Production and Section 6.2: Gas Well Development.

D. Watershed Protection Permit Standards

The standards in this Subchapter 6: Gas Wells, are adopted pursuant to the authority granted by TLGC, Section 551.002 and Chapter 211 and are intended to minimize adverse impacts on areas within the Flood Fringe or ESA, reduce flood damage, and lessen the potential for contaminating surface water or any water supply.

1. Location of Sites
   Drilling and Production Sites shall be located outside floodplains and other ESAs whenever practicable to minimize adverse impacts on these areas, reduce flood damage, and lessen the potential for contaminating surface water or any water supply.

2. Riparian Buffers
   For all ESAs constituting or containing riparian buffers prior to the approval of a Gas Well Development Site Plan:
Subchapter 6: Gas Wells
6.3 Gas Well Drilling and Production
6.3.9 Watershed Permits for Gas Well Developments

Denton, Texas – Denton Development Code

If a riparian buffer is designated as "fair" to "excellent" ESA, the designated protective stream buffer width as specified in Section 7.4, Environmentally Sensitive Areas of this DDC shall apply, and no encroachments shall be allowed.

Within all areas except unstudied floodplains, if the stream is designated as a "poor" ESA, the designated width of the protective stream buffer shall be decreased by either 50 percent or to the limits of the floodway whichever is greater, but in no instance shall the protective stream buffer width be decreased below 25 feet measured each direction from the centerline of the existing channel.

3. Tree Mitigation
In the event of a conflict between this Subchapter 6: Gas Wells, and 7.7.4, Tree Preservation, this Subchapter 6: Gas Wells, shall control. Tree mitigation for gas wells located in an ESA shall be required and shall be calculated on a one to one replacement value for 100 percent of the diameter breast height ("dbh") of trees removed from the Drilling and Production Site. Tree mitigation shall be accomplished by planting replacement trees, within a floodplain, on-site or off-site with similar tree species or by payment into a Tree Mitigation Fund. Tree Mitigation Funds that are specific to ESAs will be kept separate from other Tree Mitigation Funds and will only be used to either acquire wooded floodplain or riparian property that remains in a naturalistic state in perpetuity, or to purchase conservation easements within riparian or floodplain areas. Funds may be used to purchase, plant, and maintain trees on public property, as long as the public property is within a riparian area or floodplain.

4. Tree Removal
Any request to remove tree(s) shall be accompanied by a letter from a certified geologist or engineer that indicates why the well site cannot be located to avoid the trees. If Operator has chosen to pay into the Tree Mitigation Fund, such funds shall be paid prior to approval of a Final Gas Well Development Site Plan or Gas Well Development Plat for the ESA.

5. Limitation on Well Heads
Only one well head may be placed in the Flood Fringe or other ESA under the following conditions:

a. Storage tanks or separation facilities shall be constructed at least 18 inches above the established Base Flood elevation plus the surcharge depth for encroachment to the limits of the floodway having a one percent chance of being equaled or exceeded in any year.
b. A hydrologic and hydraulic engineering study shall be performed by a Registered Professional Engineer. The study shall be submitted to the Engineering Department in a technical report for review by the City Engineer or his designated representative. The report shall demonstrate that the proposed facilities will have no adverse impacts on the carrying capacity of the adjacent waterway nor cause any increases to the elevations established for the floodplain. When the Special Flood Hazard Areas (SFHA) on the subject site is designated as “Zone A” on the FIRM Panel, or the SFHA is not identified on the FIRM Panel, the following approximate method may be used to evaluate the impacts from gas well development. A flow rate shall be calculated using procedures set forth in the City of Denton Drainage Criteria Manual. Using Manning’s Equation with an estimate of the average slope of the stream, measurements of a single irregular cross-section geometry at the well site, and the one hundred-year discharge rate, the average velocity and normal depth may be calculated. Calculations shall be provided for the unaltered existing channel cross-section and for the proposed modified channel cross-section and submitted to the City for review and approval prior to construction within these areas.

c. No more than 10 percent of the flood fringe, within the limits of the Gas Well Development Site Plan or Gas Well Development Plat, may be filled.

6. Additional Standards inside City Limits
For land inside the City limits, all conditions imposed by any applicable SUP, MPC District or a PD District for the land subject to the Watershed Protection Permit, as well as the standards in Subsection 6.3.9D and any other applicable requirements contained in this Section 6.3: Gas Well Drilling and Production and Section 6.2: Gas Well Development, shall apply.

E. Post-Approval Procedures
1. If evidence from water quality monitoring efforts indicates that contamination is occurring from gas wells, the Operator shall remove, cause to be removed, or otherwise remediate contamination, as required by the Gas Well Administrator including but not limited to Waste Minimization Practices established by the RRC. Cleanup operations shall begin immediately. A re-inspection fee shall be charged as established by the City Council and published in the Application Criteria Manual.

2. An associated Watershed Protection Permit shall expire with the expiration of the Gas Well Development Site Plan or Gas Well Development Plat and may not be extended prior to expiration.
Subchapter 6: Gas Wells
6.3 Gas Well Drilling and Production
6.3.9 Watershed Permits for Gas Well Developments

[Denton, Texas – Denton Development Code]

Print Date: December 12, 2019
Subchapter 7: Development Standards

7.1 Purpose

This subchapter includes standards that regulate the physical layout and design of development within Denton to ensure the protection of the health, welfare, safety, and quality of life. These standards address the physical relationship between development and adjacent properties, public streets, neighborhoods, and the natural environment, in order to implement the Comprehensive Plan vision for a visually cohesive, efficient, and livable community.

7.2 Applicability

7.2.1 Generally

Except as otherwise provided in this Subchapter 7: Development Standards, the standards of this subchapter and any applicable Criteria Manuals shall apply to all development located within the city, pursuant to the TLGC and Subsection 8.2.1: Regulatory Jurisdiction.

7.2.2 Development Activities

The following development activities shall trigger compliance with the standards in this subchapter as provided in Table 7.2-A: Development Standards Applicability Table.

A. Minor: Tier 1
   1. Expansions, alterations, or modifications that increase the gross floor area of an existing structure by the greater of 1,000 square feet or between 10 and 50 percent;
   2. Expansions, alterations, or modifications that increase the total number of existing dwelling units on a lot by the lesser of 10 dwelling units or between 10 and 25 percent;
   3. The alteration or expansion of any vehicular parking area by the greater of six spaces or 50 percent, excluding re-stripping; or
   4. Any change in use that involves or requires improvements that meet the thresholds established in paragraphs (1) through (3) above.

B. Major: Tier 2
   1. Expansions, alterations, or modifications that increase the gross floor area of an existing structure by more than 50 percent;
   2. Expansions, alterations, or modifications that increase the total number of existing dwelling units on a lot by more than 25 percent;
   3. An existing principal structure is relocated on the lot; or
   4. Any change in use that involves or requires improvements that meet the thresholds established in paragraphs (1) through (3) above.

C. Development Standards Applicability Table

1. Table 7.2-A identifies activities that trigger compliance with specific development standards contained in Subchapter 7: Development Standards. These standards shall not exempt development activity that falls below the thresholds identified in Subsections 7.2.2A or 7.2.2B from complying with applicable standards of this DDC or any applicable federal, state, or local regulations.
Subchapter 7: Development Standards

7.3 Land-Disturbing Activities

7.3.1 Purpose

2. For purposes of this section, “entire site” shall mean the total area of the lot on which development is occurring. “Development impact area” shall mean those areas of the lot or those portions of the structure that are included in the project area or that are affected by the proposed development activity, as defined in Section 9.2: Definitions.

3. Specific applicability thresholds and applicable exemptions are provided in Sections 7.2 through 7.13.

Notes:
[1] Also applies when the addition or expansion of one or more structures or uses requires specific use permit approval.

D. Planned Development (PD)

1. Development within any new planned development (PD) established after the effective date of this DDC shall be subject to this Subchapter 7: Development Standards, unless alternative standards are adopted as part of the PD approval that, in the determination of the Director, are at least equal to the standards set forth in this subchapter.

2. Development of a residential structure within an existing PD established prior to the effective date of this DDC is exempt from this Subchapter 7: Development Standards.

7.3 Land-Disturbing Activities

7.3.1 Purpose

The section establishes standards that regulate earthwork construction (including clearing, grading, grubbing, stockpiling, excavation, demolitions, and embankments) on property located within the city, in order to:
Subchapter 7: Development Standards
7.3 Land-Disturbing Activities
7.3.2 Applicability

A. Preserve and enhance the City of Denton’s natural character by preventing untimely and indiscriminate removal or destruction of trees, understory, and ground cover;

B. Protect and preserve the ecological functions of environmentally sensitive areas (ESAs) by regulating land disturbances and removal of vegetation within the ESAs;

C. Protect the city from sediment entering streets, storm sewers, ditches and streams, which may result in additional taxes for city maintenance costs, increased flooding, impaired water quality, and damage to property;

D. Promote soil conservation by minimizing land disturbances, thereby reducing sedimentation, air, and surface water pollution; and

E. Comply with state and federal stormwater regulations.

7.3.2 Applicability

Except as otherwise provided in this Section 7.3: Land-Disturbing Activities, the standards of this section shall apply as set forth in Section 7.2: Applicability, with the following modifications:

A. Generally

1. No person shall engage in any clearing, grading, grubbing, stockpiling, excavating, cutting, or other site earthwork without first obtaining the proper permit and/or authorization pursuant to Subchapter 2: Administration and Procedures, and any other applicable criteria manuals, ordinances, plans, policies, and city standards.

2. Activities shall be limited to the area and scope identified on the plans submitted with the development permit, and shall comply with all state and federal stormwater regulations.

B. Exemptions

Unless otherwise provided in this DDC, the following shall be exempt from the provisions of this Section 7.3: Land-Disturbing Activities:

1. Grading and clearing in emergency situations involving immediate danger to life and property or substantial fire hazards;

2. Any activity where the total volume of material disturbed, stored, disposed of or used as fill does not exceed 25 cubic yards and the area disturbed does not exceed 2,000 square feet, provided it does not obstruct a watercourse and is not located in a floodplain or other environmentally sensitive area;

3. Soil-disturbing activities, excluding tree removal, that are associated with normal agricultural crop operations; or

4. Stockpiling and handling of earth material associated with commercial quarry and landfill operations licensed under the state.

7.3.3 Legal Responsibility for Land Disturbance

The exemptions provided in Subsection 7.3.2B do not preclude any person from liability if that person’s actions increase flood hazards to any other person or property. Neither the issuance of a building permit nor compliance with the provisions of this Section 7.2, or with any conditions imposed in the building permit, shall relieve any person from responsibility for damage to other persons or property, nor impose any liability upon the city for damage to other persons or property.
7.3.4 Applications

Permit applications and requirements, processing of applications, and conditions of issuance are as follows:

A. An application along with the required fee shall be submitted in accordance with Subchapter 2: Administration and Procedures, and the Administrative Criteria Manual.

B. Any permit granted under this section shall expire one year from the date of issuance. Upon a showing of ongoing construction activity, the permit may be extended by the Building Official for one six month period and for an additional fee in accordance with the city’s adopted fee schedule.

C. Reviewed plans shall not be amended without authorization of the Building Official based on a determination that the modified plan meets all city requirements. The Building Official may stop work or revoke a permit because of incorrect information supplied, or for any violation of the provisions of this subchapter.

7.3.5 General Standards

Land-disturbing activities shall comply with the Texas Commission on Environmental Quality (TCEQ) regulations found in TXR150000 and this section. The design criteria for erosion and sediment control shall comply with the design standards contained in the Site Design Criteria Manual. Permittees shall also comply with the following general regulations and standards:

A. General Regulations
   1. The activity will not create or contribute to landslides, accelerated soil creep, and settlement.
   2. The activity will not create or contribute to flooding, erosion, or increased turbidity, siltation, or other forms of pollution in a watercourse.
   3. Operations shall be consistent with anticipated build-out schedule and shall be conducted so as to expose the smallest practical area of soil to erosion for the least possible time.

B. Construction Stormwater Notice of Intent (NOI) Required
   The site operator or owner shall provide a copy of the signed Notice of Intent (NOI) from the TCEQ for all sites that are larger than five acres or are less than five acres and part of a larger common plan of development that is larger than five acres. A copy of Notice of Termination (NOT) shall be provided to the city after final stabilization is completed and temporary erosion and sediment controls are removed.

C. Construction Site Notice (CSN) Required
   1. A small construction site operator or owner shall provide a copy of the Small CSN Construction Site Notice for all sites larger than one acre and less five acres, or part of a common plan of development greater than one acre and less than five acres.
   2. Secondary operators of large construction sites shall provide a copy of the signed Secondary Operator CSN for all sites larger than five acres or part of a larger common plan of development greater than five acres.
   3. The CSN notice shall be posted at the construction site in a location where it is safely and readily available for viewing by the general public and city staff. The CSN must be posted at
least two days prior to commencing construction activity and maintained in that location until completion of the construction activity.

D. Stormwater Pollution Prevention Plan (SWPPP) Required

1. The site owner or operator is responsible for routinely inspecting erosion and sediment controls at the site as specified in the SWPPP. The city shall also inspect erosion and sediment controls located at a site for compliance. If a responsible party fails to implement, inspect, and maintain controls as specified in the site’s approved SWPPP, the city shall provide such party with written notice of non-compliance. The responsible party shall have no less than 48 hours to correct the violation, which may be extended for inclement weather or other factors outside of the control of the responsible party at the discretion of the City Inspector.

2. When construction or land-disturbing activities are conducted as a part of a nonresidential or multifamily construction project, temporary erosion and sediment controls shall be installed prior to land-disturbing activities as specified in the approved SWPPP. Permanent erosion and sediment controls that are specified in the SWPPP shall be installed and maintained prior to the occupancy of any nonresidential or multifamily structure. Phased occupancy will only be allowed when there are no outstanding erosion or sediment control violations for the project for which the request is made.

3. When construction or land-disturbing activities are conducted as part of a residential subdivision project, temporary erosion and sediment controls shall be installed prior to land-disturbing activities as specified in the approved SWPPP. Permanent erosion and sediment controls that are specified in the SWPPP shall be installed and maintained prior to final acceptance of a subdivision.

   a. The permittee for such subdivision shall continue to maintain all temporary erosion and sediment control devices until permanent erosion and sediment control has been established on all lots within the subdivision for which the permittee retains day-to-day operational control and a Notice of Termination (NOT) is issued;

   b. If a permittee sells one or more lots in a subdivision to a purchaser, the permittee may extend permit coverage to the purchaser under the developer’s NOI. If this occurs, the permittee remains the responsible party for the entire subdivision including the purchased lot(s) and remains liable for violation of this section. A copy of the developer’s NOI and a letter from the developer stating that coverage under the NOI has been extended to the purchaser shall be provided to the city as a condition of building permit issuance for the lot(s);

   c. If a permittee sells one or more lots in a subdivision to a purchaser, the permittee may choose to not extend permit coverage to the purchaser under the permittee’s NOI. If this occurs, the permittee remains the responsible party for only those lots for which the permittee retains day-to-day operational control. The purchaser then becomes the responsible party for the lot(s) and is liable for violation of this section;

   d. If a purchaser sells one or more lots prior to final occupancy, the current owner of the lot(s) becomes the responsible party. A copy of owner’s NOI and SWPPP shall be provided to the city as a condition of building permit issuance for the lot(s).
E. Establishing Ground Cover

Stabilization of disturbed areas, excluding areas within an approved landscape plan must, at a minimum, be initiated immediately whenever any clearing, grading, excavating, or other earth disturbing activities have permanently ceased on any portion of the site, or temporarily ceased on any portion of the site and will not resume for a period exceeding 14 calendar days. In the context of this requirement, “immediately” means as soon as practicable, but no later than the end of the next work day, following the day when the earth-disturbing activities have temporarily or permanently ceased.

1. Temporary Stabilization

   a. Temporary stabilization measures shall be established in all areas of the site where soil disturbances have occurred and where construction activities have temporarily ceased for more than 14 calendar days.

   b. Temporary stabilization shall be completed no more than 14 calendar days after initiation of soil stabilization measures.

   c. Temporary stabilization may include seeding, geotextiles, mulches, and similar measures that are designed to reduce or eliminate erosion until permanent stabilization can be achieved or until further construction activity takes place and are approved as part of the permit.

2. Permanent Stabilization

   a. Final stabilization measures shall be initiated within 48 hours of construction activities being completed on a portion of the site.

   b. Final stabilization measures shall be a uniform perennial vegetative cover with a density of at least 70 percent of the native background vegetative cover for all unpaved areas not covered by structures.

   c. Final stabilization shall be completed prior to termination of permit coverage.

F. Cleanup Operations

1. The property owner shall be responsible for all cleanup operations incidental to the disturbance of the surface of the property within six months of the operation completion date, including removal of temporary erosion and sediment controls if final stabilization has been obtained, and removal of all trash or other materials not suitable for fill;

2. No soil, rock, mud, and/or other construction debris shall be allowed to be deposited on or in the streets, alleys, utility facilities, rights of way, easements, or drainage facilities owned or required by the City of Denton.

3. Upon establishing permanent ground cover or other approved permanent erosion and sediment control, all temporary erosion and sediment control devices shall be removed by the responsible party, as identified on the SWPPP. Failure to comply with this provision is considered a violation of this section.

7.3.6 Compliance Required

A. The city may deny the approval of any clearing and grading permit, building permit, site development plan, and any other city approval necessary to commence or continue construction or to assume occupancy, on the grounds that site erosion or sediment controls are determined
not to reduce the discharge or sediment, silt, earth, soil, or other materials associated with land disturbances to the maximum extent practicable.

B. Any person who violates any provision of this section shall be deemed guilty of a violation of this DDC punishable in accordance with Section 1.6, Enforcement, and the following standards:
1. The cure period will be established by the Director, and will generally not be less than 24 hours unless the alleged failure represents a risk of destruction of property or injury to persons.
2. The cure period may be extended for inclement weather or other factors at the discretion of the Director.
3. If the permittee does not cure the alleged failure within the time frame specified by the Director, the city may:
   a. Notify the TCEQ and request that the TCEQ take appropriate action; and
   b. Issue a Stop Work Order and may enforce the penalty provision of Section 1.6: Enforcement, against the permittee or site operator, or both.
4. Should the permittee fail in any respect to fulfill the requirements of this section, the city may go onto the property in question and perform such work as may be necessary to fulfill such requirements, including, but not limited to, leveling grounds, establishing temporary stabilization, constructing erosion controls, and removing all soil, rock, debris, and other materials not suitable for fill at the permittee's expense. The city shall bill the permittee for the expenses incurred. If the permittee fails to pay the city for such expenses within 30 days of being billed for same, the city shall have the right to place a lien on the property for all amounts expended by the city, plus interest at the current lawful rate.

C. The remedies provided by this section are in addition to any other remedies described in this DDC. Exercise of any remedy shall not be a bar against, nor a prerequisite for, taking other action against the violator, including civil enforcement remedies.

7.4 Environmentally Sensitive Areas (ESAs)

7.4.1 Purpose

This Section 7.4 is intended to achieve the following goals:

A. Manage and protect environmentally sensitive areas within the city.
B. Protect the natural and ecological resources that are essential elements of the city’s health and community character and which provide irreplaceable plant and wildlife habitat;
C. Establish a development framework for the city that respects private property rights, while encouraging them to be used responsibly for the benefit of the entire community;
D. Preserve and enhance the city’s distinctive community character and quality of life by ensuring that its natural and built environments are consistent with the community vision and values embodied in the Comprehensive Plan; and
E. Establish regulations that conform to the requirements of the state and federal government regarding air quality, water quality, and environmental protection.
Subchapter 7: Development Standards

7.4 Environmentally Sensitive Areas (ESAs)

7.4.2 Applicability

A. General Applicability

1. The standards of this Section 7.4: Environmentally Sensitive Areas (ESAs), shall apply to all land and all development within the corporate limits of the city, except as otherwise specifically provided for in this section.

2. The floodplain standards of this section shall apply to all land and all development within the extraterritorial jurisdiction (ETJ) of the city.

3. The type of regulation applicable to the land depends upon the specific ESA classification determined for the property in question on the Environmentally Sensitive Areas Map. If other regulations in this DDC conflict with the specific ESA regulations of this section, the more stringent of the two regulations shall apply.

B. Exemptions

1. Property that does not contain any ESAs as depicted on the City’s Environmentally Sensitive Areas Map (ESA Map).

2. Grading, filling, cutting, or other earth-moving activity on any lot involving less than 25 cubic yards for residential projects, or 50 cubic yards for nonresidential projects.

3. Lots platted for single-family or duplex dwelling uses prior to February 20, 2002.

4. The applicant can demonstrate through an ESA field assessment application that the subject property contains no ESAs, or their location is not as depicted on the ESA Map.

7.4.3 Environmentally Sensitive Areas Criteria Manual

In addition to meeting the requirements expressly established in this section, all ESAs shall comply with the Environmentally Sensitive Areas Criteria Manual.

7.4.4 ESAs Procedures

A. ESAs Compliance Review

1. Applicability

   ESA compliance review for residential and nonresidential development shall be performed as part of a final plat application pursuant to Subsection 2.6.4: Final Plat, a site plan application pursuant to Subsection 2.5.1: Site Plan Review, a clearing and grading permit, or any other applicable permission to commence land-clearing activity.

2. Information Required

   Information as required on the applicable checklists shall be provided. Additional information deemed appropriate and necessary to process the application may also be required.

3. Criteria for Approval

   The requirements of an ESAs review shall be deemed met either upon approval of an alternate ESA plan or when the applicant demonstrates the following:

   a. The land disturbing activity complies with the requirements of this DDC for floodplains, riparian buffers, water related habitat, and upland habitat, as well as all other federal, state, or local laws applicable to the application type;
Subchapter 7: Development Standards
7.4 Environmentally Sensitive Areas (ESAs)

7.4.5 Official Map

b. The land disturbing activity will not cause damage to ESAs adjacent to the areas to be disturbed;
c. The land disturbing activity complies with the requirements of Section 7.3: Land-Disturbing Activities;
d. Protective fencing as specified in the Environmentally Sensitive Areas Criteria Manual has been established at the perimeter of the ESA. Protective fencing shall clearly mark and delineate all ESAs to be protected and preserved for the duration of the land disturbing activities on the property; and
e. A wetland delineation by a trained scientist has been performed if encroachments into U.S. Army Corp of Engineers’ jurisdictional wetlands are proposed, and a Section 404 Nationwide Permit or a Letter of Permission from the U.S. Army Corps of Engineers has been obtained.

4. Expiration
The ESA review shall expire when the final plat for residential development approval expires, or when the site plan approval for a nonresidential development expires.

5. Credit
Any ESA that is preserved may be used towards meeting:
b. Drainage standards in accordance with Section 7.5: Drainage.

B. ESAs Field Assessments
ESAs field assessments provide a mechanism for the city to confirm the presence of ESAs and shall be conducted pursuant to Subsection 2.5.5: Environmental Sensitive Areas (ESAs) Field Assessments.

C. Alternative ESA Plans
The Alternative ESA Plan provides the option to address the regulations through a flexible discretionary process using the procedure established in Subsection 2.8.4: Alternative Environmentally Sensitive Area (ESA) Plan.

7.4.5 Official Map

A. Environmentally Sensitive Areas (ESA) Map
The ESAs Map is the official map that identifies areas designated as ESAs.

B. ESAs Map Amendments
1. The ESAs Map may be updated administratively when an ESA field assessment is conducted for a property and approved by the Director, pursuant to Section 2.5.5: Environmental Sensitive Areas (ESAs) Field Assessments.
2. The ESAs map may be updated administratively when the FEMA 1% Annual Chance Flood Zones are revised or amended.
3. Substantial amendments of the ESAs Map shall follow the procedure in Section 2.7.2: Zoning Map Amendment. “Substantial amendment” is defined as a change impacting the whole city, excepting changes caused by the publication of new flood insurance rate maps (FIRMs) by FEMA.
C. **Text Applicability**

The text of this section describes and regulates the protected ESAs shown on the City’s ESAs Map. In the case of any discrepancy, the text of this section shall control.

### 7.4.6 Floodplain Development ESAs

Upon field verification, areas designated as FEMA 1% Annual Chance Floodplain would be classified according to the existing conditions as developed or undeveloped floodplains.

#### A. Developed Floodplain

1. Development within the developed floodplains shall comply with Section 7.5: *Drainage*.
2. Section 7.4.7: *Riparian Buffer and Water-Related Habitat*, applies when riparian buffers and water-related habitats are nested, partially or wholly, inside developed floodplain ESAs.
3. Gas well drilling and production within developed floodplains shall comply with Subchapter 6: *Gas Wells*.

#### B. Undeveloped Floodplain

1. **Permitted Uses and Activities**
   
   The following permitted uses and activities are allowed, when in compliance with Section 7.5: *Drainage*; and Subpart B, Chapter 30, of the Municipal Code of Ordinances:
   
   a. The planting of any new trees or vegetation.
   
   b. Restoration or enhancement of floodplains, riparian buffers, water related habitats, upland habitats, wetlands and streams as required by federal and state standards.
   
   c. The placement of public or private utility facilities, such as sewer, storm water, water, electricity, gas, or other utilities, as long as the disturbed area is restored to minimized erosion and promote the recovery of the ESAs, and when adequately flood-proofed.
   
   d. Measures to remove or abate nuisances, the removal of invasive plant species, or any other violation of federal, state, or local law, with the approval of the Department of Environmental Services.
   
   e. Parking lots, subject to the limitations on fill as specified in paragraph 7.4.6B.3, and constructed of pervious materials as provided in the Transportation Criteria Manual.
   
   f. Parks, open space, recreational uses, trails, walkways and bike paths.
   
   g. Storm water quality controls.
   
   h. Construction of roadways identified on the Mobility Plan, as long as the disturbed areas are restored to minimize erosion and promote the recovery of the ESA subject to the Director of Environmental Services approval.
   
   i. Routine repair and maintenance of existing structures, roadways, driveways, utilities, and accessory uses.
   
   j. Agricultural activity permitted through Nationwide Permit 40 (NWP 40); Agricultural Activities pursuant Section 404 of the Clean Water Act; or any other federal permits.
   
   k. Any action taken by federal, state, or local officials in an emergency to mitigate an existing or potential hazard.
   
   l. The construction of a private driveway, as long as the disturbed areas are restored to minimize erosion and to promote the recovery of the ESA, subject to the Director of Environmental Services approval.
Subchapter 7: Development Standards
7.4 Environmentally Sensitive Areas (ESAs)
7.4.7 Riparian Buffer and Water-Related Habitat ESAs

m. Gas well drilling and production that complies with Subchapter 6: Gas Wells.

n. Fill activities subject to the limitations of paragraph 7.4.6B.3.

o. Culverts and bridges, as long as the disturbed areas are restored to minimize erosion and to promote the recovery of the ESA, subject to the Director of Environmental Services approval. Culverts and bridges are exempt from the limitations of paragraph 7.4.6B.3.

2. Prohibited Uses and Activities
   a. Placement, handling, processing, or storage of hazardous waste.
   b. Hazardous waste and solid waste landfills.
   c. Land-disturbing activity not authorized by a U.S. Army Corps of Engineers Section 404 Permit or Letter of Permission.
   d. Any new structures or additions, including garages and carports, and storage sheds located within the area mapped as undeveloped floodplain.
   e. Tree and understory vegetation removal, except as allowed by Subsection 7.5.3J: Floodways and Improvements.
   f. Septic tanks, septic tank drain fields, and other forms of on-site wastewater treatment.

3. Standards for Fill in Undeveloped Floodplains
   a. Filling of any floodplain of a stream that drains more than one square mile is prohibited unless the fill on any lot is less than 50 cubic yards or 300 cubic feet per acre, whichever is greater.
   b. Up to 15 percent of the floodplain valley storage may be filled if the stream drains less than one square mile.
   c. In addition to meeting the requirement for fill set above, all fill activities in the undeveloped floodplain shall comply with the Environmental Sensitive Area Criteria Manual; Section 7.5: Drainage; and federal law.

7.4.7 Riparian Buffer and Water-Related Habitat ESAs

The following subsection defines permitted and prohibited uses and activities within riparian buffers and water-related habitats. In areas where multiple types of ESAs overlap, the standards, permissions, and prohibitions specified for those other types of ESAs, as outlined in this subsection, shall also apply.

A. Permitted Uses and Activities
   1. Placement of private residential yard amenities, including but not limited to: gardens; yards; trails; and clearings; that would result in disturbing up to 10 percent of the area, but in no instance shall the protective buffer width be decreased below 25 feet, measured each direction from the centerline of the existing channel or the outer edge of surface water bodies. No disturbance is permitted in delineated wetlands.
   2. Riparian buffers nested, partially or wholly, inside developed floodplains may be disturbed up to 10 percent of the riparian buffer area, but in no instance shall the protective buffer width be decreased below 25 feet, measured each direction from the centerline of the existing channel, or from the outer edge of surface water bodies. No disturbance is permitted in delineated wetlands.
Subchapter 7: Development Standards

7.4 Environmentally Sensitive Areas (ESAs)

7.4.8 Cross Timbers Upland Habitat ESAs

3. Repair, replacement, or improvement of public utility facilities where the disturbed portion of the ESA is restored, and vegetation listed as invasive is removed and replaced with vegetation from the City Native Plant List in the Site Design Criteria Manual.

4. Additions, alterations, rehabilitation, or replacement of existing structures that do not increase the existing structural footprint in the riparian buffer or water related habitat. Any disturbed areas must be restored using native vegetative cover.

5. Stream, wetland, riparian, and upland enhancement or restoration projects.

6. Agricultural activity, including buildings and structures, permitted through Nationwide Permit 40 (NWP 40), Agricultural Activities pursuant to Section 404 of the Clean Water Act, or any other federal permits.

7. Routine repair and maintenance of existing structures, roadways, driveways, utility facilities, accessory uses, and other development.

8. Construction of roadways identified on the City Mobility Plan, as long as the disturbed areas are restored to minimize erosion and promote the recovery of the ESA, and subject to the Department of Environmental Services approval.

9. Measures to remove or abate nuisances, or any other violation of state statute, administrative rule, or the Municipal Code of Ordinances.

10. Any action taken by the city in an emergency to mitigate an existing or potential hazard.

11. Gas well drilling and production within riparian buffers and water-related habitats shall comply with Subchapter 6: Gas Wells.

B. Prohibited Uses and Activities

The following uses and activities are not allowed in riparian buffers and water related habitats:

1. Land-disturbing activity not authorized by a U.S. Army Corps of Engineers, Section 404 Permit Letter of Permission;

2. Tree and understory vegetation removal, except as allowed by Subsection 7.5.3J: Floodways and Improvements;

3. Placement, handling, processing, or storage of hazardous waste;

4. Any structures, including storage sheds, garages, and carports; and

5. Septic tanks, septic tank drain fields, and other forms of on-site wastewater treatment.

7.4.8 Cross Timbers Upland Habitat ESAs

The following subsection defines permitted and prohibited uses and activities within upland habitat areas. In areas where multiple types of ESAs overlap, the standards, permissions, and prohibitions specified for those other types of ESAs, as outlined in this subsection, shall also apply.

A. Permitted Uses and Activities

1. Residential development shall be designed to retain a contiguous 50 percent of the area defined as upland habitat, that shall remain predominantly in its natural state. Preservation of upland habitat contiguous to forested areas on adjacent properties or parcels is strongly encouraged. Trees removed shall be considered part of the development impact area of a site and will be subject to tree preservation and landscape requirements.

2. Non-residential development shall be designed to retain 30 percent of the area defined as upland habitat, which shall remain predominantly in its natural state. Preservation of
Subchapter 7: Development Standards

7.5 Drainage

7.4.9 Development Clustering

Denton, Texas – Denton Development Code

Print Date: December 12, 2019

upland habitat contiguous to forested areas on adjacent properties or parcels is strongly encouraged. Trees removed shall be considered part of the development impact area of a site and will be subject to tree preservation and landscape requirements.

3. Selective pruning conducted by or under the supervision of an International Society of Arboriculture (ISA) certified arborist is allowed to remove up to one-quarter of the preserved canopy area for the purposes of tree health, subject to the approval of the Environmental Services Department.

4. Enhancement or restoration projects, as approved by the Department of Environmental Services. Trees planted as part of an approved enhancement or restoration project may be credited against required replacement in Section 7.7: Landscaping, Screening, Buffering, and Fences.

B. Prohibited Uses and Activities

Septic tanks, septic tank drain fields, and other forms of on-site wastewater treatment are prohibited in areas set aside for required preservation.

7.4.9 Development Clustering

Development clustering is encouraged to minimize impact to the natural environment. Clustering shall be designed to maintain a contiguous forested area and shall comply with Section 8.3.4, Cluster Subdivisions.

7.4.10 Development Impact Area

A. If an Alternative ESA Plan is approved, any areas of the ESA in which encroachment is permitted are considered part of the development impact area of a site and are subject to tree preservation and landscape requirements.

B. Areas of ESA that are to be left undisturbed will be excluded from the development impact area. Additionally, areas restored or provided as mitigation as part of an approved Alternative ESA Plan will be excluded from the development impact area.

7.5 Drainage

7.5.1 Purpose

This section establishes standards that regulate drainage on property located within the city, in order to:

A. Protect human life, health, and property;

B. Minimize the expenditure of public monies for costly flood control projects;

C. Minimize the need for rescue and relief efforts associated with flooding and generally undertaken at the expense of the public;

D. Retain natural floodplains in a condition that minimizes interference with floodwater conveyance, storage, aquatic, and terrestrial ecosystems as well as groundwater and surface water supplies;

E. Minimize erosion and sedimentation problems and enhance water quality; and

F. Minimize future operational and maintenance expenses.
7.5.2 Applicability

Except as otherwise provided in this Section 7.5: Drainage, the standards of this section and the Stormwater Design Criteria Manual shall apply as set forth in Section 7.2: Applicability.

7.5.3 General Drainage Requirements

A. Stormwater Design Criteria Manual Adopted
   In addition to meeting the requirements expressly set out in this DDC, all drainage systems shall comply with the Stormwater Design Criteria Manual.

B. Drainage Computation Data
   1. Design standards for drainage facilities and improvements shall be based on hydraulic and hydrologic computation data submitted and approved by the City Engineer, or designee, prior to submission of the final plat.
   2. The City Engineer, or designee, may specify the form and manner in which the necessary data is to be submitted.

C. Separation of Stormwater and Sanitary Sewerage Systems
   1. Stormwater and sanitary sewerage systems are to be used and maintained as separate systems.
   2. Drainage facilities shall be designed so they do not connect, direct, or allow stormwater into the sanitary sewerage system.

D. Drainage Improvements Required
   1. All developments shall provide for new drainage facilities, improvements to existing drainage facilities, channel improvements, grading, driveway adjustments, culvert improvements, or any other improvement, drainage facility, or work that is necessary to provide for the stormwater drainage needs of a development, including but not limited to work that is necessary to:
      a. Provide for the conveyance of all stormwater from the development when fully developed to an adequate discharge point;
      b. Fulfill any purpose for which the requirements of this section are imposed;
      c. Adequately protect the development from flooding, including the effects of the 100 year flood;
      d. Properly control any increase in the upstream or downstream stage, concentration, or water surface elevation caused by the development; or
      e. Provide for the conveyance of off-site storm drainage based on ultimate developed watershed conditions through the development.
   2. Such improvements shall be in accordance with the requirements and design standards of this section.

E. Off-Site Drainage
   1. Off-site drainage facilities and improvements shall be provided by the permittee whenever additional stormwater runoff from the development would adversely affect any off-site property or overload an existing drainage facility, whether natural or manmade.
2. Where stormwater runoff from three or more acres has been collected or concentrated to one point, it shall not be discharged onto adjacent properties, except into existing streams, channels, or storm drains, unless drainage or flowage easements are obtained from those properties.

3. If the permittee cannot obtain the necessary easements to make required off-site drainage improvements, upon the request of the permittee after compliance with the provisions of this DDC, the city may, but shall not be required to, initiate eminent domain proceedings to obtain the off-site drainage easements.

F. Detention Facilities
All detention facilities, whether maintained by the city, private property owner, home owners association, or private entity, shall comply with any applicable design requirements of the city and any state or federal laws or regulations, as amended, including the regulations of the Texas Commission on Environmental Quality (TCEQ) or its successor agency. The following standards shall apply to all detention facilities, to the extent they do not conflict with any applicable federal or state laws or regulations, as amended:

1. The 100-year flood shall be used to determine the volume of detention storage required. Water quality volume shall be designed per the Stormwater Design Criteria Manual.

2. Detention facilities shall be designed so that any additional runoff generated by the proposed development will not increase the amount of original discharge for storm frequencies from the 1-year, 25-year, and 100-year flood;

3. Publicly dedicated or privately maintained detention facilities may be used to reduce peak discharges where conditions prevent conveying stormwater to an adequate discharge point or studies show that off-site structural facilities will not mitigate hydraulic effects more efficiently;

4. All detention facilities shall comply with the standards of this section and the Stormwater Design Criteria Manual, as amended;

5. A development may provide for drainage by participating in the design and construction of a regional detention facility. Detailed engineering studies of the entire basin shall be required to ensure that the timing of peak flows has not been altered to create higher peak flows elsewhere in the basin; and

6. Detention facilities may be constructed in phases, if phased to provide for the timely needs of the development.

G. Flood Damage Prevention
All developments regulated by this DDC shall be subject to and comply with any applicable provision of FEMA Flood Damage and Prevention Regulations and the Municipal Code of Ordinances, Subpart B, Chapter 30: Flood Prevention and Protection Ordinance.

H. Floodplain Reclamation-Engineering Criteria

1. Water Surface Elevation
   a. Alterations of the floodplain shall not result in an increase in the 100-year fully developed watershed water surface elevation on other properties under separate ownership.
   b. Alteration of the floodplain that could result in any degree of increased flooding to other properties, adjacent, upstream, or downstream is prohibited.
2. **Stream Velocity**
   a. Alterations of the floodplain shall not create an erosive water velocity on- or off-site. The mean velocity of stream flow at the site, after fill, shall be no greater than the mean velocity of the stream flow under existing conditions.
   b. Alteration to the floodplain that would increase velocities of flood waters to the extent that the significant erosion of floodplain soils will occur either on the subject property or on other properties up or downstream is prohibited.
   c. City staff shall determine what constitutes an “erosive” velocity based on analysis of the surface material and permissible velocities for specific cross-sections affected by the proposed alteration, using criteria established in the Stormwater Design Criteria Manual.

3. **Valley Storage**
   a. Encroachments and/or channelization is strongly discouraged along Pecan, Cooper, Hickory Creek, Milam, and Clear Creeks to prevent the reduction of storage capacity of streams and drainage ways and to prevent increasing discharges downstream.
   b. The city restricts the valley storage loss to zero percent reduction for all streams serving with a drainage basin of one square mile or greater in the city. For minor tributaries (drainage basins with less than one square mile), a 15 percent maximum reduction in valley storage shall be allowed.

4. **Conveyance**
   Alterations of the floodplain shall be permitted only to the extent permitted by equal conveyance on both sides of the natural channel. Staff’s calculation of the impact of the proposed alteration shall be based on the “equal conveyance” principle in order to insure equitable treatment for all property owners. Under equal conveyance, if the city allows a change in the flood carrying capacity (capacity to carry a particular volume of water per unit of time) on one side of the stream due to a proposed alteration of the floodplain, it shall also allow an equal change to the owner on the other side. The combined change in flood carrying capacity, due to the proposed alteration, plus corresponding alteration to the other side of the stream, shall not cause either an increase in flood elevation or an erosive velocity, or violate the other criteria.

I. **Floodplains**
   Where regulations within this section require a development to make any drainage improvements in or adjacent to a floodplain to provide for the ultimate base flood, the permittee may, in lieu of making the required improvements, restrict development in the area subject to flooding because of the failure to provide for the drainage improvements. In such cases, the area to be left undeveloped shall be dedicated to the public as a floodplain and drainage easement on the final plat.

1. **Floodplain Restrictions**
   a. Development is prohibited within the floodplain of any stream or water course with a contributing drainage area of one square mile or more. These floodplain areas shall be preserved from all destruction or damage resulting from clearing, grading, or dumping of earth, waste or material, or stumps. Modifications of this requirement shall be considered by the Floodplain Administrator.
b. The purpose of a floodplain easement is to preserve open space in an area subject to riverine flooding. Construction of new buildings within floodplain easements is prohibited. Filling, grading, or other activities that obstruct flood flows or remove flood storage are prohibited in floodplain easements. Floodplain easement regulations listed in this section also apply to drainage easements dedicated for the purpose of preserving floodplain areas as open space.

c. New fences shall not be permitted within the floodplain, regardless of whether or not there is a drainage easement. The Floodplain Administrator may approve exceptions to this prohibition for specific sites where adequate mitigation measures are provided, as determined by the Floodplain Administrator, such as provision of a breakaway area.

2. Stream Restrictions

Major streams (those with a contributing drainage area of one square mile or more) shall remain in open natural condition; smaller streams or drainage ways (contributing drainage area less than one square mile) may be channelized if allowed by Section 7.4: Environmentally Sensitive Areas, and provided they meet the criteria of the Stormwater Design Criteria Manual. When a stream or excavated channel is to remain open, or in its natural condition, it shall meet one of the following requirements:

a. Dedication, Ownership, and Maintenance Requirements
   i. For single-family residential subdivisions where more than 50 percent of the lots are less than one-half acre in size, dedication of the stream or drainage way shall be made to the city or to an approved homeowner association (HOA).
   ii. A drainage or floodplain easement shall be dedicated as a single lot to the city, a homeowners association, or other legal entity as allowed by this subsection.
   iii. The Planning and Zoning Commission may waive this dedication requirement for the following reasons:
      a. Replats which were originally platted prior to the dedication requirement.
      b. Subdivisions of five lots or less.
   iv. Streams and drainage ways may be retained as a part of a nonresidential lot, and it shall be the property owner's responsibility to maintain this area as set forth by easement, except as otherwise provided.
   v. A maintenance easement shall be granted to the city and shall grant the right but not the obligation to maintain and construct drainage facilities if the stream or drainage way is not being properly maintained.
   vi. The maintenance entity’s by-laws and covenants filed of record shall provide for ongoing maintenance. The easement shall authorize a lien against individual abutting lots in favor of the city to secure the payment to the city for any expenses incurred by the city in the event of default or to secure payment for any expenses incurred if the maintenance entity is not properly maintaining the stream or drainage way.
   vii. Adequate floodplain and drainage easements shall be required that give the city the right but not the obligation to maintain and construct drainage facilities if, in the city's sole opinion, the maintenance entity is not properly maintaining the stream or drainage way.

Subchapter 7: Development Standards

7.5 Drainage

7.5.3 General Drainage Requirements

viii. Where the city has designated a floodway or floodplain as part of the city park system, the permittee shall provide access by one of the following methods. In all cases, the city shall approve the proposed street alignment fronting on city parks as required for this purpose:

a. Parallel streets fronting along the park; or
b. Courtyard or cul-de-sac streets that provide public access fronting on the park; or

c. Loop streets that provide public access fronting on the park.

3. Minimum Finished Floor Elevations

a. Minimum finished floor elevations, the datum used, and the source of the elevation information shall be labeled on the final plat where required. Vertical datum used for minimum finished floor elevations shall be the same as the datum used to establish 100-year base flood elevations.

b. The city reserves the right to specify a new or revised minimum finished floor elevation at the time of issuance of a building permit if new or more accurate information, as determined by the Floodplain Administrator, warrants the change. This minimum finish floor elevation shall apply to the building foundation, including basements, and electrical and mechanical equipment.

c. Minimum lot and habitable space for lots within the 100-year base flood, abutting the 100-year base flood, or within 200 feet of the 100-year base flood shall be established as follows:

i. For lots adjacent to a stream without Base Flood Elevations (BFE’s) identified on the official FEMA Flood Insurance Rate Maps, any habitable structure shall have a finished floor elevation at least 18 inches above the 100-year base flood elevation based on fully developed conditions. This shall apply to all rivers or streams regardless of whether the 100-year floodplain is shown on the FEMA map.

ii. For lots adjacent to a stream with Base Flood Elevations (BFE’s) identified on the official FEMA Flood Insurance Rate Maps, any habitable structure shall have a finished floor elevation at least 18 inches above the 100-year base flood elevation based on fully developed conditions, or at least 30 inches above the FEMA Base Flood Elevation.

J. Floodways and Improvements

1. Generally, floodways serving drainage areas larger than one square mile in area and that are still functioning primarily in a natural and adequate state shall not be altered or improved to provide for the drainage needs of a development, unless there is no other reasonable means or method to provide for such drainage.

2. As part of required improvements, debris, small brush, vines and other obstructions may be cleared from that portion of any channel located within or on the perimeter of the development, as directed by the Director of Utilities, prior to the connection of any utilities for any building within a development.

3. A development may also be required to provide clearing of off-site floodways to the extent necessary to adequately receive or convey stormwater runoff from the development, based on the roughness coefficient approved during the development review process.
7.5 Drainage

7.5.3 General Drainage Requirements

Developments discharging stormwater runoff into a floodway shall provide grass or similar vegetation as approved by the city, on-site and off-site areas in public easements, when necessary to preserve or restore any disruption to the natural state. Refer to the North Central Texas Council of Governments Integrated Stormwater Management (ISWM) technical manual on landscape for additional suggestions.

The vegetation requirement shall apply to any portion of any floodway, on-site or off-site, that would be affected by runoff from the development.

K. Channel Requirements

Required channel improvements shall be based on the amount and concentration of the stormwater runoff from the development. All developments shall provide for the permanent improvement and modification of existing drainage system channels or dedication of floodplain areas based on flood conditions as necessary to serve the development, subject to and in accordance with the following:

1. Channels that serve as floodways having a drainage basin one square mile or larger shall be maintained in a natural state, as provided for in this section.

2. Channels serving a development shall contain the 100-year base flood with at least one foot of freeboard.

3. Excavated channels shall have a concrete pilot channel, if deemed necessary by the Drainage Department, for access or erosion control as outlined in the specifications of the Stormwater Design Criteria Manual. Locations where earth channel improvements are required to carry a flood discharge through an undeveloped area of the off-site property channel grade may be “daylighted” and no freeboard required until the area is developed.

4. The design for all open channels shall be based on geotechnical investigations, unless determined to be unnecessary by the City Engineer, or designee.

5. No development shall be designed to access a public street across a channel without providing adequate clearance for the channel under design storm conditions as required by the Stormwater Criteria Manual. No public access to a public street by means of a low water crossing will be permitted.

6. Bridges crossing channels serving drainage areas greater than one square mile in area shall have one foot of freeboard between the 100-year base flood elevation and the lowest beam of the bridge.

7. Bridges crossing channels serving drainage areas less than one square mile in area shall have one foot of freeboard between the design water surface and the lowest top of road elevation of the bridge.

8. All culvert crossings shall have two feet of freeboard between the 100-year base flood elevation and top-of-curb elevation.

L. Lot Drainage

1. Generally, each lot shall be designed or graded to direct stormwater into an abutting street, alley, channel, or inlet. If drainage is provided in the rear of any lot by a surface or underground storm drainage system, the surface or underground drainage system shall be designed to convey runoff from the 100-year storm event.

2. Where it is not practical to provide abutting drainage facilities for each lot, drainage facilities such as a closed pipe system or drainage ditch, shall generally be required
Subchapter 7: Development Standards

7.5 Drainage

7.5.3 General Drainage Requirements

whenever the cumulative stormwater runoff from more than two lots is directed across a third lot or when the facilities are necessary to avoid an adverse effect on any other lot.

3. It shall be unlawful for any person to fill, modify or otherwise obstruct any public drainage easement designed or used as an overflow channel or structure.

M. Site Erosion Control

1. To minimize erosion resulting from the removal of vegetation and to reduce the introduction of erosion materials into the storm drainage systems, all developments and any person undertaking any development activity shall make use of erosion and sediment control devices in accordance with the requirements of the Stormwater Design Criteria Manual and the iSWM Water Quality Technical Manual.

2. The erosion and sediment control devices shall be installed and thereafter maintained until sufficient vegetation cover has been provided or been replaced to control erosion and sediment.

N. Easements

In addition to any other provisions of this DDC relating to easements for public improvements, the following requirements for public drainage improvements, channels, and facilities required for any development shall apply:

1. All public drainage systems and facilities, that are not to be included within an existing or proposed public street right-of-way, shall be located within easements to be dedicated to the city and shall have adequate access to a public street.

2. Prior to acceptance of any public drainage facilities, all easements within which the facilities are located shall be cleared of all buildings, structures, fences or other obstacles that would interfere with access to the easements.

3. Restrictions of easements shall be described on the final plat and approved by the city.

4. Drainage easements through residential lots shall be placed entirely on one lot. Split lot easements shall not be allowed.

5. Structures, eaves and overhangs, fences, storage sheds, decks, pools, landscaping or other aboveground man-made improvements shall not be permitted in drainage easements or floodplains, except as specifically allowed in the Stormwater Design Criteria Manual. This provision includes, but is not limited to areas encompassing floodplain, channels, flumes, natural streams or swales, or any other system used to convey storm water through surface flow, regardless of whether or not there is an easement.

O. Payment in Lieu of Improvements

Any development required to provide drainage facilities or improvements in accordance with this section may elect to pay the city the total construction cost of the required facilities or improvements, excluding engineering and design cost, when:

1. The city’s approved Capital Improvement Plan proposes to provide, within two years of the date the required improvements are to be undertaken, for the same or similar drainage improvements that would make the drainage improvements required by the development unnecessary;

2. Failure to provide the drainage improvements at the time of development would not adversely affect the development or any off-site properties, as determined by the City Engineer, or designee; and
3. The payment allowed in this subsection shall be made prior to beginning any construction of the development. If the money paid to the city is not used for the required improvements within five years of payment; the funds shall be returned to the person making the payment.

### 7.6 Water and Wastewater

#### 7.6.1 Applicability

Except as otherwise provided in this Section 7.6: Water and Wastewater, the standards of this section and the Water and Wastewater Criteria Manual shall apply as set forth in Section 7.2: Applicability.

#### 7.6.2 Basic Policy

It is the responsibility of the design engineer to ensure the final design of water or sewer system improvements is in conformance with the following:

A. Current standards prescribed by all state and federal laws;
B. Texas Administrative Code (TAC) Title 30, Part 1, Texas Commission on Environmental Quality (TCEQ) - Rules, Ch. 290: Public Drinking Water; and Ch. 217: Design Criteria for Domestic Wastewater Systems;
C. This DDC;
D. The Water and Wastewater Criteria Manual and the City's Standard Details;
E. North Central Texas Council of Governments (NCTCOG) Standard Specifications for Public Works Construction ("COG Specs"), as amended by the City of Denton;
F. City of Denton Water and Wastewater Master Plans;
G. In accordance with adopted Fire Code;
H. American Water Works Association (AWWA) Standards; and
I. All applicable local ordinances.

#### 7.6.3 Extensions of Water and Sewer Mains

A. Extensions for New Subdivisions and Other Developments

Extensions required to serve new subdivisions and other developments shall be as follows:

1. Required Extensions
   a. All developments shall be required to extend across the full width of the development lot (defined by plat or lot of record) in such an alignment that it can be extended to the next property in accordance with the master sewer and water plans for the city or provide continuity of service to the adjoining lot.
   b. Properties having frontages along multiple streets shall extend accordingly along each street frontage.
   c. Gravity wastewater mains shall generally be installed at maximum depth and minimum slope, to facilitate future service to upstream properties. The Water and Wastewater Director may modify this requirement on a case-by-case basis.
   d. Properties already served by water and sewer shall not be required to install additional facilities unless:
Subchapter 7: Development Standards
7.6 Water and Wastewater
7.6.3 Extensions of Water and Sewer Mains

i. The current lines are not of adequate capacity to serve the proposed development, in which case the permittee will be required to install adequate facilities;

ii. The current lines are not of adequate capacity to serve the zoning of a property that has been rezoned to a more intense use since the time of the original utility installation; and

iii. The lot is located on a corner lot and/or fronting a state or federal highway right of way.

2. Extensions to Existing Dwellings
The Water and Wastewater Director may approve an extension of water and sewer mains to an existing dwelling, provided funds are available and as allocated in the Capital Improvement Plan.

B. Cost Policies for New Developments

1. Development Mains and Facilities
Developers, including individuals, subdividers, and owners of single or multifamily dwellings, shall pay the actual cost of all water and sewer main extensions, lift stations, or other necessary facilities required to serve their development, in accordance with the City’s Criteria Manuals and the provisions of this DDC. A developer may appeal a determination of the required facilities to the Public Utilities Board, which shall provide a recommendation, and City Council, which shall make a final decision on the appeal, pursuant to the procedures established in Subsection 2.8.3: Appeal of Administrative Decision, and in accordance with TLGC, § 212.904.

2. Oversized Participation by the City
See Subsection 7.6.14: Oversize Participation by the City.

3. Pro Rata Agreements
See Subsection 7.6.15: Pro-Rata Agreements.

C. Number of Water Service Taps

1. Developments exceeding the following thresholds shall be required to be served by at least two different connections to mains to facilitate domestic and fire service redundancy:
   a. Multifamily Residential: 200 units
   b. Single Family Residential: 30 units
   c. Commercial/Industrial: 124,000 square feet

2. The Water and Wastewater Director, at their discretion, may adjust this requirement if there are extenuating circumstances involved.

3. The connections shall be spaced as far apart as reasonably feasible, and preferably be tapped off of different mains.

4. Sufficient valving shall be provided to facilitate isolating each service connection with minimal service disruption to other customers; if such valving does not exist, the developer shall be required to install it, at their cost.
D. Minimization of Public Main Extensions into Private Property
1. Public water or sewer mains serving only one lot (for both the proposed and anticipated future conditions) shall not be extended into that lot.
2. Water or sewer mains within lots shall be privately owned and maintained, and be designed per the requirements of the Building Code, as adopted by the City of Denton.

7.6.4 Fire Hydrants

These are general standards to be used for platting purposes. For known end uses at the time of platting, Appendix C of the International Fire Code, as amended, shall be used. Fire hydrant spacing requirements for all building permits issued on any platted lot shall comply with the International Fire Code as adopted by the City of Denton.

7.6.5 Booster Pump Stations and Pressure Regulating Valves

A. Occasionally, the proper design of the water distribution system may require the installation of booster pump stations and/or pressure regulating valves to insure proper water system pressures are provided to the development. The city reserves the right to require the developer to design and install these appurtenances as essential components of the water system necessary to serve the development. Any cost sharing for these improvements by the city will be handled by separate contract with the developer on a case-by-case basis and be in accordance with the provisions contained in Subsection 7.6.14: Oversize Participation by the City, and will factor in the following:
1. The location of the proposed development in relationship to the existing water distribution system;
2. The size of the development and the economic hardship that would be imposed upon the development by applying this requirement;
3. Compliance with the City’s Water Distribution System Master Plan;
4. The relative benefits to the development compared to the benefits to the existing or future utility customers;
5. Availability of funding within the Water Department’s Capital Improvement Program; and
6. The identification of capital improvement projects within the Water Utility Department’s adopted five year Capital Improvements Program that would be designed to address this system wide need.

B. All contracts between the city and the developer for city cost participation for these improvements must be approved by the City Council after recommendation from the Public Utilities Board.

7.6.6 Lift Stations

A. On occasion, the location of the property, the topography of the surrounding area and the location and elevation of the nearest sanitary sewer main requires the installation of a lift station and force main to provide wastewater service for a proposed development. The city reserves the right to require the developer to design and install these facilities as essential components of the wastewater collection system necessary to serve the development. Any cost sharing for oversizing these facilities by the city will be handled by separate contract with the developer on a case-by-
case basis and be in accordance with the provisions contained within Subsection 7.6.14: **Oversize Participation by the City**.

B. All contracts between the city and the developer for city cost participation for these improvements must be approved by the City Council after recommendation from the Public Utilities Board.

C. The Wastewater Utility Department reserves the right to require the developer to locate any proposed lift station in a manner that would facilitate the operation, maintenance and ultimate abandonment of the facility in the future by gravity extension of sanitary sewer mains on a watershed basin basis in accordance with the City's Wastewater Collection System Master Plan. The Wastewater Utility Department also reserves the right to require the developer to install an alternative gravity sanitary sewer line extension to minimize the number of additional lift stations that must be operated and maintained by the city as a result of the development. The developer has the right of appeal to this requirement. The City Council shall consider this appeal after receiving a recommendation from the Public Utilities Board.
7.6.7 **Easement Requirements**

All utilities in a development shall be provided in street rights-of-way except for special circumstances approved by the City Engineer, in consultation with the Directors of Water and Waste Water Utilities. In such cases, the following standards shall prevail:

**A.** All utility easements shall be a minimum of 16 feet, unless special circumstances warrant additional or reduced easements which can be approved by the City Engineer, in consultation with the Directors of Water and Waste Water Utilities. The general criteria to define minimum easement widths are listed in Table 7.B: *Minimum Easement Widths*:

<table>
<thead>
<tr>
<th>Type of Development</th>
<th>Easement Size</th>
</tr>
</thead>
<tbody>
<tr>
<td>Individual water or sewer lines up to 12 inches in diameter</td>
<td>16 ft</td>
</tr>
<tr>
<td>Individual water or sewer lines greater than 12 inches up to 20 inches</td>
<td>20 ft</td>
</tr>
<tr>
<td>Individual water or sewer lines greater than 20 inches</td>
<td>25 ft</td>
</tr>
<tr>
<td>Water and sewer lines up to 12 inches in the same easement</td>
<td>25 ft</td>
</tr>
<tr>
<td>Water and sewer lines greater than 12 inches up to 20 inches in the same easement</td>
<td>30 ft</td>
</tr>
<tr>
<td>Easements along TxDOT rights-of-way</td>
<td>20 ft</td>
</tr>
</tbody>
</table>

**B.** Lot lines shall not split easements.

**C.** Side yard easements shall not be allowed. Proposed public water or sewer mains intended to be aligned alongside yards shall be contained with dedicated open space lots, with overlapping public utility easements, and there shall be a note on the plat stating that these lots shall be owned and maintained by the property owners association.

**D.** Dead-end easements are not acceptable unless approved for special circumstances by the City Engineer, in consultation with the Directors of Water and Waste Water Utilities.

**E.** Fences within utility easements are prohibited, except as provided below:

1. Fences shall not be built within or across dedicated utility, water, or sewer easements. The City Engineer, in consultation with the Directors of Water and Waste Water Utilities, at their discretion, may allow fences to be built across an easement if gates at least 12 feet wide are built.

2. Any existing fence that crosses dedicated utility, water, or sewer easements that conflict with the purpose and intent of the easement may be removed by the city at any time.

3. The city is under no obligation to repair or replace any fence that is damaged or removed that encroaches within a dedicated easement for the purposes of operating, maintaining, replacing or installing water or sewer facilities within the dedicated easement.

**F.** Employees of the city shall have the authority to enter premises at any reasonable time in the regular line of duty for the purpose of inspecting, repairing, or constructing any water or sewer line or any water or electric meters, etc.. The landowner and occupant are responsible for any construction activities occurring over or within any on-site utility in a utility easement.
G. If utility inspection or repair or reconstruction is necessary, any pavement, structure, or improvement damaged within a dedicated utility, water, or sewer easement, shall not be the responsibility of the city for any repairs, but shall be the sole responsibility of the owner.

H. The landowner assumes responsibility for any and all improvements placed within a utility, water, or sewer easement at their own risk. Additionally, the provisions of this section do not permit or supersede the limits and restrictions prescribed by the conditions of any existing utility easement for allowing improvements to be placed within utility easements.

I. The following shall not be installed or planted within a utility, water, or sewer easement:
   1. Trees; and
   2. Any structures, including retaining walls and signs. No part of a structure, including its underground foundation, shall encroach into an easement.

J. The following items are typically allowed to be installed within utility, water, or sewer easements:
   1. Drive approaches and parking lots (alignment within drive aisles is preferred);
   2. Sidewalks; and
   3. Grass and small shrubbery.

### 7.6.8 Sewer Capacity Requirements

The city reserves the right to prohibit any connection to the city sewer system when it is determined that a line or the system is overloaded or that the line or system has inadequate excess system capacity to serve the sewer demand of the proposed development.

### 7.6.9 Impact Fees

All connections to the city’s water distribution and wastewater collection systems will require the payment of impact fees in accordance with the provisions of the Municipal Code of Ordinances, Chapter 26: Utilities.

### 7.6.10 Tapping Fees

A. The Water and Wastewater Utility Department personnel shall make all connections to the existing water and sewer system. The fees charged to perform this work shall be paid for by the entity requesting this work.

B. The Water and Wastewater Department shall have discretion as to who shall make connections to the existing wastewater system. If the Water and Wastewater Department decides to make these connections themselves, then the fees charged to perform this work shall be paid for by the entity requesting this work.

### 7.6.11 Basic Policy

Any water and sewer service connections that serve lots that connect to new water and sewer mains extended to serve a proposed development shall be designed and installed by the developer prior to acceptance of these lines by the city.
7.6.12 Fee Schedule

A. The fee schedule for all taps and meter loops shall be established annually by ordinance adopted by the City Council, after recommendation by the Public Utilities Board.

B. The fees shall be based upon the actual cost to install a given sized tap in a paved or unpaved area. These costs shall only reflect the average annual cost to perform the work, including equipment, materials, and labor.

C. For all taps or other utility work performed by the Water and Wastewater Utility Department personnel that do not have established fee schedules adopted by ordinance, the fee will be based upon the Department’s estimated cost of equipment, materials, labor, plus administrative costs.

7.6.13 Administrative Procedure

A. All tap fees shall be paid for prior to the work being performed by the city.

B. The Directors of Water and Wastewater Utilities will be responsible for the development of administrative procedures to insure the collection of tapping fees in accordance with the provisions of this DDC.

7.6.14 Oversize Participation by the City

A. Generally

The city reserves the right to require developers to install water mains, sewer lines, booster pump stations, and/or pressure regulating valves, and wastewater lift stations that have excess capacity to serve adjacent properties and to comply with the adopted comprehensive master plans for these utility systems. The city may elect to participate in the oversizing, subject to fund availability, approval by the City Council, and the requirements of this subsection.

B. Basic Policy

If city participation in oversizing is approved, the amount would be in the cost of:

1. Water line size above the greater of:
   a. Eight-inch; or
   b. The size water line that is necessary to serve the development.

2. Sewer line size above the greater of:
   a. 10-inch; or
   b. The size sewer line that is necessary to serve the development.

C. Administrative Procedure

1. Prior to the beginning of construction of any facility for which the city is to participate in the cost thereof, the developer and city shall enter into a written participation agreement. The city shall approve all oversized utility contracts for such construction of utilities prior to their execution by the developer.

2. The agreement shall be in a form approved by the city. In addition to such other terms as may be necessary to carry out the provisions of this section, the agreement shall provide that if construction of the facility does not commence within one year of the date of the agreement, it shall terminate, unless a written extension thereof is approved by both parties.
The Director of Utilities or his/her designee, in consultation with the Directors of Water and Waste Water Utilities, shall determine the appropriate level of cost participation by the city based upon the incremental cost between the developer required facilities and the city’s requested oversized facilities. This cost determination shall be based upon recent bids for similar facilities and/or cost estimates prepared by the city’s engineering staff. If the city cannot justify the costs involved in any such contract where city funds or pro rata repayment is involved, the city shall have the option and right to submit the project for sealed bids, and the developer shall pay his proportionate share of the acceptable low bid.

Final approval of all oversize participation agreements between the city and the developer shall come from the City Council after recommendation from the Public Utilities Board unless the participation amount is less than the expenditure level authorized by the City Manager. Final payment to the developer for oversize participation by the city shall occur within 60 days of final acceptance of the installed facilities.

### 7.6.15 Pro-Rata Agreements

Any developer who bears the cost of off-site water or sanitary sewer main extensions to a development or installs a lift station with excess capacity to serve adjacent property without city oversize participation shall be entitled to reimbursement of the pro rata cost paid to the city, as provided below, for each user who extends a service line from the main or connects to the lift station within 20 years from the date the facility is finally inspected and accepted by the city. In no case, however, shall a developer receive reimbursement in excess of the cost of the facility.

#### A. Basic Policy

The pro rata charges for tapping mains extended by the developer shall be as follows:

1. Every person or developer applying for a tap of any water or sanitary sewer main which has been constructed under the terms of the developer extension requirements of this section or the city extension requirements of this section shall pay for the requested taps at the following rates:
   
   a. Where a water or sewer main is located on a city street or county road and abuts and is accessible to separate platted tracts, the pro rata charge shall be 60 percent of the average current per-foot cost of such main.
   
   b. Where a water or sewer main is located on a state or federal highway and abuts and is accessible to separate platted tracts, the pro rata charge shall be 100 percent of the average current per-foot cost of such main.
   
   c. Where a water or sewer main is located in a proper easement across an owner’s property and where such easement does not abut a street or is not in any other way directly accessible to any separately owned tract, the pro rata charge shall be 100 percent of the average current per-foot cost of such main.
   
   d. The pro rata charge shall be based on the average current cost of similar projects with pipe of the same size up to eight-inch inside diameter water pipe and 10-inch diameter sewer pipe.
   
   e. All pro rata charges shall be charged on a per-front-foot basis.

2. The pro rata charge provided by this subsection shall be in addition to the usual tapping fee and to any other charges required by the city.
3. The intent and purpose of this subsection is to provide an equitable charge for water and sanitary sewer connections as a proportionate distribution of the cost of water and sanitary sewer main extensions to serve property within the jurisdiction of the city.

4. In cases where a property or a tract of land is so situated or shaped that the above front-foot charge creates an inequitable basis compared to other tracts of land of similar overall size, the Public Utilities Board shall determine the proper charge in accord with the intent and purpose of this subsection, and such determined charge may be lesser or greater than that by the front-foot basis. If more lots are to be served by the main than abut or contain it, then the charge shall be greater, as determined by the Public Utilities Board.

5. No person shall acquire any vested right under the terms and provisions of this subsection, nor shall the city incur or assume any liability or obligation to expend or encumber tax or utility funds. No utility funds shall be spent or encumbered unless funds are available for such purpose, as determined by the Public Utilities Board.

B. Reimbursement for Lift Stations or Force Mains

Reimbursement to developers for the cost of lift stations or force mains shall be as follows:

1. Any developer who bears the cost of lift stations or force mains to serve a development shall be entitled to reimbursement for such costs from pro rata connection or use charges paid to the city, in accordance with this section, by any person who makes use of such lift stations or force mains within 20 years of the date such facilities are accepted by the city.

2. The maximum reimbursable cost paid to a developer by the city from pro rata charges collected from persons connecting to the facilities constructed by a developer shall be based upon the cost of providing capacity for the facilities in excess of the capacity required or reserved by the developer to meet the requirements of the developer’s property for which the facilities were installed, determined as follows:

\[
\text{Reimbursement} = \left( \frac{\text{Cost}^1}{\text{Capacity}^2} \right) \times \text{ECAP}^3
\]

1 Total cost of facility.
2 Total capacity, in gallons per minute (gpm) of the facility.
3 Capacity, in gallons per minute (gpm), in excess of capacity reserved or required by developer’s property.

3. Reimbursement costs shall be payable to the developer within 30 days of receipt of pro rata charges collected by the city.
C. Pro Rata Charges for Use of Sanitary Sewer Lift Stations or Force Mains Installed by Developers

Persons connecting to or using sanitary sewer lift stations or force mains installed by a developer shall pay pro rata costs as follows:

1. Every person who connects to or makes use of a sanitary sewer lift station or force main, the cost of which was incurred by a developer and for which a pro rata reimbursement agreement has been entered into between the city and such developer, shall, as a condition to such connection or use or continued use, pay to the city a pro rata cost charge based upon the use of the excess capacity of the facility, determined as follows:

   \[\text{Avg. Daily Flow} \times 1.5 \times N \times \text{Rate} \frac{1440}{\text{Total Capacity (gpm)}}\]

   \[\text{Avg. Daily Flow} \text{— The projected average daily sewage flow from each building, structure or particular land use. For single-family residential buildings the projected average daily sewage flow of 312.5 gallons per day (gpd) shall be used (based upon two and one-half persons per building times 125 gpd). For other land uses, the projected average daily sewage flows shall be based upon the U.S. Environmental Protection Agency's or its successor agency's most recent listing of average sewerage flows for various land uses or facilities or any other national or state listing of such sewage flows recognized in the utility industry, as determined appropriate by the Directors of Water and Wastewater Utilities.}\]

   \[1.5 \text{— Ratio of peak flow to average daily flow.}\]

   \[N \text{— Number of buildings, structures, units or particular land uses on which the projected average daily sewage flows are based.}\]

   \[\text{Rate} \text{— The gallon per minute (gpm) cost of providing the sewage capacity used, determined as follows:}\]

   \[\text{Total Cost of Facility} \frac{1440}{\text{Total Capacity (gpm)}}\]

   \[1440 \text{— The minutes in a 24 hour day.}\]

2. The intent of this subsection is to provide for an equitable pro rata charge to persons making use of lift stations or force mains constructed under the provisions of this section based upon the average daily projected sewage flows and peak sewage flows of particular buildings, structures and land uses.

3. In cases where the pro rata charge calculated in accordance with this subsection would not be equitable because the actual average daily sewage flow or peak flow from a particular building, structure or land use is much greater or smaller than the normal projected average daily flow or peak flow on which such pro rata charge is based, the Directors of Water and Wastewater Utilities may, based upon evidence of such greater or smaller actual daily sewage flow or peak flow, require a payment of a greater or smaller pro rata charge as a condition to the connection to, use of or continued use of a lift station or force main which is subject to a pro rata reimbursement agreement. In such cases, the Assistant City Manager of Utilities shall give written notice to such person required to make such pro rata payment of the basis for the actual pro rata charge, and such person may, within 30 days thereafter, appeal such determination to the Public Utilities Board. The Board shall, within a
D. Administrative Procedure

1. Prior to beginning of construction of any facility for which pro rata reimbursement is provided for herein, the developer shall enter into a pro rata reimbursement agreement with the city. The agreement shall be in a form adopted by the city. In addition to such other terms as may be necessary to carry out the provisions of this section, the agreement shall provide that if construction of the facility does not commence within one year of the date of the agreement, it shall terminate, unless a written extension thereof is approved by both parties.

2. Pro rata reimbursement payments shall be made by the city to the person or entity who paid the cost of the main or his assignee, and no other person shall be entitled to payment under the terms of this subsection.

3. Pro rata reimbursement payments shall be made pursuant to the terms of the final approved pro rata agreement.

4. The reimbursement shall be payable within 30 days of its receipt by the city.

5. All pro rata agreements shall be reviewed and approved by the Directors of Water or Wastewater Utilities. Final approval of pro rata agreements will be by the City Council after recommendation by the Public Utilities Board or by the City Manager if this authority is delegated to him/her by the City Council.

7.6.16 Alternative Water and Sewer Facilities

All developments within the jurisdiction of the city shall be required to have approved water supply and sanitary sewerage facilities and shall be required to connect to the city facilities unless alternative arrangements have been approved by the city according to the following standards and procedures:

A. Basic Policy

1. Alternative water and sewer systems will be considered for developments that are located in areas that are impractical or economically infeasible to connect to the city’s centralized water distribution and/or wastewater collection system.

2. The key factors that will be evaluated to determine the city’s acceptance of these alternative water and sewer systems are:
   a. General compliance with the city’s land use element of the Comprehensive Plan and Water Distribution and/or Wastewater Collection System Master Plans.
   b. The severity of the economic difference between the collective costs of the alternative water and/or sewage disposal systems necessary to serve the entire development and the costs to extend water and/or wastewater lines to the development.
   c. The suitability of the soil conditions, topography and other environmental factors effecting the development for the installation of the individual on-site sewage disposal systems.
   d. The total number of lots, size of lots and overall density of the development.
   e. The impact on surrounding properties and environmentally sensitive areas adjacent to the development and the availability of buffer areas.
f. The impact on surrounding properties ability to develop with suitable access to water and/or sanitary sewer facilities.

B. Approval Process

1. All alternative water and sewer systems shall be approved by the Directors of Water or Wastewater Utilities based on the approval criteria established above and below.

2. All alternative systems shall be designed and operated in strict compliance with all applicable permits, ordinances, regulatory guidance and regulations including the EPA, TCEQ, Texas Department of State Health Services, and the city.

C. Approval Criteria

Alternative water and sewer systems will be considered for developments pursuant to Chapter 26: Utilities, in the Municipal Code of Ordinances; the Water and Wastewater Criteria Manual; and the following:

1. Individual Water Wells

Developments may be approved with individual water well facilities according to the following criteria:

a. Water well operation and quality meet the minimum requirements of the TCEQ; North Texas Groundwater Conservation District; the provisions of the Municipal Code of Ordinances; and Title 16, Texas Administrative Code, Part 4, Chapter 76; or other administrative rules promulgated by the Texas Department of Licensing and Regulation;

b. Water wells are not used in any commercial sale of the water;

c. Cost to tie onto the city water system, less impact fees, exceeds the certified initial capital cost of a well;

d. Satisfying health and safety requirements, including fire standards; and

e. An applicant for approval of an individual water well shall submit the following evidence to the Director of Water Utilities:

   i. Water Well application;

   ii. Water quality tests;

   iii. Affidavits stating that no more than three families will use the well and/or the well water will not be used in any commercial sales; and

   iv. Certified cost estimate of well installation.

   v. Upon review of this evidence, the Director of Water Utilities may issue a Water Well Permit.

2. Private Water Systems

In areas where development requires water services for more than a single facility and the cost of extending and tying onto the city system is prohibitive, privately owned water facilities may be considered and approved by the city according to the following general criteria:

a. The cost to tie onto the city system would be significantly greater than the proposed alternative.
b. The applicant of the proposed alternative system provides certified evidence from a registered professional engineer that the system will meet all city, state, and federal health and water quality standards.

c. The sizing and material quality of all facilities will meet the city standards. Provisions shall be made to design the water system to provide adequate fire protection for the development in accordance with the design criteria established by the city.

d. Perpetual private maintenance is guaranteed by such means as a homeowner’s association, bonds, or other means approved by the City Attorney.

e. Operators of the system will be certified by the TCEQ.

f. The city shall have the right to inspect the system periodically to determine if such system is being operated and maintained according to industry standards.

g. The review and approval procedures for such private water system shall proceed concurrently with the normal platting and engineering plan approval process as outlined in this article, except for applications under these alternative water facilities proposals, which shall first require review and recommendation from the Public Utilities Board and final concurrence from the City Council.

h. The city may accept existing or annexed private water systems for operation and maintenance when the city’s water lines are connected to such system, provided the system has been designed, constructed and operated in accordance with accepted industry and city standards. Such private system shall be dedicated to the city at no cost.

i. Prior to such acceptance by the city, such water lines and facilities shall be inspected and evaluated as to standards, adequacy, condition, etc. If water lines and facilities are not according to city standards, a per-lineal-foot pro rata charge shall be assessed to the users of such system for installation of these new facilities or will be on a per-lineal-foot, actual-cost basis for upgrading or repairing the existing facilities to meet city standards.

3. Land Use Requirements for Water Wells and On-Site Sewage Systems

a. Utilizing Private Water Well
Lots or tracts of land platted or created after the effective date of this DDC shall have a minimum area of two acres when a private water well is located on the legal tract and a single-family dwelling, commercial, or institutional building utilizes an on-site sewage facility. Environmental protection must be demonstrated on the on-site sewage facility plan when the land tract is in a flood plain or floodway.

b. Utilizing Public Water System
Lots or tracts of land platted or created after the effective date of this DDC shall have a minimum area of one acre when a single-family dwelling, commercial, or institutional building uses an on-site sewage facility. Environmental protection must be demonstrated on the on-site sewage facility plan when the land tract is in a flood plain or floodway.
4. **Individual On-Site Sewage Disposal System**

Individual on-site sewage disposal systems will be considered for developments that are located in areas that are impractical or economically infeasible to connect to the city's centralized wastewater collection system.

a. **Approval Criteria**

The key factors that will be evaluated to determine the city's acceptance of these alternative individual on-site sewage disposal systems are:

i. General compliance with the city's land use element of the Comprehensive Plan and Wastewater Collection System Master Plans.

ii. The severity of the economic difference between the collective costs of all of the individual on-site sewage disposal systems necessary to serve the entire development and the costs to extend wastewater lines to the development. In addition, the feasibility of low pressure sewer system shall be evaluated to serve the dwelling unit or the development.

iii. The suitability of the soil conditions, topography, and other environmental factors effecting the development for the installation of the individual on-site sewage disposal systems.

iv. The total number of lots, size of lots, and overall density of the development.

v. The impact on surrounding properties and environmentally sensitive areas adjacent to the development and the availability of buffer areas.

vi. The impact on surrounding properties ability to develop with suitable access to sanitary sewer facilities.

b. **Review of Subdivision or Development Plans**

i. Prior to final plat approval and before the on-site sewage facility permit process for an individual on-site sewage facility can begin, persons proposing residential subdivisions, manufactured housing communities, multi-unit residential developments, business parks, or other similar uses and using on-site sewage facilities for sewage disposal shall submit planning materials for these developments to the City of Denton.

ii. The planning materials shall be prepared by a professional engineer or professional sanitarian and shall include:

   a. An overall site plan;
   b. Topographic map;
   c. 100-year floodplain map;
   d. Soil survey;
   e. Location of water wells;
   f. Locations of easements as identified in Texas Administrative Code, Title 30, Chapter 285;
   g. A complete report detailing the types of on-site sewage facilities to be considered and their compatibility with area wide drainage and groundwater; and
   h. A comprehensive drainage plan.
5. **On-Site Sewage Facilities**
   a. An on-site sewage facility may be installed to serve an individual residence, commercial, or industrial facility if:
      i. The lot upon which such structure is located is more than 600 feet from any city sanitary main. The distance shall be measured as the straight-line horizontal distance between the end of the existing city sanitary sewer main to the nearest property boundary of the lot to be served;
      ii. The Director of Wastewater Utilities, or designee, certifies in writing that the topography of such premises makes normal connection with such existing sanitary main impractical or impossible, and a low pressure sewer system is not feasible; and
      iii. The operation of an on-site sewage facility is feasible on the premises and will meet the standards and requirements of this section.
      iv. All other installations of on-site sewage facility shall be unlawful within the wastewater service area as certified by TCEQ.
   b. On-site sewage facilities shall be installed in accordance with the standards established by the Texas Department of State Health Services, TCEQ, and the design criteria adopted by the city.
   c. An applicant for approval of an individual on-site sewage facility shall submit the following evidence to the Director of Water or Wastewater Utilities:
      i. Map and statement of justification;
      ii. Affidavits that the on-site sewage facility will serve residents, commercial, or industrial facilities confined to a single lot and not to exceed 5,000 gallons per day in capacity;
      iii. A site evaluation and construction plan of the on-site sewage facility system prepared by a registered professional engineer or registered professional sanitarian; and
      iv. Affidavit of the results of the soil analysis and site evaluation in accordance with Title 30, TAC, Chapter 285.
      v. Upon review of this evidence, the Director of Water or Wastewater Utilities may issue an on-site sewage facility permit.
6. **Wastewater Treatment Systems**
   In areas where development requires wastewater services for more than a single facility and the cost of extending and tying onto the city system is prohibitive, wastewater treatment system may be considered and approved by the city according to the following general criteria:
   a. The cost to tie onto the city system, less impact fees, would be significantly greater than the proposed alternative;
   b. The applicant of the proposed alternative system provides certified evidence from a registered professional engineer that the system will meet all city, state, and federal health and water quality standards;
   c. The sizing and material quality of all facilities will meet the city standards, and federal, and state regulatory requirements;
d. The review and approval procedures for such wastewater treatment system shall proceed concurrently with the normal platting and engineering plan approval process as outlined in this article, except for applications under these alternative sewer facilities proposals that shall first require review and recommendation from the Public Utilities Board and final concurrence from the City Council. In addition, TPDES permit shall be secured for operation of the wastewater treatment facility; and

e. The city will assist in obtaining the TCEQ TPDES permit for the wastewater treatment facility. Once the construction of the facility is complete and the city issues the acceptance letter, the ownership of the wastewater treatment facility will revert to the city. The city will thereafter own and operate the facility.

7. Existing Privately Owned Water and Wastewater Systems

a. The city may accept existing or annexed private wastewater treatment system for operation and maintenance when the city’s sewer lines are connected to such system, provided the system has been designed, constructed and operated in accordance with accepted industry and city standards and proper maintenance bonds are provided. Such private system shall be dedicated to the city at no cost.

b. Prior to such acceptance by the city, such water and sewer lines and facilities shall be inspected and evaluated as to standards, adequacy, condition, etc. If sewer lines and facilities are not according to city standards, a per-lineal-foot pro rata charge shall be assessed to the users of such system for installation of these new facilities or will be on a per-lineal-foot, actual-cost basis for upgrading or repairing the existing facilities to meet city standards.

c. Connections to sanitary sewer extensions required upon notice. Whenever the city sanitary sewer system is extended to within 200 feet of any lot or parcel of land within the corporate limits of the city where an on-site sewage facility exists, the owner or occupant of each premises shall abate such on-site sewage facility, dry closet or privy and shall construct a suitable water closet upon such premises and connect the water closet with the city sanitary sewer main within 45 days after written notice to do so from the Director of Water and Wastewater Utilities, unless he/she can show by county health certificate that his current system is functioning in a sound and safe manner. He/she shall further be required to have these facilities re-certified every two years.

7.6.17 Plans and Specifications

The developer shall provide the city with all plans and specifications for all water and wastewater facilities necessary to service the proposed development.

A. Basic Requirements

1. All water and wastewater facilities necessary to support a proposed development shall be designed by a professional engineer licensed in the State of Texas.

2. Plans and specifications shall be prepared and submitted for review and approval prior to final acceptance and approval of the final plat.

3. Plans and specifications shall conform to the criteria contained in the Water and Wastewater Design Criteria Manual.
B. **Construction Plans**
   1. The developer's engineer shall prepare construction plans for all water and wastewater facilities required to serve the development.
   2. The construction plans shall be prepared by a professional engineer licensed in the State of Texas and shall be signed and sealed in accordance with the criteria outlined by the State Board of Registration for Professional Engineers prior to submittal to the city for review, approval or construction purposes.
   3. The construction plans shall be prepared in accordance with the standards outlined in the Water and Wastewater Design Criteria Manual and shall be available on electronic media unless otherwise approved by the Water and Wastewater Utility Department.

C. **As Built Drawings**
   After the construction has been completed and prior to acceptance of the facilities by the city, the construction plans shall be modified to reflect as-built conditions and be submitted to the city.

### 7.7 Landscaping, Screening, Buffering, and Fences

#### 7.7.1 Purpose

The city recognizes landscaping, tree preservation, buffering, and screening as important features and activities to:

A. Blend the built and natural environment and preserve the natural landscape;
B. Mitigate or minimize potential nuisances such as noise, light, glare, dirt, litter, signs, parking, or storage areas and to provide a transition between uses;
C. Conserve water resources by using sustainable design and maintenance techniques and low-water plant species;
D. Promote environmental benefits such as improved stormwater retention, water quality, and air quality, soil moisture, groundwater, and erosion prevention;
E. Improve the appearance of development and establish an attractive streetscape; and
F. Increase the urban tree canopy.

#### 7.7.2 Intent

A. The intent of these regulations is to achieve and maintain an average minimum of 30 percent tree canopy coverage citywide from preserved trees and newly planted trees, and to promote a multi-aged urban forest. Specifically, to achieve the city’s goal of a city-wide average tree canopy cover of at least 30 percent, the following goals are established for specific areas of the city based upon the unique ecoregions present in different areas of the city:
   1. For areas east of the Interstate 35 / Interstate 35-W corridor, where the Cross Timbers ecoregions is more prevalent, the minimum canopy goal shall be 40 percent coverage.
   2. For areas west of the Interstate 35 / Interstate 35-W corridor, where the Grand Prairie ecoregion is more prevalent, the minimum canopy goal shall be 20 percent coverage.
B. These regulations are intended to promote the functional distribution of that canopy throughout various land uses as development occurs through a combination of planting and retention goals and requirements for tree canopy cover.
7.7.3 Applicability

A. General Applicability
   Except as otherwise provided in this Section 7.7: Landscaping, Screening, Buffering, and Fences, the standards in this section, and the Criteria Manual shall apply as set forth in Section 7.2: Applicability, with the following modifications:

1. New Development
   a. A new principal structure is constructed; or
   b. An existing principal structure is relocated on the lot.

2. Expansions and Enlargements
   All expansions or enlargements shall be considered together with any other expansions or enlargements during the previous two year period.
   a. The entire site shall comply with this Section 7.7 when:
      i. The number of multifamily dwelling units on a property is increased by more than 25 percent; or
      ii. Ten or more additional multifamily dwelling units are created within the MD zoning district; or
      iii. The square footage of a nonresidential building is expanded or enlarged by more than 50 percent; or
      iv. The addition or expansion of one or more structures or uses that requires specific use permit approval.
   b. The portion of the site being expanded and/or improved shall comply with this Section 7.7 when:
      i. Except for within the MD zoning district, the number of dwelling units on a property is increased by between 10 and 25 percent or 10 dwelling units, whichever is less; or
      ii. The square footage of a nonresidential building is expanded or enlarged by between 10 and 50 percent; or
      iii. Parking area improvements or expansions including reconfiguring, reconstructing, or other similar projects, but not including resurfacing or restriping.

3. Electric Substations and Switch Stations
   Landscaping, screening, buffering, and tree standards for electric substations and switch stations shall be pursuant to Subsection 7.13.7: Electric Substation, Interchange, and Switch Station Design.

B. Exemptions
   1. Expansion of a single-family detached dwelling, duplex, or townhome within the permitted building coverage.
   2. Cumulative expansions and enlargements of a multifamily development or nonresidential use less than 1,000 square feet.
   3. Conversion of a residential structure to a nonresidential use where no site improvements are required.
C. Alternative Landscaping

1. **Alternatives Authorized**
   A reduction in the count, configuration, or location of required landscaping materials may be allowed when alternatives are justified by site or development conditions. Conditions justifying approval of an alternative landscape plan include:
   a. Natural conditions, such as watercourses, natural rock formations, or topography;
   b. The likelihood that required landscaping material at maturity would not achieve the intent of this DDC due to topography, placement, or other existing site conditions;
   c. Unique lot size or configuration;
   d. Challenges associated with infill development or redevelopment on small lots;
   e. The presence of existing utility or other easements;
   f. The potential for interference with public safety;
   g. Preservation of natural vegetation; or
   h. Other situations where strict adherence to the buffer or landscaping standards in this DDC are determined impractical by the Director.

2. **Alternative Landscape Plan Approval Criteria**
   The Director may approve alternative landscape plans that do not meet the specific requirements stated in this Section 7.7, when the Director determines that the alternatives meet the following criteria:
   a. Are consistent with the purposes of this Section 7.7;
   b. Do not include invasive vegetation included in an adopted city, county, or state list of prohibited or invasive species;
   c. Provide equal or superior buffering of adjacent properties from anticipated impacts of the proposed development; and
   d. Provide equal or superior visual appearance of the property when viewed from a public right of way.

### 7.7.4 Tree Preservation

A. **Purpose and Intent**
   The Comprehensive Plan identifies the importance of environmental management, while allowing reasonable and responsible development of land within the city. Towards this end, the purpose of these regulations is to promote the preservation and expansion of tree canopy, facilitate site design and construction that contributes to the long term viability of existing trees, and to establish a process to manage the removal of tree canopy. Further, this section is intended to accomplish the following public purposes:

1. Protect trees and promote the ecological, environmental, and aesthetic values of the city;
2. Maintain and enhance a positive image of the city through the preservation, mitigation, and planting of trees;
3. Prevent the untimely and indiscriminate removal or destruction of trees and clear-cutting of land;
4. Provide for a permitting and enforcement procedure;
5. Preserve the public health, safety, and general welfare of citizens;
Subchapter 7: Development Standards
7.7 Landscaping, Screening, Buffering, and Fences

7.7.4 Tree Preservation

6. Encourage the protection of healthy trees and provide for the replacement and/or replanting of trees that are necessarily removed during construction, development, or redevelopment;

7. Provide for the preservation and protection of larger native and/or established trees, which provide a valuable amenity to the urban environment and which, once destroyed, can only be replaced after generations, if at all;

8. Enhance and preserve established tree stands adjacent to Environmentally Sensitive Areas in order to further protect wildlife habitats and reduce impacts from new developments;

9. Provide for shade, windbreaks, and the cooling of air; thereby, reducing the requirements for air conditioning and heating and the utilization of nonrenewable energy sources;

10. Provide for open space and more efficient drainage of land; thereby, reducing the effects of soil erosion and the need for additional drainage facilities; and

B. Applicability and Exemptions

1. Unless exempted in paragraph 2 below, the requirements of this subsection shall apply to:
   a. Undeveloped land;
   b. All nonresidential and multifamily property to be redevelopment including additions or alterations, but not including interior alterations or exterior alterations that do not change the footprint of the building, and that do not require the removal of trees; and
   c. Existing single-family and duplex dwelling properties applying for a demolition permit for the principal structure, provided that the minimum dbh for protected trees shall be 10 inches or greater.

2. The following activities shall be exempt from this subsection:
   a. Agricultural operations under Tex. Agric. Code Sec. 251.002(1);
   b. Property on which a single-family or duplex dwelling unit(s) exists, provided that trees designated for preservation on an approved Tree Survey or Preservation Plan and/or an associated Plat shall be preserved unless otherwise exempt under TLGC 212.905 or its successor;
   c. Any tree determined to be diseased beyond recovery, dying, dead, creating a public nuisance or damaging a foundation by a qualified professional;
   d. Any tree determined to be causing a danger, or to constitute a hazardous condition, as a result of a natural event such as tornado, storm, flood or other act of God, that endangers the public health, welfare or safety and requires immediate removal;
   e. Any tree listed on the Texas Department of Agriculture Noxious and Invasive Plant List;
   f. Clearing of understory necessary to perform soil borings, boundary surveying of real property, to conduct tree surveys or inventories, or to install tree protection fencing, provided that clearing for surveying shall not exceed a width of four feet for general survey (e.g., of easement boundary) and eight feet for survey of property boundary lines, and provided that any protected tree having a dbh of 10 inches dbh or greater may not be removed under this exemption. For the installation of tree protection fencing the clearing shall not exceed a width of four feet, measured radially from the trunk, and must not encroach into the dripline or critical root zone of any tree to be protected; and
7.7 Landscaping, Screening, Buffering, and Fences

7.7.4 Tree Preservation

C. Tree Removal Permit

1. New Development/Construction

a. In the event it becomes necessary to remove a tree for development or construction, a tree removal permit is required. No protected tree may be removed for development or construction until the final plat has been approved and the Building Official has properly issued a tree removal permit for that purpose. In instances where a final plat is not required, proposed removal of protected trees shall be reviewed with any required site plan for development.

b. All areas within the public rights-of-way, utility easements or drainage easements, as shown on an approved plat, and areas designated as cut/fill on the related drainage plan approved by the City Engineer, shall be subject to the requirements of this section.

2. Municipal/Public Property

Property owned by the City of Denton, State of Texas, a political subdivision of the State of Texas, or any public school, public school district, or nonprofit charter school shall be subject to requirements of Subsection 7.4.3.

3. Tree Removal Permit Required

a. No protected trees may be removed or transported until authorized by a tree removal permit. It shall be an affirmative defense to prosecution that permitting is exempted by Subsection 7.7.4B.

4. Tree Removal Permit Review and Approval Process

a. Applicant submits a complete application, along with the applicable fees.

b. A tree survey and tree preservation plan is required for all new development, in accordance with Subsection 7.7.4D.

c. A tree removal permit is valid for 180 days, or for the duration of a building permit, clearing and grading permit, or clearing and grubbing permit issued in conjunction with the tree removal permit, whichever is longer.

d. Protected trees shall not be removed until:

i. Proper mitigation or replacement requirements have been determined and approved for the lot or site on an approved tree survey and preservation plan; and

ii. A preconstruction meeting has been held with proper city staff authorizing grading and construction activities to begin on the lot or site; and/or

iii. A tree removal permit has been issued for the lot or site.

5. Standards for Relocating Heritage and Quality Trees

All permitted tree relocations shall be in accordance with the applicable American National Standards for Tree Care Operations ANSI A300.
Subchapter 7: Development Standards
7.7 Landscaping, Screening, Buffering, and Fences

7.7.4 Tree Preservation

6. **Permits Issued for Public Need, Danger, or Calamity**
The Director or designee may issue a permit for the removal of a protected tree provided that it:

a. Is determined to be in a hazardous or dangerous condition so as to endanger the public health, welfare, or safety;

b. Hinders or obstructs the construction, maintenance, repair, or replacement of city streets, water and sewer lines, and drainage and storm sewer;

c. Is located in any right-of-way required under the mobility/thoroughfare plan to be dedicated to, and accepted by the city. This does not include trees being removed for proposed driveways, right and left turn lanes, or median openings required or warranted by a development. Trees removed in these instances shall be replaced per paragraph 7.7.7F.5;

d. Hinders or obstructs the construction, repair, maintenance, or replacement of public improvement projects including, but not limited to, major collection lines for sanitary sewer, distribution lines for water, collection and management of storm water runoff, and thoroughfares designated for construction in the City’s Capital Improvement Project Plan, Water and Sanitary Distribution Line Maps, or Mobility/Thoroughfare Plan;

e. Is damaged or killed by a tornado, ice or wind storms, flooding, or other acts of nature; or

f. Is otherwise required by statute.

D. **Tree Protection Requirements During Construction**
Property owners shall adhere to the following tree protection measures on all construction sites, consistent with Figure 7.7-1: Tree Protection and Root Pruning Details.

1. Prior to grading, brush removal, or construction, the developer shall clearly tag or mark all trees to be preserved.

2. The developer shall erect an orange plastic mesh fence, or other approved fencing material, a minimum of four feet in height around each tree or group of trees to prevent the placement of debris, equipment, or fill within the dripline or critical root zone. The fence shall be installed prior to the release of any permit. If the protection fence is found removed, damaged, or altered at any time during construction prior to final inspection or landscape installation, a stop work order may be issued by the Building Official.

3. During the construction phase of development, the developer shall prohibit cleaning, parking, or storage of equipment or materials under the canopy of any tree or group of trees required to be preserved. The developer shall not allow the disposal of any waste material harmful to tree growth and health, such as, but not limited to, paint, oil, solvents, asphalt, concrete, or mortar in the dripline area.
4. No attachments or wires of any kind, other than those intended to identify or protect a protected tree, shall be attached to any tree.

5. No fill or excavation may occur within the dripline of a tree to be preserved unless there is a specific approved plan for use of tree wells or retaining walls. Any plan proposing the use of tree wells or retaining walls within the dripline of a tree to be preserved shall be designed by a licensed landscape architect. Major changes of grade (four inches or greater) will require additional measures to maintain proper oxygen and water exchange with the roots. In addition, the developer should adhere to the following guidelines to protect the trees to be preserved:
   a. With grade changes, a reinforced retaining wall or tree well of a design approved by the city should be constructed around the tree no closer than half the distance between the trunk and the drip line. The retaining wall should be constructed so as to maintain the existing grades around a tree or group of trees.
   b. At no time should a wall, pavement, or porous pavement be placed closer than five feet or one foot for every two inches in caliper, whichever is greater, to the trunk of the tree.
   c. In instances where tree wells or retaining walls are approved, root pruning may be necessary when the critical root zone is to be disturbed. See Figure 7.7-1.
   d. If a patio, sidewalk, drive, parking lot, or other paved surface must be placed within the drip line of an existing tree, material such as a porous pavement or other approved construction methods that will allow the passage of water and oxygen may be required.

E. Tree Survey and Preservation/Replacement Plan
   1. A tree survey and preservation/replacement plan is required for the development impact areas and shall accompany the initial application for a site plan, preliminary plat, replat, gas well site plan, or a clear and grade permit, regardless of the number of trees present on a property.
2. A tree survey and preservation/replacement plan may be required to accompany a zoning application, specific use permit, or a planned development amendment where tree and landscaping requirements are relevant to the requested zoning or development amendment, as determined by the Director.

3. Each tree survey and preservation/replacement plan shall contain, but not be limited to, the following required elements:
   a. The locations of all trees to be preserved and removed on the subject site.
   b. A table containing the following information for all trees:
      i. Tree number;
      ii. Common name of each tree;
      iii. Circumference of each landmark tree;
      iv. Diameter (dbh) of each tree;
      v. General health and condition of each tree;
      vi. Average canopy spread;
      vii. Classification (quality, heritage, landmark, secondary, or non-protected) and status (preserve or remove) for each tree; and
      viii. Mitigation worksheet as shown in Table 7.C.

4. The tree survey and preservation/replacement plan shall be prepared by or under the supervision of an ISA certified or ASCA registered arborist, a SAF certified forester, botanist, professional land surveyor that has documented completion of at least eight hours of training in Texas tree identification, or a registered landscape architect.

5. Residential subdivisions that are to be developed in phases must provide a plan that complies with the preservation requirements at full build-out as approved on the preliminary plat or general development plan.

6. Any subsequent redevelopment of property shall preserve the minimum percentage dbh inches as indicated by the initial tree survey and preservation/replacement plan.

7. A notation must be placed on the preliminary plat, final plat, site plan, and building permit identifying the dbh of trees to be preserved and the location of the lots that contain preserved trees. The notation shall limit any future unauthorized land disturbing activity or construction that would impact and/or damage the tree(s) preserved.

8. A tree survey and preservation/replacement plan shall be approved if the minimum preservation and replacement requirements are met.

9. If there are no protected trees on a property, then a signed and notarized letter indicating such shall be prepared by or under the supervision of an ISA certified or ASCA registered arborist, a SAF certified forester, botanist, professional land surveyor that has documented completion of at least eight hours of training in Texas tree identification, or a registered landscape architect and submitted with the initial development application.

F. Alternative Tree Preservation/Replacement Plan

1. Description and Intent
   The alternative tree preservation/replacement plan provides the option to further the purpose and intent of these regulations through a flexible process reviewed and approved by the Director for one of the following purposes:
Subchapter 7: Development Standards
7.7 Landscaping, Screening, Buffering, and Fences
7.7.4 Tree Preservation

a. To allow trees measuring below the minimum dbh to be counted for Protected Trees when:
   i. The allowance would result in the preservation of a greater number of post oak trees, regardless of dbh; or
   ii. The preservation of protected tree(s) would cause a substantial burden, but smaller dbh non-secondary trees are located in such a way that the trees can be incorporated into the site design such as the parking lot, buffer, or front yard landscaping.

b. To allow secondary trees to count towards the minimum required preservation instead of quality trees.

2. Criteria for Approval
   a. The proposed alternative tree preservation/replacement plan adequately achieves, or is an improvement on, the intent of the requirements of this subsection; and
   b. The proposed site design has minimized the loss of protected trees to the greatest extent possible or has maintained existing tree stands.

3. Replacement Trees
   Required replacement and mitigation contained in paragraphs 7.7.4H and 7.7.4I shall be required for those alternatives in paragraph 7.7.4F.1 above.

G. Minimum Preservation Requirements
   1. Tree Types and Required Preservation
      a. Landmark Trees
         One-hundred percent of all Landmark trees shall be preserved.
      b. Heritage and Quality Trees
         A minimum of 30 percent of the total dbh shall be preserved within the development impact area. Removal of trees shall be replaced in accordance with Subsection 7.7.4H or 7.7.4I.
            i. The 30 percent minimum preservation requirement may be reduced to 20 percent provided:
               a. The 20 percent preserved dbh is in either a dedicated conservation easement or in a preserved habitat. All protected and non-protected trees, unless dead or diseased, that are greater than six inches dbh may be counted toward meeting the 20 percent requirement.
               b. Preserved habitats may be dedicated as a conservation easement, and if not dedicated as a conservation easement must otherwise be restricted on a plat. Preserved habitat shall contain the prescribed minimum preservation amount, contain a stand of trees and understory, and shall be the greater of 10 percent of the property or 5,000 square feet.
               c. All other trees remaining in the development impact area but removed shall be replaced in accordance with subsection 7.7.4H or 7.7.4I., if applicable.
            ii. Properties without a preserved habitat or conservation easement may reduce the 30 percent minimum to 20 percent provided:
Subchapter 7: Development Standards
7.7 Landscaping, Screening, Buffering, and Fences

7.7.4 Tree Preservation

Denton, Texas – Denton Development Code
Print Date: December 12, 2019

The 10 percent reduction is mitigated at the following rates: heritage trees at two and three-quarters inches for every inch removed; and quality trees at two and one-quarter inches for every inch removed.

All other trees remaining in the development impact area but removed shall be replaced in accordance with Subsection 7.7.4H or 7.7.4I., if applicable.

c. Secondary Trees
   There is no minimum preservation of secondary trees required when there are quality and heritage trees located on a property. In instances where there are no quality or heritage trees located on a property, then a minimum of 20 percent of the total dbh for secondary trees on the property must be preserved within the development impact area.

d. Preservation Relief
   City Council may approve relief of the Preservation Requirements in accordance with Tree Preservation Relief Provisions in 7.7.4J, and where required by State law.

H. Tree Replacement
   1. In the event that it is necessary to remove a protected tree(s) as allowed in this section, the applicant shall be required to replace the tree(s) being removed with healthy trees or pay a mitigation fee as explained hereafter.
      a. If it is determined that tree replacement is required, the tree preservation/replacement plan must be approved prior to approval of a final plat or replat and a note shall be placed on that plat referencing the approved tree replacement plan.
      b. If platting is not required, the tree replacement plan shall be included as part of a site plan approval or tree removal permit.
   2. In accordance with TLGC, § 212.905, as amended, replacement trees must:
      a. Be planted on property in which they were removed; or
      b. Be planted at a location mutually agreed upon by the city and the property owner; and
      c. Measure at least two inches dbh when planted.
   3. In order to ensure biodiversity and protect against tree diseases, if 20 or more replacement trees are planted, no one species of tree may exceed 30 percent of the total new trees on the site.
   4. To determine the replacement inches required by this section, the applicant shall inventory and combine the total inches of dbh of all protected trees that are to be removed and that are located within the development impact area.
   5. This inventory shall be separated into inches of dbh removed per protected tree classification as calculated using the following replacement rates:
      a. Heritage Tree – Two and one-half inches for every inch removed;
      b. Quality Tree – Two inches for every inch removed; and
      c. Secondary Tree – Four inches for every tree removed.
   6. The total of the required inventories represents the replacement inches that shall be replaced through new tree plantings or preservation of existing trees. New trees required
7.7 Landscaping, Screening, Buffering, and Fences

7.7.4 Tree Preservation

Once each tree on the site is inventoried, tree mitigation shall be calculated as follows and as shown in Table 7.C: Sample Tree Mitigation Worksheet. The calculated dbh of each tree shall be the dbh of the tree multiplied by the appropriate classification ratio as described in paragraph 4 above. The total calculated dbh shall be the sum of all these trees.

In accordance with TLGC, § 212.905, as amended, a credit of 50 percent shall automatically be given to the total calculated dbh for all residential development, and 40 percent for nonresidential development. The preliminary mitigation dbh is 50 percent of the total calculated dbh for all residential, or 40 percent for nonresidential. Mixed-use developments shall be credited at the residential rate of 50 percent.

After calculating the preliminary mitigation dbh and subtracting the preserved credits, any remaining dbh is defined as the mitigation dbh. The mitigation dbh is required to be satisfied either by the planting of new trees on-site with an equivalent total dbh or by using one of the alternative methods described in Subsection 7.7.4J.

If any preserved and/or replacement tree(s) dies within three years of initial planting or issuance of certificate of occupancy, the current property owner shall be subject to the same replacement requirements per these requirements, unless otherwise exempt or deemed a non-protected tree.

I. Tree Preservation Credit

Additional credit shall be given for all protected trees that are preserved. Preserved credits shall be the sum of:

1. A four-inch credit against mitigation for each one-inch of preliminary mitigation dbh shall be applied to the preservation of any landmark tree, or any trees preserved within a conservation easement or preserved habitat;

2. A three-inch credit against mitigation for each one-inch preliminary mitigation dbh shall be applied to the preservation of any other heritage tree; and

3. A two-inch credit against mitigation for each one-inch of Preliminary Mitigation dbh shall be applied to the preservation of any other quality tree.

4. An additional preserved credit may be credited against preliminary mitigation dbh for preserved secondary trees, provided:
   a. The minimum preservation of 30 percent is achieved for heritage and quality trees;
   b. A one-half inch credit against mitigation for each one-inch preliminary mitigation dbh shall be applied to the preservation of secondary trees; and
   c. Credit for preserved secondary trees may not exceed 50 percent of the preserved dbh of quality trees.

### J. Tree Preservation Relief Provisions

1. **Purpose**
   
The purpose of this provision allows a determination of whether the application of this DDC, as applied to a tree removal application and related development applications, would if not modified or other relief granted, may unreasonably burden the development of the property.

2. **Review Procedure**
   
a. A property owner or his authorized agent may file an application for relief under this subsection following a final decision to deny or conditionally grant an application for a tree removal permit.
   
b. The Director has the authority to establish requirements for applications for tree preservation relief in the Application Criteria Manual. No application shall be accepted for filing until it is complete and the fee established by the City Council has been paid.
c. Upon approval of an application for relief in whole or in part by the City Council, the Director shall process the tree removal permit and related development applications pursuant to the relief granted on the application for relief approved by the City Council.

d. A denial of an application for relief by the City Council is a final determination.

3. **Criteria for Approval**

   In deciding whether to grant relief to the applicant, the City Council shall consider whether there is any evidence from which it can reasonably conclude that the application of all or a part of the provisions of this DDC that apply to tree preservation may deprive the applicant of all economically viable use of the property, based on the following factors:

   a. Whether there is a unique physical circumstance on the property.
   
   b. Whether the proposed design has minimized the loss of trees to the extent possible.
   
   c. Whether preservation and/or mitigation unduly burdens the development of the property.

**K. Alternatives to Tree Replacement Requirements**

In order to satisfy the mitigation dbh, the property owner may use any combination of alternative methods of compliance listed below. These alternative methods may also be used in combination with or in lieu of tree replacement, so long as the total replacement dbh is satisfied by one or all methods.

1. **Payment in Lieu of Replacement**

   a. Payment in lieu may be made in the amount prescribed separately and periodically by ordinance, and, if made, such a payment shall be deposited into the tree fund for the purposes described in this subsection. This amount is calculated by the average cost incurred by the city for the purchase, planting, and irrigation of a two-inch tree for three years.
   
   b. The applicant must pay the fees contributed to the tree fund prior to the issuance of a gas well site plan, or the filing of a final plat in the Denton County Clerk’s Office. If platting is not required, payment shall be prior to issuance of a tree removal permit.
   
   c. Notwithstanding any other provision in this subsection, no tree mitigation fee may be collected or enforced in contravention of state law.

2. **Tree Donation**

   The developer may donate the replacement tree(s) to the City’s Parks Department for planting within the city, with the approval of the Parks Director.

3. **Conservation Easement**

   The property owner may request to grant a conservation easement by plat to the city that includes protected trees and non-protected trees beyond the minimum preservation amount, and with a combined dbh equal to or exceeding the dbh for which mitigation is being requested.

   a. In addition to the tree survey and preservation/replacement plan, a detailed baseline document describing the property’s physical and biological condition, the general age of any tree stands, locations of easements and construction, and the conservation values protected by the easement, shall be required.
b. The city may decline the request for a conservation easement for any reason; however a request so declined will not satisfy the mitigation requirement and mitigation must be achieved in a different manner as described above.

I. Tree Fund

1. The city shall administer and use the tree fund to:
   a. Purchase, plant, and maintain trees;
   b. Conduct maintenance on conservation easements dedicated in accordance with this subsection;
   c. Preserve wooded property remaining in a naturalistic state in perpetuity;
   d. Perform and maintain a city-wide tree inventory;
   e. Educate citizens and developers on the preservation, care, maintenance, benefits and value of trees within the City of Denton; and
   f. Support programs for the public purpose of increasing the tree canopy within the City of Denton as approved by City Council.

2. Proceeds from the tree fund shall not be used to meet any requirements for preservation, mitigation, landscaping, buffering, streetscaping, or similar requirements in this DDC or the Municipal Code of Ordinances.

3. Voluntary contributions for tree planting shall be placed in the tree fund.

M. Incentives

1. Energy Conservation Credit
   Mitigated or preserved large canopy shade trees located on the western or southern exposures of a habitable building may receive additional tree replacement credit. The trees must be located a minimum of 10 feet but a maximum of 30 feet in distance from the building. Required tree replacement may be credited at 1.5 times the existing or newly planted trees;

2. Heritage Tree Credit
   A replacement credit of 4.0 times the dbh of a heritage tree preserved beyond the minimum preservation requirements may be counted toward meeting the required replacement;

3. Conservation Easement Credit
   Required replacement trees may be credited 2.0 times if planted within the dedicated Conservation Easement;

4. Tree Cluster(s)
   In order to emphasize the importance of preserving trees in a cluster during development, additional mitigation credit will be given for a cluster(s) of three or more trees whose bases are located less than 10 feet apart and whose drip lines overlap. Credit shall be calculated at 1.15 times the dbh of each tree within the cluster; and

5. Parking Space Reduction
   Upon application and verification by the Director, an individual shall be entitled to a reduction in the minimum parking to help meet the minimum tree preservation requirements. For the purpose of providing an incentive, the minimum parking requirements in Subsection 7.9.4, may be reduced by one parking space for every 12 inches
Subchapter 7: Development Standards
7.7 Landscaping, Screening, Buffering, and Fences
7.7.5 Landscape and Tree Canopy Requirements

dbh of trees that have been protected or mitigated on a site. Up to 15 percent of the required spaces may be reduced; or

6. Certification in Lieu of Mitigation
The Director shall assist those who wish to have a site certified under the Denton Wildscape Program in lieu of meeting replacement requirements as long as 20 percent of existing trees on-site are preserved.

7. The enforcement and penalty provisions of Section 1.6 shall apply to this subsection.

7.7.5 Landscape and Tree Canopy Requirements

A. Applicability to the Development Impact Area

1. Single-family, Duplex, and Townhome Dwellings:
   a. Existing single-family, duplex, townhome, triplex, and fourplex lots that are currently developed are exempt from the minimum requirements contained in subsection (B).
   b. New detached single-family, duplex, townhome, triplex, and fourplex subdivisions are required to provide landscaping as specified in subsection E.

2. Multifamily and nonresidential developments are required to comply with all landscaping and tree canopy requirements in this section.

3. All replacement trees included as part of the approved tree preservation/replacement plan shall be credited against the trees planted, as required by this section.
B. Minimum Landscape Area and Tree Canopy Requirements
Landscape area is the portion of a development impact area which is comprised of trees, shrubs, and pervious groundcovers. The percentage of landscape area required shall be based on the property’s zoning designation, as indicated in Table 7.D below.

C. Measurement and Calculation of Landscape and Tree Canopy Areas

1. Tree Canopy Measurement
   a. Tree canopy is measured by computing the area that the mature canopy will encompass, based on the tree list contained in the Site Design Criteria Manual. The mature canopies may be estimated for existing trees on-site. Any tree not on the tree list may be estimated by a registered landscape architect.
   b. The required percentage of tree canopy required shall be based on the zoning of the property as described in Table 7.D. The required tree canopy area shall apply to either:
      i. The entire development impact area, or
      ii. The entire lot being developed, minus the footprint area of any proposed buildings.
   c. The selected method for calculating the required tree canopy must be explicitly stated on the Landscape Plan.

2. Qualifying Types of Landscaping and Tree Canopy - General
The following may count towards meeting the landscape and tree canopy requirements:
   a. All landscaped areas planted and maintained within the development impact area;
   b. Tree canopy in the adjacent public right-of-way;
Subchapter 7: Development Standards  
7.7 Landscaping, Screening, Buffering, and Fences  
7.7.5 Landscape and Tree Canopy Requirements

- All required mitigation trees may count towards landscaping (including street trees and yard trees) if planted trees have a minimum of two-inches dbh; and
- Plazas and pedestrian circulation areas if constructed with pervious material and not located within the public right-of-way.

3. Qualifying Types of Low Impact Development (LID) Designs

Low Impact Development (LID) options count toward required landscape if installed and maintained pursuant to the North Central Texas Council of Governments Integrated Storm Water Management (iSWM) strategies, including:

a. **Bioswales**: Bioswales are vegetated swales planted with wet tolerant species of plants or ornamental grasses. They transport, store, and allow infiltration of water, and can be designed as a landscape feature. Bioswales are not grassed, but are planted with a variety of plant species that can withstand occasional water inundation for short periods of time.

b. **Grassed Swales**: Grassed swales are designed conveyance devices used to transport water over the surface of the ground to a point of disposal that may be a catch basin, ditch, or water body that will filter, infiltrate, evaporate, and clean the water of total suspended solids and other pollutants. Swales are often appropriate along property lines, public streets, and around buildings.

c. **Bioretention Facilities**: (a.k.a. Rain Gardens): Bioretention facilities are small shallow depressions planted with a variety of native or ornamental plants that can treat small amounts of runoff to improve water quality. Bioretention facilities are generally small collections of flood-tolerant plants planted on a low site area that naturally collects rainfall.

d. **Sand Filters**: Sand filters are depressions, trenches, barriers, or sand lens, constructed of porous mineral matter that improve ground water recharge, to filter, clean and trap waterborne pollutants.

D. Appropriate Planting Materials

1. Ninety percent of plantings shall be from the approved landscape plant list in the Site Design Criteria Manual.

2. In order to ensure biodiversity and protect against tree disease, if 20 or more trees are planted, no one species of tree may exceed 30 percent of the total new trees on the site.

3. At least 50 percent of the trees planted must be native, indigenous, or adapted, as indicated on the approved landscape plant list.

E. Minimum Landscaping for Single-Family Detached Dwelling, Duplex, Townhome, Triplex, and Fourplex Lots

1. All single-family, duplex, and townhome lots must contain a minimum of one large shade tree per dwelling.

2. All triplex and fourplex lots must contain a minimum of one large shade tree per lot.

3. At least 30 percent of the front yard shall be landscaped.

4. At least 20 percent of the rear yard shall be landscaped.
F. Landscape Plan and Point System

In addition to the above standards, the following requirements shall apply to all developments except single-family detached dwelling, duplex, and townhome lots:

1. A landscape plan is required for all developments demonstrating compliance with the required minimum landscape area requirements, at the time of application for whichever of the following comes first:
   a. Specific use permit;
   b. Site plan; or
   c. Building permit.

2. All landscape plans shall be drawn and sealed by a registered landscape architect.

3. All landscape plans shall contain at a minimum the following elements:
   a. A delineation of the property boundary, the development impact area, ESAs, preserved habitat areas, and any easements;
   b. Dimensioned buffer areas, right-of-way screening areas, and parking lot landscaping areas;
   c. Location and tabulation of all proposed plantings, including size at the time of planting and expected canopy area of all trees at maturity, as provided for in the Site Design Criteria Manual;
   d. Tabulation of how the required landscape and buffer points, as described in the sections below, are provided;
   e. Tabulation of the required and provided number of street trees, unless provided on a separate street tree plan at the time of platting; and
   f. Any additional information required to demonstrate compliance with the requirements of this section.

4. Landscape area and tree canopy shall be designed using a combination of elements from the point system described below.
   a. All developments are required to provide a combination of landscaping elements from Table 7.E, totaling at least 30 points and meeting the minimum required percentage of landscape area and tree canopy.
   b. At least two elements must be selected from both Sections A and B in Table 7.E, except as noted below. The remaining points may be selected from Sections A, B, or C.
      i. Right-of-way screening shall be provided between the front-most row of parking and the street. Screening area shall begin at the back edge of either the right-of-way or public utility easement, as necessary to prevent encroachment into those areas. The area dedicated to right-of-way screening must contain sufficient area to plant the proposed screening elements and allow for full growth potential. For developments where parking is not located between the building and the street, any drive aisles located in front of the building are required to be screened by at least one of the elements in Section A in Table 7.E.
      ii. Parking lot landscaping shall be provided internal to the parking lot. Turf grass does not satisfy requirements for planting materials in parking lot landscaping areas. Planting materials permitted include drought-tolerant plants, ornamental...
and/or native grasses, and pervious non-living ground cover installed with a permeable weed-barrier.

iii. If proposed, living walls and living green roofs should be engineered in accordance with building industry standards to ensure building safety and longevity of the plant material. Living green roofs shall be installed in a manner allowing for inspection consistent with applicable OSHA standards, along with all other site landscaping.

<tr>
<td>Butterfly or pollinator gardens that include native milkweed and nectar plants that are provided as part of a designated pedestrian amenity or plaza area and that comprise at least five percent of the required overall landscape area. Butterfly and pollinator gardens are encouraged due to Denton’s designation as a Monarch City.</td>
<td>5</td>
</tr>
</tbody>
</table>

### G. Landscape Installation and Maintenance

1. Landscaping installed as part of the requirements of the landscape standards shall be free from diseases and insects and maintained in a healthy and growing condition at all times.
2. The property owner is responsible for regular weeding, mowing, irrigation, fertilizing, pruning, litter removal, and other maintenance as needed for all plantings.

3. The property owner shall remove and replace any required landscaping as part of an approved landscape plan that dies with other approved living plants from the approved plant list contained in the Site Design Criteria Manual no later than 30 days after: The landscaping has died, or after the postmarked date of written notification from the city, whichever is sooner. The Director or designee may, in his sole discretion, extend this time period due to weather, appropriate planting season, or other events outside of the reasonable control of the property owner.

H. Irrigation
To ensure viability, landscape areas shall be irrigated by one or a combination of the following methods:

1. An automated underground system;
2. A drip irrigation system; and/or
3. The Director or designee may waive the irrigation system requirement if the approved landscape plan includes drought tolerant plants, a xeriscape system, or other approved materials. In such cases, a temporary irrigation system shall be installed and maintained until the plants are established.

I. Permits, Enforcement, and Drought

1. No permits will be issued for any nonresidential and multifamily development until a landscape plan is submitted as part of the site plan, specific use permit, or building permit review process.

2. Prior to the issuance of a certificate of occupancy for any building or structure, all screening and landscaping shall be in place in accordance with the approved landscape plan and applicant shall call for inspection of all landscape installation.

3. An as-built landscape plan shall be provided to the city upon final inspection.

4. Landscaping that dies shall be replaced by the owner with plants of similar variety and size no later than 30 days after the landscaping dies or 30 days after being notified from the Director or designee, whichever occurs first. The Director or designee may in his sole discretion, extend this time period due to weather or other events outside of the reasonable control of the property owner. Replacement trees of similar mature canopy may be replanted with approval from the Director or designee. Replacement trees must be a minimum of three-inch caliper, measured six inches above the ground.

5. A planting extension may be granted by the Director or designee, in his sole discretion, if substantial evidence is presented to indicate abnormal circumstances beyond the control of the owner or his agent. Seasons of drought, extreme heat, or heavy rainfall causing construction delays are examples of abnormal circumstances.

J. Payment in Lieu of Planting
In instances where easements, encumbrances, physical constraints, or life safety requirements limit the ability to plant the required trees needed to meet the minimum tree canopy coverage, an applicant may pay into the tree fund as an alternative. The Director may approve a reduction in minimum tree canopy area of up to 10 percent of the required amount. Any reduction in tree canopy area shall be mitigated by payment into the city’s tree fund based upon the standard...
Subchapter 7: Development Standards
7.7 Landscaping, Screening, Buffering, and Fences
7.7.6 Compatibility Landscape Buffer Requirements

canopy size of a large canopy tree as specified in the Site Design Criteria Manual, assuming each
required tree measures two caliper inches. The payment per inch shall be calculated as provided
in the city’s payment schedule.

7.7.6 Compatibility Landscape Buffer Requirements

Compatibility buffers are required to mitigate or minimize potential nuisances such as noise, light, glare,
dirt, litter, signs, parking, or storage areas and to provide a transition between incompatible uses.

A. Minimum Buffer Required

1. All developing uses, unless exempted in subsection D below, shall be required to install a
buffer as specified in Table 7.F below. All replacement trees included as part of an
approved tree preservation/replacement plan will be credited against trees required in this
subsection.

Table 7.F: Buffer Points and Minimum Width Requirements

</tr>
</tbody>
</table>

2. For mixed-use buildings or development sites, buffers shall be provided based on the most
intense use within such building or development site.
Subchapter 7: Development Standards
7.7 Landscaping, Screening, Buffering, and Fences

7.7.6 Compatibility Landscape Buffer Requirements

B. Buffer Point System

Buffers shall earn the designated point total by selecting a combination of elements as indicated in Table 7.G below. For buffers including more than two listed elements, vegetation may also include a combination of shrubs and trees. No more than one fence or wall type may be used to meet the buffer point requirements.

<table>
<thead>

<td>5</td>
</tr>
</tbody>
</table>

C. Buffer Standards

1. Buffer Location

Buffers shall be located on the outer perimeters of lots or parcels, and shall extend to the limits of the developed area of the site. Buffers shall not occupy any portion of an existing, dedicated, or reserved right-of-way, or be located on public property.

   a. In instances where a required drainage or public utility easement is located within a buffer area, the easement area will count toward the buffer area requirement. No trees or shrubs are allowed within the easement. However, if the remaining buffer area outside the easement is 10 feet or greater, buffer elements are required.

   b. In those instances where a perimeter fence or wall is used in conjunction with a buffer, the perimeter fence or wall shall have a minimum height of six feet, shall be constructed of material permitted by Subsection 7.7.8: Walls, Fences, and Screening, and shall be located on the outside boundary of the required buffer.

2. Buffer Design

   a. The entire buffer area shall be landscaped with ground cover other than turf grass.

   b. Vegetation included in the buffer shall meet the following requirements:

      i. Plant species shall be selected from the approved landscape plant list or native plant list.

      ii. At least 50 percent of the plants shall be evergreen.

      iii. No more than 50 percent of the plants shall be from the same genus.
c. Buffers may contain pedestrian or bike trails to promote connectivity to adjoining properties as long as no required plant material is omitted from the design, and the buffer width is maintained.

3. Designated tree preservation areas occupying a portion of a required buffer satisfy the planting requirements for the portion they occupy.

4. When healthy protected trees are located within the required buffer, the protected trees should be preserved to the greatest extent possible. The Director may determine if additional buffer elements are required to mitigate or minimize potential nuisances based on specific site conditions.

5. When a preserved ESA is located in an area where a buffer would be required, the ESA may count as the required buffer for that portion of the property.

D. Exceptions to Buffer Requirements

1. Buffer requirements may be waived by the Director when the property is an internal site within a master planned development or within a mixed-use development. Buffers shall still be required around the perimeter of the development based on the requirements in this subsection.

2. Buffer requirements shall not apply to the MD district except that the buffer requirements shall apply to multi-family and nonresidential properties adjoining single-family detached, duplex, or townhome uses within the MD district.

7.7.7 Street Tree Requirements

A. Applicability

Applications for development shall propose and be required to plant street trees in accordance with the following standards, and in accordance with the spacing requirements identified in the Site Design Criteria Manual. The Director may approve alternative plans due to special site conditions, which may, for reasons such as safety or existing trees on the lot, affect the ability to meet these regulations. All replacement trees included as part of an approved tree preservation/replacement plan will be credited against the required street trees.

B. Street Tree Plan

A street tree plan shall be submitted with a site plan for multifamily or nonresidential developments and with a final plat for new residential subdivisions. Additionally, street trees should be specifically called out on building permits and landscape plans.

C. Street Tree Location

Street trees shall be located within the street right-of-way or within 10 feet of the street right-of-way.

D. Number and Spacing

1. At least one street tree is required for every 30 feet of street frontage.

2. Street trees are not required to be regularly spaced at 30-foot intervals; however, street trees shall not be planted further apart than 50-foot intervals and not closer than 25 feet apart.

3. Street trees shall be planted in accordance with the spacing requirements from utilities, intersections, and driveways described in the Site Design Criteria Manual.
4. To ensure biodiversity and protect against tree disease, if 20 or more street trees are planted, no one species of tree may exceed 30 percent of the total new street trees. Where multiple species are required within a single block, trees of the same species shall be planted non-contiguously to the greatest extent possible.

E. Tree Planting

1. Tree planting standards shall be in accordance with the Site Design Criteria Manual.
2. Each tree planted shall meet the most current version of American Standards for Nursery Stock ANSI Z60.1, and shall have a minimum size of three-inch caliper measured six inches above grade, unless the trees are planted as replacement for the removal of existing trees, in which case the trees must have a minimum size of two inches dbh. Any tree that does not meet ANSI Z60.1 may be rejected by the Director.

F. Maintenance

1. Property Owner Responsibility
   a. Street trees shall be maintained by the adjoining property owner.
   b. It is the adjoining property owner’s responsibility to water, prune, fertilize, and treat for insect and disease, as may be deemed necessary. All incurred costs are to be borne by the property owner.
   c. It is the adjoining property owner’s responsibility to remove any hazardous or dead tree, as may be deemed necessary. All incurred costs are to be borne by the property owner.

2. Tree Canopy Clearance Height
   All trees shall be maintained by pruning and other necessary care by the adjacent property owner to ensure a minimum clearance of 15 vertical feet from the curb line, 15 vertical feet from an alley, and eight vertical feet from the sidewalk.

3. Removal of Trees or Plantings in Public Right-of-Way
   The city may prune or remove any tree or planting that constitutes a hazard to person or property or for any other reason for trees and plantings located in public right-of-way or in a landscape maintenance easement.

4. Pruning
   All pruning shall be in accordance with the most current version of American National Standards for Tree Care Operations ANSI A300.

5. Tree Replacement
   The city may replace an approved street tree or other planting that has died or may have been removed for any reason, or plant additional street trees deemed appropriate and consistent with available resources.

6. Abuse or Mutilation
   It shall be unlawful for any person to break, destroy, or mutilate any approved street tree, or to set fire or permit any fire to cause damage to any portion of any street tree, or to attach or place any rope or wire, sign, poster or other device on any street tree. Each occurrence shall constitute a distinct and separate offense.
Subchapter 7: Development Standards
7.7 Landscaping, Screening, Buffering, and Fences

7.7.8 Walls, Fences, and Screening

A. Purpose
The purpose of these standards is to provide reasonable regulations for the appearance, location, type, and maintenance of fences and walls to ensure the safety of residents and the high-quality character and appearance of the city.

B. When Required
1. Residential Subdivision Perimeter Fences
A perimeter fence meeting the standards of this section shall be provided around the perimeter of residential subdivisions along all arterials and corridors.

2. Other Fences
Except for residential subdivision perimeter fences, fences are not mandatory; however, when used, all fences or walls shall be constructed in compliance with applicable Municipal Code of Ordinance provisions, and are subject to the standards of this subsection.

C. Perimeter Fence Standards
Perimeter fences surrounding residential subdivisions and nonresidential uses shall comply with the following fencing material standards:

1. Perimeter Fences Adjacent to and Fronting Public Right-of-Way
   a. For new development, allowable materials include only masonry, wrought iron, elevated and sealed wood, or a combination of masonry, wrought iron, and elevated and sealed wood.
   b. For existing development, individual backyard fences along an arterial or collector are allowed to replace the existing originally constructed fence with the same materials or with higher quality materials.

2. Perimeter Fences not Adjacent to or Fronting Public Right-of-Way
   a. Allowed Materials
      i. Wood;
      ii. Wrought iron;
      iii. Masonry;
      iv. Brick;
      v. Vinyl;
      vi. PVC;
      vii. Architectural metal panels; or
      viii. Composite material.
   b. Prohibited Materials
      i. Barbed wire;
D. Fences on Individual Lots

1. Summary Table of Fence Standards
   A summary of the standards for fences on individual lots is provided in Table 7.H, below.

<table>
<thead>
<tr>
<th>Fence Type</th>
<th>Allowed Materials</th>
<th>Prohibited Materials</th>
<th>Maximum Height</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Single-Family Detached, Duplex, Townhome, Triplex, and Fourplex</strong></td>

2. Materials and Design
   a. All fences shall be constructed of materials pursuant to Table 7.H and shall be designed and constructed to allow proper drainage flow. The structural support members shall not be visible from public view. Natural vegetative edge row is also permitted.
   b. Barbed wire, razor wire, or electrified fences may only be used as specified in Table 7.H or to comply with federal or state law.
   c. Fence design and materials shall be installed and maintained consistently for the entire length of the fence.

3. Fence Height
   a. Fence height shall not exceed the maximum height specified in Table 7.H.
   b. Fences over four feet tall in the front yard that extend beyond the front building line shall not exceed 50 percent opacity.

4. Fence Location
   Fences shall not be located within any right-of-way, easement, designated fire lane, or within any required parking spaces. Fences shall not obstruct safe vehicular or pedestrian passage; ingresses or egresses; nor shall they obscure any sight visibility lines or sight visibility triangles contained in the Transportation Criteria Manual.

E. Screening
   Screening is required for the following applications, as specified below:

1. Refuse Container Screen
   a. Containers for commercial solid waste and recycling service shall be screened from public view. Refuse containers that are not visible to the public are not required to be screened.
   b. Containers for solid waste and recycling service for nonresidential, mixed-use, and multifamily development shall be enclosed on all sides with a gated solid screening wall at least six feet in height.
   c. Materials used for container enclosure construction shall be of masonry, metal, wood, vinyl, or composite material that is compatible with the principal structure and shall be maintained in a state of good repair at all times.
d. All refuse and recyclable materials shall be contained within the screened refuse and recyclables area. A concrete or asphalt pad shall be installed beneath the waste collection area.

e. All refuse and recycling collection areas shall meet applicable requirements of the Solid Waste and Recycling Criteria Manual.

2. Mechanical Equipment Screen
   a. All mechanical equipment, including those on roof tops, shall be screened from all rights-of-way and residential uses or zoning districts.
   b. Mechanical equipment shall not be located between the main structure on the site and any street adjacent to a front or side yard, and every attempt shall be made to place such equipment so that it is not visible from adjacent public streets.
   c. Mechanical equipment may be placed in a side yard abutting a side street if there are lot or building constraints from placing it in the other side yard and the equipment is screened with a fence or landscaping.
   d. Any installation of mechanical equipment shall require a building permit.

3. Outside Storage
   Except for industrial uses that are legally permitted, and uses in the LI district, all outside storage shall be screened from all rights-of-way with a fence or wall at least six feet in height. No outside storage shall be stacked in a way that it becomes visible from the public right-of-way.

4. Inoperable or Junk Vehicle
   Unless otherwise provided, all inoperable or junk vehicles that are stored outside an enclosed structure shall be screened from all rights-of-way.

F. Exceptions to Screening Requirements
   Screening requirements may be waived by the Director or his or her designee if an opaque screening of equivalent height or greater exists immediately abutting, and on the opposite side of the lot line.

G. Maintenance
   Fencing and screening installed as part of the requirements in this Section shall be maintained in good working condition at all times. See Subpart A, Municipal Code of Ordinances, Chapter 17: Property Maintenance, Article VIII: Fences.
Subchapter 7: Development Standards

7.8 Access and Circulation

7.8.1 Purpose

The purpose of this section is to reduce the number and length of automobile trips and related greenhouse gas emissions by encouraging walking and bicycling by integrating sidewalks and bicycle routes in new development and redevelopment, and by providing for shorter and more direct routes between many destinations.

7.8.2 Applicability

Except as otherwise provided in this Section 7.8: Access and Circulation, the standards in this section, and the Transportation Design Criteria Manual shall apply as set forth in Section 7.2: Applicability.

7.8.3 Parking and Circulation Plan Required

A. All development, except for single-family, duplex, and townhouse residential uses within previously platted subdivisions shall prepare a parking and circulation plan. The plan shall meet the requirements of the Administrative Criteria Manual, Transportation Design Criteria Manual, and contain the following information:

1. Internal circulation and connectivity to existing street network;
2. Emergency and service vehicle access;
3. Parking layout;
4. Loading operations;
5. Turning radii based on uses;
6. Traffic calming measures where future “cut-through” traffic is likely;
7. Pedestrian, bicycle, and transit facilities; and
8. Other similar issues identified by the Director.

B. The Director may waive the requirement for a circulation plan on a case-by-case basis if a development is expected to have no impact upon circulation or proposes no change in existing circulation patterns. This standard shall not be construed to exempt development that includes additional parking, driveways, or substantial modifications to the existing pedestrian network.

C. A circulation plan shall be submitted with the respective site plan or subdivision application, as appropriate.

7.8.4 Compliance with Specifications

A. Developments shall provide for streets, sidewalks, bicycle, and transit facilities to serve the development in accordance with the requirements of this section, the design standards in the Transportation Design Criteria Manual, and the City Mobility Plan, as amended.

B. All street, sidewalk, bicycle, and transit improvements shall be constructed in accordance with Division II, Materials, and Division III, Methods, of the City’s Standard Specifications for Public Works Construction, North Central Texas Council of Governments (NCTCOG Standard Specifications), as amended by the city.

C. Where any provision of this DDC conflicts with a provision or requirement of the NCTCOG Standard Specifications, the provisions of this DDC shall control.
D. Prior to construction of sidewalks or any other public pedestrian facility for developments where the total cost of pedestrian improvements will exceed $50,000, the developer must show proof of Texas Department of Licensing review and approval for accessibility.

E. For sidewalks or other pedestrian facilities proposed in a TxDOT right-of-way, Texas Department of Licensing review must occur prior to applying for a TxDOT Permit. Proof of review must be submitted with the Permit application.

### 7.8.5 Street Design

All streets shall be designed to comply with the Transportation Design Criteria Manual.

### 7.8.6 Street Connectivity

**A. Purpose**

Street and block patterns shall include a clear hierarchy of well-connected streets that distribute traffic over multiple streets and avoid traffic congestion on principal routes. Within each development, the access and circulation system should accommodate the safe, efficient, and convenient movement of vehicles, bicycles, and pedestrians through the development, and provide ample opportunities for linking adjacent neighborhoods, properties, and land uses consistent with the City’s Mobility Plan, as amended. Local neighborhood street systems are intended to provide multiple, direct connections to and between local destinations such as parks, schools, and shopping.

**B. Applicability**

All developments shall provide the necessary street system to ensure safe and adequate access to each lot within the development in accordance with these standards, the Transportation Design Criteria Manual, and any other applicable City Ordinance.

**C. General Standards**

1. **Alignment**
   
   All streets shall be aligned with existing streets by continuation of the centerline.

2. **Coordination with Surrounding Streets**
   
   a. The street system for each development shall connect with existing, proposed, and anticipated streets within and outside the development and shall extend to the property boundary to provide for adequate access and the safe and effective movement and circulation of traffic.

   b. Street sections from an existing development shall continue to the first intersection of the new development. Requirements concerning block length, land use versus street sections and maximum traffic trips are all applicable in the extension of existing streets into a new development.

   c. If there are no adjacent public streets, subdivisions and/or site plans shall provide for connections along each boundary abutting adjacent vacant land for future connections spaced at intervals not to exceed 1,000 feet for arterials, or 660 feet for other street types, or as otherwise approved.
Subchapter 7: Development Standards

7.8 Access and Circulation

7.8.7 Developer Responsibility for Access and Circulation Improvements

Denton, Texas – Denton Development Code

Print Date: December 12, 2019

d. An extension or connection of a public street and right-of-way to an abutting property shall include the extension or connection of associated bikeways and sidewalks.

3. Temporary Turnarounds

a. The Director and/or the City Engineer may require a temporary turnaround at the end of a roadway extension if needed to facilitate traffic flow or to accommodate emergency vehicles pending the roadway’s connection to other roadways. In cases where a temporary turnaround is required, it shall be designed as a temporary cul-de-sac in accordance with the Transportation Design Criteria Manual.

b. Temporary dead-end streets may be approved by the City Traffic Engineer, based on the criteria set forth below, without a temporary cul-de-sac. If a temporary cul-de-sac is not required, signage shall be posted indicating that the street will be extended in the future is required.

D. Modifications to Street Connectivity

1. In limited circumstances, the City Traffic Engineer may modify the requirements or standards for the extension or connection of a public street from or to an abutting property if such extension or connection is impractical or undesirable because it would:

   a. Require crossing a significant physical barrier or environmentally sensitive area (e.g., watercourses, floodplains, riparian areas, steep slopes; wildfire hazard areas);

   b. Require the extension or connection of a proposed internal public street to an abutting property with existing development whose design makes it unlikely that the street will ever be part of a network of public streets (for example, the abutting existing development has no public streets, or there are no “stubbed-out” street rights-of-way or open corridors between the proposed development site and public streets in the abutting development to accommodate a current or future extension or connection);

   c. Require the extension or connection of a proposed internal public street to an abutting property owned by a government or public utility to which vehicular access is restricted, or other property to which vehicular access is restricted by easement or deed; or

   d. Require the extension or connection of a proposed internal public street to an abutting property that is developed or zoned for a use whose level and type of generated traffic would be incompatible with the proposed development.

2. Any modification that is not considered impractical as listed above shall follow the variance procedures established in Subsection 2.8.1: Variance.

7.8.7 Developer Responsibility for Access and Circulation Improvements

The requirements of this Subsection 7.8.7, shall be subject to the proportionality requirements in TLGC, Section 212.904.

A. Internal Streets

1. If a street is proposed within a development site, the developer shall provide street, bikeway, sidewalk, and other access and circulation improvements in accordance with the standards in this DDC, the Denton Transportation Design Criteria Manual, and the City
Subchapter 7: Development Standards

7.8 Access and Circulation

7.8.7 Developer Responsibility for Access and Circulation Improvements

Mobility Plan, as amended, or another adopted plan and shall dedicate or reserve any required rights-of-way or easements as determined necessary by the city.

2. If a development site includes the proposed corridor of a street designated on an adopted plan, the development shall incorporate a provision of the street into the design of the development, and shall dedicate right-of-way that meets the right-of-way width standards for the street, and an additional five feet to provide for any sloping needed between the pavement and the property line, as determined by the city.

3. All streets shall be provided with curb and gutter along the side abutting the development.

4. If the street is ultimately proposed to serve as a divided arterial street and the development is required to install half of the arterial street, then curb and gutter shall be provided on both sides of the street so as to provide the curb for the future median of the arterial street.

B. Perimeter Streets

1. Unimproved Perimeter Streets
   a. Any development on the perimeter of an unimproved street shall dedicate the right-of-way and improve or reconstruct the street to the same extent as is required for new streets, unless the perimeter street has already been partially improved, in which case the development shall dedicate the additional right-of-way and make the additional street improvements necessary to complete the perimeter street to the classification required.
   b. For the purpose of this subsection, an "unimproved perimeter street" shall mean a perimeter street which does not have curb and gutter or which does not substantially comply with the standards for street construction listed in the Transportation Criteria Manual or NCTCOG Specifications.
   c. Whenever existing streets adjacent to or within a tract are of inadequate width, additional right-of-way in accordance with the Transportation Criteria Manual shall be provided at the time of subdivision.
   d. Any perimeter street required to be improved to meet the specifications for new streets shall be connected to existing off-site streets in accordance with the horizontal design specifications in the Transportation Criteria Manual.
   e. The City Engineer may authorize a developer to not improve a street and instead pay the full impact fee in cases where the Engineering Department has determined that the entire street will need to be improved in the near future.

2. Phasing of Perimeter Paving Improvements
   a. Perimeter paving improvements are required to be constructed adjacent to the property which is final platted.
   b. In a development where final platting will occur in phases, the developer may choose to perform the required perimeter paving improvements adjacent to each phase as it is platted, or may choose to perform all perimeter paving improvements at one time with the platting of a latter phase as long as the paving is constructed prior to or with the phase of the development that includes 50 percent of the lots in the entire development and the subject perimeter road is not the sole access to the property.
c. The developer will be required to enter into a perimeter paving postponement escrow agreement.

3. **Exemptions to Perimeter Street Requirements**

The provisions requiring the improvement of existing unimproved perimeter streets to city specifications for new streets shall not apply to the following:

a. A plat for a single-family detached, duplex, or townhome residential lot, where such lot is not part of a larger general scheme of development or subdivision of land containing more than one residential lot;

b. A development that abuts less than 100 feet of an existing perimeter street, where the existing off-site perimeter street on either side of the abutting perimeter street is not improved to city specifications and there are no proposals or plans for improvements to the perimeter street on either side of the abutting perimeter street as evidenced by the City's Capital Improvement Plan or plats approved or pending approval;

c. A development that:
   i. Is not required or does not propose to extend a city water line to the property to serve the development; and
   ii. Is located more than 8,000 feet from an existing city water line, measured along a straight line from the nearest boundary of the development to the nearest water line; or
   iii. A state or federal highway.

4. **Rural/Suburban Streets**

Upon recommendation of the City Engineer, a required perimeter street meeting standards outlined in the Transportation Criteria Manual for a rural/suburban street may be approved whenever:

a. The required perimeter street is for a residential development in rural district, as shown in the Future Land Use Element of the Comprehensive Plan;

b. The development is not located in an area where the pattern or intensity of development would create the need for improved urban drainage facilities in the foreseeable future; and

c. There are no existing or proposed improved drainage facilities, as shown by the City’s Capital Improvement Plan or by plats approved or pending approval, in such proximity to the development that would connect to or receive the drainage waters from the required street drainage improvements.

C. **Improvements to Existing Off-Site Streets**

1. **Fewer than 100 Daily Vehicle Trips**

Developments generating fewer than 100 vehicles per day are not required to make pavement improvements to off-site streets, but shall be required to participate in the cost of any proposed signal improvements at the nearest intersection in accordance with the Transportation Design Criteria Manual if signalization in the future is expected.
2. **Between 100 and 1,000 Daily Vehicle Trips and Less than 100 Trips per Hour**
   a. Developments expected to generate at least 100 but less than 1,000 vehicle trips per day and less than 100 vehicle trips per hour at full development shall improve or repair connecting off-site streets as necessary to provide a safe and adequate paved surface for the amount and type of traffic generated by the development.
   b. The off-site street improvements or repairs need not meet the specifications for new streets, but shall be made to a standard determined to be necessary by the City Engineer to provide for the safe movement of vehicular traffic generated by the development, pursuant to a distress rating performed by the City Engineer in accordance with the Transportation Design Criteria Manual.
   c. Off-site street improvements shall not be required to extend beyond the nearest existing intersecting arterial or collector street as indicated on the roadway component of the Mobility Plan.
   d. Such developments accessing an arterial street shall provide right turn lanes into each entrance and left turn lanes into each entrance that left turns are possible.
   e. Such developments shall be required to participate in the cost of any proposed signal improvements at nearby intersections determined by the City Engineer in accordance with the Transportation Design Criteria Manual if signalization in the future is expected.

3. **More than 1,000 Daily Vehicle Trips and More than 100 Trips per Hour**
   a. Developments generating 1,000 or more vehicle trips per day or 100 or more vehicle trips per hour shall provide offsite street improvements as determined by the City Engineer in accordance with an approved Transportation Impact Analysis.
   b. Offsite improvements may include but are not limited to installation of turn lanes, pavement widening, pavement reconstruction, signal construction, installation of pavement markings, signage or equitable participation in the cost of any of the listed types of improvements.
   c. Such improvements shall be required to the extent that the effects of the increased traffic the development generates will not reduce level of service of surrounding streets rather than allowing absorption of existing street capacity on a first come first serve basis.

D. **Payment in Lieu of Improvements**
   1. Where any development would be required by this DDC to improve an existing unimproved street to less than its full width and the city’s approved Capital Improvement Plan proposes improvement of the existing perimeter street to city specifications within three years of the date the required improvements are to be undertaken, the development may elect, in lieu of making the required perimeter street improvements, to pay to the city prior to filing the plat, the total construction cost, excluding engineering and design cost, of the required street improvements.
   2. The amount to be paid shall be determined by the City Engineer, based on the actual cost of providing for the improvements, as shown in the most recent public bids for the same or similar type street improvements.
Subchapter 7: Development Standards

7.8 Access and Circulation

7.8.8 Transportation Impact Analysis (TIA)

Denton, Texas – Denton Development Code

3. If the money paid to the city is not used for the required improvements within five years of payment, the funds shall be returned to the person making the payment.

4. In the event that the plat is not filed until after the city has entered a contract with a contractor to construct the subject street improvements, the payment by the development is no longer required.

7.8.8 Transportation Impact Analysis (TIA)

A TIA shall be required for any proposed site development in accordance with the thresholds established in the Transportation Design Criteria Manual.

7.8.9 Driveways and Access

A. Applicability

No person shall construct, reconstruct, replace, relocate, alter, enlarge, improve or perform any work on or make use of any driveway for any property within the city, except in accordance with the requirements of this section, the Transportation Design Criteria Manual, and any other relevant standard in this DDC.

B. Compliance with Specifications

1. All driveway improvements shall comply with the design specifications, as contained in the Transportation Design Criteria Manual.

2. All driveway improvements shall be constructed in accordance with Division II, Materials, and Division III, Methods, of the City's Standard Drawings and Specifications for Public Works Construction, North Central Texas Council of Governments (NCTCOG Standard Specifications), as amended by the City. Where any provision of this DDC conflicts with a provision or requirement of the NCTCOG Standard Specifications, the provisions of this DDC shall control.

3. All driveways shall be designed, installed, located and constructed in accordance with the approved specifications, plans, conditions and requirements of the permit issued for the property and the requirements of this section.

4. No certificate of occupancy shall be issued for any building on any property for which a permit is required, until the construction, improvements, alterations or other work covered by the permit is completed in accordance with the permit issued, the requirements of this section or the provisions of any other applicable ordinance.

5. Where no building permit was required in connection with the requested permit, no driveway on the property for which the permit was issued shall be used until and unless the work is completed in accordance with the permit and this DDC.

C. General Standards

1. Every lot shall have sufficient access providing adequate means of ingress and egress for emergency vehicles and for those needing access to the property for its intended use.

2. All driveway entrances and other openings onto streets shall be constructed so that:
   a. Vehicles may safely enter and exit the property;
   b. Interference with the free and convenient flow of traffic in abutting or surrounding streets is minimized; and
c. Shared driveways are provided to the maximum extent feasible to minimize the number of access points to streets.

3. Unobstructed, direct, and convenient access for vehicles to and from a public street shall be provided for all off-street parking spaces. Access from any parking area to a public street shall be designed to allow vehicles to enter and exit in forward drive.

4. Driveways shall align with existing driveways and "T" intersections on the opposite side of the street, or shall be offset in accordance with the Transportation Design Criteria Manual.

5. Driveway approaches shall be paved with concrete surfacing constructed in accordance to City Standard Drawings and Specifications.

D. **Vehicle Maneuvering**

1. Except for single-family detached or duplex uses, groups of more than five parking spaces per lot shall be provided with adequate aisles or turn-around areas so that all vehicles may enter the street in a forward manner.

2. Except for single-family detached or duplex uses, more than five parking spaces shall be served by a driveway designed and constructed to facilitate the flow of traffic on or off the site, with due regard to pedestrian and vehicle safety, and shall be clearly and permanently marked and defined.

3. Two-way and one-way driveways shall meet minimum and maximum widths established in the Transportation Design Criteria Manual.

4. Parking lots exceeding 100 spaces shall be designed with a clear hierarchy of circulation. The hierarchy shall consist of:
   
   a. Major entry driveways without parking spaces; then
   
   b. Major circulation drives with little or no parking; then
   
   c. Parking aisles for direct access to parking spaces.

*Figure 7.8-A: Vehicle Maneuvering*
E. **Minimum Driveway Clearances to Street Corners**  
Driveways located near intersections shall maintain the corner clearances as indicated in the Transportation Design Criteria Manual.

F. **Separation of Driveways**  
Driveways shall be separated in accordance the Transportation Design Criteria Manual.

G. **Driveway Widths and Grades**  
Driveway widths and grades shall be designed in accordance with the Transportation Design Criteria Manual.

H. **Access to Collector Streets**  
Access to collector streets for commercial, office, or industrial development is required and shall be designed and constructed in accordance with the standards provided in the Transportation Design Criteria Manual.

1. Driveway access to single-family detached or duplex dwelling units is not permitted.

2. Single-family and duplex lots developed prior to October 1, 2019, with exclusive frontage on a collector street and no alley, may be developed with a circular drive. Such driveways shall be designed and constructed in accordance with the standards for circular drives provided in the Transportation Design Criteria Manual.

I. **Access to Arterial Streets**  
Access to an arterial street shall not be permitted unless there is no other reasonable means of providing safe access to the property.

1. No development shall be allowed access to an arterial street if property excluded from the development could have been used to provide reasonable access to a lesser classified street or if the property has been previously subdivided in violation of state law or City Ordinance, if access could have been provided to a lesser street except for such unapproved subdivision of the property.

2. Existing commercial or industrial lots created prior to October 1, 2019, by legal subdivision procedures with exclusive frontage on an arterial street may take access to the arterial in accordance with the access standards in the Transportation Design Criteria Manual.

3. Existing single-family detached and duplex lots created prior to October 1, 2019, by legal subdivision procedures with exclusive frontage on an arterial street may be developed with a circular drive. Such driveway shall be designed and constructed in accordance with standards for circular drives provided in the Transportation Design Criteria Manual.

4. When driveway access to an arterial street is the only reasonable means of providing safe and adequate access to the property as determined by the City Engineer, the driveway design, number of driveways, location and construction shall be in accordance with the Transportation Design Criteria Manual.

J. **Access to Freeways**  
1. Direct access to freeway main lanes shall only be provided by ramps and interchanges.

2. Direct access to freeway frontage roads shall be prohibited in the vicinity of ramp connections and shall be subject to Texas Department of Transportation requirements.

3. Direct access to frontage roads may be provided in accordance with the standards for access to arterial streets in the Transportation Design Criteria Manual and shall be approved by the Texas Department of Transportation.
K. **Temporary Driveways for Agricultural Purposes**
   A driveway that does not meet the minimum requirements of this DDC may be permitted for undeveloped property used for agricultural purposes under the following conditions.
   1. No building or parking lot permit is being applied for;
   2. The driveway will be located a minimum of 50 feet from adjacent intersections;
   3. The driveway will not be paved;
   4. The driveway will be a minimum of 15 feet wide, but no more than 24 feet wide;
   5. All drainage structures associated with the driveway will be sized to carry a 100-year storm; and
   6. If applicable, the driveway meets Texas Department of Transportation Design Criteria.

L. **Residential**
   Residential driveways shall meet minimum and maximum widths established in the Transportation Design Criteria Manual.

M. **Closing Driveways**
   1. Where the closing or relocating of one or more existing driveways or portions thereof is necessary to comply with this DDC or a curb cut permit issued, access shall be closed by the removal of the existing driveway approach and the installation of curb and gutter along the gutter line of the street, all in accordance with city specifications.
   2. If there is no existing curb and gutter on the street, the driveway shall be closed in the manner specified by the City Engineer.
   3. Where the closing or relocating of one or more existing driveways or portions thereof, drainage patterns must be maintained or improved to meet the standards of this DDC and vegetation shall be installed to meet the standards of this DDC.

### 7.8.10 Cross-Access between Abutting Development

A. All nonresidential development shall be designed to allow for cross-access to adjacent properties to encourage shared parking and shared access points on public or private streets. This may be established by one or more of the following:
   1. Connecting streets and drives;
   2. Coordinating parking structure and parking lot entrances;
   3. Common service/delivery areas;
   4. Legally shared parking structures and parking lots;
   5. Linkages between parking lots and parking structures; or
   6. Providing shared driveways for two adjacent lots from public rights-of-way to minimize curb cuts.

B. When cross-access is deemed impractical by the Director and/or City Engineer on the basis of topography, the presence of natural features, or vehicular or pedestrian safety factors, this requirement may be waived provided that appropriate bicycle and pedestrian connections are provided between adjacent developments or land uses.

C. Cross-access and maintenance agreements associated with such interconnections shall be recorded with the County Clerk and provided, if necessary, with the associated subdivision or development application.
7.8.11 Pedestrian and Bicycle Circulation

A. Applicability
All developments shall provide for the pedestrian and bicycle facilities necessary to serve pedestrian/bicycle traffic to, from, or across the development in accordance with the Transportation Design Criteria Manual and the Bicycle/Pedestrian component of the Mobility Plan.

B. Exemptions
Pedestrian and bicycle improvements required by this Subsection 7.8.11 shall not apply to the following:

1. Except for Planned Developments, along streets fronted by a subdivision in the RR zoning district provided that:
   a. All lots are platted and have a minimum lot area of five acres; and
   b. The lots do not have access from a street that serves more than 200 total vehicle trips per day.
2. For a replat of property zoned for single-family detached residential use if the preceding plat covering the same property did not require sidewalks or bicycle facilities and a zoning change to a district other than single-family detached residential use is not anticipated.
3. The development is not required to make perimeter street improvements in accordance with Subsection 7.8.7.
4. Improvements that result in an increase in the floor area of the existing building or buildings by less than 10 percent;
5. Improvements will not require the construction of additional parking spaces as required in Subsection 7.9.2, Applicability.

C. Types of Facilities

1. Sidewalk
   a. Intended for the use of pedestrian traffic only and located outside of the street pavement.
   b. Sidewalks are required along residential, collector, and arterial streets.
   c. Required geometry, locations and materials shall be in accordance with the Transportation Design Criteria Manual.

2. On-Road Bicycle Path
   a. Intended for the use of bicycle traffic only and required within the street pavement on arterial streets and where shown in accordance with the Bicycle/Pedestrian Component of the Mobility Plan.
   b. Required geometry, location and materials shall be in accordance with the Transportation Design Criteria Manual.

3. Off-Road Combination Pedestrian and Bicycle Path
   a. Intended for the use of bicycle and pedestrian traffic, located outside of the street pavement.
b. These facilities are required along residential, collector, arterial, and freeways and where shown in accordance with the Bicycle/Pedestrian Component of the Mobility Plan.

D. On-Site Pedestrian Walkways

1. On-Site Pedestrian Walkways Required
   All development shall provide an on-site system of pedestrian walkways with a minimum width of five feet designed to provide direct access and connections to and between the following:
   a. The primary entrance or entrances to each building, including pad site buildings;
   b. Any sidewalks, walkways, or multi-use paths on adjacent properties that extend to the boundaries shared with the development. Interconnected walkways should be designed with similar and/or complementary details, colors, finishes, etc.;
   c. Any parking areas intended to serve the development;
   d. Any sidewalk system along the perimeter streets adjacent to the development;
   e. Any public transit station areas, transit stops, park and ride facilities, or other transit facilities on-site or along an adjacent street.
   f. Any adjacent residential neighborhoods (planned or existing) if sidewalk stubs are planned or existing; and
   g. Any adjacent or on-site public park, trail system, open space, greenway, or other public or civic use or amenity.

2. On-Site Pedestrian Walkway Design
   Required on-site pedestrian walkways shall:
   a. Be a minimum of five feet in width;
   b. Be distinguishable from areas used by vehicles using one or more of the following techniques:
      i. Changing paving material, patterns, and/or paving color, but not including the painting of the paving material;
      ii. Changing paving height;
      iii. Decorative bollards;
      iv. Raised median walkways with landscaped buffers;
   c. Have adequate lighting for security and safety;
   d. Be conveniently and centrally located on the subject property;
   e. Be ADA accessible; and
   f. Not include barriers that limit pedestrian access between the subject property and adjacent properties.

E. Pedestrian Access through Parking Areas

1. All parking lots that contain more than 100 parking spaces shall include pedestrian walkways through the parking lot to the principal building entrance or a sidewalk providing access to the principal building entrance. At a minimum, walkways shall be provided for
Subchapter 7: Development Standards
7.8 Access and Circulation
7.8.11 Pedestrian and Bicycle Circulation

2. Parking lots with 100 spaces or more shall be divided into separate areas and divided by landscaped areas or walkways at least 10 feet in width, or by a building or group of buildings.

F. Pedestrian Access through Parking Garages
Pedestrian walkways shall be provided through parking garages from the parking area to the abutting public right-of-way and/or to the primary entrance of the building served. Pedestrian walkways shall not use vehicle entrance or exit driveways from the parking area to a public right-of-way.

G. Crosswalks
1. Crosswalks shall be identified in consultation with the City Traffic Engineer to meet the specific need and functionality of pedestrian movement at a particular location.
2. The type and size of the crosswalk shall be determined based on federal and state guidelines described in the Manual on Uniform Traffic Control Devices (MUTCD).

H. Pedestrian Transportation Impact Analysis
For developments proposed within one-half mile of a public elementary, secondary school, or a University, a pedestrian TIA will be required in accordance with the Transportation Design Criteria Manual to determine the appropriate size and location of sidewalks and bicycle facilities to serve those uses.

I. Required Bicycle Access
1. All new development, except individual lot development of single-family detached, duplex, or townhome dwellings, shall be served by an internal bicycle circulation system (including shared roadway lanes, widened outside roadway lanes, bike lanes, shoulders, and/or separate bike paths) that permits safe, convenient, efficient, and orderly movement of bicyclists among the following origin and destination points within the development:
   a. Bicycle parking facilities or areas near the primary entrance(s) of principal buildings (or the buildable area of lots, for subdivisions), as well as any adjacent transit station areas, transit stops and shelters, public parks, greenways, schools, universities, community centers, and shopping areas;
   b. Any designated or planned bus stops and shelters; and
   c. Recreation facilities and other common use area and amenities.
2. The development’s internal bicycle circulation system shall not conflict with the safe, convenient, efficient, and orderly movement of vehicles between the development’s internal origin and destination points and adjacent parts of an existing or planned external, community-wide bicycle circulation system, as well as any adjacent transit stations, bus stops and shelters, public parks, trails, greenways, schools, community centers, and shopping areas.
3. Sidewalks shall not be used to satisfy the bicycle circulation requirement.
4. Required bike lanes shall be provided within the right-of-way of the street unless the City Engineer determines that location within the right-of-way is not practicable or preferable—in which case, alternatives may be allowed by the Director and/or the City Engineer.
J. Use and Maintenance of Pedestrian Connections

1. Restrictions on Use
   Sidewalks, walkways, and trails are intended to provide pedestrian access. Vehicle parking, garbage containers, merchandise storage or display, utility boxes and poles, signs, trees, and other obstructions shall not encroach into the required minimum clear width of any required sidewalk, trail, walkway, or other pedestrian way. Pedestrian amenities including bollards and trash receptacles for pedestrians are exempt from this requirement.

2. Maintenance
   Sidewalks, trails, and walkways required by this title shall be maintained in usable condition throughout the year.

7.8.12 Public Transit

The requirements of this Subsection 7.8.12 shall be subject to the proportionality requirements in TLGC, Section 212.904.

A. Applicability
   All developments shall provide for the transit facilities necessary to serve pedestrian/bicycle traffic to, from, or across the development in accordance with the Transportation Design Criteria Manual and the Bicycle/Pedestrian component of the Mobility Plan. This shall include major and minor bus stops and park and ride facilities, the specifications for which are in the Criteria Manual.

B. Location of Bus Stops
   1. Major bus stops shall be provided on arterials or collector streets at intersections of arterial streets, or arterial and collector streets but no closer than one-half mile apart.
   2. Minor bus stops shall be provided on arterials and collector streets at the intersections of collectors and intersections, which include a local street if there is not an arterial or collector intersection existing or proposed within a one-half mile distance along the street.
   3. Bus stops shall be located on the approaching side of the intersection.
   4. The City Engineer will determine which and how many quadrants of an intersection a bus stop will be required.

C. Pull Outs
   Pull out lanes will be required in conjunction with any bus stops along any street where the posted speed limit is more than 40 miles per hour.

D. Payment in Lieu of Improvements
   Where a development would be required by this DDC to provide a bus stop or stops, and the proposed development is not on an existing bus route, the developer may in lieu of providing signage, shelter and seating provide cash payment equal to the cost of such items to the city for future construction of the facility. In these instances, the developer shall still provide the additional street pavement for a pull out if required, a concrete loading area, and a concrete pad adjacent to the sidewalk for a future shelter or seating in accordance with the Transportation Design Criteria Manual.

E. Participation Funding for Park and Rides
   Developments generating 1,000 vehicle trips per day or more that are located within or adjacent to MR or MD zoning district may participate in the funding of the proposed park and ride for that
Subchapter 7: Development Standards
7.9 Parking and Loading

7.9.1 Purpose

This section is intended to provide off-street parking and loading facilities in proportion to the generalized parking, loading, and transportation demands of different land uses. This section is also intended to help protect the public health, safety, and general welfare by:

A. Avoiding and mitigating traffic congestion;
B. Providing necessary access for service and emergency vehicles;
C. Providing for safe and convenient interaction between motor vehicles, bicycles, and pedestrians;
D. Encouraging multi-modal transportation options and enhanced pedestrian safety;
E. Providing flexible methods of responding to the transportation and access demands of various land uses in different areas of the city;
F. Reducing stormwater runoff, reducing heat island effect from large expanses of pavement, improving water quality, and minimizing dust pollution; and
G. Avoiding and mitigating the adverse visual impact of large concentrations of exposed parking.

7.9.2 Applicability

A. General Applicability

Except as otherwise provided in this Section 7.9: Parking and Loading, the standards in this Section, and the Transportation Design Criteria Manual shall apply as set forth in Section 7.2: Applicability, with the following modifications:

1. New Development
   a. A new principal structure is constructed; or
   b. An existing principal structure is relocated on the lot.

2. Expansions and Enlargements

   All expansions or enlargements shall be considered together with any other expansions or enlargements during the previous two-year period.
   a. The entire site shall comply with this Section 7.9 when:
Subchapter 7: Development Standards
7.9 Parking and Loading
7.9.3 Calculations

i. The number of multifamily dwelling units on a property is increased by 25 percent or more; or
ii. Ten or more additional multifamily dwelling units are created within the MD zoning district; or
iii. The square footage of a nonresidential building is expanded or enlarged by more than 50 percent; or
iv. The addition or expansion of one or more structures or uses that requires specific use permit approval.

b. The portion of the site being expanded and/or improved shall comply with this Section 7.9 when:
   i. Except for within the MD zoning district, the number of dwelling units on a property is increased by 10 percent or 10 dwelling units, whichever is less; or
   ii. The square footage of a nonresidential building is expanded or enlarged by between 10 and 50 percent; or
   iii. Parking area improvements or expansions including reconfiguring, reconstructing, or other similar projects, but not including resurfacing or restriping.

3. Change of Use
   Off-street parking and loading shall be provided pursuant to this section for any change of use that increases the minimum number of required vehicle parking or loading spaces by more than 25 percent above those that currently exist on the site or on permitted off-site locations, except that changes of use in the MD Zoning District shall not be required to provide additional parking or loading for nonresidential uses.

B. Exemptions from Minimum Parking Requirements
   Minimum required off-street parking spaces indicated in Table 7.9-I: Minimum Required Off-Street Parking, shall not apply to the following:
   1. Properties containing less than 5,000 square feet of lot area, except for single-family detached, duplex, and townhome dwelling uses.
   2. Expansions or enlargements that cumulatively increase the square footage of an existing structure or use by less than 10 percent of the gross floor area or 1,000 square feet, whichever is less, provided that the amount of existing off-street parking remains the same. For purposes of this standard, cumulative shall mean any construction, expansions, or enlargements initiated after October 1, 2019.
   3. Residential development with 10 or fewer dwelling units in the MD zoning district as identified on the Official Zoning Map of City, as amended.
   4. Non-residential development in the MD zoning district as identified on the Official Zoning Map of City, as amended.

7.9.3 Calculations

A. All square-footage based parking and loading requirements shall be computed on the basis of gross floor area of the subject use. Structured parking within a building shall not be counted in such computation.
Subchapter 7: Development Standards
7.9 Parking and Loading
7.9.4 Amount of Off-Street Parking Required

B. When measurements of the number of required spaces result in a fractional number, any fraction shall be rounded up to the next higher whole number.

C. The following types of parking spaces shall not count towards the maximum parking requirement:
   1. On-street parking spaces provided pursuant to Subsection 7.9.5C;
   2. Designated accessible parking;
   3. Designated carpool parking;
   4. Designated fleet vehicle parking; and
   5. Structured parking, underground parking, and parking within, above, or beneath the building(s) it serves.

7.9.4 Amount of Off-Street Parking Required

A. Minimum Required Parking
   Each development or land use subject to this section pursuant to Subsection 7.9.2, shall provide at least the minimum number of off-street parking spaces required by Table 7.9-I: Minimum Required Off-Street Parking, unless otherwise provided in this DDC.

B. Maximum Parking Allowed
   In no case shall any use or development provide more than 125 percent of the minimum number of off-street parking spaces required by Table 7.9-I: Minimum Required Off-Street Parking, unless otherwise provided in this DDC.

C. Vehicle Stacking Space Requirements
   All uses with drive-through facilities and those requiring stacking spaces shall comply with the minimum stacking space requirements in the Transportation Design Criteria Manual.

D. Outdoor Sales, Display, Leasing, and Auction Areas
   All uses with outdoor sales, display, leasing, and/or auction facilities shall provide one parking space per 1,000 square feet of outdoor sales, display, leasing, or auction area in addition to the minimum parking requirement prescribed in Table 7.9-I: Minimum Required Off-Street Parking.

| Table 7.9-I: Minimum Required Off-Street Parking |

E. **Director Determination**
For uses in Table 7.9-I: *Minimum Required Off-Street Parking*, that reference this subsection and uses not expressly listed in Table 7.9-I: *Minimum Required Off-Street Parking*, the Director is authorized to:

1. Apply the minimum off-street parking space requirement specified in Table 7.9-I: *Minimum Required Off-Street Parking*, for the listed use that is deemed most similar to the proposed use; or
2. Establish the minimum off-street parking space requirement by reference to standards in parking resources published by the National Parking Association, American Planning Association, Institute of Traffic Engineers (ITE) or other acceptable sources of parking data; or
3. Establish the minimum off-street parking space requirement based on local or national best practices; or
4. Establish the minimum off-street parking space requirement based on a demand study prepared by the applicant. Such a study shall be prepared according to Subsection 7.9.4E.

F. **Accessible Parking**

### 7.9.5 Parking Alternatives
The Director may approve parking alternatives that result in a cumulative adjustment not to exceed 50 percent of the minimum or maximum off-street parking spaces required by Table 7.9-I: *Minimum Required Off-Street Parking*, in accordance with the following standards.

A. **Infill Development**

1. **Single-Family and Duplex Development**
For single-family and duplex dwellings infill development, the minimum number of required parking spaces may be reduced to two parking spaces per dwelling unit if the reduction is consistent with the character of the existing area and the criteria in paragraph 7.9.5A.3 are met.

2. **Mixed-Use and Non-Residential Development**
For mixed-use and non-residential infill development, the minimum number of required parking spaces may be reduced by up to 10 percent, provided the criteria in paragraph 7.9.5A.3 are met. Such reduction in parking spaces shall not require approval of a minor modification in Section 2.8.2.
3. **Qualifying Criteria**
   a. Granting the reduction will not cause excessive congestion, endanger public safety, substantially reduce parking availability for other uses or otherwise adversely impact the neighborhood, or that such lesser amount of parking will provide positive environmental or other benefits to the users of the lot and the neighborhood, including specifically, among other benefits, assisting in the provision of affordable housing units;
   b. Granting the reduction does not impose an undue financial administrative burden on the city;
   c. For every vehicular parking space reduced by means of this standard, four bicycle parking spaces shall be provided. These bicycle spaces are in addition to the minimum required bicycle parking spaces.

B. **Shared and/or Off-Site Parking**
   The Director may approve shared parking and/or off-site parking subject to the standards established in 7.9.4E.

1. **Location**
   a. For nonresidential uses, every shared and/or off-site parking space shall be located within 500 feet (measured along a legal pedestrian route) of the entrance to each building for which the shared and/or off-site parking is provided. If valet parking is provided, shared and/or off-site parking spaces may be located up to 1,000 feet from the entrance.
   b. For residential uses, every shared and/or off-site parking space shall be located within 300 feet (measured along a legal pedestrian route) of the entrance to each building for which the shared and/or off-site parking is provided.
   c. Shared and/or off-site parking is not permitted for single-family detached, duplex, and townhome dwelling uses.

2. **Ineligible Activities**
   Accessible parking (ADA parking) shall not be permitted off-site.

3. **Public Parking Facilities**
   Public parking facilities within 500 feet of the subject property may be counted toward up to 25 percent of the total amount of required off-street parking.

4. **Documentation Required**
   a. The owners of record involved in the joint use of shared parking facilities shall submit written documentation of the continued availability of the shared parking arrangement to the Director for review.
   b. The Director may approve the shared parking arrangement if the Director determines that the documentation demonstrates the continued availability of the shared parking facility for a reasonable period of time. No zoning or use approval shall be issued until the Director has approved the shared parking documentation.
Subchapter 7: Development Standards
7.9 Parking and Loading
7.9.5 Parking Alternatives

c. If the shared parking arrangement is later terminated or modified and the Director determines that the termination or modification has resulted in traffic congestion, overflow parking in residential neighborhoods, or threats to pedestrian, bicycle, or motor vehicle safety, the property owners involved in the shared parking arrangement may be held in violation of this DDC.

C. **On-Street Parking**

On-street parking may be counted toward the minimum number of required off-street motor vehicle parking spaces on a one-to-one basis, subject to the following standards:

1. On-street parking may not be used to meet the minimum off-street parking requirements for single-family detached, duplex, or townhouse uses;
2. On-street parking that is subject to residential parking permit restrictions or other time restrictions shall not be used to meet any off-street minimum parking requirements for any use;
3. Only those street parking spaces abutting any lot line of the subject property, and with 22 linear feet of lot frontage located between the imaginary extension of the side property lines into the street right-of-way, may be counted.
4. Areas in front of or within ten feet of a driveway, within 20 feet of a street intersection or within five feet of a fire hydrant shall not be counted toward required parking.
5. Each on-street parking space may only be counted once toward the parking requirements of the abutting lot, regardless of the number of individual buildings or tenants on the lot.
6. No development or use approved with an on-street parking credit shall be considered nonconforming if the on-street parking is later removed by city action and the remaining off-street parking does not meet the minimum off-street parking requirements of this section.
7. On-street parking spaces shall be available for general public use at all times. No signage or actions limiting general public use of on-street spaces shall be permitted unless otherwise prohibited by City Ordinance.

D. **Proximity to Transit**

Except for single-family detached, duplex, and townhome dwelling uses, the minimum number of required off-street parking spaces required in Table 7.9-I: *Minimum Required Off-Street Parking*, for uses within one-quarter mile of a fixed transit station, measured radially in a straight line, shall be reduced by 10 percent.

E. **Affordable and Senior Housing**

The minimum number of required off-street parking spaces required in Table 7.9-I: *Minimum Required Off-Street Parking*, shall be reduced by 25 percent for affordable residential and senior housing developments that satisfy the following:

1. Have a minimum of 10 dwelling units; and
2. At least 25 percent of the dwelling units are restricted for purchase or occupancy at below-market rate levels approved by the Director; or
3. At least 75 percent of the dwelling units are restricted for purchase or occupancy by persons 65 years of age or older.
F. **Bicycle or Motorcycle Spaces**

Any existing or proposed parking facility may utilize, on a substitution basis, on-site parking spaces for motorcycle or bicycle spaces that are in addition to those spaces required by Subsection 7.9.8: *Bicycle Parking*.

1. Such bicycle spaces shall be raised a minimum of six inches from grade of the adjacent parking facility.
2. One parking space may be omitted for each four bicycle spaces provided.
3. One parking space may be omitted for each two motorcycle spaces provided.
4. Bicycle spaces shall measure at least two feet by seven feet and shall be located in groups of four and shall be of the following three types:
   a. A rack that secures the frame, or
   b. An enclosed bike locker, or
   c. A fenced, covered, locked, or guarded bike storage area.
5. Motorcycle spaces shall measure four feet by eight feet and shall be provided with adequate unobstructed maneuvering areas to permit easy access to the space.
6. In no instance shall credit for motorcycle or bicycle parking or combination thereof exceed five percent of the total required parking spaces.

G. **Modification of Minimum Parking Requirement by Director**

If an applicant submits a parking demand study pursuant to Subsection 7.9.4E demonstrating that anticipated off-street parking demand for the proposed development, use, or combination of uses will be less than that calculated from Table 7.9-I: *Minimum Required Off-Street Parking*, and the Director determines that the information and assumptions used in the study are reasonable and that the study accurately reflects anticipated off-street parking demand for the proposed development, use, or combination of uses, the Director may authorize a reduction in required off-street parking spaces based on that study.

H. **Modification of Maximum Parking Requirement by Director**

No use shall provide off-street parking spaces in an amount exceeding the maximum established in Subsection 7.9.4B unless approved by the Director based on the following:

1. The proposed development has unique or unusual characteristics that typically does not apply to comparable uses, such as high sales volume per floor area or low parking turnover, that create a parking demand that exceeds the maximum ratio;
2. The applicant submits a demand study pursuant to Subsection 7.9.4E; and
3. Any parking provided above the maximum required in 7.9.4B is constructed with approved pervious surfaces.

7.9.6 **Off-Street Parking Layout and Design**

A. **Dimensions of Parking Spaces and Drive Aisles**

All parking and maneuvering areas shall be constructed according to the following dimensional standards:

1. If the applicant can provide different acceptable standards based on the Institute of Transportation Engineers (ITE) standards (current edition), or other professionally recognized sources, the Director may approve alternative standards pursuant to the minor...
modification process outlined in Subsection 2.8.2: Minor Modification. However, any alternative standards must also meet the intent and purpose of this DDC.

2. The length of a parking stall may be reduced to 16 feet allowing the front of vehicles to overhang the required parking space by two feet; provided that:
   a. The curb is no more than four inches in height; and
   b. The front of the parking space is located adjacent to a landscaped area or sidewalk that is at least six feet in width.
Subchapter 7: Development Standards
7.9 Parking and Loading
7.9.6 Off-Street Parking Layout and Design

3. The minimum parking stall dimensions are illustrated in the figure below. Each letter in the figure is keyed to a corresponding dimensional requirement in Table 7.9-J.

Note: [1] Minimum drive aisle widths may be modified subject to approval of the Fire Marshal.

B. Compact Car Parking
Up to five percent of the total parking spaces required may be designated for compact cars. Minimum dimensions for compact spaces shall be eight by 16 feet. Such spaces shall be signed or the space painted with the words “Compact Car Only.”

C. Surface Materials
All parking areas, aisles, turn-arounds and driveways shall be paved with concrete, asphalt or other approved surface, constructed to standards on file in the office of the City Engineer.

1. Single-family residential uses in the RR and R1 zoning districts may be surfaced with a permeable material, such as crushed rock, to the standards on file in the office of the City Engineer.
Subchapter 7: Development Standards

7.9 Parking and Loading

7.9.6 Off-Street Parking Layout and Design

2. Permanent surfacing shall be installed prior to receiving a certificate of occupancy.
3. Parking areas may be surfaced with a dust-free permeable material.
4. Parking spaces provided above the minimum number of required parking spaces pursuant to Table 7.9-I, Minimum Required Off-Street Parking, shall be designed in accordance with iSWM standards described in the iSWM Water Quality Technical Manual.
5. Stall markings and/or other vehicular control devices shall be provided to the specifications of the City Engineer.

D. Location of Parking Areas

1. Single-Family Detached, Duplex, and Townhome Dwellings
   Off-street parking for single-family detached, duplex, and townhome dwelling uses shall only be allowed in a garage or on an approved surface. All other off-street parking within a required front setback area shall be prohibited.

2. All Other Uses
   Off-street parking areas located between the front building façade and the adjacent street frontage is prohibited, unless the parcel satisfies all of the following standards:
   a. It is located outside of the MN, MD, and MR zoning districts;
   b. It adjoins either side of an Arterial, as defined in the City Transportation Plan;
   c. It does not adjoin the following corridors:
      i. Fort Worth Drive (between Carroll Boulevard and Eagle Street);
      ii. Dallas Drive (between Teasley Boulevard and Eagle Street);
      iii. Elm Street (between University Drive and Eagle Street);
      iv. Locust Street (between University Drive and Eagle Street); and
   d. The development satisfies the general regulations for parking in front of buildings as set forth in Subsection 7.9.6E.

3. Infill Development
   Except as prohibited by paragraph 7.9.6D.2.c, infill parcels meeting the requirements of Subsection 7.9.6E are exempted from prohibitions against parking in front of buildings.

E. Front Parking Design Standards

1. Development with 100 or Fewer Off-Street Parking Spaces
   Development with 100 or fewer off-street parking spaces located between the front building façade and the adjacent street frontage shall comply with the following:
   a. Development shall be limited to no more than two rows of parking between the front building façade and the adjacent street frontage.
   b. Landscaping and screening shall be provided per Section 7.7, Landscaping, Screening, Buffering, and Fences, unless the development includes pad sides pursuant to paragraph 7.9.6E.2 below.

2. Development with More than 100 Off-Street Parking Spaces
   Development with more than 100 off-street parking spaces located between the front building façade and the adjacent street frontage shall comply with the following:
Subchapter 7: Development Standards
7.9 Parking and Loading
7.9.7 Loading Areas and Drive-Throughs

- Pad sites are reserved to be located at corners where two streets intersect and at both corners of the main drive into the development. For purposes of this provision, the “main drive” is the drive that receives the majority of vehicular traffic. When required, the Transportation Impact Analysis shall determine the main drive;

- Corner pad site buildings shall be built to the front setback line; however, additional setback may be allowed to accommodate outdoor dining or a plaza with a focal point that includes seating, public art, and a water feature; and

- Pad sites not located on a corner shall not exceed two rows of parking between the front building façade and the adjacent street frontage.

F. Parking Area Lighting
   See Section 7.11.4.

G. Pedestrian and Bicycle Circulation
   See Section 7.8.11.

7.9.7 Loading Areas and Drive-Throughs

A. Number and Size of Loading Berths Required
   1. All commercial and industrial uses shall provide loading berths pursuant to the table below.
   2. The Director may approve a variation from the required loading space requirements if warranted by the building use.
   3. The minimum turning radius for truck traffic areas shall be 40 feet.

<table>
<thead>
<tr>

<td>14 feet wide x 50 feet long x 14 feet high</td>
</tr>
</tbody>
</table>

B. Location of Off-Street Loading Areas
   1. Except for properties in the LI and HI zoning districts, required off-street loading spaces shall not be permitted in any front yard or in any required street side yard.
   2. Loading areas shall be separated from pedestrian areas.
   3. Off-street loading spaces may occupy all or any part of a required rear yard where visibility from public streets and windows of neighboring buildings will be minimized.
   4. Loading areas shall not interfere with parking lot maneuvering areas.
   5. City streets or rights-of-way shall not be utilized for loading and unloading purposes.
C. **Drive-Throughs**

Any establishment that has a drive-through use is subject to the requirements in the Transportation Design Criteria Manual and the following:

1. Drive-through uses shall provide sufficient stacking area to ensure that public rights-of-way are not obstructed;
2. Drive-through uses shall be built as an integral architectural element of the principal structure and shall use the same materials as those used in the principal structure. Drive-through structures and facilities separate from the principal structure are prohibited; and
3. Drive-through uses shall be located to the rear or side of the principal structure, and shall be buffered on the rear and side lot lines as required in Subsection 7.7.6, *Compatibility Landscape Buffer Requirements*.

---

### 7.9.8 Bicycle Parking

A. **Minimum Required Bicycle Parking**

Unless exempted by Subsection 7.9.8B, all multifamily and nonresidential development shall provide off-street bicycle parking spaces at a ratio of one bicycle parking space per 20 vehicle parking spaces, with no development providing less than two bicycle parking spaces.

B. **Bicycle Parking Reduction**

Subject to the approval of the Director, the number of bicycle parking spaces may be reduced because of building site characteristics.

C. **Bicycle Parking Location and Design**

1. **Location**

   Required off-street bicycle parking spaces shall be provided with bike racks, bike lockers, or similar parking facilities that comply with the following standards:
   a. Located in a visible, well-lit ground-level area;
   b. Conveniently accessible to the primary entrances of a development’s principal building(s);
   c. Does not interfere with pedestrian traffic; and
   d. Is protected from conflicts with vehicular traffic.

2. **Multiple Building Developments**

   For developments with multiple buildings, bicycle parking shall be distributed evenly among principal buildings.

3. **Design**

   a. Bicycle parking areas shall not be used for any other purposes.
   b. Bicycle parking spaces shall be installed using standard requirements that are effective for storage and are permanently anchored to a hard surface.

---

### 7.10 Site and Building Design

#### 7.10.1 Purpose

This Section 7.10 is intended to:
Subchapter 7: Development Standards
7.10 Site and Building Design
7.10.2 Applicability

A. Promote high-quality development and construction;
B. Ensure compatibility between residential neighborhoods and adjacent commercial and mixed-use areas;
C. Mitigate negative impacts created by the scale and bulk of large buildings;
D. Provide variety and visual interest in the exterior design of buildings;
E. Enhance the streetscape and diminish the prominence of garages and parking areas;
F. Promote an environment that is friendly toward multiple modes of transportation and accommodates varying ages and abilities; and
G. Protect and enhance property values and encourage further investment and reinvestment.

7.10.2 Applicability

A. General Applicability
   Except as otherwise provided in this Section 7.10: Site and Building Design, the standards in this
   section and the Site Design Criteria Manual shall apply as set forth in Section 7.2: Applicability,
   with the following modifications:

1. New Construction
   a. A new principal structure is constructed; or
   b. An existing principal structure is relocated on the lot.

2. Expansions and Enlargements
   a. The entire site and buildings and/or dwelling units shall comply with this Section 7.10 when:
      i. The number of multifamily dwelling units on a property is increased by more than 25 percent; or
      ii. Ten or more additional multifamily dwelling units are created within the MD zoning district; or
      iii. The square footage of a nonresidential or mixed-use building is expanded or enlarged by more than 50 percent; or
      iv. The addition or expansion of one or more structures or uses that requires specific use permit approval.
   b. The portion of the building and/or site being expanded and/or improved shall comply with this Section 7.10 when:
      i. Except for within the MD zoning district, the number of dwelling units on a property is increased by between 10 and 25 percent or 10 dwelling units, whichever is less; or
      ii. The square footage of a nonresidential or mixed-use building is expanded or enlarged by between 10 and 50 percent.

B. Exemptions
   1. Expansion of a single-family detached dwelling, duplex, or townhome within the permitted building coverage.
   2. Expansions and enlargements of a multifamily or nonresidential use less than the greater of 1,000 square feet or 10 percent of the building’s square footage.
Subchapter 7: Development Standards

7.10 Site and Building Design

7.10.3 Single-Family Detached, Duplex, Townhome, Triplex, and Fourplex Dwelling Site and Building Design

3. Conversion of a residential structure to a nonresidential use where no site improvements are required.

C. Conflicting Standards
Where the site and building design standards in this Section 7.10 conflict with the design standards applicable to an overlay district or PD, the standards in the overlay district or PD shall govern.

D. Alternative Compliance
Alternatives to these standards may be approved by the Director if the applicant demonstrates that the proposed alternative:

1. Achieves the intent of the subject standard to the same or better degree than the subject standard;
2. Advances the goals and policies of the Comprehensive Plan and this DDC to the same or better degree than the subject standard;
3. Results in benefits to the community that are equivalent to or exceed benefits associated with the subject standard; and
4. Imposes no greater impacts on adjacent properties than would occur through compliance with the specific requirements of this DDC.

7.10.3 Single-Family Detached, Duplex, Townhome, Triplex, and Fourplex Dwelling Site and Building Design

A. Applicability
This subsection applies to any single-family detached dwelling, duplex, townhome, triplex, or fourplex.

B. Orientation
Primary entrances shall face a public right-of-way to the maximum extent practicable. The Director may approve alternative orientations for primary entrances facing common green spaces or other common areas such as courtyards, plazas, and gathering spaces.

C. Open Space Requirements
Any development consisting of 10 or more duplex, townhome, triplex, and fourplex dwelling units shall set aside a minimum of five percent of the land area as open space for the use and enjoyment of the development’s occupants and users. Such open space shall comply with the requirements of Subsection 7.10.4C.
D. **Architectural Variety**

The same elevation shall not be used within any 10 lot grouping as defined by the two adjacent lots on either side of the subject property and the five lots immediately across the street from those same lots. This requirement shall not apply across a right-of-way dividing two adjacent blocks:

*Figure 7.10-A: Architectural Variety*

![NO symbol] ![NO symbol]
E. **Building Mass and Form**

Buildings shall incorporate at least three of the following design features to provide visual relief along the front of the residence:

1. Dormers;
2. Gables;
3. Recessed entries, a minimum of three feet deep;
4. Covered front porches;
5. Cupolas;
6. Architectural pillars or posts; and/or
7. Bay window with a minimum 24 inches projection.

![Building Mass and Form Diagram](image)

**Figure 7.10-B: Building Mass and Form**

F. **Garage Design**

1. Where alleys are present, garages shall be accessed from the alley to the maximum extent practicable.
2. For front-entry garages:
   a. The garage shall be offset a minimum of three feet from the building; and
   b. The total width of the garage door(s) shall not occupy more than 40 percent of the ground-floor building frontage.
3. Side- and rear-entry garages are encouraged and may encroach into setbacks pursuant to Table 3.7-A: Authorized Exceptions to Setbacks.

G. **Building Transparency/Windows**

1. Within the front façade (front adjoining a public or private right-of-way where the entrance/address is located), windows and doors (excluding garage doors) shall comprise at least 15 percent of the wall area.
2. Windows shall be provided with trim or shall be recessed. Windows shall be provided with an architectural surround at the jamb. Shutters, trims, or false windows shall not count toward the minimum requirement.
H. Building Materials
   1. Exterior finishes shall be of wood, masonry, or cementitious siding.
   2. Masonry shall comprise a minimum of 25 percent of the exterior finishes of the total
      building elevation.
   3. Other building materials may be approved by the Director provided they meet the intent of
      this section.

I. Minimum Pervious Area in the Front Yard
   Each lot shall maintain a minimum 30 percent pervious area between the principal structure and
   the front property line, and shall be landscaped pursuant to Section 7.7: Landscaping, Screening,
   Buffering, and Fences. Pavers shall not count toward required pervious area. The minimum
   pervious area may be reduced by 10 percent for side-entry garages.

7.10.4 Multifamily Site and Building Design

A. Applicability
   This subsection applies to any multifamily development, except those that are part of a mixed-use
   building.

B. Site Design and Orientation
   1. Primary Building Access
      Primary building access shall be oriented towards the adjacent street, and building access
      shall be provided from the street and/or sidewalk.

   2. Multi-Building Developments
      For developments with three or more buildings, the buildings shall be arranged using one
      or more of the following techniques:
      a. Organize units around a central courtyard that maintains a consistent side yard
         setback between units along the street frontage;
      b. Locate the buildings on the corner of an adjacent street intersection or entry point to
         the development to frame the corner;
      c. Provide common gathering spaces between buildings; and/or
      d. Other site improvements as approved by the Director that do not conflict with this
         DDC.
3. **Location of Trash Storage and Mechanical Equipment**
   Trash storage areas, mechanical equipment, and similar areas shall not be visible from public view, and shall not be located between the building and the street.

C. **Open Space Requirements**
   Any development consisting of 10 or more dwelling units shall set aside a minimum of eight percent of the land area as open space for the use and enjoyment of the development’s occupants and users. Open space serves numerous purposes, including preservation and protection of natural areas and features, providing opportunities for passive and active recreation, enhancing management of stormwater runoff to protect water quality and reduce flooding, and mitigating the heat island effect of developed areas. This requirement does not apply to multifamily developments in the MD zoning district.

1. **Design of Open Space**
   Such open space shall meet the following design standards:
   a. To the maximum extent practicable, required open space shall be located and configured to include, protect, or enhance natural resource or hazard areas (including but not limited to lakes, ponds, streams, flood hazard areas, and drainage ways);
   b. Areas covered by shrubs, bark mulch and other ground covers that do not provide a suitable surface for human use may not be counted toward this requirement;
   c. Required open space areas shall be compact and contiguous unless a different configuration is needed to continue an existing trail or accommodate preservation of natural features;
   d. Required open space shall be located to be readily accessible and useable by occupants and users of the development. Where possible, a portion of the open space should provide focal points for the development through prominent placement or easy visual access from streets; and
e. If the development site is adjacent to existing or planned parks, greenways, or other public open space, required open space shall, to the maximum extent practicable, be located to adjoin, extend, and enlarge the park, greenway, or other public open space.

2. **Ownership, Management, and Maintenance of Open Space**
   
a. Required open space area shall be managed and maintained as permanent open space through one or more of the following options:
   
i. Open space may be held in common ownership by the owner(s) of the development, who will be responsible for managing and maintaining the land for its intended open space purposes.
   
ii. Open space areas may be conveyed to a property owners’ or homeowners’ association that holds the land in common ownership and will be responsible for managing and maintaining the land for its intended open space purposes.
   
iii. Open space areas may be conveyed to a third-party beneficiary such as an environmental or civic organization that is organized for, capable of, and willing to accept responsibility for managing and maintaining the land for its intended open space purposes.
   
iv. Open space areas may be dedicated to the public and conveyed to the city or other public agency that is organized for, capable of, and willing to accept responsibility for managing and maintaining the land for its intended open space purposes.
   
b. Easements may be established on those parts of individually-owned lots including open space areas that require the areas to be managed consistent with their intended open space purposes and prohibit any inconsistent future development. Any options involving private ownership of required open space area shall include association by-laws, deed restrictions, covenants, or other legal instruments that ensure continued use of the land for its intended open space purposes and provide for the continued and effective management, operation, and maintenance of the land and facilities. Such instruments shall be approved by the city as sufficient to comply with this standard before or in conjunction with approval of any subdivision approval for the development, or any construction plan approval for the development (if no subdivision approval is required).
   
c. Responsibility for managing and maintaining open space areas lies with the owner of the land comprising the areas. Failure to maintain open space areas in accordance with the approved development shall be a violation of this DDC. Identification of who bears responsibility for managing and maintaining open space areas shall be shown on any recorded subdivision plat for the development or any approved construction plan for the development (if no subdivision approval is required).

D. **Architectural Requirements**

1. **Limitation on Same Building Design**
   
For projects with 30 dwelling units or greater, or more than three buildings, the same exterior design may not be used for greater than 30 units and/or more than three buildings in a project. A variety of compatible exterior materials’ use and type, building styles, massing, composition, and prominent architectural features, such as door and window openings, porches, rooflines, shall be used.
2. Entries
   
a. Primary building entries shall be denoted through the use of distinctive architectural elements and materials, such as ornamental glazing or paving, over doors, porches, trellises, or planter boxes or as otherwise identified in this section.

b. In the mixed-use zoning districts, residential units abutting a public street shall be designed with entries and windows facing the street. In all cases, buildings shall be designed to distinguish the private realm from the public realm through such features as, but not limited to, elevation change or fencing.

E. Building Mass and Form
1. General
   
a. Buildings shall be designed to prevent the appearance of straight, unbroken lines in the horizontal and vertical surface. Buildings shall have no more than 50 continuous feet without a horizontal and vertical break of at least three feet. Such breaks may include recesses, projections, windows, roofs, alcoves, porticoes, awnings, and other architectural features to provide visual interest and relief.

b. Façades shall be broken up to give the appearance of a collection of smaller structures. Elements including but not limited to balconies, recessions, and projections may be used to articulate individual units or collections of units.

c. Buildings visible from the public right-of-way or private street system shall include changes in relief such as columns, cornices, bases, fenestration, and fluted masonry, for at least 15 percent of the exterior wall area.

d. Stairwells shall not be a prominent feature of any building façade, and shall be shielded from view from public and private streets to the maximum extent practicable.

e. Any building constructed with a flat roof shall contain a distinctive finish consisting of a cornice, banding, or other architectural termination.

2. Additional Requirements in Mixed-Use Zoning Districts
   In the mixed-use zoning districts, the following additional requirements apply:

a. Buildings shall be designed to reduce apparent mass by including a clearly identifiable base, body, and top, with horizontal elements separating these components. The component described as the body must constitute a minimum of 50 percent of the total building height;

b. The first floor of multifamily buildings shall be a minimum of 12 feet in height; and

c. Stoops and higher finish-floor elevations are encouraged on the street-facing elevation for multi-family buildings. Buildings that provide stoops and/or finish-floor elevations that rise at least two feet above the sidewalk may measure building height from the beginning of the first floor, instead of from grade.

F. Accessory Structure/Garage
1. Garages, carports, storage units, and other accessory structures (but not including leasing offices, club houses, or recreation centers) shall not be located along the portion of the building that fronts the public or private street.

2. Garages shall not occupy more than 40 percent of the total building frontage. This measurement does not apply to garages facing an alley or courtyard entrance.
3. Garages, carports, storage units, and other accessory structures visible from the public right-of-way, private street system, and/or adjacent residential properties shall include at least three of the following:
   a. Façade modulation of at least six inches for every 30 feet of wall length;
   b. Multiple building materials (e.g., brick, fieldstone, limestone, marble, granite, textured block, architectural pre-cast concrete, cementitious siding, wood clapboard siding, wood beaded siding, or stucco);
   c. Multiple surface textures (e.g. rough, striated, imprinted, etc.) or patterns; or
   d. Separation in roof pitch, variation in direction of roof pitches, inclusion or dormers, or other variation on roof design.

G. Building Transparency/Windows
1. Within the front façade (front adjoining a public or private right-of-way where the entrance/address is located), windows and doors (excluding garage doors) shall comprise at least 25 percent of the wall area.
2. For all other façades that face a public or private street or right-of-way (excluding alleys), windows and doors (excluding garage doors) shall comprise 15 percent of the wall area.
3. Windows shall be provided with trim or shall be recessed. Windows shall not be flush with exterior wall treatment. Windows shall be provided with an architectural surround at the jamb.
4. Use of false door or window openings shall be defined by frames, sills, and lintels.

H. Building Materials
1. An amount equal to 40 percent of the total net exterior wall area of each building elevation, excluding gables, windows, doors and related trim, shall be masonry.
2. Other building materials may be approved by the Director provided they meet the intent of this section.

7.10.5 Nonresidential and Mixed-Use Buildings

A. Applicability
1. This subsection applies to any nonresidential or mixed-use development.
2. These standards do not apply to industrial uses in the LI or HI zoning districts where the building or structure is located:
   a. Farther than 250 feet from the ultimate right-of-way of an arterial, collector, or interstate roadway; or
   b. Behind another building or structure that screens the building or structure from the adjacent arterial or interstate roadway.
3. Alternatives to these standards may be approved by the Director if:
   a. The building is not accessed by pedestrians, such as warehouses and industrial buildings without attached offices, automotive service uses such as gasoline sales and automobile sales; or
   b. The development is on an infill site; or
c. The design results in a higher-quality product that exceeds the minimum standards in this subchapter.

**B. Site Design and Orientation**

1. The primary entrance of a building shall have a clearly defined, highly visible customer entrance with distinguishing features such as a canopy, portico, or other prominent element of the architectural design.
2. Buildings shall have their primary orientation toward the street rather than the parking area.
3. Buildings that are within 30 feet of the street shall have an entrance for pedestrians from the street to the building interior.
4. Trash storage areas, mechanical equipment, loading areas, and similar areas shall not be visible from public view, and shall not be located between the building and the street.

**C. Multi-Building Developments**

For developments with three or more buildings, the buildings shall be arranged using one or more of the following techniques:

1. Organize units around a central courtyard that maintains a consistent side yard setback between units along the street frontage;
2. Locate the buildings on the corner of an adjacent street intersection or entry point to the development to frame the corner;
3. Provide outdoor dining and/or common gathering spaces between buildings; and/or
4. Other site improvements as approved by the Director that do not conflict with this DDC.

*Figure 7.10-D: Multi-Building Development*
D. **Building Mass and Form**
   Buildings shall have no more than 50 continuous feet without a horizontal and vertical break of at least three feet. Such breaks may include recesses, projections, windows, roofs, alcoves, porticoes, awnings, and other architectural features to provide visual interest and relief.

E. **Building Transparency/Windows**
   1. Use of glass for displays and to allow visual access to interior space is permitted. Buildings may not incorporate glass for more than 70 percent of the building skin.
   2. Windows shall be provided with trim. Windows shall not be flush with exterior wall treatment. Windows shall be provided with an architectural surround at the jamb.

F. **Building Materials**
   1. Fronts and street sides of buildings visible from the public right-of-way shall be non-reflective and shall be of wood, masonry, stucco, EIFS (Exterior Insulation Finishing System), or cementitious siding.
   2. Masonry shall comprise a minimum of 50 percent of the exterior finishes of the total building elevation.
   3. A maximum of 10 percent of architecturally finished metal can be used as an accent material or for embellishments on buildings classified as commercial uses, except that in the LI and HI districts along an arterial, architecturally finished metal can be used for up to 50 percent of the building façade.
   4. Other building materials may be approved by the Director provided they meet the intent of this section.

G. **Additional Standards in the MN and MD Districts**
   1. **Applicability**
      a. These standards apply to nonresidential and mixed-use development in the MN and MD districts.
      b. These standards are in addition to those required for nonresidential and mixed-use development in Subsection 7.10.5.
      c. Where these standards conflict with the standards in Subsection 7.10.5, these standards shall apply.
2. Site Design and Orientation
   a. At least 60 percent of the street frontage shall have buildings within 10 feet of the front property line.
   b. A building shall be setback not more than 15 feet from the public right-of-way unless the area is used for pedestrian activities such as plazas or outside eating areas.
   c. Buildings that are open to the public and are within 30 feet of the street shall have an entrance for pedestrians from the street to the building interior. This entrance shall be designed to be attractive and functional, be a distinctive and prominent element of the architectural design, and shall be open to the public during all business hours.
   d. Buildings shall incorporate lighting and changes in mass, surface, or finish emphasizing entrances.

3. Building Mass and Form
   a. The top floor of any building rising over four stories shall incorporate a distinctive finish, consisting of a cornice or other architectural termination.
   b. Buildings shall be designed to reduce apparent mass by including a clearly identifiable base, body, and top, with horizontal elements separating these components. The component described as the body must constitute a minimum of 50 percent of the total building height.

4. Building Transparency/Windows
   a. Any ground floor wall facing a main street, plaza, or other public open space shall contain at least 50 percent of the wall area facing the street in display areas, windows, or doorways.
   b. At least 20 percent of each upper floor facing a main street, plaza, or other public open space shall contain windows or doorways.
   c. Windows shall allow views into working areas or lobbies, pedestrian entrances, or display areas.
   d. Walls facing side streets shall contain at least 25 percent of the wall space in windows, display areas, or doors, provided:
i. Blank walls within 30 feet of the side street are prohibited.

ii. Up to 40 percent of the length of the building can be exempted from this standard if oriented toward loading or service area.

5. Building Materials
   a. A maximum of 10 percent of architecturally finished metal can be used as an accent material or for embellishments on buildings classified as nonresidential uses.
   b. Buildings shall include changes in relief such as columns, cornices, bases, fenestration, and fluted masonry, for at least 15 percent of the exterior wall area.

6. Streetscape
   Hardscape (paving material) shall be used to designate pedestrian-oriented areas. Sample materials could be pavers, scored and colored concrete, grass-crete, or combinations of the above.

7.10.6 Building Height in Transition Areas

A. Any portion of a building within 50 feet of a property zoned in a Residential District, as provided in Table 3.1-A: Zoning District Designations, shall not exceed the maximum building height allowed in the abutting Residential District. Portions of buildings within 50 feet are not eligible for additional building height that may otherwise be allowed with a specific use permit.

B. Any portion of a building between 50 feet and 100 feet of a property zoned in a Residential District, as provided in Table 3.1-A: Zoning District Designations, shall not exceed the maximum building height allowed in the abutting Residential District, plus 15 feet. Portions of buildings between 50 feet and 100 feet are not eligible for additional building height that may otherwise be allowed with a specific use permit.

C. Any portion of a building beyond 100 feet from a property zoned in a Residential District, as provided in Table 3.1-A: Zoning District Designations, shall not exceed the allowed building height of the zoning district where the building is located. Portions of buildings beyond 100 feet are eligible for additional building height that may otherwise be allowed with a specific use permit.

D. Building features referenced in Table 3.7-B: Authorized Exceptions to Height Standards, shall be designed to minimize visibility from adjacent residential districts and fit within the allowed building height of the zoning district where the building is located, to the maximum extent practicable.

Figure 7.10-F: Building Height in Transition Areas
7.11 Exterior Lighting

7.11.1 Purpose
The purpose of this Section 7.11 is to ensure that vehicle circulation areas, pedestrian areas, parking areas, public gathering spaces, and other areas have adequate outdoor illumination to provide safety at night, while limiting the negative impacts of outdoor lighting nuisance on adjacent properties.

7.11.2 Applicability

A. Generally
Except as otherwise provided in this Section 7.11: Exterior Lighting, the standards in this section shall apply as set forth in Section 7.2: Applicability, with the following modifications:

B. Exemptions
The following types of exterior lighting are exempt from the requirements of this section, provided they shall not create glare to motorists or result in light trespass onto adjacent properties:

1. Holiday Lighting
   a. Temporary winter holiday lighting illuminated from November 1 to March 1 is allowed in mixed-use and nonresidential zoning districts;
   b. Residential zoning districts may use holiday lighting any time of year; and
   c. Holiday lighting shall not exceed one foot-candle at any property line, except where the property line is adjacent to walkways, driveways, and streets.

2. Single-Family Detached, Duplex, and Townhouse Uses
   a. Soffit or wall-mounted lights permanently attached to the dwelling shall be exempt from the exterior lighting regulations, provided the lights do not exceed the height of the eave; and
   b. Such lights shall be downcast and directed away from abutting properties.

3. Mixed-Use, Corridor, and Other Nonresidential Zoning Districts
   a. Twinkle lighting located on trees, bushes, or landscape features; and
   b. Bistro lighting.

4. Special Events
   Special events that have been issued a temporary use permit.

5. Lighting Required by FAA or FCC
   Lighting required by the Federal Aviation Administration or the Federal Communications Commission.

6. Underwater Lighting
   Underwater lighting used for the illumination of swimming pools and decorative water fountains shall not be subject to this Section 7.11, though they must conform to all other provisions of this DDC.
7. **Lighting Required by Building Code**
   Any lighting that is required by the building code for life safety purposes such as stairway lighting, walkways, and building entrances, shall not be prohibited by this section, but shall be subject to the lighting standards.

### 7.11.3 Standards Applicable to All Development

The following standards apply to all development unless specifically exempted in Subsection 7.11.2B.

A. Except in the RR, R1, R2, and R3 zoning districts, sidewalks, internal pedestrian paths, and bicycle paths shall be lit with full cutoff shielded and downcast fixtures no more than 16 feet tall and providing consistent illumination of at least one foot-candle on the walking surface.

B. Lighting along public rights-of-way and landscaped areas for a specific development shall be designed uniformly.

C. Light spillover onto adjacent properties shall not exceed one foot-candle at any property line, except where the property line is adjacent to walkways, driveways, and streets or in nonresidential developments comprised of multiple lots, and when state and federal regulations apply.

### 7.11.4 Parking Area Lighting

A. **Pole Height**
   Parking area lighting fixtures shall not exceed 25 feet in height.

B. **Shielding of Lights**
   1. Parking area lighting shall be full cutoff shielded and downcast fixtures.
   2. The source of light on any fixtures on a nonresidential use adjacent to a single-family, duplex, or townhouse use shall be shielded from sight.
   3. Lighting fixtures for canopies or similar structures shall be flush-mounted or recessed above the lower edge of the canopy.

C. **Illuminance**
   1. Maintained average illuminance values in commercial and multifamily parking areas shall be no less than two foot-candles.
   2. The acceptable uniformity ratio for lighted areas shall comply with recommended ranges adopted by the International Engineering Society of North America (IESNA) for low, medium, and high activity areas.

### 7.11.5 Building Lighting

A. **Location and Direction**
   1. Except for decorative lighting, building-mounted lights shall be installed so that all light is directed downward.
   2. Wall packs and similar lights shall be prohibited unless the cutoff angle effectively eliminates glare from beyond the property lines.

B. **Decorative Lighting**
   Decorative lighting shall be permitted provided all light is cast against the building surface.
Subchapter 7: Development Standards
7.12 Solid Waste and Recycling Design Standards
7.11.6 Street Lighting

Denton, Texas – Denton Development Code

Street Lighting

A. Street lights shall be installed for every new development, at the developer’s expense to protect the public health, safety, and welfare of the site and/or surrounding neighborhoods.

B. All fixtures shall be compatible with the character of the neighborhood and city as a whole.

C. All street lighting fixtures shall be full cut-off and designed to direct lighting below a 90-degree horizontal plane extending from the lowest point of the light source.

D. All street lighting fixtures shall be designed and constructed to minimize or eliminate the direct visibility of the light source and so that they do not cast or reflect light on adjacent properties.

7.12 Solid Waste and Recycling Design Standards

7.12.1 Purpose

The purpose of this section is to provide basic criteria and standards for the development and maintenance of solid waste and recycling container enclosures.

7.12.2 Applicability

Except as otherwise provided in this Section 7.12: Solid Waste and Recycling Design Standards, the standards in this section, and the Solid Waste Criteria Manual shall apply as set forth in Section 7.2: Applicability.

7.12.3 General Design Standards

A. Non-residential on-site solid waste and recycling storage facilities (container enclosures) shall be located on each platted lot of non-residential property, except as otherwise provided within the Solid Waste Criteria Manual, and shall be constructed and maintained by the property owner or developer, and made available for use by the City of Denton Solid Waste Department and/or commercial recycling service provider. For purposes of these solid waste requirements, "non-residential development" includes any attached residential dwellings of five or more dwelling units.

B. Nonresidential on-site solid waste and recycling storage facilities (container enclosures) shall be available for the storage of all municipal solid waste and recyclables generated for each platted property. The city reserves the ability to determine which, if any parcels or areas (e.g., Downtown Square, strip centers, multi-family residential, etc.) may be recommended for shared container or other alternative service. Container enclosures shall be of adequate size to contain all solid and liquid wastes and recyclables generated on the property, which may include, but are not limited to, municipal solid waste, recyclables, grease and oils, process by-products and wastes, hazardous waste, medical waste, and any special wastes, contained as necessary to meet disposal standards published by the city. The container enclosures shall be constructed to such capacity prescribed by the Solid Waste Criteria Manual for non-residential solid waste and recycling facilities. Enclosures are not required for non-residential uses where the dumpster locations cannot be seen from the public right-of-way.

7.13 Electric Standards

7.13.1 Purpose

The purpose of this section is to provide basic criteria and standards for the development and maintenance of electric transmission lines, distribution lines, substations, interchanges, and switch stations. These reasonable regulations serve to preserve the integrity of adjacent impacted lands and to prevent imminent destruction of property or injury to persons, while ensuring that these mitigating actions conform to the comprehensive plan and DDC. These regulations further serve to protect the health, safety, and general welfare of the public and to accomplish the orderly and practical development of electric utilities, and to achieve the following broader objectives:

A. To protect and promote the public health, safety and general welfare of the community.

B. To define and establish the minimum clearances in an effort to safeguard persons against electrical hazards during the installation, operation, maintenance and replacement of electric supply lines, electric substations, interchanges, and electric switch stations.

C. To adopt the most current National Electrical Safety Code, as amended (NESC) and the most current North American Electric Reliability Corporation Critical Infrastructure Protection, as amended (NERC, CIP).

7.13.2 Applicability

Except as otherwise provided in this Section 7.13: Electric Standards, and the standards in this section shall apply as set forth in Section 7.2: Applicability.

7.13.3 General Design

A. All applicable electric industry practices and guidelines set forth in the National Electrical Safety Code, as it may be hereafter amended (NESC) are hereby adopted and shall apply to electric transmission lines, distribution lines, substations, interchanges, and switch stations. To the extent that this DDC conflicts with standards adopted in the NESC, the more restrictive standards shall apply.

B. All applicable protection standards set forth in the North American Electric Reliability Corporation Critical Infrastructure Protection Standards (NERC CIP), in its most current version, are hereby adopted and shall apply to electric transmission lines, distribution lines, and substations. To the extent that this DDC conflicts with standards adopted in the NERC CIP, the more restrictive standard shall apply.

C. Adequate consideration shall be given to design criteria to include route evaluation, topography, drainage, size in relation to setbacks, roadway access, distances to residences/schools/businesses, existing trees, unique ecology, and sensitivity to cultural resources in conformance with the DDC, NERC CIP and NESC standards, Electric Service Standards, and other local, State, and/or Federal law.

D. A development plat shall be required for proposed substation, interchanges, and switch station sites in accordance with the requirements established in TLGC, Ch. 211; Subchapter B, Municipal Code of Ordinances; and the DDC.

E. Unobstructed and adequate space shall be provided for all clearance areas required by this section that will allow ingress and egress for utility-related personnel and equipment to perform
operations, maintenance and replacement of electric supply and communication lines. Such clearance provision shall be included in the design and construction when real property is developed or altered. Such clearance areas shall be recorded by the property developer or by the record owner on subdivision plats; or shall be evidenced by written instrument, duly recorded, in the Public Records of Denton County, Texas.

F. Regulations contained herein are intended to supplement any regulations contained in the Municipal Code of Ordinances, Chapter 26: Utilities, and not to replace such existing regulations.

### 7.13.4 Overhead Electric Transmission Line Clearance

A. New Electric Transmission Lines

1. **69kV Transmission Lines**
   
   A minimum of 60-foot wide electric transmission clearance is required on real property affected by 69kV electric transmission lines, said clearance shall be a minimum of 30 feet from either side of the centerline of the particular transmission pole(s). Clearance criteria in the National Electric Safety Code may require greater clearance widths in some instances.

2. **138kV Transmission Lines**
   
   A minimum of 75-foot wide electric transmission clearance is required on real property affected by 138kV electric transmission lines, said clearance shall be a minimum of 37.5 feet from either side of the centerline of the particular transmission pole(s). Clearance criteria in the National Electric Safety Code may require greater clearance widths in some instances.

B. Existing Electric Transmission Lines

1. For existing transmission lines and for transmission lines being constructed or reconstructed in developed areas, the utility may elect to perform NESC analysis and calculations to determine if safe and adequate reduced clearance widths can be utilized in lieu of the standard sixty- and seventy-five-foot widths as stated above.

2. Trees adjacent to overhead electric distribution lines shall comply with paragraph 7.7.7F.7: *Trees Adjacent to Overhead Electric Utilities*.

### 7.13.5 Overhead Electric Distribution Line Clearance

A. New Electric Distribution Lines

1. **13.2kV/7.62kV Grounded Wye**
   
   A minimum of 35-foot wide electric distribution clearance is required on real property affected by 13.2kV/7.62kV Grounded Wye electric distribution lines, said clearance shall be a minimum of 17.5 feet from either side of the centerline of the particular distribution pole(s). Clearance criteria in the National Electrical Safety Code may require greater clearance widths in some instances. Additional electric distribution service and clearance requirements are further defined within the Electric Service Standards.

B. Existing Electric Distribution Lines

1. For existing distribution lines and for distribution lines being constructed or reconstructed in developed areas, the utility may elect to perform NESC analysis and calculations to determine that safe and adequate reduced clearance widths can be utilized in lieu of the standard 35 foot width state above.
7.13.6 Electric Easement Requirements

In all cases where primary electric lines which will feed adjacent properties are installed on private property, the following standards shall prevail:

A. All easements shall be dedicated as public utility easements and shall be sized per Table 7.13-L, Table 7.13-M, Table 7.13-N. The general criteria to define typical easement widths and sizes are listed in the following tables:

**Table 7.13-L: Typical Overhead Electric Line Easement Widths**

<table>
<thead>
<tr>
<th>Line Type</th>
<th>Along Lot Frontage</th>
<th>Through Interior of Lot</th>
</tr>
</thead>
<tbody>
<tr>
<td>138 KV Transmission Lines</td>

<td>As Needed</td>
</tr>
</tbody>
</table>

B. Easement widths and sizes are subject to change at the discretion of Denton Municipal Electric (DME) in accordance with the applicable criteria manual.

C. DME may allow a utility easement to be dedicated within a fire lane for underground electric distribution lines in some cases, provided that equipment easements are dedicated outside of the fire lane for pad-mounted equipment.
Subchapter 7: Development Standards
7.13 Electric Standards
7.13.6 Electric Easement Requirements

Denton, Texas – Denton Development Code
Print Date: December 12, 2019

Figure 7.13-A: Equipment Easement Location

D. Fences within utility easements are generally prohibited, subject to the following:
   1. Fences shall not be built within or across dedicated utility or electric easements. DME, at their discretion, may allow fences to be built across an easement if access gates at least 12 feet wide are built.
   2. Any existing fence located within dedicated utility or electric easements that conflicts with the purpose and intent of the easement may be removed by the city at any time.
   3. The city is under no obligation to repair or replace any fence that is damaged or removed that encroaches within a dedicated easement for the purposes of operating, maintaining, replacing or installing electric facilities within the dedicated easement.

E. Employees of the city shall have the authority to enter premises at any reasonable time in the regular line of duty for the purpose of inspecting, repairing or constructing any electric line or any electric meter, etc. The landowner and occupant are responsible for any construction activities occurring over or within any on-site utility in a utility easement.

F. If utility inspection or repair or reconstruction is necessary, any pavement, structure, or improvement damaged within a dedicated utility or electric easement, shall not be the responsibility of the city for any repairs, but shall be the sole responsibility of the owner.

G. The landowner assumes responsibility for any and all improvements placed within a utility or electric easement at their own risk. Additionally, the provisions of this section do not permit or supersede the limits and restrictions prescribed by the conditions of any existing utility easement for allowing improvements to be placed within utility easements.

H. The following shall not be installed or planted within a utility or electric easement without approval by the city:
   1. Trees; and
   2. Any structures, including retaining walls and signs. No part of a structure, including its underground foundation, shall encroach into an easement.

I. The following items are typically allowed to be installed within a utility or electric easements:
7.13 Electric Standards

7.13.7 Electric Substation, Interchange, and Switch Station Design

A. Generally
1. Standards in this subsection require a basic level of architectural variety, compatible scale, and mitigation of negative impacts.
2. Where the following provisions are silent, the regulations of Subchapter 7: Development Standards, will apply.

B. Screening
1. Generally
   a. All screening shall comply with the minimum standards set forth in NERC and NESC. However, to the extent this DDC provides a stricter requirement, this DDC controls.
   b. Screening is required to obstruct, to the greatest extent possible, internal substation or switch station components from view of the public rights-of-way. This does not require screening of structures, equipment, or buildings that exceed 10 feet in height.

2. Screening Wall
   A minimum 10-foot masonry wall is required around the perimeter of the substation, interchange, or switch station to screen the view from public rights-of-way and adjoining properties.

3. Landscaping
   a. Trees or any other landscaping shall not be placed within 20 feet of station fences (clearance zone of section G below).
   b. Landscaping shall not interfere with the physical security of the site.

4. Gates
   a. Gates shall be provided at all entrances.
   b. Wrought Iron or similar metal gate material shall be permitted.

C. Buffering
   Buffers are required to minimize potential nuisances such as noise, light, glare, and litter between electric stations and other abutting land uses. Station site expansions are not required to provide space for buffers. Buffering shall not be required when it would compromise station security. Trees shall not be required within clearance zones.
   1. Substations or switch stations abutting any property other than an industrial zoning district, shall provide a 20 foot planted strip along the common boundary that includes a combination of five evergreen and deciduous trees and 30 shrubs per 100 linear feet.
   2. When located within the clearance zones, low growing shrubs with a maximum mature height of 24 inches shall be used to meet the requirements of this section.
   3. Buffering shall not be required when a substation, interchange, or switch station abuts property in an industrial zoning district.
4. Streets and easements shall be considered as buffer.

D. **Street Tree Standards**
   1. Street trees are required in accordance with Subsection 7.7.7, *Street Tree Requirements*.
   2. Street lights may be used in lieu of any required street trees provided they are of the same number and spacing required.

E. **Tree Canopy Coverage**
   Tree canopy coverage is required in accordance with Subsection 7.7.4, but shall not be located within the clearance zone as prescribed in Subsection 7.13.7G. In determining the landscape area for the site, only the area located outside the screening wall, clearance zone prescribed in Subsection 7.13.7G, and any transmission easements shall be considered.

F. **Access and Transportation**
   Access and transportation into and around the site should be provided to minimize the impacts on adjacent properties, intersections, and the overall street system. Access to the site should be carefully considered to limit the number of entrances that allow greater visibility into the site, while simultaneously allowing for adequate maneuvering of trucks and other heavy equipment necessary to construct, operate, and maintain the site. The following access and transportation standards shall be applicable.
   1. Driveways shall be located on the perimeter streets of the lowest classification unless the only reasonable means of providing safe and adequate access to the property, as determined by the City Engineer, is to access a street of higher classification.
   2. To the extent possible, driveways shall be located so as not to be directly across from the front yards of residential structures or uses, unless otherwise agreed to by the Director of Development Services or his/her designee.
   3. No more than two driveways shall be located on each perimeter street.
   4. Driveway separation is subject to the Transportation Criteria Manual. Due to unique access, large vehicular, and trailer turning radius requirements for electric stations, driveway geometry may differ from the Transportation Criteria Manual requirements.
   5. Driveways shall be constructed of concrete from the back of edge of the curb to the entrance gate of the site. Gravel is not a permitted driveway material for any driveway outside of the site’s perimeter screening wall, unless approved by the City Engineer due to the substation’s distance from the roadway.
   6. Sidewalks shall be required in accordance with Section 7.8: *Access and Circulation*, and the Transportation Criteria Manual. Enlarging of substation sites shall not be required to meet the requirements of this section.

G. **Clearance Zones**
   1. A 20-foot clearance zone around the perimeter screening wall free of visual obstructions and climbing aids is required to protect the security and safety of the site.
   2. Any landscaping that could be used as a climbing aid shall not be placed within 20 feet of a substation fence.

H. **Miscellaneous Standards**
   Development shall comply with this DDC and the NESC and/or NERC standards as applicable and as amended:
Subchapter 7: Development Standards
7.13 Electric Standards
7.13.7 Electric Substation, Interchange, and Switch Station Design

1. Height;
2. Noise;
3. Voltage Limitations:
4. Warning Signs;
5. Lighting;
6. Internal Illumination:
7. Vibration:
8. Electric Interference; and
9. Other development standards established by NESC and/or NERC as amended.

I. Minor Modifications
Minor modifications on a site plan may be approved by the Director pursuant to Subsection 2.7.2:
Minor Modification.
Subchapter 8: Subdivisions

8.1 Purpose

This subchapter establishes standards that regulate the subdivision of property in order to:

8.1.1 Facilitate the orderly growth and harmonious development of the city and to protect and promote public health, safety, and welfare;

8.1.2 Provide lots and parcels of sufficient size and appropriate design for the purposes for which they are to be used;

8.1.3 Protect the natural environment;

8.1.4 Promote the use of good design, landscape architecture, and civil engineering to preserve and enhance natural features, watercourses, drainage ways, floodplains, native vegetation, and trees;

8.1.5 Provide safe ingress and egress for vehicular and pedestrian traffic;

8.1.6 Ensure safe and efficient traffic circulation through coordinated street systems with relation to major thoroughfares, adjoining subdivisions, adjoining streets, and public facilities;

8.1.7 Provide adequate water supply, sewage disposal, storm drainage and other utilities and facilities;

8.1.8 Provide for adequate sites for schools, recreation areas, and other public purposes;

8.1.9 Protect or enhance real property values;

8.1.10 Facilitate the transfer of lands having accurate legal descriptions and to establish and assure the rights, duties and responsibilities of subdividers and developers with respect to land development;

8.1.11 Ensure that the costs of providing the necessary rights-of-way, street improvements, utilities and public areas and facilities for new developments are borne fairly and equitably; and

8.1.12 Encourage the clustering of dwellings and other structures to preserve open space, minimize adverse visual impacts, minimize public infrastructure costs, and prevent public safety hazards; and

8.1.13 Provide a common ground of understanding and an equitable working relationship between public and private interests, so that both independent and mutual objectives can be achieved in the subdivision of land.

8.2 Applicability

8.2.1 Regulatory Jurisdiction

A. Generally

1. This subchapter shall apply to all land and all developments within the regulatory jurisdiction of the City of Denton, except as otherwise provided for in this subchapter.

2. The regulatory jurisdiction of the city shall be defined as follows:

   a. The area within the corporate limits of the city;

   b. The area within the extraterritorial jurisdiction (ETJ) of the city, provided that regulatory authority has not been ceded pursuant to agreement or operation of law; and

   c. Any other area to which the provisions of this subchapter are made applicable in accordance with and as permitted by federal, state or local law.
B. **Land Included**  
Except where otherwise specifically provided for in this subchapter, all the provisions of this subchapter shall apply to the following lands located within the regulatory jurisdiction of the city:

1. Any tract of land which has not been recorded by plat in the plat records of Denton County, Texas, and which is intended to be sold, leased, or otherwise subdivided from another tract of land or which is intended or proposed to be used for the purpose of development.

2. Any tract of land which has been recorded as a lot or block by plat in the plat records of Denton County, Texas; prior to and upon which no development has been constructed or placed prior to the effective date of this subchapter.

3. The division of any previously platted lot into two or more parts.

4. The removal of one or more lot lines of any platted lot so as to permit the combining of two or more contiguous platted lots into one or more new lots.

### 8.2.2 Extraterritorial Jurisdiction

A. **Official Regulatory Map**  
1. The extraterritorial jurisdiction of the City of Denton is classified into two divisions as indicated on the City of Denton Extraterritorial Jurisdiction map on file in the Development Services Department.

2. The Development Services Department is directed to consider amendments to the regulatory line map whenever the certificate of public convenience and necessity for water and wastewater services is amended by the state or when directed by the City Council. Any amendments shall not be effective until the revised regulatory line map is approved by the City Council.

B. **Division 1**  
All subdivisions and developments within Division 1 are subject to all of the standards of this subchapter.

C. **Division 2**  
Subdivisions and developments within Division 2 are not subject to the standards of this subchapter, but shall be subject to the standards of the County of Denton and state law, as amended.

### 8.2.3 Exemptions

A. Prior to the subdivision, re-subdivision, or development of any land within the city, or its extraterritorial jurisdiction, all plans, plats, and construction plans for public improvements shall first be approved in accordance with these regulations, except as provided in paragraph B below.

B. The following are exempt from the subdivision regulations of this subchapter, but are subject to all other standards in this DDC:

1. The division of land into two or more parts, other than for purposes of development, if the smallest resulting parcels, tract or site is five acres or larger in size where each part has access and no public improvement is being dedicated.
2. Development on a single tract which was subdivided prior to January 1, 1960, and for which extension of streets or public improvements (excluding sidewalks) are not required to support the proposed development.

3. Construction of additions or alterations to an existing building where no drainage, street, utility extension or improvement, additional parking or street access changes required to meet the standards of this subchapter are necessary to support such building addition or alterations.

4. Construction of accessory structures or fences.

5. Dedication of easement or right-of-way by separate document recordable in the county records if approved by city.

6. Cemeteries complying with all state and local laws and regulations.

7. Divisions of land created by order of a court of competent jurisdiction.

8. A change in ownership of a property through inheritance or the probate of an estate.

9. Construction or reconstruction of a single-family residential structure in the extraterritorial jurisdiction, provided no utility extensions or right-of-way dedications are necessary.

10. Development of an agricultural use.

8.2.4 Compliance and Enforcement

A. It shall be unlawful for any person to begin, continue, or complete any development on any land within the regulatory jurisdiction of the city to which the provisions of this subchapter applies, except in accordance with and upon compliance with the provisions of this subchapter.

B. Except as otherwise authorized by this subchapter, the city shall not issue a building permit or certificate of occupancy required by any subchapter of the city for any land located within the corporate limits to which this subchapter applies, until and unless there is compliance with this subchapter.

C. The city may refuse to authorize or make utility connections on the grounds set forth in TLGC, § 212.012, as amended.

D. No improvements shall be initiated until the approval of the city has been given. Disapproval of a final plat by the city shall be deemed a refusal by the city to accept offered dedications shown thereon.

E. Approval of a final plat shall not be deemed an acceptance of the proposed dedications and shall not impose any duty upon the city concerning the maintenance or improvement of any such dedicated parts until the proper authorities of the city have both given their written acceptance of the improvements and have actually appropriated the same by entry, use, or improvements.

8.2.5 Platting Requirements

A. Division of Property

1. No land may be subdivided or platted through the use of any legal description other than with reference to a plat approved pursuant to the procedures established in Section 2.5: Subdivision Procedures, and in accordance with the standards in this DDC.

2. Excepting agricultural leases, no land described in this subchapter shall be platted or sold, leased, transferred, or developed until the property owner has obtained approval of the
applicable plat pursuant to the procedures established in Section 2.5: Subdivision Procedures, and in accordance with the standards in this DDC.

3. No person shall transfer, lease, sell, or receive any portion of a parcel of land before a conveyance plat or final plat of such parcel and the remaining parcel has been approved pursuant to the procedures established in Section 2.5: Subdivision Procedures, in accordance with the standards in this DDC, and filed with the county clerk.

4. The subdivision of any lot or any parcel of land, by the use of metes and bounds description for the purpose of sale, transfer, lease or development is prohibited.

B. Permits for Construction Activity or Public Improvements

The city shall not issue permits for any construction activity or allow any public improvements for a development until a plat is approved and filed of record and all public improvements have been accepted (if applicable) except as provided in Section 8.2: Applicability, or for a plot or tract conveyed prior to January 1, 1960, and remaining in the same configuration, or for the following:

1. Model Homes

A developer may construct no more than four model homes within a single-family detached, duplex, or townhome development phase containing public improvements that have not yet been finally accepted, provided that:

a. All off-site, drainage or regional improvements have been installed, inspected and accepted;

b. Each model home is inspected and found to meet all building, plumbing and fire code requirements prior to being opened to observation by the public;

c. The home will not be sold or occupied as a dwelling unit until all public improvements within that phase have been completed and accepted by the city; and

d. The homes comply with Section 7.3: Land-Disturbing Activities.

2. Multifamily or Nonresidential Development

Upon application and satisfaction of the following conditions, together with other DDC, City Ordinance, and Criteria Manual requirements, otherwise applicable to full building permits, the Building Official may issue a building permit for multifamily or nonresidential development to allow for limited construction subject to the following:

a. The applicant shall complete installation of all drainage and other regional improvements, including off-site improvements. This requirement may be satisfied by constructing temporary drainage improvements (such as detention ponds) that, in the opinion of the City Engineer, are adequate to offset the decrease in permeable surface of the permitted phase of development and prevent harm to downstream properties, pending completion and acceptance of required permanent regional improvements for drainage.

b. The applicant must enter into an agreement with the city, in a form approved by the City Attorney, which indemnifies and holds the city harmless for any failure of the applicant, owner, or builder to obtain necessary access and drainage easements and permits, or to build needed offsite improvements; and

c. A building permit issued in this manner may be withdrawn upon failure to meet any imposed condition, as set forth in Section 1.6: Enforcement.
d. The applicant shall install and demonstrate proper function of fire hydrants and all-weather access improvements for fire apparatus required by the Fire Code and Chapter 29 of the Municipal Code of Ordinances, prior to any construction above slab.

e. The applicant complies with Section 7.3: Land-Disturbing Activities.

### 8.3 Subdivision Design

#### 8.3.1 General

**A.** Every subdivision shall comply with all other ordinances and regulations of the City and the TLGC.

**B.** Public infrastructure shall be constructed in accordance with City of Denton Criteria Manuals or, if no standard or specification can be found, then the standard or specification used shall be subject to approval by the City Engineer based on professional engineering practices.

**C.** The applicant shall make all required improvements, at his/her expense, according to city regulations, without reimbursement by the city, except for certain reimbursable costs as provided in Subsections 7.6.14 and 7.6.15, or as determined as a result of an exaction proportionality determination and appeal under Section 2.5.6.

#### 8.3.2 Lot Planning

**A. General**

The size, shape, and orientation of lots shall be appropriate to the location of the proposed subdivision and to the type of development contemplated. The following lot design standards shall apply to all subdivisions:

1. All lots created through the subdivision process shall be developable and conform to the minimum zoning, development, and floodplain standards stated in this DDC. No subdivision shall create lots that prohibit development due to configuration of the lots, steepness of terrain, location of watercourses or floodplain, natural physical conditions, or other existing conditions, except when in conflict with ESA regulations.

2. The minimum area and dimensions of all lots shall conform to the requirements of Subchapter 3: Zoning Districts, and Subchapter 6: Development Standards, relating to the zoning district in which the lot is located. This subsection does not apply to planned developments. Modifications may be granted pursuant to Subsection 8.3.2D of this subsection.

3. Side lot lines shall be at right angles or radial to street lines, except where other terrain makes such design impractical.

4. Double frontage lots may be allowed; however, driveways are only permitted on one frontage.

5. Flag lots and other irregularly shaped lots are discouraged.

6. Corner lots may be required to be wider than interior lots to facilitate conformance with setback requirements.

7. The city, county, school district, or other taxing agency boundary shall not divide a lot except in conformance with this DDC.

8. Each residential lot shall have a minimum of 15 feet of frontage along an existing or proposed public street except as provided in paragraph 8.3.2C.2.
9. Each mixed-use and nonresidential lot shall have a minimum 20 feet of frontage along an existing or proposed public street.

10. Refer to Section 7.10.3C: Open Space Requirements, for common open space requirements for single-family detached dwelling, duplex, townhome, triplex, or fourplex developments.

B. Drainage
Lots shall be designed and located to provide positive drainage away from all buildings and shall comply with the standards in Section 7.5: Drainage.

C. Access
1. Generally
   a. Each lot shall be provided with adequate access to an existing or proposed public street.
   b. Development adjacent to existing public streets shall include the required improvements in accordance with the city’s perimeter street policy and in accordance with TLGC, § 212.904.
   c. At least two points of vehicular access into the proposed subdivision shall be provided, where feasible, unless it can be shown to the satisfaction of the City Engineer that legal, topographical, and/or engineering constraints preclude such access.

2. Single-Family Residential Private Drive
   a. Up to three single-family detached or townhome residential dwelling units may access a public road by means of a flag drive within a private access easement as provided in the Transportation Design Criteria Manual.
   b. Each residential lot shall have a minimum of 15 feet of frontage on the private access easement.

![Figure 8.3-A: Single-Family Residential Private Drive](image)
3. **Mixed-Use and Nonresidential Drives**
   a. Lots within a subdivision or addition that is surrounded by developed property making it unfeasible to provide street connectivity, do not have to abut a public street if such lots have access to a public street by a public access and fire lane easement approved by the city.
   b. Such easement shall be at least 24 feet wide and constructed, marked, and maintained to meet the standards for parking lots as contained in the Transportation Design Criteria Manual and for fire lanes as contained in the Fire Code.
   c. The stacking requirements for public streets shall apply to the public access and fire lane easement at the point where it intersects with a public street.
   d. In addition, the public access and fire lane easement shall be considered a driveway or curb cut access to the public street for all such lots.
   e. Each nonresidential lot shall have a minimum 20 feet of frontage on the public access and fire lane easement.

4. **Drilling and Production Site Access**
   Truck traffic related to gas well drilling and production shall not be allowed to use a plat's neighborhood streets to access a gas well drilling and production site. In addition, no plat shall be allowed to eliminate or alter an access road or easement depicted on a gas well development plat or gas well development site plan, unless written consent of the gas well operator is obtained and a separate access road or easement on the plat is provided for access to a drilling and production site.

D. **Common Area and Facilities**
   Such areas shall be noted on the plat and the association's covenants shall be filed with the county pursuant to Subsection 8.3.6J. Alternatively, other arrangements for permanent maintenance of these areas and facilities may be approved by the decision-making body.

E. **Flag Lots**
   1. Notwithstanding any other provision of this DDC, the width of the flagpole portion of a flag-shaped lot shall be no less than:
      a. Thirty feet when both public water and sewer systems are to serve such a residential lot.
      b. Forty feet when both public water and sewer systems are to serve such a commercial or industrial lot.
      c. Twenty-four feet when only a public water or a public sewer system is to serve such a lot.
      d. Twenty-four feet when the lot will not be served by a public water or public sewer system.
   2. The flagpole portion of the lot shall be ignored in measuring lot width.
   3. The length of the flag pole portion of the lot shall not exceed 300 feet and shall comply with all other standards and measurements of this DDC and other regulating agencies.
   4. Flag lots where the length of the flag pole portion exceeds 150 feet shall provide a permanent turn-a-round approved by the City Engineer and the Denton Fire Department.
8.3.3 Block Layout

A. Block Length
Residential blocks shall not be less than 300 feet nor more than 1200 feet in length. The city may approve a longer block length when necessary to accommodate natural features such as steep slopes, environmentally sensitive lands, and pedestrian linkages.

B. Block Arrangement
Blocks shall have sufficient width to provide for two tiers of lots of depth meeting the minimum requirements of this DDC, except where lots back onto a collector or greater street, natural feature, or subdivision boundary, or where lots face an approved cul-de-sac.

8.3.4 Cluster Subdivisions

A. Purpose
This section provides optional standards for cluster subdivision development to protect sensitive lands and common open space areas and to implement the comprehensive plan and/or adopted area plans. A cluster subdivision is a residential subdivision in which some or all of the lots are allowed to be smaller in area and width, thus allowing flexibility in development density in those areas in exchange for permanent protection of common open space.

B. Applicability
1. The cluster subdivision option is available in all residential districts as identified in Table 3.1-A: Zoning District Designations.
2. The minimum parcel size for a cluster subdivision shall be at least five acres.
3. All other standards in the DDC shall apply to cluster subdivisions unless modified by the cluster subdivision standards in this Subsection 8.3.4.
4. In the case of conflict between the provisions of Table 8.A: Cluster Subdivisions, and any other portion of this DDC, the provisions of this Table 8.A: Cluster Subdivisions, shall govern.
Subchapter 8: Subdivisions
8.3 Subdivision Design
8.3.4 Cluster Subdivisions

C. Review and Approval of Cluster Subdivisions
   1. Cluster subdivisions require approval of a planned development (PD) and shall be reviewed
      through the rezone to a planned development (PD) district procedure in Subsection 2.7.3:
         Rezone to a Planned Development (PD) District.
   2. Cluster subdivisions shall be reviewed through the preliminary plat and final plat
      procedures in Section 2.6, Subdivision Procedures.

D. Cluster Subdivision Minimum Standards
The minimum standards for cluster subdivision lots are established in Table 8.A: Cluster
Subdivisions below. The measurements and exceptions in Section 3.7, shall also apply to cluster
subdivision lots unless otherwise stated in Table 8.A: Cluster Subdivisions.

</tbody>
</table>

Notes:
[1] Building envelopes shall be established on the final plat with any cluster subdivision.

E. Common Open Space
1. Minimum Required
   A minimum of 30 percent of the total site area of the cluster subdivision shall be set aside
   as common open space for the use of the site's residents and visitors.
2. Identification and Maintenance
   a. Common open space shall be identified on the final plat for a cluster subdivision, with a
      notation that indicates that those lands shall not be used for future development.
   b. Common open space shall be identified on-site with appropriate permanent signage
      markers in order to distinguish these areas from private property.
   c. Common open space shall be permanently maintained and preserved as:
Subchapter 8: Subdivisions

8.3 Subdivision Design

8.3.4 Cluster Subdivisions

i. Open space lots with deed restrictions; or
ii. Protected through a conservation easement; or
iii. Land dedicated and accepted to the city, at the city’s sole discretion.

d. For any land not dedicated to the city, the developer shall provide a permanent mechanism acceptable to the City Attorney for the primary purpose of conservation, preservation, and management of protected/conserved lands.

e. There shall be no further subdivision of land in an area approved for cluster subdivision; however, dedication of easements for public utilities may be permitted.

3. Use of Common Open Space

a. Common open space shall be used for low-intensity recreation, agriculture, buffers, critical wildlife habitat, or other passive park or open space purposes. A pond may also count towards the minimum common open space requirement.

b. The use of common open space may be further limited or controlled at the time of final approval where necessary to protect adjacent properties.

4. Design of Open Space

Land set aside for common open space shall meet the following design criteria, as relevant:

a. The lands shall be contiguous unless the land shall be used as a continuation of an existing trail, or specific topographic features require a different configuration. An example of such topographic features would be the provision of a trail or private open area along a riparian corridor.

b. Where open space areas, trails, parks, or other public spaces exist adjacent to the tract to be subdivided or developed, the common open space shall, to the maximum extent feasible, be located to adjoin, extend, and enlarge the existing trail, park, or other open area land.

c. In larger projects, open space should flow through the site linking recreation facilities to dwellings with uninterrupted green belts.

d. If an ESA is preserved to meet the open space requirement, the land shall be left in an undisturbed natural state. Other open space shall be landscaped pursuant to Section 7.7, Landscaping, Screening, Buffering, and Fences.

F. Auto Courts

Auto courts may be considered as an alternative layout for cluster subdivisions. Up to four single-family units (attached or detached) may share a single driveway access to a public street using an auto court arrangement, provided the layout is approved with a preliminary plat pursuant to Subsection 2.6.3, Preliminary Plat. Additionally, auto courts shall comply with the following:

1. The surface of the shared driveway in the auto court shall be at least 20 feet wide and shall be surfaced with concrete or other permeable paving approved by the Director.

2. Individual driveways leading from the shared driveway to each dwelling unit shall be at least 20 feet long, as measured from the front of the garage or carport to the closest edge of the shared driveway.

3. The shared driveway shall be designed to comply with the standards of the Transportation Criteria Manual.

4. The auto court design shall comply with the applicable off-street parking requirements.
5. Maintenance and repair of auto courts shall be the responsibility of a property owners association or adjacent property owners. The city shall approve provisions for maintenance and repair during the subdivision review process.

6. Parking on the shared driveway shall be prohibited and shall be clearly marked as such.

7. The auto court access shall be from a standard-width street and the applicant shall demonstrate that there is adequate guest parking available on the street.

8. The auto court shall comply with all other city standards including fire and emergency access, and utility provisions.

---

**Figure 8.3-C: Auto Courts**

---

8.3.5 **Gas Well Notification Disclosure**

A plat that proposes single-family or multifamily residential lots that will be within 1,000 feet of one or more drilling and production sites, except for those drilling and production sites and their subsurface mineral interests which are eliminated through plugging and abandonment, the developer shall be required to provide all of the following disclosure notifications to all lot purchasers:

A. A note shall be placed on the plat identifying the drilling and production site(s) and those proposed lots that are within 1,000 feet of the drilling and production site(s). Said note shall also include a statement that advises lot purchasers of the existence of producing wells on the drilling and production site(s), the possibility of new wells that may be drilled and fracture stimulated on the drilling and production site(s), as well as the possibility that gas wells on the drilling and production site(s) may be re-drilled and/or re-fracture stimulated in the future.

B. There shall be depicted on the plat, and on a lot survey submitted as part of a building permit application, the location of the drilling and production site(s) in relation to the lots that are within 1,000 feet of a drilling and production site(s).

C. A provision shall be included in the declaration of restrictive covenants that advises lot purchasers of the existence of producing wells on the drilling and production site(s), the possibility that new
wells may be drilled and fracture stimulated on the drilling and production site(s), as well as the possibility that gas wells on the drilling and production site(s) may be re-drilled and/or re-fracture stimulated in the future.

**D.** A notice document that advises lot purchasers of the existence of producing wells on the drilling and production site(s), the possibility that new wells may be drilled and fracture stimulated on the drilling and production site(s), as well as the possibility that gas wells on the drilling and production site(s) may be re-drilled and/or re-fracture stimulated in the future, shall be recorded with the Denton County Clerk’s Office.

**E.** The form of the disclosure notifications required in paragraphs C and D above shall be approved by the City Attorney.

### 8.3.6 Gated Community

A gated community may be approved only through the planned development (PD) procedures in Subsection 2.7.3, *Rezone to a Planned Development (PD) District*. All gated communities are subject to the following standards:

**A. Criteria Manuals**

All public infrastructure within a gated community shall be constructed in accordance with City of Denton Criteria Manuals unless specific exceptions to such manuals is approved by the City Engineer during the gated community PD rezoning approval process.

**B. Access**

1. All gated communities shall have a minimum of one point of access to a public street, and an alternative emergency access for emergency service vehicles if only one public access point is provided.

2. Turnouts or turnarounds for the public shall be provided outside the gated perimeter, pursuant to the guidelines of the Transportation Design Criteria Manual.

3. Turnout or turnaround areas shall be dedicated by the developer as public access easements, or as part of the public right-of-way, and shall be maintained by the developer where they are easements.

4. Any private street that has an access control gate or cross arm must have a minimum uninterrupted pavement width of 22 feet at the location of the access control device. If an overhead barrier is used, it must be a minimum of 14 feet in height above the road surface.

5. All gates and cross arms must be of a breakaway design.

6. The Fire Chief, or his designated representative, shall approve the installation of access gates, which shall meet Fire Code requirements for emergency operation, and shall be maintained at all times by the homeowner’s association (HOA).

7. The HOA shall provide keypads and codes, as well as a receiver and mechanism designed to open gates automatically in response to a remote traffic signal preemption device meeting the specifications of emergency service providers, at all gates into the community.

8. In the event that at any time any gate does not promptly and automatically open for an emergency vehicle utilizing a traffic signal preemption device, the emergency responders shall be privileged to remove, disable or destroy any locking device, gate or piece of a gate in order to gain access. The deed restrictions shall recognize and incorporate this requirement, and further hold the City and its emergency providers harmless from any and
all claims or damages arising from the HOA’s failure to maintain the gate to this standard or for the removal or destruction of such gates or devices.

9. The HOA shall provide non-emergency access codes to solid waste providers, the Electric Utility, the Water Utility and Wastewater Utility Maintenance Department franchised utilities, and the US Postal Service.

C. Fencing Adjacent to Entry Gates
   1. On lots adjacent to entry gates, fences may exceed 40 inches in height, up to a maximum of eight feet within the side yard setback.
   2. Such fences must be constructed of wrought iron with brick columns. No solid fencing panels will be allowed.

D. Streets
   1. Private Streets
      a. All streets and alleys in a gated community shall be private streets.
      b. Private streets shall meet all requirements and standards for public streets.
      c. Gated communities shall not be allowed to obstruct any existing arterial street or proposed arterial street as shown on the City Mobility Plan.
      d. Streets shown on the Mobility Plan shall not be gated or private streets.
      e. The Planning and Zoning Commission may recommend the denial of the creation of any other private street if, in the Commission's judgment, the private street would negatively affect vehicular or pedestrian traffic circulation on public streets, or impair access to property (either on-site or off-site), to the subdivision, access to or from public facilities (including schools, parks and libraries), or the response time of emergency vehicles.
      f. The city shall not pay for any portion of the cost of constructing or maintaining a private street.
   2. Private Street Lot
      a. Private streets and alleys must be constructed within a separate lot owned by the property owners association. This lot must conform to all of the city's standards for a public street and/or alley right-of-way.
      b. An easement covering the street lot shall be granted to the city and franchised utilities, providing unrestricted use of the property for utilities and maintenance.
      c. The easement shall provide the city with the right of access for any purpose related to the exercise of a governmental service or function.
      d. The easement shall permit the city to remove any vehicle or obstacle within the street lot that impairs emergency access.
   3. Maintenance and Reconstruction
      The city is not responsible for reconstruction or full depth repair to the private street. The city will follow customary practices in backfilling and repaving repaired sections of private streets after a utility repair, utilizing the least cost solution, with no further obligation of future maintenance for the repair, and no obligation to rebuild or repair pavements to any preexisting design or appearance, if different from the city's ordinary repair standards for public streets. Alternatively, the HOA may elect to privately undertake one or more aspects
of the backfilling and pavement repair, and the city may participate in the funding of such private repairs, but only to the extent of any repair costs avoided by such private repairs.

E. Water and Sewer
   1. All water and sewer mains that serve inside the gated community and are located within public utility easements shall be dedicated to the city prior to approval of the final plat, and shall be publicly owned and maintained.
   2. All water and sewer mains and associated appurtenances shall be designed and built according to city standards.
   3. Public water and sewer mains and facilities shall be located within a public utility easement or other adequate water and sewer easement dedicated to the city.
   4. Water meters and sanitary sewer cleanouts shall be located within a public utility easement and outside of the paved portion of the private street.

F. Street Lighting
   1. Street lighting on private streets is required to meet the design standards of the city and shall be installed and maintained by the HOA at no cost to the city.
   2. Luminaries, fixtures, poles, foundations, conduit, wiring, appurtenances, and any other ancillary items associated with street lighting shall be owned, operated, and maintained by the HOA.
   3. All energy costs will be metered and invoiced to the HOA under the appropriate rate schedule.
   4. The HOA shall be solely responsible to obtain and pay for power needed to illuminate street lighting.

G. Electric Utility Infrastructure
   1. All electric facilities that serve inside the gated community shall be owned and maintained by the utility provider.
   2. All electric facilities shall be designed, built, and operated according to the standards of the utility provider.
   3. Electric utility infrastructure shall be located within a public utility easement or other adequate easement dedicated to the city.

H. Solid Waste Requirements
   1. Residential solid waste collection service shall be provided from the front of the property at the curbside of the private streets.
   2. For residential dwellings with rear entry garages, the solid waste collection service may be provided from the alley, if the alley is designed to provide adequate turning radii for all solid waste collection trucks and if the house address number is visible from the alley.
   3. All residential refuse collection criteria, as listed within the city's ordinances, shall apply to gated communities.
   4. In the event that a vehicular access gate is not operable and access is not available for solid waste collection vehicles, the Solid Waste Department shall continue on with the normal progression of their daily route, and report the inaccessibility of the area to customer service.
I. **Drainage Requirements**

   The developer is responsible for the installation of the stormwater system to city standards, and the HOA is responsible for maintenance of the stormwater system.

1. **Minor Drainage System**
   a. The minor drainage system includes the entire storm drainage collection systems within the streets, ditches and channels within the gated community that collect surface drainage originating from within the spatial boundaries of the gated community.
   b. The minor drainage system also includes all drainage systems within the gated community that collect drainage from offsite areas up to three acres.
   c. Drainage easements for the minor drainage system shall be consistent with this DDC and the City’s Criteria Manuals, and shall be dedicated on the final plat.
   d. The minor drainage system shall be maintained by the HOA, and the city has no obligation for the inspection or maintenance of this system.
   e. Physical connection points shall be established between the minor and major drainage systems as described herein, that will be used to establish the physical limits for maintenance responsibilities.

2. **Major Drainage System**
   a. The major drainage system provides for the conveyance of stormwater runoff through the gated community, originating from any area outside of the gated community greater than three acres.
   b. To provide for the major drainage system, green space or open space areas and floodplain areas shall be reserved for stormwater detention, retention, or conveyance of drainage. These areas shall be dedicated by simple deed as separate lots, with ownership to be retained by the HOA. The entire lot or a portion thereof shall be dedicated on the final plat as a drainage easement or as a drainage and detention easement, as appropriate.
   c. The plat shall include dedication language stating that the drainage easement, or drainage and detention easement, will be reserved for the conveyance of drainage or floodwaters, and shall remain open at all times and maintained by the HOA in a safe and sanitary condition.
   d. The city will not be responsible for the maintenance and operation of said lots or easements, or for any damage to private property or person that results from conditions in the lots or easements, or for the control of erosion.
   e. No obstructions to the natural flow of stormwater run-off shall be permitted by construction of any type of building, fence or any other structure within the drainage easement or drainage and detention easement, as herein above defined, unless approved by the city.
   f. The HOA shall keep the drainage easement or drainage and detention easement clear and free of debris, silt, and any substance that would result in unsanitary conditions or obstruct the flow of water.
g. The city shall have the right of ingress and egress to inspect and supervise maintenance by the HOA, or to optionally alleviate any undesirable conditions that may occur.

h. The city shall have the right, but not the obligation, to enter upon the lot or drainage or drainage and detention easement to remove any obstruction to the flow of water, after giving the HOA written notice of such obstruction, upon failure of the HOA to remove such obstruction. The city shall be reimbursed by the HOA for reasonable costs for labor, materials, and equipment in each such instance.

i. Any easement dedication shall conform to the provisions of TLGC, § 212.904.

J. Homeowners Association (HOA) Required

Documents establishing the HOA shall be submitted as part of the final plat application, providing for the maintenance, repair and/or replacement obligations of the HOA for private roads, alleys, gates, fences, street lighting, drainage items and/or other like held facilities and/or common areas, their appurtenances and/or other associated ancillary items and improvements, shall be incorporated into the final plat.

1. The HOA shall provide for the power to file a lien, to foreclose, or to otherwise secure payment from homeowners for the maintenance, repair and replacement, in part or in whole, of all privately held common areas, including but not limited to, drainage items, street lighting, and other appurtenances or associated ancillary items.

2. The association documents shall be submitted to, reviewed by, and approved by the City Attorney prior to final plat approval.

3. The covenants and restrictions documents shall indicate that the streets in the subdivision are private and are maintained by a Homeowners Association, that they are not public, and that the city has no obligation to maintain them.

4. The covenants and restrictions shall also state that the city has no obligation to inspect the streets or drainage in the gated community.

5. The covenants and restrictions documents shall indicate that the subdivision final plat, property deeds and home owner association restrictive covenants that certain city services shall not be provided on private streets. Among the services that will not be provided are: routine police patrols, enforcement of traffic and parking ordinances and preparation of accident reports. All private traffic regulatory signs shall conform to the Texas Manual of Uniform Traffic Control Devices. Depending on the characteristics of the proposed development, other services may not be provided.

6. The covenants and restrictions shall also state that the city has no obligation to inspect the streets in the gated community.

7. The Homeowners Association may not be dissolved, nor may deed restrictions and covenants providing for maintenance of common areas be deleted or amended, without the prior written consent of the Planning and Zoning Commission, by way of a plat amendment.

8. The final plat and restrictive covenants shall contain language whereby the Homeowners' Association, as owner of various private improvements within a private street, lot or easement, agrees to release, indemnify, defend and hold harmless the city from claims and suits for property damage or bodily injury (including death) arising from the condition, use or operation of any privately-owned streets or facilities.
8.4 Subdivision Improvements

8.4.1 Purpose

This section establishes the minimum acceptable standards for improvement of streets and utilities. All improvements in streets or easements which are required as a condition to plat approval shall be the responsibility of the subdivider.

8.4.2 Compliance Required

A. In addition to satisfying Section 7.6: Water and Wastewater, and all applicable City Criteria Manuals, the applicant shall demonstrate the ability to satisfy the requirements set forth herein prior to development, at each stage of the platting process, including applications for preliminary plats, and final plats.

B. The city may deny a preliminary plat if the applicant cannot demonstrate the ability to satisfy these requirements, the requirements of Section 7.6: Water and Wastewater, and applicable City Criteria Manuals, prior to approval.

8.4.3 Cost of Improvements and City Participation

The applicant shall make all required improvements, at his expense, according to city regulations, without reimbursement by the city, except for certain reimbursable costs as provided in Subsections 7.6.14 and 7.6.15, or as determined as a result of an exaction proportionality determination and appeal under Subsection 2.5.6.

8.4.4 Applicant to Extend Mains and Streets to Subdivisions

A. If the existing city mains and/or streets are not within or adjacent to a subdivision, the developer shall construct the necessary extension as specified in this subchapter.

B. These mains or streets shall be constructed in accordance with the Mobility Plan of the city.

C. These facilities shall be in public easements, secured and paid for by the developer.

D. Such easements must be recorded as required by law before service is extended to the subdivision.

8.4.5 Pre-Construction Phase Procedures and Requirements

A. Prior to beginning construction of public improvements the City Engineer shall schedule a preconstruction conference between the owner/applicant and applicable city departments.

B. Representatives of public and franchise utilities shall be notified and maybe required by the city to review the proposed improvements to be made and the requirements of this subchapter.

8.4.6 Development Contract Required

A. For all developments in which streets, drainage facilities, water or sewer lines or other improvements are to be constructed and dedicated or conveyed to the public, a development contract is required to ensure proper construction and completion of the improvements and payment is made.
B. The developer shall submit the development contract, along with all required documents in conformity with all city construction standards.

8.4.7 Construction, Inspection, and Acceptance

The construction, inspection of construction, and acceptance of public improvements after completion shall be approved by the City Engineer, if the construction conforms to the requirements of all city construction standards.

8.4.8 Streets

Streets and right-of-way shall conform to the Mobility Plan, the Transportation Design Criteria Manual, and the standards in this DDC, as amended.

8.4.9 Utilities

A. New utilities shall be installed underground unless an administrative determination is made that physical barriers render undergrounding utilities infeasible. Transformers, pedestals, fire hydrants, and other appurtenances normally associated with “underground” utility installations are permitted on the surface of the ground.

B. When overhead utility lines exist within the property being platted, including boundary easements, these utility lines and new installations within the platted area shall be placed underground.

C. When overhead utility lines exist on the periphery of the property being platted, they and any additions or replacements needed to increase capacity or improve service reliability may remain overhead; provided, that any service drops into the platted area from said peripheral overhead lines shall be underground.

D. Underground utilities may be extended and easements shall be required to the boundaries of the plat to provide service connections to abutting un-subdivided land.

8.4.10 Adequate Water System

A. Generally

1. The applicant shall demonstrate that the water system serving the development will be adequate to serve the development at the time of preliminary plat approval for development within the city limits, or at the time of final plat approval for developments within the city's extraterritorial jurisdiction.

2. Where a development plan or phased preliminary plat is proposed, the applicant shall demonstrate that each phase of the development will be served by an adequate water system under this standard.

3. The approach main shall be extended to serve the entire development subject to a development plan or phased preliminary plat prior to the time of final plat approval for the second phase of the development plan or phased preliminary plat, unless the extension is part of a funded capital improvement project that the City has initiated consistent with its adopted Capital Improvement Plan for water facilities.
B. **Criteria for Adequate Facilities**

The water system serving the subdivision shall be deemed adequate when in conformance with Section 7.6: *Water and Wastewater*, and one of the following options, as applicable:

1. **City Facilities Not Used**
   a. Where the city is not the supplier, the applicant shall provide assurance of sufficient capacity, in accordance with the water capacity standards in the Administrative Criteria Manual, from the entity holding the certificate of convenience and necessity for the land to be subdivided.
   b. Such entity shall have sufficient water supply, water treatment, and transmission capacity to serve the development, considering all other commitments, in accordance with city standards.
   c. The applicant shall present written verification from the water supplier that it has agreed to provide water service to the development in conformance with Denton design and construction standards. The applicant shall provide assurances that water mains will be extended to serve the subdivision prior to the time of final plat approval for the second phase of a development plan or phased preliminary plat.

2. **City Facilities are Used**
   a. Where city distribution mains are to be used for supplying water, and there is an existing distribution main with adequate capacity to serve the development within one mile of the boundary of the proposed subdivision, the applicant may, at his initial expense, and subject to standard city participation policies, extend one or more approach mains from the existing distribution main to the subdivision, of a size sufficient to serve the development.
   b. The city reserves the right to require oversizing of the line in accordance with standard City of Denton oversize policies. This requirement does not apply where the approach main is already a component of a funded capital improvement project that the city has initiated, consistent with its adopted Capital Improvement Plan for water facilities.

C. **Water and Sewer Utilities Connections**

The city shall not provide any water or sewer utility connection to land proposed for subdivision under this DDC until all of the following requirements have been met:

1. The water supply, treatment, storage and off-site distribution system to serve the subdivision meet the requirements of Subsection 8.4.10;
2. The sanitary sewer treatment and collection system to serve the subdivision meet the requirements of Subsection 8.4.11;
3. The owner or developer of the subdivision or addition has executed a written agreement with the city, providing for the offsite extension of water and sewer mains to serve the development, in accordance with the existing water and sewer extension regulations;
4. Off-site mains have been extended to the subdivision pursuant to the agreement and this section, and water and sewer mains have been installed in accordance with the city’s specification in the block facing the street on which the property is situated and accepted by the City; and
5. "As built" plans in digital format are required at the end of construction showing the actual location of all improvements.
8.4.11 Adequate Sewer System

A. Generally

1. No preliminary or final plat application shall be approved unless the applicant demonstrates that there will be an adequate sanitary sewer system to serve the subdivision concurrent with development.

2. The applicant shall demonstrate that the sanitary sewer system serving the development will be adequate at the time of preliminary plat approval for development within the city limits, or at the time of final plat approval for developments within the city's extraterritorial jurisdiction.

3. Where a development plan or phased preliminary plat is proposed, the applicant shall demonstrate that each phase of the development shall be served by an adequate sanitary sewer system under this standard.

4. The approach main shall be extended to serve the entire development subject to a development plan or phased preliminary plat prior to the time of final plat approval for the second phase of the development plan or phased preliminary plat, unless the extension is part of a funded capital improvement project that the city has initiated consistent with its adopted Capital Improvement Plan for wastewater facilities.

5. Adequacy of treatment facilities cannot be demonstrated by reliance upon package treatment plants.

B. Criteria for Adequate Facilities

The sanitary sewer system serving the development shall be deemed adequate when in conformance with Section 7.6: Water and Wastewater, and one the following options, as applicable:

1. City Facilities Not Used
   a. Where the city’s sanitary sewer system is not to be used, the applicant shall provide assurance that the entity collecting the sewage holds a certificate of convenience and necessity for the land to be subdivided, that collection systems are adequate to accommodate sewage flows from the development and that the treatment system to be used has adequate capacity in accordance with the standards in Section 7.6: Water and Wastewater.
   b. The applicant shall provide assurances that sanitary sewer mains will be extended to serve the subdivision prior to the time of final plat approval for the second phase of a development plan, or phased preliminary plat.

2. City Facilities are Used
   a. Where city collection mains are to be used for collecting sewage, and there is an existing collection main with adequate capacity to serve the development within one mile of the boundary of the proposed subdivision, the applicant may agree to extend one or more existing collection mains to the subdivision of a size adequate to serve the development, at his expense, including the cost to construct all necessary lift stations and force mains, in accordance with standard city participation policies.
b. The city reserves the right to require oversizing of the line in accordance with standard City of Denton oversize policies. This requirement does not apply where the approach main is already a component of a funded capital improvement project that the city has initiated, consistent with its adopted Capital Improvement Plan for wastewater facilities.
Subchapter 9: Definitions

9.1 Rules of Construction

9.1.1 General

All provisions, terms, phrases, and expressions contained in this DDC shall be liberally construed in order that the true intent and meaning of the City Council may be fully implemented. The Director is responsible for making any interpretations of this subchapter.

9.1.2 Headings, Illustrations, and Text

In the event of a conflict or inconsistency between the text of this DDC and any heading, caption, figure, illustration, table, or map, the text shall control.

9.1.3 Lists and Examples

Unless otherwise specifically indicated, lists of items or examples that use terms such as “for example,” “including,” and “such as,” or similar language are intended to provide examples and are not exhaustive lists of all possibilities.

9.1.4 Computation of Time

The time in which an act is to be done shall be computed by excluding the first day and including the last day. If a deadline or required date of action falls on a Saturday, Sunday, or holiday observed by the city, the deadline or required date of action shall be the next day that is not a Saturday, Sunday, or holiday observed by the city.

A. “Day” means a calendar day.
B. “Week” means seven calendar days.
C. “Month” means a calendar month.
D. “Year” means a calendar year.

9.1.5 Delegation of Authority

Whenever a provision appears requiring the head of a department or some other officer or employee to do some act or perform some duty, it is to be construed to authorize the head of the department or other officer to designate, delegate, and authorize a subordinate to perform the required act or duty, unless the terms of the provision or section specifies otherwise.

9.1.6 Nontechnical and Technical Words

Words and phrases shall be construed according to the common and approved usage of the language, but technical words and phrases and such others as may have acquired a peculiar and appropriate meaning in law shall be construed and understood according to such meaning.

9.1.7 Mandatory and Discretionary Terms

The words “shall,” “must,” and “will” are mandatory, establishing an obligation or duty to comply with the particular provision. The words “may” and “should” are permissive.
Subchapter 9: Definitions

9.2 Definitions

Conjunctions

Unless the context clearly suggests the contrary, conjunctions shall be interpreted as follows:

A. “And” indicates that all connected items, conditions, provisions, or events apply; and
B. “Or” indicates that one or more of the connected items, conditions, provisions, or events apply.

100-Year Water Surface Elevation (100-Yr W.S.E.)
The water surface elevation established by hydrologic/hydraulic analysis of a stream, river, stream, or tributary, using the 100-year fully developed watershed, based upon the 100-year rainfall event.

Accessory Building
A building on the same lot with, and of a size and nature customarily incidental and subordinate to, the principal building.

Accessory Dwelling Unit
A subordinate dwelling unit added to, created within, or detached from a single-family residence, that contains a dwelling that is subordinate to a principal single-family detached dwelling and that provides basic requirements for living, sleeping, cooking, and sanitation. A HUD-Code manufactured home shall not be considered an accessory dwelling unit.

Accessory Use
A use incidental or secondary to the principal use of a lot, building or structure and located on the same lot as the principal use.

Administrative, Professional, or Government Office
A building in which services are provided and/or business is conducted including administrative, professional, governmental, or clerical operations. Typical examples include real estate, insurance, property management, investment, financial, employment, travel, advertising, law, architecture, design, engineering, accounting, call centers, and similar offices. This use includes accessory uses such as restaurants, coffee shops, health facilities, parking, limited retail sales, or other amenities primarily for the use of employees in the firm or building.

Adopted Plan
Any statement of goals, objectives, and policies adopted as an official plan by the City of Denton, Texas.

Adult Arcade
Any place to which the public is permitted or invited wherein coin-operated or slug-operated or electronically, electrically, or mechanically controlled still or motion picture machines, projectors, or other image-producing devices are maintained to show images to 5 or fewer persons per machine at any one time, and where the images so displayed are distinguished or characterized by an emphasis on matter depicting, describing or relating to “specified sexual activities” or “specified anatomical areas.”

Adult Bookstore/Adult Video Store
1. A commercial establishment which as one of its principal business purposes offers for sale or rental for any form of consideration any one or more of the following:
   a. Books, magazines, periodicals or other printed matter, or photo-graphs, films, motion pictures, video cassettes or video reproductions, slides, or other visual representations distinguished or characterized by an emphasis on matter depicting, describing or relating to “specified sexual activities” or “specified anatomical areas”; or
b. Instruments, devices, or paraphernalia which are designed for use in connection with "specified sexual activities."

2. For the purpose of this definition, a commercial establishment shall be considered to have as "one of its principal business purposes" the sale or rental of the materials described in subsection 1 above, if:
   a. The establishment makes use of a sign visible from any public street, whether located on or off the property of the establishment, advertising the availability at the establishment of any materials described in subsection 1;
   b. The establishment devotes more than 30 percent of its total floor area which is open to the public to the display of items for sale or rental that are materials described in subsection 1;
   c. More than 30 percent of the total number of items displayed for sale or rental by the establishment are materials described in subsection 1; or
   d. The establishment regularly maintains on the property for sale or rental materials described in subsection 1 whole total retail value is more than 50 percent of the total retail value of all materials kept on the premises for sale or rental.

**Adult Cabaret**
A nightclub, bar, restaurant, or similar commercial establishment which regularly features:

1. Persons who appear in a state of nudity; or
2. Live performances which are distinguished or characterized by an emphasis on "specified sexual activities" or the exposure of "specified anatomical areas"; or
3. Films, motion pictures, video cassettes, slides, or other photographic reproductions which are distinguished or characterized by an emphasis on matter depicting, describing or relating to "specified sexual activities" or "specified anatomical areas."

**Adult Entertainment Establishments**
Adult entertainment establishments include: adult arcade, adult bookstore or adult video store, adult cabaret, adult motel, adult motion picture theater, adult theater, escort agency, nude model studio and all other adult entertainment establishments.

**Adult Motel**
A hotel, motel, or similar commercial establishment that:

1. Offers accommodations to the public for any form of consideration; provides patrons with closed-circuit television transmissions, films, motion pictures, video cassettes, slides, or other photographic reproductions which are distinguished or characterized by an emphasis on matter depicting, describing or relating to "specified sexual activities" or "specified anatomical areas"; and has a sign visible from the public right-of-way which advertises the availability of this adult type of photographic reproductions; or
2. Offers a sleeping room for rent for a period of time that is less than 10 hours; or
3. Allows a tenant or occupant of a sleeping room to sub-rent the room for a period of time that is less than 10 hours.

**Adult Motion Picture Theater**
A commercial establishment where, for any form of consideration, films, motion pictures, video cassettes, slides, or similar photographic reproductions are regularly shown which are distinguished or characterized by an emphasis on matter depicting, describing or relating to "specified sexual activities" or "specified anatomical areas."
**Adult Theater**
A theater, concert hall, auditorium, or similar commercial establishment which regularly features persons who appear in a state of nudity or live performances which are distinguished or characterized by an emphasis on "specified sexual activities" or the exposure of "specified anatomical areas."

**Adverse Impact**
An impact that:
1. Creates, imposes, aggravates, or leads to inadequate, impractical, unsafe, unhealthy conditions on a site or degrades or damages environmental or cultural resources on a site proposed for development or on off-site property or facilities; or
2. Creates, imposes, or leads to a nuisance on a site proposed for development or on off-site property or facilities.

**Advertise**
As it applies to short-term rentals, the written, audio, oral or other methods of drawing the public’s attention whether by brochure, written literature or on-line posting to a Short Term Rental in order to promote the availability of the short term rental.

**Agriculture and Animal Uses**
This category includes agricultural and farming activities, including nurseries and facilities for processing and selling agricultural products. Agricultural uses involve farming, dairying, pasturage, beekeeping, horticulture, floriculture, viticulture, and animal husbandry. Animal-related uses include the boarding and care of animals on a commercial basis. Accessory uses may include confinement facilities for animals, parking, and storage areas.

**Airport Hazard**
Any structure or object of natural growth, or use of land, which obstructs the air space required for the taking off, landing and flight of aircraft, or that interferes with the visual, radar, radio or other systems for tracking, acquiring data relating to, monitoring or controlling aircraft.

**Airport, City-Owned**
A landing area, runway, or other city-owned facility designed, used, or intended to be used for the landing or taking off of aircraft, including all necessary taxiways, aircraft storage and tie-down areas, hangars, and other necessary buildings and open spaces.

**Alley**
A public way that provides access to abutting property and which is not intended for general travel or circulation. Alleys are typically a secondary means of access to a property.

**Alley Access Garage**
See “Garage, Alley Access”

**Alternative Mounting Structure**
A man-made tree, clock tower, church steeple, bell tower, utility pole, light standard, identification pylon, flagpole, or similar structure, designed to support and camouflage or conceal the presence of telecommunications antennas.

**Amenity Center**
A building or facility owned or operated by a corporation, association, person, or persons for a place of meeting, social, cultural, educational, or recreational purposes, to which membership or residency requirements is required for participation.
Subchapter 9: Definitions

9.2 Definitions

Antenna
A structure or device used to collect or radiate electromagnetic waves, including directional antennas, such as panels, wireless cable and satellite dishes, and omni-directional antennas, such as whips, but not including satellite earth stations.

Antenna Array
An arrangement of antennas and their supporting structure.

Antenna, Dish
A parabolic bowl shaped device that receives and/or transmits signals in a specific directional pattern.

Antenna, Panel
An antenna which receives and/or transmits signals in a directional pattern.

Antenna, Stealth
A telecommunications antenna that is effectively camouflaged or concealed from view.

Antenna, Telecommunications
An antenna used to provide a telecommunications service. This excludes lightning rods, private mobile radio systems, amateur radio antennas less than 50 feet (15 meters) in height and whip antennas less than four inches (10 cm) in diameter and less than 10 feet (three meters) in height.

Antenna, Whip
An omni-directional dipole antenna of cylindrical shape which is no more than 6 inches (15 cm) in diameter.

Applicant
Unless otherwise specified, an owner or other person with a legal property interest, including heirs, successors, and assigns, or an owner's authorized agent, who has filed an application for zoning, subdivision, or development activity.

Approach Surface
A surface longitudinally centered on the extended runway centerline and extending outward and upward from each end of the primary surface. An approach surface is applied to each end of each runway based upon the type of approach available or planned for that runway end.

Architectural Compatibility
Consistency in roof pitch, exterior construction materials, exterior color, and architectural design and detail.

Architectural Element
Authentic architectural projections and details.

Architectural Projection
Eaves, decorative extensions, bay windows having no floor space, or other portions of a structure having neither living space nor key structural value.

Assisted Living Facility
An establishment that:
1. Furnishes, in one or more facilities, food and shelter to four or more persons who are unrelated to the proprietor of the establishment; and
2. Provides personal care services.
Auto Court
Auto court development is an arrangement of single-family, duplex, or townhome dwellings with a shared access to minimize curb cuts and/or provide shared parking facilities.

Auto Wash
The use of a site for washing, cleaning, and detailing of passenger vehicles, recreational vehicles, or other light-duty equipment. This use includes self-service and any facility attended by an employee.

Automotive Fuel Sales
An establishment where fuel, motor oil, automobile lubricants, travel aids and other supplies are sold to the motoring public. Outside storage of any automobiles or materials such as tires, auto parts, etc., is prohibited. The sale of motor vehicles is prohibited.

Automotive Repair Shop, Major
An establishment primarily engaged in providing vehicle repair, body work, mechanical servicing, and/or painting.

Automotive Repair Shop, Minor
An establishment primarily engaged in providing minor vehicle repair services such as lubrication, oil and tire changes, and tune-ups, brake repair, tire replacement, and detailing and polishing. Major repairs such as vehicle bodywork or painting or repair of engines or drive trains shall not be provided.

Automotive Sales or Leasing
The sale, display, lease, rental, or storage of light motor vehicles, including automobiles, vans, light trucks, light trailers, boats, ATVs, snowmobiles, and recreational vehicles. This definition shall not include salvage operations, scrap operations, vehicle impound yards, or commercial parking lots available for short-term use.

Automotive Wrecking Service, Impound Lot, Junkyard and Salvage Yard
A business that stores, buys, or sells materials that have been discarded or sold at a nominal price by a previous owner and that keeps all or part of the materials outdoors until disposing of them. This definition includes activities such as junk or salvage storage or operation; vehicle wrecking and salvage operation; and vehicle storage at a state licensed facility. A licensed vehicle storage facility is a garage, parking lot, or other facility owned or operated by a person other than a governmental entity for storing or parking 10 or more vehicles per year.

Bank or Financial Institution
An establishment that provides retail banking, mortgage lending, and financial services to individuals and businesses. Accessory uses may include automatic teller machines, drive-through service, offices, and parking.

Bar, Tavern, or Lounge
An eating and drinking establishment providing or dispensing by the drink for on-site consumption fermented malt beverages, and/or malt, special malt, vinous, or spirituous liquors, and in which the sale of food products is secondary. A bar, tavern, or lounge may include the provision of live entertainment and/or dancing; however, shall not include any adult entertainment. Accessory uses may include the manufacture of alcoholic beverages for on-site consumption and/or retail sales.

Base Flood
A flood having a one percent chance of being equaled or exceeded in any given year based on a fully developed watershed. Also known as the 100-year flood.
Basement
A building story partially or completely underground. A basement shall be counted as a story in computing building height where any portion of a basement has more than one-half of its height above grade.

Basic Utilities
Infrastructure services and the structures necessary to provide those services including electricity, natural gas, telephone, telecommunications, water, or sewer. This definition includes water towers and water treatment plants.

Bed and Breakfast
A single-family detached dwelling that is owner-occupied or occupied by a resident manager in which rooms are rented and meals may be served to transient guests on an overnight basis for a period of time less than 30 consecutive days.

Bedroom
Any room other than a living room, family room, dining room, kitchen, bathroom, closets, or utility room, for the purpose of this DDC, shall be considered a bedroom. Dens, studies, etc. with or without closets and similar areas, which may be used as bedrooms shall be counted as bedrooms for the purposes of this DDC.

Block Length
The distance between intersections of through streets, such distance being measured along the longest street bounding the block and from right-of-way line to right-of-way line of the two intersecting streets.

Board of Adjustment/Board
The Board of Adjustment of the City of Denton, Texas.

Boarding or Rooming House
A building or portion of a building, other than a hotel, motel, or multifamily dwelling wherein non-transient lodging and/or meals are provided for compensation to more than four but fewer than 20 persons. Provision for meals may be made, provided cooking is done in a central kitchen and not in individual rooms or suites.

Buffer
A strip of land that includes landscaping, fencing, walls, vegetated earthen berm, or any combination thereof.

Building
Any permanent structure designed, used, or intended to be used for human occupancy or use or to support the human occupancy or use of land, including manufactured homes.

Building Coverage
The portion of the lot that is covered by the principal building and all accessory buildings. The coverage is expressed as a percentage of such area in relation to the total gross area of the lot or site.

Building Materials and Supply Store
A business involved in the sale, storage, and distribution of structure supplies and services including lumber, brick, tile, cement, insulation, floor covering, lighting, plumbing supplies, electrical supplies, cabinetry and roofing materials. Accessory uses may include repair or delivery services and outside sale of plants and gardening supplies.
Building Pad
The actual foundation area of the principal building and a 10-foot clear area extending from the foundation perimeter necessary for construction and grade transitions.

Building Permit
A document signed by the Building Official or their authorized representative as a condition precedent to the commencement of a use or the erection, construction, reconstruction, restoration, repair, remodeling, rehabilitation, alteration, conversion, demolition, moving, installment, or portion of a structure or building, which acknowledges that such use or building complies with the provisions of this Chapter or an authorized variance or specific use permit there from.

Building, Principal
A building in which the principal use of the lot on which the building is located is conducted.

Business or Trade School
A secondary school offering instruction in a professional, vocational, or technical field.

Calculated dbh
The combined dbh of the tree(s) to be removed, multiplied by the appropriate tree classification ratio, as described in paragraph 7.7.4H.5.

Carport
A partially enclosed structure used for the housing of motor vehicles, the property of, and for use only by the occupants of the lot upon which such structure is located. For purposes of zoning, a carport attached to a principal structure shall be regarded as part of that principal structure and not as an accessory structure. A detached carport shall be classified as an accessory structure.

Cementitious Siding
Siding used for exterior building finishes that is formed by combining water, wood pulp, fly ash, and Portland cement.

Cemetery, City-Owned
A city-owned facility or area used or intended to be used for the interment or burial of the dead, including graveyard, burial park, mausoleum, columbarium, or any other area containing one or more graves.

Certificate of Appropriateness (COA)
An order issued by the Historic Preservation Officer (often with the approval of the Historic Landmark Commission) indicating approval of plans for alteration, construction, or removal affecting a designated landmark or property within a designated district.

Certificate of Occupancy
Certificate issued by the Building Official for the use of a building, structure or land, when it is determined by the Building Official that the building, structure or proposed land use complies with the provisions of all applicable Codes of the City of Denton

Certified Local Government
A local government certified or approved by the State Historic Preservation Office (SHPO), which has an appointed commission to oversee the survey and inventory of historic resources, to review areas for historically significant structures, and to develop and maintain community planning and education programs.

Channel
An open conduit in which water flows with a free surface.
Chapter House
A place of residence other than a hotel, rooming or boarding house, or dormitory that is operated by a nationally chartered membership organization or a local chartered organization and used, occupied and maintained for persons enrolled in a college, university or other educational institutions, and which is recognized and subject to controls by such educational institution.

City
The City of Denton, Denton County, Texas, and its extraterritorial jurisdiction.

City Council
The City Council of the City of Denton, Texas.

City Engineer
The individual holding the office of City Engineer of the City of Denton, Texas, who shall actively maintain licensure in good standing as a professional engineer under the laws of the State of Texas. Those duties assigned by this DDC to the City Engineer which relate to the development review process may be reassigned by the City Manager, in whole or in part, to one or more licensed professional engineers, as needed to adjust workflow or to provide specific expertise.

Civil Engineering Plans
Plans, profiles, cross-sections, and other required technical drawings and details for the construction of public and private improvements prepared by a registered engineer.

Clearing and Grading
The removal of vegetation by manual or mechanical means, or altering surfaces to specified elevations or slopes including stripping, cutting, filling, stockpiling, shaping, or any combination thereof.

Club or Lodge
A group of people associated with or formally organized for a common purpose, interest or pleasure, including organizations with facilities for the storage, sale, possession, or serving of any alcoholic beverage permitted by the law of the State of Texas and where none of such facilities are available except by membership qualifications, dues, or regular meetings.

College or University
An institution of higher learning providing facilities for teaching and research and authorized to grant academic degrees.

Co-Location
A single telecommunications tower and/or site used by more than one telecommunications service provider.

Commercial Greenhouse or Nursery
An establishment, including a building, part of a building, or open space, for the growth, display, and/or sale of plants, trees, and other materials used in indoor or outdoor planting for retail sales and incidental wholesale trade.

Commercial Incinerator
Establishments primarily engaged in the collection and disposal of refuse by processing or destruction for profit. Examples would be furnaces or similar devices for the burning to ash of trash or bodies.

Commercial Incinerator, Transfer Station
A commercial facility for the collection, source separation, storage, transportation, transfer, processing, treatment or disposal of solid waste that does not impose a present or potential hazard to human health or the environment, including pollution of air, land, surface water or ground water. This definition includes...
any commercial incinerator, boiler, percolator or other solid waste facility at which solid waste, including previously processed solid waste is burned for the purposes of volume and weight reduction or steam heat, power or energy generation.

**Commercial Stable**
A facility or area where horses, mules, or other domestic animals are kept, housed, boarded, lodged, fed, hired, trained, sold, or bred as a commercial activity. The definition includes accessory uses such as riding lessons, clinics, and similar activities.

**Common Open Space**
A portion of a development permanently set aside to preserve elements of the natural landscape for public or private use, which will not be developed or subdivided.

**Community and Cultural Facilities**
Uses including buildings, structures, or facilities owned, operated, or occupied by a governmental entity or nonprofit organization to provide a service to the public.

**Community Center**
A building used as a place of meeting, recreation, or social activity and not operated for profit and which neither alcoholic beverages or meals are normally dispensed or consumed, and typically for use by the residents of a particular development or the community.

**Community Garden**
A facility where members of the community have access to individual garden plots for the cultivation of fruits, flowers, vegetables, or ornamental plants.

**Community Home**
A community-based residential home containing not more than six disabled persons with two supervisory personnel which meets the requirements of the Community Homes for the Disabled Persons Location Act, Tex. Hum. Res. Code Chapter 123.001, et seq. (Vernon 1990), as amended.

**Community Service**
A structure or group of structures that are governmentally owned or controlled for social, educational, and/or recreational activities. Community Service facilities include federal, state, county, and City of Denton activities. Fire stations, libraries, and civic buildings are included in this definition.

**Comprehensive Plan**
The comprehensive plan of the City of Denton, Texas as adopted by the City Council. The comprehensive plan shall consist of a land use plan, a mobility plan, a water system plan, a sanitary sewer plan, a storm drainage plan, a parks and recreation plan, and such other plans as may be adopted by the City.

**Concrete or Asphalt Batching Plant**
A temporary facility where asphalt or concrete, or its ingredients or products, are ground up, mixed, or otherwise prepared for use on-site or for transportation to another site.

**Conduit**
Any open or closed device for conveying flowing water.

**Conical Surface**
A surface which extends outward and upward from the periphery of the horizontal surface at a slope of 20:1 for a horizontal distance of 4,000 feet.

**Conservation District**
Any neighborhood or region designated by the City Council as a conservation district.
Conservation Easement
A voluntary and permanent deed restriction which limits the development and/or subdivision of property for the purposes of protecting conservation values in the land. The easement is a recorded restriction, applies to and binds all subsequent owners, and may be held by either a non-profit entity or organization that manages open space, such as a land trust or other qualified entity, pursuant to Section 170(h) of the Internal Revenue Code, as amended, or a governmental entity.

For the purposes of tree preservation, the conservation easement shall contain the prescribed minimum preservation amount, included a stand of trees and understory, and shall be the greater of 10 percent of the property or 5,000 square feet.

Conveyance Plat
An interim plat recording the subdivision of property or defining a remainder of property created by the approval of a final plat for sole purpose of conveying land and not for development for a portion of property, where approval of final development plans is not sought.

Cornice
A continuous, molded projection that crowns a wall or other construction, or divides it horizontally for compositional purposes.

Craft Alcohol Production
A facility in which processing and production of beverages occurs, including canning, bottling, and packaging for sale and/or distribution to retailers, drinking establishments, restaurants, or wholesalers, but may also include onsite consumption and/or retail sales.

Credit Access Business
A credit services organization that obtains for a consumer or assists a consumer in obtaining an extension of consumer credit in the form of a deferred presentment transaction or a motor vehicle title loan, as established in Section 393.601 of the Texas Finance Code, as amended.

Criteria Manual
A manual pertaining to the technical and design requirements of this DDC.

Critical Root Zone (CRZ)
The area of soil extending from the tree trunk where roots required for future tree health and survival are located. This area can also be defined as a circle with a minimum radius of one-foot for every one-inch in trunk diameter at 4.5 inches above ground.

Daycare, Adult or Child
A facility or area licensed, certified, or registered by the State to provide daytime care, training, education, custody, treatment, or supervision to children, adults, or elderly in a family setting for less than 24 hours a day, whether for compensation or not. This definition shall not include education facilities listed elsewhere in this DDC. The following are child- or adult-care facilities:

Adult Day Care
A facility providing care for the elderly and/or functionally impaired adults in a protective setting for a portion of a 24-hour day. The facility provides services under an adult day-care program on a daily or regular basis but not overnight to four or more elderly or handicapped persons who are not related by blood, marriage, or adoption to the owner of the facility.
Child-Care Institution
A child-care facility that provides care for more than 12 children for 24 hours a day, including facilities known as children's homes, halfway houses, residential treatment centers, emergency shelters, and therapeutic camps.

Day-Care Center
A child-care facility that provides care for more than 12 children under 14 years of age for less than 24 hours a day.

Family Home
A home that provides regular care in the caretaker's own residence for not more than six children under 14 years of age, excluding children who are related to the caretaker, and that provides care after school hours for not more than six additional elementary school children; but the total number of children, including children who are related to the caretaker, does not exceed 12 at any given time. The term does not include a home that provides care exclusively for any number of children who are related to the caretaker.

Group Day-Care Home
A child-care facility that provides care for seven to 12 children under 14 years of age for less than 24 hours a day.

Dead or Unhealthy Tree
Any tree certified by a certified arborist, certified forester, or a registered landscape architect, to be dead or significantly diseased beyond recovery, injured, or hazardous and in danger of falling or dying.

Demolition by Neglect
The deterioration of a property, potentially beyond the point of repair, through neglect in the maintenance or repair of any structure on property designated as an historic property or located in a Historic or Conservation District.

Detention
The storage of storm runoff for a controlled release during or immediately following the design storm. Regional detention refers to storage of storm runoff from an entire drainage area or basin.

Developed Floodplain
Area within the FEMA one-percent Annual Chance Floodplain (a.k.a. 100-year floodplain) for which the natural stream has been redesigned and no longer exhibits characteristics of a natural channel and/or its floodplain has been significantly modified, graded, filled, or otherwise disturbed.

Developer
The legal or beneficial owner or owners of a lot or any land proposed to be included in a proposed development including the holder of an option or contract to purchase, or other person having an enforceable proprietary interest in such land.

Development
Any man-made change to improved or unimproved real estate, including but not limited to, buildings or other structures, paving, drainage or utilities. Development activities include: subdivision of land; construction or alteration of structures, roads, parking, fences, pools, signs, temporary uses, utilities, and other facilities; installation of septic systems; grading; excavation, mining or drilling operations; deposit of refuse, debris, or fill materials; and clearing of natural vegetative cover (with the exception of agricultural activities as defined and as permitted). Routine repair and maintenance activities are exempted.
Development Assistance Team
The Development Assistance Team of the City of Denton, Texas.

Development Impact Area
Means and includes any man-made change to improved or unimproved real estate, including but not limited to, buildings or other structures, paving, drainage or utilities. Development activities include: subdivision of land; construction or alteration of structures, roads, parking, fences, pools, signs, temporary uses, utilities, and other facilities; installation of septic systems; grading; excavation, mining or drilling operations; deposit of refuse, debris, or fill materials; and clearing of natural vegetative cover (with the exception of agricultural activities as defined and as permitted). Environmental Sensitive Areas (ESA), Conservation Easements, and Preserved Habitat are excluded from the Development Impact Area.

Diameter at Breast Height (dDH)
The tree trunk diameter measured in inches at a height of 4.5 feet above ground level. For multi-trunk trees, combine the diameter of the largest stem or trunk with one-half of the diameter of each additional stem or trunk, all measured at four and one-half 4.5 feet above ground level.

Director
The Director of Development Services or his or her designee.

Disabled Persons
Persons whose ability to care for himself, perform manual tasks, learn, work, walk, see, hear, speak or breathe is substantially limited because the person has:

1. Orthopedic, visual, speech, or hearing impairments;
2. Alzheimer's disease;
3. Cancer;
4. Pre-senile dementia;
5. Heart disease;
6. Cerebral palsy;
7. Diabetes;
8. Epilepsy;
9. Mental retardation;
10. Muscular dystrophy;
11. Autism;
12. Multiple sclerosis; or
13. Emotional illness

District
An area, region, or section with a distinguishing character, or the regulations governing the height, area, use and design of the land and buildings.

Disturbed Area
An area of land subjected to erosion due to the removal of vegetative cover and/or earthmoving activities, including but not limited to filling.
Subchapter 9: Definitions
9.2 Definitions

Donation Box
A portable container for the acceptance of donations operated by a non-governmental entity, a for-profit company, or a non-profit organization that can be emptied and readily moved. Such uses shall be accessory to a primary business on the same lot.

Dormitory
A place of residence, other than a hotel, rooming house, or boarding house that is used, occupied, and maintained by at least 50 or more persons enrolled in a college, university, or other educational institution, with sleeping accommodations, common gathering rooms, and may include group cooking and dining facilities designed to service the entire residency of the dormitory, and that is recognized and subject to controls by such educational institution.

Drainage Area/Basin
The land area upon which all rainfall that falls on that area is directed towards or flows to a given point or stream.

Drainage Facilities/Systems
Physical provisions to accommodate and regulate stormwater runoff to preclude excessive erosion and sedimentation and to control and regulate the rate of flow. Facilities/systems can include natural features and conduits, channels, ditches, swales, pipes, detention devices or other devices designed or intended to carry, direct, detain or otherwise control stormwater.

Dripline
The outermost circumference of a tree canopy.

Dwelling, Duplex
A building containing two dwelling units, each of which is a separate household that has an individual exterior entrance and separate utility meters.

Dwelling, Fourplex
A single building on a single lot containing four dwelling units, each of which is a separate household that has an individual exterior entrance and separate utility meters.

Dwelling, Manufactured Home HUD-Code
A structure constructed on or after June 15, 1976, according to the rules of the United States Department of Housing and Urban Development, transportable in one or more sections, which, in the traveling mode, is eight body feet or more in width, or 40 body feet or more in length, or, when erected on-site, is 400 or more square feet, and which is built on a permanent chassis and designed to be used as a dwelling with or without a permanent foundation when connected to the required utilities, and includes the plumbing, heating, air conditioning and electrical systems. The term does not include a recreational vehicle as that term is defined by 24 C.F.R. Section 3282.8(g).

Dwelling, Mobile Home
A structure that was constructed before June 15, 1976, transportable in one or more sections which, in the traveling mode, is eight body feet or more in width or 40 body feet or more in length or, when erected on-site, is 400 or more square feet and which is built on a permanent chassis and designed to be used as a dwelling with or without a permanent foundation when connected to the required utilities and includes the plumbing, heating, air conditioning and electrical systems.

Dwelling, Modular Home
See definition of “Single-Family Detached Dwelling.”
Subchapter 9: Definitions

9.2 Definitions

Dwelling, Multifamily
One or more buildings on a single lot containing five or more dwelling units. This definition includes single room occupancy, co-housing, and residential condominiums developed on a single lot. This definition does not include duplex, triplex, fourplex, or tiny home development.

Dwelling, Single-Family Detached
A building containing one dwelling unit not physically attached to any other principal structure. This definition includes "Modular Homes" and "Dwelling, Manufactured Home HUD-Code." This definition does not include "Manufactured Home Development."

Dwelling, Tiny Home
A single-family detached dwelling that is less than 500 square feet and more than 300 square feet in size on a permanent foundation. This does not include "Recreational Vehicle" that are allowed only in a RV Park.

Dwelling, Townhome
Three to eight attached single-family dwelling units, each of which is a separate household on its own lot.

Dwelling, Triplex
A single building on a single lot containing three dwelling units, each of which is a separate household that has an individual exterior entrance and separate utility meters.

Dwelling, Work/Live
A dwelling unit containing an integrated living and working space in different areas of the unit.

Dwelling/Dwelling Unit
A structure or portion thereof that provides living, sleeping, eating, cooking, and sanitation accommodations. This term does not include short-term rental.

Easement
A grant of the right to use a strip of land for specific purposes.

Educational Facilities
Uses in this category include public, private, and parochial institutions at the primary, elementary, middle, high school, or post-secondary level, trade or business schools, or colleges and college campuses. Accessory uses commonly include play areas, cafeterias, recreational and sport facilities, auditoriums, and day care facilities.

EIA-222

EIFS
Exterior Insulation and Finish Systems (EIFS) is a non-load bearing exterior wall cladding system consisting of insulation board attached to the substrate, with a reinforced base coat and a textured protective finish coat.

Elderly Housing
A structure licensed by the Texas Department of Aging and Disability, 80 percent of whose occupants are 55 years of age and older, and that meets the definition of one of the four uses listed below:

Elderly Housing, Assisted Living
Services in these establishments include assistance with daily activities, such as dressing, grooming, bathing, etc.
Elderly Housing, Congregate Care Facility
A facility for long-term residence generally for persons 55 years of age or older, and which shall include, without limitation, common dining, social and recreational features, special safety and convenience features designed for the needs of the elderly, such as emergency call systems, grab bars and handrails, special door hardware, cabinets, appliances, passageways, and doorways designed to accommodate wheelchairs, and the provision of social services for residents which shall include at least two of the following: meals services, transportation, housekeeping, linen, and organized social activities.

Elderly Housing, Life Care Housing and Services
A residential complex, which may contain multi-family dwellings, attached dwellings, single-family dwelling and other types of dwellings and structures designed for and principally occupied by senior citizens. Such facilities will include one of the following: A congregate meals program in a common dining area, assisted living housing, nursing home facilities, congregate care facilities, or medical facilities.

Continuing Care Retirement Center
A facility that integrates multiple senior living options into one facility including skilled nursing, assisted living, dementia care, as well as independent living. This use is not considered a multi-family dwelling unit.

Electric Distribution Line
Any electric line or part of the power system which distributes electric power at less than 60kV when measured phase to phase, and is utilized to deliver and serve electric power to local utility customers. Electric Distribution Lines include both overhead and underground facilities and circuits that operate at our primary rated distribution voltage level of 13.2kV/7.62 kV Grounded Wye. The distribution system includes that part of the distribution line transformers and all other necessary equipment to step the primary voltage down to a lower secondary voltage level to meet service requirements.

Electric Substation
A structure that is part of an electric generation, transmission, and distribution system which either:
1. Converts electric energy to a lesser voltage for the purpose of subregional or localized distribution;
2. Functions as a transition point from overhead to underground electric transmission lines; or
3. Acts as the point of convergence for two or more transmission lines.

Electric Switch Station
A substation without transformers and operating only at a single voltage level.

Electric Transmission Line
Any electrical line operating at a nominal line-to-line voltage equal to or greater than 60,000 volts.

Environment
The physical condition which exists within the area that will be affected by a proposed development, including: land, air, water, mineral, flora, fauna, noise, and objects of historic or aesthetic significance.

Environment, Natural
This environment is characterized by severe biophysical limitations, presence of some unique or natural or cultural features intolerant of intensive human use, or its value is retained only in its natural condition. Management objectives are oriented toward preserving unique features, restricting activities that may degrade the actual or potential value of this environment, and severely restricting development in hazardous areas.
Subchapter 9: Definitions

9.2 Definitions

Equal Conveyance Principle
An area of the cross-section of a stream, in its existing condition, carrying a percentage of the stream flow, will continue to carry the same percentage of the stream flow after filling of the flood plain occurs, without any rise in the 100 year floodplain elevation.

Equipment Sales and Rental
An establishment engaged in the display, sale, and rental of equipment, tools, supplies, machinery or other equipment used for building construction, manufacturing, farming or agriculture. This use includes the sale of farm-specific vehicles such as tractors, tillers, farm trailers, back hoes, graders, boom lifts, and front-end loaders, but not including car or truck rentals.

Erosion
The detachment and movement of soil or rock fragments, or the wearing away of the land surface by water, wind, ice, or gravity, caused either by natural or human created conditions.

Escort
A person who, for consideration, agrees or offers to act as a companion, guide, or date for another person, or who, for consideration, agrees or offers to privately model lingerie or to privately perform a striptease for another person.

Escort Agency
A person or business association who furnishes, offers to furnish, or advertises to furnish escorts as one of its primary business purposes, for a fee, tip, or other consideration.

Estate-Style Subdivision
Estate style subdivisions are those subdivisions using barrow ditches as drainage along streets, on public or private streets.

Existing Development
Development not otherwise exempted by this DDC that meets one of the following criteria:

1. It either is built or has established a statutory or common-law vested right as of the effective date of this DDC; or
2. It occurs after the effective date of this DDC, but does not result in a net increase in built-upon area and does not decrease the infiltration of precipitation into the soil.

Expansion
An increase in the floor area of an existing structure or building, or the increase of area of a use.

FAA
Federal Aviation Administration or any successor agency.

Fabricating
The process of assembling using standardized parts.

Family
One or more persons related by blood, marriage, or legal adoption.

FAR
See Floor-Area-Ratio.

Farmer's Market or Open Air Market
The seasonal selling or offering for sale at retail directly to the consumer of fresh fruits, vegetables, flowers, herbs, or plants, processed food stuffs and products such as jams, honey, pickled products, sauces, baked goods, crafts, and art, clothing and other goods, occurring in a pre-designated area, where
the vendors are generally individuals who have raised the produce or have taken the same or other goods on consignment for retail sales.

FCC
Federal Communications Commission or any successor agency.

**Feedlot, Slaughterhouse, or Packaging Plant**
The feeding of livestock, poultry, pigs, or small animals for commercial purposes in lots, pens, ponds, sheds or buildings where food is supplied primarily by means other than grazing, foraging, or other natural means, and/or a facility for the slaughtering and processing of domestic farm animals and the refining, packaging, and distribution of their byproducts.

FEMA
Federal Emergency Management Agency.

**Fence**
A vertical device used as a boundary or means of providing protection, confinement or privacy.

**Fence, Residential Subdivision Perimeter**
Fences or walls that are placed within 50 feet of the edge of the right-of-way of an arterial or collector street for the horizontal distance around the perimeter of a subdivision that includes single-family detached, townhome, duplex, triplex, or fourplex dwellings. Fences or walls that have a surface area that is 25 percent or less opaque, and hedges and screens composed of living plant material, shall not be included in this definition.

**Field or Construction Office**
A temporary modular building located at a construction site which serves only as an office until the given construction work is completed. This definition shall also include leasing offices and sales trailers for new developments.

**Filling**
The depositing on land, whether submerged or not, of gravel, earth, or other natural materials in any combination.

**Fire Code**
The most recently adopted International Fire Code as published by the International Code Congress.

**Flood Fringe**
The area located within the floodplain and outside the floodway.

**Flood Hazard Boundary Map (FHBM)**
An official map of a community, issued by the Federal Insurance Administration, where special flood hazard areas have been designated.

**Flood Insurance Rate Map (FIRM)**
An official community map showing special flood hazard areas and the risk premium zones applicable to the community as issued by the Federal Insurance Administration.

**Floodplain**
An area identified by the Federal Emergency Management Agency as possibly being flood-prone, or below the immediate flood line (100 year floodplain).

**Floodway**
Area regulated by federal, state, or local requirements to provide for discharge for the base flow, so that the cumulative increase in water surface elevation is no more than a designated amount within the 100-
year floodplain. A river, channel or other watercourse and the adjacent land areas that must be reserved in order to discharge the base flood without cumulatively increasing the water surface elevation more than a designated height. Normally, the floodway will include the stream channel and that portion of the adjacent land areas required to pass the base flood (100-year flood) discharge without cumulatively increasing the water surface elevation at any point more than one foot above that of the pre-floodway condition, including those designated on the flood insurance rate map.

Floor Area
The floor area is the gross horizontal area of the one or more floors of a structure, excluding interior parking spaces. Residential floor space shall be exclusive of carport, basement, attic, patios and open porches. Same as Gross Leasable Floor Space.

Floor Area Ratio (FAR)
The ratio which is the result of dividing the total floor area of a structure by the area of the lot on which it is located. For example, a structure with a floor area of 20,000 square feet, located on a lot of 40,000 square feet has a floor area ratio (FAR) of one-half.

![Figure 9.2-A: Floor Area Ratio (FAR)](image)

Food and Beverage Services
Uses in this category include establishments that serve prepared food or beverages for consumption on or off the premises. Accessory uses may include food preparation areas, offices, and parking.

Food Processing, Less than 2,500 Square Feet
A facility or area containing not more than 2,500 square feet of gross floor area in which food for human consumption in its final form, such as candy, baked goods, tortillas, and ice cream is produced, and the food is distributed to retailers or wholesalers for resale on or off the premises. This use does not include commercial feedlots, meatpacking, poultry dressing, stockyards, fat rendering, or the tanning, cutting, curing, cleaning or storing of green hides or skins.

Food Processing, More than 2,500 Square Feet
A facility or area containing more than 2,500 square feet of gross floor area in which food for human consumption in its final form, such as candy, baked goods, tortillas, and ice cream is produced, and the food is distributed to retailers or wholesalers for resale on or off the premises. This use does not include commercial feedlots, meatpacking, poultry dressing, stockyards, fat rendering, or the tanning, cutting, curing, cleaning or storing of green hides or skins.
Freeboard
The vertical distance between the design water surface level and the top of an open conduit left to allow for wave action, floating debris or any other condition or emergency without overtopping the structure.

Front yard
See “Yard, Front.”

Frontage
That side of a lot, parcel or tract abutting a street right-of-way.

Funeral and Internment Facility
An establishment for the care, preparation, or disposition of the deceased for burial and the display of the deceased and rituals connected with, and conducted before, burial or cremation. This use includes mortuaries, which are facilities in which dead bodies are prepared for burial or cremation, columbariums, and funeral homes, and may include a facility for the permanent storage of cremated remains of the dead.

Garage, Alley Access
A garage with vehicular access from a public or private alley, typically from the rear of the lot.

Garage, Rear Access
A garage with vehicular access doors that faces the rear of the lot.

Garage, Side Access
A garage with vehicular access doors primarily oriented toward one of the side lot lines or perpendicular to the street.

Garage, Private or Public
A structure for the use of the owner or occupant of a principal structure for the storage of motor vehicles with no facilities for mechanical service or repair of a commercial or public nature.

Gas Well
Any well drilled for the production of gas or classified as a gas well under the Texas Natural Resources Code.

Gated Community
A subdivision or housing development with two or more dwellings with private streets controlled through the use of a vehicular or pedestrian gate.

General Agriculture
The land use of animal husbandry, farming, cultivation of crops, dairying, pasturage, floriculture, horticulture, viticulture, aquaculture, hydroponics, together with necessary accompanying accessory uses, buildings, or structures for housing, packing, treating, or storing said products. This definition includes associated dwellings for those involved in agricultural uses. An accessory use may include incidental sales by the producer of products raised on the farm. This definition does not include feed lots or similar uses.

General Retail Unless Otherwise Specified, Between 5,000 Square Feet and 15,000 Square Feet
Retail sales containing between 1,500 square feet and 10,000 square feet of gross floor area.

General Retail Unless Otherwise Specified, Less than 5,000 Square Feet
Retail sales containing not more than 1,500 square feet of gross floor area.

General Retail Unless Otherwise Specified, More than 15,000 Square Feet
Retail sales containing more than 10,000 square feet of gross floor area.
Grade
1. The inclination or slope of a conduit, channel or natural ground surface, usually expressed in the percentage of units of vertical rise or fall per unit of horizontal distance;
2. The elevation of the invert at the bottom of a conduit, canal, culvert, sewer, etc.; or
3. The finished surface of a canal bed, roadbed, top of an embankment or bottom of excavation.

Grade Separation
The physical development of structures or intersections that separate motor vehicle from motor vehicles; motor vehicles, pedestrians, and bicyclists from trains and other transit; motor vehicles from pedestrians and bicyclists; as well as pedestrians from bicyclists.

Grade, Existing
The vertical elevation of the ground surface prior to excavation or filling; the surface of the ground or pavement at a stated location as it exists prior to disturbance in preparation for a development regulated by this DDC; or, the vertical elevation of a site which is currently developed and built upon.

Grade, Ground Level
The average of the finished ground level at the center of all walls of the structure. In case a wall is parallel to and within five feet of a sidewalk, the ground level shall be measured at the sidewalk.

Grade, Natural
The existing grade or elevation of the ground surface that exists in its unaltered state.

Grade, Percentage of
The rise or fall of a slope in feet and tenths of a foot for each 100 feet of horizontal difference.

Grading
The mechanical or physical act of disturbing, moving, removing, transferring, or redistributing soil.

Gross Leasable Floor Space
The gross horizontal floor area of the one or more floors of a structure, excluding interior parking spaces. Residential floor space shall be exclusive of carport, basement, attic, patios, and open porches.

Ground Cover
Low growing plants, vines, or grasses that form dense, extensive growth, and have a positive effect against soil erosion and soil moisture loss. Permeable natural landscape materials, such as mulch and rock, are also considered ground cover to the extent they are used in combination with live plant materials.

Group Home
A profit or nonprofit facility, home, or structure for the protective care of persons, both adult and adolescent, who need a watchful environment, but do not have an illness, injury, or disability which requires chronic or convalescent care, including medical and nursing services. Protective care and watchful oversight includes, but is not limited to, a daily awareness by management of the residents' whereabouts, the asking and reminding of residents of their appointments for medical checkups, the ability and readiness of management to intervene if a crisis arises for a resident, and supervision by management in areas of nutrition, medication, and actual provision of transient medical care, with a 24-hour responsibility for the well-being of residents of the facility. Personal care facilities are exempt from the definition of a family and shall be classified in one of the following ways:

1. Individual: One to three clients, plus manager.
2. Family: Four to six clients, plus manager.
3. Group: Seven to 15 clients, plus manager.
4. Congregate: 16 or more clients, plus manager.
9.2 Definitions

Group Home for Disabled Persons
A shared residential living arrangement which provides a family-type environment for six or more handicapped persons supervised by one or more primary caregivers and has obtained a license to operate under the Personal Care Facilities Licensing Act. Tex. Health & Safety Code § 247.001 et seq. A group home for disabled persons does not include community homes for disabled persons.

Grubbing
The mechanical or physical act of removing stumps, underbrush, and rocks, prior to clearing and grading. Grubbing does not allow for any grade changes, only vegetation removal down to bare soil. A tree removal permit is required for all trees with a three-inch or greater diameter, measured at four and a half feet above natural grade.

Handicap
A physical or mental impairment which substantially limits one or more of such person's major life activities, a record of having such an impairment or being regarded as having such an impairment, but such term does not include current, illegal use of or addition to a controlled substance as defined by Chapter 481 of the Texas Health & Safety Code.

Hazardous Materials or Waste
A substance classified as a hazardous material under state or federal law or a chemical, petroleum product, gas, or other substance that if discharged or released, is likely to create an imminent danger to individuals, property or the environment. A hazardous material includes, but is not limited to any one of the following, as defined by 40 C.F.R 173, or, with respect to hazardous waste, listed as a substance subject to 40 C.F.R. 262: Radioactive material; Explosives, Class A; Explosives, Class B; Poison A; Poison B; Flammable gas; Nonflammable gas; Flammable liquid; Oxidizer; Flammable solid; Corrosive material; Combustible liquid; Etiologic agent; other regulated material (ORM); or, Hazardous waste.

Healthcare Facilities
Uses characterized by activities focusing on medical services, particularly licensed public or private institutions that provide primary health services and medical or surgical care to persons suffering from illness, disease, injury, or other physical or mental conditions. Accessory uses may include laboratories, outpatient, or training facilities, and parking, or other amenities primarily for the use of employees in the firm or building.

Height, Airport Overlay Zone
For the purpose of determining height limitations in all zones established in Subchapter 4: Overlay and Historic Districts, and shown on the zoning map, the vertical distance of an object above mean sea level elevation unless otherwise specified.
Height, Building or Structure
Height shall be measured as the vertical distance above finished grade measured to the highest point of the roof of a flat roof or to the deck line of a mansard roof, or to the midpoint of the highest gable of a pitched or hipped roof.

Heritage Trees
All Quality trees with a dbh greater than 18 inches and all Post Oaks with a dbh of six inches or greater.

Historic District
Any neighborhood or region designated by City Council as a historic district.

Historic Landmark
A building, district, object, site, or structure that is officially recognized by the State of Texas, or the United States government, for its outstanding architectural, archeological, cultural, social, economic, ethnic and political history significance.

Historic Landmark Commission (HLC)
The City of Denton Historic Landmark Commission.

Historic Preservation
The protection, reconstruction, rehabilitation, repair or restoration of landmarks of historical, architectural or archeological significance.

Historic Preservation Officer (HPO)
The Historic Preservation Officer for the City of Denton (HPO).

Historic Resource
Any building, structure, object or site that is 50 years or older or any resource that has been identified as a high or medium priority because of its unique history or architectural characteristics.

Historic Resources Survey
A systematic, detailed examination of an area designed to gather information about historic properties sufficient to evaluate them against predetermined criteria of significance.
Historic Site
The location of a significant event, a prehistoric or historic occupation or activity, which may include open
spaces, or a building or structure, whether standing, ruined, or vanished, where the location itself
possesses historic, cultural, or archeological value regardless of the value of any existing structure.

Home Occupation
An occupation commonly carried on within a dwelling by members of the family occupying the dwelling.
The use of the home as an occupation shall be incidental and subordinate to the use of the home as a
dwelling.

Homeless Shelter
A supervised private facility that provides temporary living accommodations for homeless individuals.

Horizontal Surface
A horizontal plane 150 feet above the established airport elevation of, the perimeter of which is
constructed by swinging arcs of 10,000 feet radii from the center of each end of the primary surface of
runways 17L-35R and 17R-35L of the airport, and connecting the adjacent arcs by lines tangent to those
arcs.

Horticulture
The cultivation of row crops, a garden, or an orchard for noncommercial purposes.

Hospital Services
An institution providing primary health services, psychiatric services, and medical or surgical care to
persons primarily on an inpatient basis. This use differs from medical clinics in that it may require stays for
longer than 24 hours. This definition includes birthing center, general hospital, private psychiatric hospital,
niche hospital, special hospital, and trauma facilities. This definition does not include nursing home and
institutions where persons suffering from permanent types of illness, injury, deformity, deficiency, or age
are given care and treatment on a prolonged or permanent basis.

Hotel
A facility offering transient lodging accommodations at a daily rate for a period of time not to exceed 30
days, and providing additional services, such as restaurants, meeting rooms, and recreational facilities.
Guest quarters are accessible through a main entrance and by hallways.

Hotel Occupancy Tax
The hotel occupancy tax as defined in the Municipal Code of Ordinances, and Chapter 351 of the Texas
Tax Code.

Household Living
Uses in this category are characterized by residential occupancy of a dwelling unit by a household.
Tenancy is arranged on a month-to-month or longer basis. Common accessory uses include recreational
activities, raising of pets, gardens, personal storage buildings, hobbies, and resident parking. Specific use
types include:

Impact Fee
A fee levied by the City pursuant to TLGC, Chapter 395, as a total or partial reimbursement for the total or
partial cost of providing additional facilities or services needed as a result of new development.

Impairment, Physical or Mental
1. Any physiological disorder or condition, cosmetic disfigurement, or anatomical loss affecting one or
more of the following body systems; neurological; musculoskeletal; special sense organs; respiratory,
including speech organs; cardiovascular; reproductive; digestive; genito-urinary; hemic and lymphatic; skin; and endocrine; or

2. Any mental or psychological disorder such as mental retardation, organic brain syndrome, emotional or mental illness and specific learning disabilities.

3. The term includes but is not limited to such diseases and conditions as orthopedic, visual, speech dementia, cerebral palsy, autism, epilepsy, muscular dystrophy, multiple sclerosis, cancer, heart disease, diabetes, mental retardation, emotional illness, drug addiction (other than drug addiction caused by illegal use of a controlled substance).

**Impervious**
Any hard-surface, man-made area that does not readily absorb or retain water, including but not limited to building slabs, building roofs, swimming pools, parking and driveway areas, sidewalks, paved recreation areas, and other surfaces that do not generally absorb water and are not considered by the City to be pervious surfaces.

**Impervious Surface**
A surface that has been compacted or covered with a layer of material so that it is highly resistant to infiltration by water.

**Imported Fill**
The mechanical or physical act of bringing soil in from offsite. When stockpiling imported fill, it shall occur on private property only.

**Indoor Recreation Facility**
A commercial recreational use conducted entirely within a building, including arcade, arena, art gallery and studio, art center, assembly hall, athletic and health clubs, auditorium, bowling alley, community center, conference center, exhibit hall, gymnasium, library, movie theater, museum, performance theater, pool or billiard hall, skating rink, swimming pool, and tennis court. Accessory uses may include limited retail, concessions, parking, and maintenance facilities.

**Infill Development**
Development on a vacant parcel or groupings of vacant lots within an existing block surrounded by existing development that is contiguous on at least two sides for corner lots and contiguous on at least three sides for interior lots (existing development located directly in front on the other side of the street may count as a side for interior lots only), no greater than two acres in size, and is served with all or most public services and facilities, including but not limited to water, wastewater and drainage. Annexed areas on the periphery of the City limits are not considered infill sites.

**Infrastructure**
The provision of systems that provide transportation, water, waste water, solid waste, stormwater drainage, electrical and franchise facilities typically required to service development.

**Inlet**
An opening into a storm drain system for the entrance of surface storm runoff.

**Institution**
An establishment that:

1. Furnishes, in one or more facilities, food and shelter to four or more persons who are unrelated to the proprietor of the establishment; and
Subchapter 9: Definitions
9.2 Definitions

2. Provides minor treatment under the direction and supervision of a physician licensed by the Texas State Board of Medical Examiners, or other services that meet some need beyond the basic provision of food, shelter, and laundry; or

3. A foster care residential facility that provides room and board to fewer than five persons who:
   a. Are not related within the second degree of consanguinity or affinity, as determined under Chapter 573, Government Code, to the proprietor; and
   b. Because of their physical or mental limitation, or both, require a level of care and services suitable to their needs that contributes to their health, comfort, and welfare.

Institutional Use
A non-profit or quasi-public use, such as a religious institution, library, public or private school, hospital services, or government-owned or government-operated structure or land used for public purpose.

Kennel
Any establishment where domestic animals (usually dogs and cats) are boarded (overnight), bred or raised for sale, or trained, exclusive of veterinary care.

Land-Disturbing Activity
Alteration of the land surface by:
1. Any grading, scraping, excavating, dredging, transporting or filling of land;
2. Any clearing of vegetation;
3. Any construction, rebuilding, or alteration of a building, road, driveway, parking area, or other structure, not including routine maintenance such as painting, repair, or reconstruction of existing structures or surfaces;
4. Any substantial activity or use which may result in soil erosion from water or wind and the movement of sediments into waters or lands protected by this Chapter; and,
5. It shall not include activities such as ordinary maintenance and landscaping operations, individual home gardens, repairs, additions or minor modifications of an existing single-family dwelling, and the cutting of firewood for personal use.

Landfill, City-Owned
A city-owned facility for the collection, source separation, storage, transportation, transfer, processing, treatment, or disposal of solid waste, including the destruction/conversion of solid waste into energy. Uses may include a sanitary landfill, debris landfill, facility treatment of natural gas, and a fueling station.

Landmark Trees
A healthy tree that is designated by the property owner on the Texas Big Tree Registry regardless if the tree is protected or a non-protected tree; or a tree designated as a historic tree where an event of historic significance occurred that had local, regional, or national importance; or at the home of a citizen who is famous on a local, regional, or national basis; or that has taken on a legendary stature in the community, is mentioned in literature or documents of historic value, or is considered unusual due to size, age, or other landmark status. Historic trees shall be designated following the historic landmark designation procedure.

Landscaping
A planted area containing trees, shrubs, and groundcovers providing a transition between structures on a site and the property line, adjacent structures, or street rights-of-way.

Lane
A driving surface with a width as specified in the street design standards for that class of street.
Large Secondary Trees
All healthy Bois d’Arc, Hackberry, or Cottonwood trees with a 12-inch or greater dbh.

Laundry Facility, Industrial
An establishment that cleans clothing, carpeting, drapes, and other cloth or synthetic fiber materials using a chemical process. This definition includes uses such as rug cleaning or repair service; pressing of garments or fabrics; carpet or upholstery; power laundry; industrial launderers; and linen supply. Such establishments may also include self-service laundering facilities.

Laundry Facility, Self-Service
An establishment providing washing, drying, or ironing machines for use on the premises by rental to the general public. This definition includes automatic, self-service, or hand laundries only.

Legal Nonconforming
The continued existence of land, buildings, structures, uses, and site features that were lawfully established prior to the time of adoption, revision or amendment of this DDC, or granted variance of the DDC, but that fails, by reason of such adoption, revision, amendment or variance, to conform to the present requirements of this DDC.

Living Space
Space within a dwelling unit used for living, sleeping, eating, cooking, bathing, washing, and sanitation purposes.

Loading Space, Off-Street
Space logically and conveniently located for bulk pickups and deliveries, and scaled to delivery vehicles expected to be used.

Local Drainage System
Any drainage facility or system, which serves an area having a contributing drainage basin of less than one square mile in area.

Local Emergency Contact
An individual other than the applicant, who resides within 20 miles of the subject property, and who is designated by the owner/applicant to act as the owner’s authorized agent if the owner has traveled outside of the immediate area or is otherwise unavailable. The local emergency contact should reachable on a 24-hour basis, have access to the Short Term Rental Property, and be authorized by the owner to act in the owner’s absence to address any complaints, disturbances, and emergencies.

Local Historic Landmark
A building, district, object, site, or structure that has been officially recognized by the City of Denton for its outstanding architectural, archeological, cultural, social, economic, ethnic and political history significance.

Lodging Facilities
For-profit facilities where lodging, meals, and the like are provided to transient visitors and guests for a defined period.

Lot
A designated parcel, tract or area of land established by a plat or otherwise permitted by law to be used, developed or built upon as a unit.

Lot Area
The total horizontal area within the lot lines of a lot, said area to be exclusive of street right-of-way.
Lot Depth
The horizontal distance from the midpoint of the rear of lot line to the midpoint of the front lot line.

Lot Frontage
That portion of a lot adjacent to a street.

Lot Line
A boundary of a lot. “Lot line” is synonymous with “property line.”

Lot Line, Front
The lot line separating the lot from the street other than an alley. In the case of a corner lot, there shall only be one street line considered the front lot line. The front lot line adjoins the public or private rights-of-way where the entrance/address is located.

Lot Line, Rear
A lot line which is opposite and most distant from the front lot line, and in the case of an irregular, triangular, or other shaped lot, a line 10 feet in length within the lot parallel to and at a maximum distance from the front lot line.
Lot Line, Side
Any lot line not a front or rear lot line.

Figure 9.2-D: Side Lot Line

Lot of Record
An individual lot or a lot which is a part of a subdivision, the map of which has been legally recorded in the office of the Denton County Clerk; or a parcel of land the deed of which has been recorded in the office of the Denton County Clerk.

Lot Width
The horizontal distance between the side lines, measured at the front property line adjacent to the public right-of-way. The lot width for a corner lot shall be measured along the right-of-way upon which the address is assigned. The flagpole portion of a flag lot shall be ignored in measuring lot width.

Figure 9.2-E: Lot Width

Lot, Corner
A lot abutting the intersection of two or more streets other than an alley.
Lot, Double Frontage
A lot having frontage on two nonintersecting streets, as distinguished from a corner lot.

Lot, Flag
Any lot without standard legal access to a city street, and that is provided with access by a driveway parallel to the lot line of a lot having standard access to a public right-of-way.

Lot, Gross Area
An area under public or private property ownership, whose lot lines are described by plat or deed.

Lot, Interior
A lot other than a corner lot or a through lot.

Lot, Through
An interior lot having frontage on two parallel or approximately parallel streets other than alleys. Through lots are prohibited.

Manufactured Home Development (HUD Code)
A development of a single lot divided into more than one stand for the placement of HUD-Code manufactured homes, accessory uses, and service facilities, meeting all requirements of this DDC and any applicable deed restrictions and state laws.

Group Living
Uses in this category are characterized by residential occupancy of a structure by a group of people who do not meet the definition of “household living.” Tenancy is arranged on a monthly or longer basis and the size of the group may be larger than a family. Generally, group living structures have a common eating area for residents. Residents may receive care, training, or treatment, and caregivers may or may not also reside at the site. Accessory uses commonly include recreational facilities and vehicle parking for occupants and staff.

Manufacturing and Processing
Uses including all transformative processes, regardless of whether or not the new product is finished or semi-finished. Production is typically for commercial wholesaling rather than for direct sales. Accessory
uses may include retail sales, offices, storage, cafeterias, employee amenities, parking, warehousing, and repair facilities.

**Manufacturing, Artisan**
An establishment or business where an artist, artisan, or craftsperson teaches, makes, or fabricates crafts or products by hand or with minimal automation and may include direct sales to consumers. This definition includes uses such as small-scale fabrication, manufacturing, and other industrial uses and processes such as welding and sculpting.

**Manufacturing, High-Impact**
An establishment or business that uses hazardous inputs or creates hazardous by-products in the course of manufacturing, assembly, fabrication, or materials treatment, or that uses manufacturing, assembly, fabrication, or treatment processes that create potentially hazardous impacts on the environment or surrounding areas. Examples include but are not limited to: acid manufacture; acid bulk storage; cement, lime, gypsum or plaster manufacture; central concrete mixing or concrete proportioning plant; distillation, manufacture or refining of bones, coal or tar asphalt; explosives, manufacture or storage; fat, grease, lard or tallow rendering or refining; fertilizer manufacture from organic matter; glue or size manufacture; paper manufacture; petroleum or asphalt refining or storage; smelting of tin, copper, zinc or iron ores; and storage or processing raw hides or fur.

**Manufacturing, Low-Impact**
Industrial operations relying on the assembly, distributing, fabricating, manufacturing, packaging, processing, recycling, repairing, servicing, storing, or wholesaling of goods or products, using parts previously developed from raw material. Low-impact manufacturing uses include only those uses that will not create noise, smoke, fumes, odors, glare, or health or safety hazards outside of the building where such assembly, fabrication, or processing takes place.

**Manufacturing, Medium-Impact**
Industrial operations relying on the assembly, distributing, fabricating, manufacturing, packaging, processing, recycling, repairing, servicing, storing, or wholesaling of goods using raw materials and mechanical power and machinery.

**Masonry**
Building materials consisting of clay brick, natural and manufactured stone, granite, marble, architectural concrete block, tilt wall concrete panels and other similar materials. This definition does not include cementitious siding or EIFS.

**Maximum Extent Feasible**
As determined by the Director, no feasible and prudent alternative exists, and all possible efforts to comply with the regulation or minimize potential harm or adverse impacts have been undertaken. Economic considerations may be taken into account but shall not be the overriding factor in determining “maximum extent feasible.”

**Maximum Extent Practicable**
The degree to which a project meets an adopted standard in which all possible efforts to comply with the standard or to minimize harmful or adverse effects have been undertaken by the applicant, but full compliance cannot be achieved, and no feasible or practical alternative exists. Economic considerations may be taken into account, but shall not be the overriding factor determining “maximum extent practicable.”
Mechanical Equipment
Equipment or devices installed for a use appurtenant to the principal use. Such equipment shall include heating and air conditioning equipment, solar collectors, parabolic antennas, disc antenna, radio or TV receiving or transmitting antennas, and any power generating devices. The following equipment or devices are exempt:

1. Private, noncommercial radio and television antennas not exceeding a height of 70 feet above grade or 30 feet above an existing structure, whichever height is greater. No part of such antenna shall be within the yards required by this Chapter. A structure permit shall be required for any antenna mast, or tower over 50 feet above grade or 30 feet above an existing structure when the same is constructed on the roof of the structure.

2. Parabolic antennas under three feet in diameter.

Medical Clinic
An establishment for the provision of medical, psychiatric, or surgical services on an outpatient basis. These facilities can be differentiated from a medical office in that such facilities may either be open to and operated for the general, walk-in public, or require an appointment. This definition includes ambulatory surgical center (ASC); end-stage renal disease facility (dialysis), outpatient services, freestanding emergency medical care facility.

Medical Office
An establishment where patients receive consultation, diagnosis, therapeutic, preventative, or corrective personal treatment by doctors, dentists, or similar practitioners of medical and healing arts for humans, medical or dental laboratories. These facilities can be differentiated from a medical clinic in that such facilities primarily operate on an appointment basis, are generally not open to the general walk-in public, and offer specialized services or attention. This definition includes dentist’s office and doctor’s office.

Minor Plat
A subdivision resulting in four or fewer lots, where all lots involved front an existing public street, and that does not require the creation of any new street or the extension of municipal facilities.

Mitigation dbh
The total combined dbh of trees removed that must be mitigated by replanting, or by alternative means as described in Subsection 7.7.4F. This total is determined by subtracting credits granted for preserved trees from the Preliminary Mitigation dbh.

Mixed-Use Building
A building containing more than one type of use, such as governmental, institutional, office, personal service, retail, and residential; including a mix of residential and non-residential uses.

Mobile Food Business
A business that serves food or beverages from a self-contained unit either motorized or in a trailer on wheels, and is readily movable, without disassembling, for transport to another location.

Mobile Food Court
The lot or parcel where mobile food truck(s) or trailer(s) can be located for the business of selling food.

Mobile Food Trailer
A mobile food business that serves food or beverages from a nonmotorized vehicle larger than three feet in width and eight feet in length that is normally pulled behind a motorized vehicle.

Mobile Food Truck
A mobile food business that serves food or beverages from an enclosed self-contained motorized vehicle.
Motel
A structure or group of structures on the same lot containing individual guest units for rental to transients, with separate exterior entrances, and consisting of individual sleeping quarters, detached or in connected rows, with or without cooking facilities.

Musician Studio
A facility where the principal use is the production, editing, and/or storage of audio media occurs, or formal private instruction in playing a musical instrument or singing.

National Register of Historic Places
The Nation’s official list of buildings, districts, and sites (including structures and objects) significant in American history and culture, architecture, archeology, and engineering maintained by the National Park Service and administered on a state-wide basis by the Texas Historical Commission. Restrictions on these properties exist only when there is an undertaking that uses federal funds or that requires a federal permit or license.

Neighborhood
A sub area of the City of Denton in which the residents (or non-residential uses) share a common identity focused around a school, park, or community business center that are generally within walking distance of the homes or businesses, architecture, or other features with boundaries that may include highways, railroads or such natural features as rivers. The neighborhood character shall be deemed to be the prevailing character of structures within 300 feet in either direction along street frontages, irrespective of intervening streets.

New Development
Development of a site that was previously unimproved (with no existing principal structures or uses) or has been or will be cleared of structures. New development is distinguished from existing development and the expansion or alteration of existing development.

Nonconforming Lot
A lot that was legally established before the effective date of this DDC or subsequent amendment thereof, but that does not comply with the dimensional standards that apply in the zoning district in which the lot is located.

Nonconforming Site Feature
Any site feature established or constructed legally at the time of passage or amendment of this DDC which does not conform, after the passage or amendment of this DDC, with the regulations of the district in which it is located.

Nonconforming Structure
Any structure established or constructed legally at the time of passage or amendment of this DDC which does not conform, after the passage or amendment of this DDC, with the regulations of the district in which it is located.

Nonconforming Use
Any use of land established legally at the time of passage or amendment of this DDC that does not conform, after the passage or amendment of this DDC, with the regulations of the district in which it is located.

Non-Protected Tree
The following are considered Non-Protected Trees:
1. Dead or Unhealthy Trees;
2. Trees that pose an imminent or immediate threat to persons or property;
3. Crepe Myrtles and ornamental pears;
4. Mesquite unless part of a Preserved Habitat or Conservation Easement;
5. Honey Locust, unless part of a Preserved Habitat or Conservation Easement; or
6. Any tree listed on the Texas Department of Agriculture Noxious and Invasive Plant List.

**Nude Model Studio**
Any place where a person who appears in a state of nudity or displays "specified anatomical areas" is provided to be observed, sketched, drawn, painted, sculptured, photographed, or similarly depicted by other persons who pay money or any form of consideration.

**Nudity or a State of Nudity**
1. The appearance of a human bare buttock, anus, male genitals, female genitals, or female breasts; or
2. A state of dress which fails to opaquely cover a human buttock, anus, male genitals, female genitals, or areola of the female breast.

**Nuisance**
Physical or environmental conditions resulting in regular and/or continuous problems affecting the health, safety, and quality of life of citizens.

**Nursing Home**
A home for the aged, chronically ill, or incurable persons who are unable to care for themselves and in which three or more persons not of the immediate family are kept or provided with food and shelter or care for compensation; but not including hospitals, clinics, or other similar institutions devoted primarily to the diagnosis and treatment of the sick or injured.

**Obstruction**
Any structure, growth, or other object, including a mobile object, which exceeds a limiting height set forth in Section 4.5: **MAO – Municipal Airport Overlay District**.

**Occasional Sales**
Occasional sales are the sale, or offering for sale, of tangible personal property to the public, upon the premises of an existing residential dwelling, by the owner or lessee of the residential dwelling. Such sales commonly include garage or yard sales.

**Odor Threshold**
The concentration of odorous matter in the atmosphere necessary to be perceptible to the olfactory nerve of a normal person. Determination of the odor threshold is prescribed by A.S.T.M.D. 1931-57, Standard Method for Measuring Odor in Atmosphere.

**Office, Business, and Professional Services**
Uses in this category provide executive, management, administrative, governmental, or professional services, but do not sell merchandise except as incidental to a permitted use. Typical uses include real estate, insurance, property management, investment, employment, travel, advertising, law, architecture, design, engineering, accounting, call centers, and similar offices. Accessory uses may include cafeterias, health facilities, parking, or other amenities primarily for the use of employees in the firm or building.

**Off-Site**
Located outside the boundary of a development.

**On-Site**
Located within the boundary of a development.
Open Space
See “Park, Playground, Open Space.”

Outdoor Recreation Facility
Uses in this category provide recreation and entertainment activities mostly outdoors or partially within a building, including golf courses, outdoor swimming pools, tennis courts, basketball courts, amphitheater, outdoor arena, and outdoor theater. Accessory uses may include limited retail, concessions, parking, and maintenance facilities.

Outdoor Storage
As a principal use, a property or area used for the long term (more than 24 hours) storage of materials, merchandise, products, stock, supplies, machines, operable vehicles, equipment, manufacturing materials, or other items not kept within a structure having at least four walls and a roof. New or used automobile sales and leasing display and parking, and outdoor sales and display areas shall not be defined as outside storage.

Outdoor Storage, Accessory
The keeping of goods, materials, or equipment as an accessory use to a principal use located on the same lot, where such goods, materials, or equipment are not kept in a structure having at least four walls and a roof. New or used motor vehicle sales and rental display and parking areas shall not be defined as accessory outside storage.

Outside Storage
The storage of objects, items, products or materials outside an enclosed building, and not intended for immediate sale.

Owner
The owner of a tract of land as recorded in the Denton County Deed Records. An owner may include: a person, firm, corporation, partnership or agent, attorney-in-fact, manager or Director, or developer. Such term as used in this chapter always includes one or more of the persons enumerated in this section who own all or any part of the land which is contemplated to be developed.

Owner-Occupied
A lot or structure that is occupied by the legal owner of record or, where there is a recorded land sales contract in effect, the purchaser thereunder.

Park, Playground, Open Space
Any parcel or area of land or water set aside, dedicated, designated, or reserved for public use or enjoyment of for the private use and enjoyment of owners and occupants of neighboring or adjoining land that are designed or used for recreational purposes and are available to the general public. Uses include neighborhood park, an urban park or plaza, a historic site, a community-wide park, a natural area, public swimming pools, golf courses, tennis courts, recreational centers, and city-owned athletic complexes.

Parking Lot as a Principal Use
The ownership, lease, operation, or management of a surface parking lot, above-ground structure, or below-ground structure.

Parking Space
A space within a public or private parking area, exclusive of driveways, ramps, columns, offices and work areas, which is for the temporary parking or storage of one motor vehicle.
**Subchapter 9: Definitions**

### 9.2 Definitions

**Particulate Matter**  
Finely divided solid or liquid matter, other than water, which is released into the atmosphere.

**Pedestrian Path**  
A graded, cleared way for individuals who travel on foot. When located along any improved street or parking area, these paths shall be adjacent to the curb at curb level.

**Pedestrian Way**  
A right-of-way for pedestrian traffic.

**Permitted Use**  
That use of a lot which is among the uses allowed as a matter of right, and subject to the restrictions of the zoning district.

**Person**  
An individual, firm, partnership, proprietorship, association, corporation, estate, receiver, syndicate, branch of government, social or fraternal organization, or any other group or combination acting as a legal entity, and including any trustee, assignee, or other representative.

**Personal Service, General**  
An establishment that provides repair, care, maintenance or customizing of wearing apparel or other personal articles or human grooming services and includes such uses as beauty/barber shops, dry cleaning, shoe repair, alterations, spas, and tanning salons, photography studios, house cleaning services, weight reduction centers, florist, or pet grooming shops. This use does not include commercial laundry and dry cleaning facilities.

**Phase**  
One final platted section of a larger overall development.

**Photovoltaic System (also “Photovoltaic Installation”)**  
An active solar energy system that converts solar energy directly into electricity.

**Photovoltaic System, Ground-Mounted**  
An active solar energy system that is structurally mounted to the ground and is not roof-mounted; may be of any size (small-, medium- or large-scale).

**Photovoltaic System, Roof-mounted**  
An active solar energy system that is structurally mounted atop a structure.

**Pilot Channel**  
A concrete channel section used to convey normal low flows, fix the location of the flow line of a channel, minimize erosion and provide access for maintenance.

**Planned Development (PD)**  
A land area under unified control designed and planned to be developed in a single phase or a series of phases according to an approved development plan.

**Planning and Zoning Commission**  
The Planning and Zoning Commission for the City of Denton, Texas. Also referred to as the “Commission.”

**Planting Area**  
An outdoor area, the surface of which shall not be covered by impervious surface materials or structures, and devoted entirely to the planting or maintenance or plant materials, except as otherwise allowed by this DDC, such as walls, fences, plazas, landscape architectural features such as gazebos, pergolas, arbors,
fountains, or sculpture. Landscape architectural features shall not include tennis courts, basketball courts or other pervious recreational facilities.

**Plants, Plant Material**  
Live plant material, including grasses, annuals, perennials, bulbs, groundcover, shrubs, and trees, are botanical plants that are nourished through the processes of air, water, and soil nutrients. Plastic, fibrous, silk, or other non-live materials, are not considered live plant materials.

**Plat or Final Plat**  
A map of a subdivision, addition, or development to be recorded in the County Clerk Plat Records after approval by the city.

**Pole-Mounted Antenna**  
Any antenna which is preassembled off-site and designed to be moved from site to site.

**Power Stations, Electric Substations, Interchanges, and Switch Stations**  
A structure that is part of an electric generation, transmission, and distribution system that:

1. Converts electric energy to a lesser voltage for the purpose of subregional or localized distribution;
2. Functions as a transition point from overhead to underground electric transmission lines; or
3. Acts as the point of convergence for two or more transmission lines.

**Precision Instrument Runway**  
A runway having an existing instrument approach procedure utilizing an Instrument Landing System (ILS) or a Precision Approach Radar (PAR). It also means a runway for which a precision approach system is planned and is so indicated on an approved airport layout plan or any other planning document.

**Preliminary Mitigation dbh**  
The numeric result determined by multiplying the total calculated dbh of trees to be removed by 50 percent.

**Preliminary Plat**  
A map showing the salient features of a proposed development as required by this DDC submitted for the purpose of preliminary consideration prior to the submission of a final plat.

**Preserved Habitat**  
Areas adjacent to an ESA where vegetation is retained to preserve natural ecological conditions and protect wildlife.

**Primary Residence**  
The usual dwelling place of the applicant's residential dwelling and is documented as such by at least two of the following: motor vehicle registration, driver’s license, Texas State Identification card, voter registration, property tax documents, or utility bill. For purposes of the short-term rental standards, a person may have only one primary residence.

**Primary Surface**  
A surface longitudinally centered on a runway. When the runway has a specially prepared hard surface, the primary surface extends 200 feet beyond each end of that runway; but when the runway has no specially prepared hard surface or planned hard surface, the primary surface ends at each end of that runway. The elevation of any point on the primary surface is the same as the elevation of the nearest point on the runway centerline.
Printing, Copying, and Publishing Establishment
An establishment where printed material is produced, reproduced and/or copied by either a printing press, photographic reproduction techniques, or other similar techniques. This use does not include the on-site manufacture of paper products.

Prior Regulations
Any ordinance adopted by the City of Denton related to issues addressed within this DDC and replaced by this DDC.

Private Club
An organization that owns, leases, or occupies a building used exclusively for club purposes at all times and:
1. Is operated solely for a recreational, fraternal, social, patriotic, political, benevolent, or athletic purpose, but not for pecuniary gain;
2. Sells alcoholic beverages only incidentally to its operation;
3. The affairs and management of the organization are conducted by a board of directors, executive committee, or similar body chosen by the members at an annual meeting;
4. Has established bylaws or a constitution to govern the club’s activities; and
5. Is exempt from federal income taxation under Section 501(a), Internal Revenue Code, as a club described by Section 501(c)(7) of that Code.

Private Covenants
Private legal restrictions on the use of land contained in the deed, plat, and other legal documents pertaining to the property.

Private Utility Provider
The owner of a wire network (i.e. cable, electric, or telephone company) utilized in connecting the various cell sites to telephone switching offices, long distance providers or the public switched telephone network.

Protected Trees
Landmark, heritage, quality, or secondary trees.

Public Improvements
The public infrastructure needed or required by the development, or by a single phase within a larger overall development.

Public Right-of-Way
Any designated public street, sidewalk, or alley.

Public Street
A street which is owned or maintained by city.

Public Utilities
The term Public Utilities means:
1. Entities franchised by the city to use public rights-of-way for the conduct of their business;
2. Entities that are “public utilities” under pertinent provisions of the Texas Utilities Code or Texas Water Code but are specifically exempted by state law from the requirement that they receive a franchise from the city for the use of public rights-of-way;
3. Public sanitary sewers;
4. Public water mains;
Subchapter 9: Definitions

9.2 Definitions

5. Public streets;
6. Public storm sewers;
7. Public detention ponds;
8. Municipally-owned electric utilities; and
9. Any contractor hired by these entities.

Quality Trees
All healthy non-secondary trees, except Post Oaks, that measure between six inches and 18 inches dbh.

Rear Access Garage
See "Garage, Rear Access"

Rear Yard
See "Yard, Rear."

Recorded Texas Historical Landmark
A state designation for buildings important for their historical associations and which have retained a high degree of their original historic fabric. They must be at least 50 years of age and retain their original exterior appearance. State historical landmarks receive greater legal protection than National Register of Historic Places designations.

Recreation and Entertainment
This category includes indoor and outdoor recreation and entertainment activities. Accessory uses may include limited retail, concessions, parking, and maintenance facilities.

Recreational Vehicle ("RV")
A motorized vehicle or recreational trailer, designed or maintained for use as a temporary dwelling or sleeping place for travel or recreation purposes exclusively, having no foundation other than wheels or jacks.

Recreational Vehicle Park
A parcel of land which is used solely for the rental or lease of lots for transient campers, trailers, motor homes, or temporary parking of any other recreational vehicle that is not a HUD-code manufactured home or tiny home.

Redevelopment
Development on a tract of land with existing structures where all or a majority of the existing structures would be razed and a new structure or structures built.

Regional improvements
Those public improvements which are required of the development for the protection of either:

1. Health, safety and welfare of the public at large; or
2. Property outside or surrounding the development;

Examples of Regional improvements include, but are not limited to:

1. Water line "loops" or extensions for service;
2. Regional detention facilities;
3. Off-site drainage improvements.

Religious Assembly
A structure used by a religious organization or congregation for regular organized religious activities.
Subchapter 9: Definitions

9.2 Definitions

Replacement Inches
The total combined dbh, in inches, of all protected trees that are proposed to be removed and that are located within the development impact area.

Replat
A change in a map of an approved or recorded subdivision plat if such change affects any street layout on such map or area reserved thereon for public use or any lot line or if it affects any map or plan legally recorded prior to the adoption of any regulations controlling subdivisions.

Residential Use
A single-family detached dwelling, townhome, duplex, triplex, fourplex, multifamily dwelling, manufactured home development, and tiny home development.

Residential Zoning District
A one-family, two-family, or multi-family zoning district, or any area within a planned development zoning district which is designated for residential use, as shown on the approved site plan for the zoning district.

Restaurant
A food establishment that is open to the public, where food and beverages are prepared, served, and consumed primarily within the principal building. Accessory uses may include an outdoor dining area or sidewalk café, and the manufacture of alcoholic beverages for on-site consumption and/or retail sales.

Restaurant with Drive-Through
Any restaurant designed to permit or facilitate the serving of food or beverages directly to, or permitted to be consumed by, patrons in or on motor vehicles on the premises.

Retail Sales
Uses involving the sale, lease, or rent of new or used products directly to the final consumer for whatever purpose but not specifically or exclusively for the purpose of resale. Accessory uses may include offices, parking, storage of goods, and assembly, repackaging, or repair of goods for on-site sale.

Rezoning
To change the zoning of a parcel of land, also referred to as a zoning amendment. Rezoning may require an amendment to the comprehensive plan.

Right-of-way
A strip of land occupied or intended to be occupied by a street, crosswalk, railroad, road, electric transmission line, oil or gas pipeline, water main, sanitary or storm sewer main or for another Specific Use. The usage of the term “right-of-way” for land platting purposes means that every right-of-way established and as shown on a Final Plat is to be separate and distinct from the lots or parcels adjoining such right-of-way and not included within the dimensions or areas of such lots or parcels. Right-of-way intended for streets, crosswalks, water mains, sanitary sewers, storm drains or any other use involving maintenance by a public agency shall be dedicated to public use by the maker of the Plat on which such right-of-way is established.

Riparian Buffer
Areas within 100 feet, measured from both sides of the stream centerline, with drainage areas greater than one square mile, and 50 feet from both sides of any streams centerline that drain areas of one square mile or less. This also applies to the outer edges of surface water bodies.

Runway
A defined area in an airport for landing and take-off of aircraft along its length.
Subchapter 9: Definitions
9.2 Definitions

Sale of Produce and Plants Raised on Premises
The incidental on-site sale of feed, grain, fruits, flowers, vegetables, ornamental plants, or similar goods.

Salvage Yard
Any lot or parcel of land on which wastes or used secondhand materials are bought, sold, exchanged, stored, processed, or handled. Materials include but are not limited to: scrap iron and other ferrous metals, paper; rags, rubber tires, bottles, discarded goods, machinery, or two or more inoperable motor vehicles.

Satellite Earth Stations
Are considered to be accessory structures and are defined as a combination of:

1. An antenna or dish antenna whose purpose is to receive communication or other signals from orbiting satellites and other extraterrestrial sources;
2. A low-noise amplifier (LNA) which is situated at the focal point of the receiving component and whose purpose is to magnify and transfer signals;
3. A coaxial cable whose purpose is to carry the signals into the interior of the structure; and,
4. The station must be located to the side or rear of the structure unless a usable satellite signal cannot be obtained; in which case, the property owner may request a variance from the requirement through the Board of Adjustments. Ground-mounted stations shall be no more than 10 feet above the maximum height requirement of the zoning district in which they are located.

School, Private
Any private school meeting all requirements of the compulsory education laws of the State of Texas. A facility or area for pre-kindergartens, kindergartens, elementary, or secondary education supported by a private organization, including a church or parish organization. This definition includes licensed private preschool facilities in which the principal use of the property is for preschool. This does not include homeschooling facilities that are located within residential structures or other structures on a part time basis.

School, Public
Any public school meeting all requirements of the compulsory education laws of the State of Texas. A facility or area for pre-kindergartens, kindergartens, elementary, or secondary education supported by a public organization. This definition includes licensed public preschool facilities in which the principal use of the property is for preschool.

Screening
A method of visually shielding or obscuring land-uses or structures via fencing, opaque buffer, or some other opaque physical barrier.

Seasonal Sales
The temporary sale of goods or products associated with the season or a cultural event, including but not limited to the sale of healthy, nonhazardous, cut or live evergreen trees, wreaths, tree stands, pumpkins, fireworks, and seasonal produce.

Secondary Tree
A healthy Ash, Bois D' Arc, Hackberry, or Cottonwood tree, with a dbh greater than six inches.

Self-Service Storage
A building or group of buildings consisting of individual, self-contained units that are leased to individuals, organizations, or businesses for self-service storage of personal property.
Semi-Nude
A state of dress in which clothing covers no more than the genitals, pubic region, and areola of the female breast, as well as portions of the body covered by supporting straps or devices.

Setback
The minimum distance between by which any building or structure must be separated from a street right-of-way or lot line.

Sexually Oriented Business
An adult arcade, adult bookstore or adult video store, adult cabaret, adult motel, adult motion picture theater, adult theater, escort agency, or nude model studio.

Shared Drive
A common driveway or access shared by adjoining properties.

Short-Term Rental
The rental of an entire dwelling unit for monetary consideration for a period of time less than 30 consecutive days, not including a bed and breakfast, boarding or rooming house, hotel, or motel. This definition does not include offering the use of one’s property where no fee is charged or collected.

Side Access Garage
See "Garage, Side Access"

Side Yard
See "Yard, Side."

Site Plan
A graphic representation, drawn to scale, indicating the outlines of the land included in the plan and all proposed use locations, accurately dimensioned, and indicating the relation of each use to that adjoining and to the boundary of the property.

Site Plan Review
The comprehensive evaluation of a development and its impact on neighboring properties and the community as a whole, from the standpoint of: land use, site design, landscape design, environmentally sensitive areas protection, architecture, lighting, signs, clearing and grading, engineering design, health and safety, other adopted standards and criteria of this DDC, all other adopted codes and ordinances of the City.

Smoke
The visible discharge of particulate matter from a chimney, vent, exhaust or combustion process.

Smoke Shop
An establishment primarily engaged in the sales of tobacco products, smoking equipment, or smoking accessories. Establishments engaged in sales of tobacco products and/or smoking equipment as an incidental or accessory use shall not be classified as a smoke shop.

Solar Access
The access of a solar energy system to direct sunlight.

Solar Energy
Radiant energy received from the sun that can be collected in the form of heat or light by a solar collector.

Solar Energy System
An energy system that consists of one or more solar collection devices, solar energy related “balance of system” equipment, and other associated infrastructure with the primary intention of generating
electricity, storing electricity, or otherwise converting solar energy to a different form of energy. Solar energy systems may generate the energy requirements of a property in accordance to applicable local and national codes, standards, ordinances, and laws.

**Solar Energy System, Interconnected**
A photovoltaic system that is physically connected to the city's electrical system so that parallel operation (on-site generation) can occur.

**Solar Energy System, Stand-Alone**
A photovoltaic system that is not connected to the city's electrical system in any way.

**Special Events**
A temporary outdoor use on private property that extends beyond the normal uses and standards allowed by this DDC. "Special events" include, but are not limited to, outdoor entertainment, educational and cultural events, art shows, sidewalk sales, haunted houses, carnivals, fairs, special auto sales, grand openings, festivals, home exhibitions, and church bazaars.

**Specific Use Permit**
A use that is not automatically permitted by right, but that may be permitted within a zoning district subject to meeting specific conditions contained in this DDC.

**Specified Anatomical Areas**
Human genitals in a state of sexual arousal.

**Specified Sexual Activities**
Includes any of the following:
1. The fondling or other erotic touching of the human genitals, pubic region, buttocks, anus, or female breasts;
2. Sex acts, normal or perverted, actual or stimulated, including intercourse, oral copulation, or sodomy;
3. Excretory functions as part of or in connection with any of the activities set forth in 1 through 2 above.

**Stealth**
See "Antenna, Stealth."

**Stockpiling**
The holding on land of material or products such as any soil, sand, gravel, clay, mud, debris, vegetation, or any other material, organic or inorganic, in a concentrated state.

**Storage and Warehousing**
Uses in this category are engaged in the storage or movement of goods for themselves or other businesses. Goods are generally delivered to other businesses or the final consumer, except for some will-call pickups. There are typically few customers present. Accessory uses may include offices, truck fleet parking, and maintenance areas.

**Storage Containers and Other Portable Storage Units**
Temporary storage containers and other portable storage units used for the storage of items on a property (excluding use for storing equipment during multi-family dwelling and nonresidential alterations and construction projects).

**Storage of Hazardous Materials**
A facility or site engaged in the storage and handling of flammable or otherwise hazardous materials, liquids, waste, or gasses.
Story, Building
That portion of a building included between the surface of any floor and the surface of the floor next above it, or if there be no floor above it, then the space between the floor and the ceiling next above it.

Stream
Linear geographic feature that conveys flowing waters. Headwater streams are the uppermost, low-order streams of a watershed and comprise the majority of streams in the United States, both in terms of number and length. Streams can be perennial, intermittent, or ephemeral.

Street
A public right-of-way for roadway, sidewalk, and utility installation including the terms “road,” “highway,” “land,” “place,” “avenue,” “alley,” or other similar designations. The entire width between the right-of-way lines of every way which provides for public use for the purpose of vehicular and pedestrian traffic.

Structure
An edifice of any kind or any piece of work artificially built up or composed of parts joined together which requires location on, in, or above the ground or which is attached to something having a location on, in or above the ground. Flatwork or in-ground swimming pools are excluded.

Structure, Accessory
Any structure on the same lot with and that is incidental and subordinate to the principal structure. Flatwork, in-ground swimming pools and fences or walls used as fences are excluded.

Structure, Principal
The structure in which the principal permitted use of the lot on which the structure is located is conducted.

Subdivision
The division or redivision of land into two or more lots, tracts, sites, or parcels that are either improved or unimproved and can be separately conveyed by sale or lease.

Surface Water Body
Term to include streams, ponds, lakes, and freshwater wetlands.

Tattoo and Body Piercing Parlor
An establishment where permanent marks, scars, or designs are made on the skin by a process of pricking and ingraining an indelible pigment or by raising scars; or in which other bodily decorations, such as piercing, are provided. For the purposes of zoning, jewelry stores or other retail facilities or clinics that provide piercing as an incidental and accessory use shall not be classified as a tattoo and body piercing parlors.

Telecommunications
The transmission, between or among points specified by the user, of audio and/or visual information of the user’s choosing, without change in the form or content of the information as sent and received.

Telecommunications Service
The offering of telecommunications for a fee directly to the public, or to such classes of users to be effectively available directly to the public, regardless of the facilities used.

Temporary Portable Wireless Telecommunications Facility
A portable self-contained telecommunications facility that can be moved to a location and set up to provide wireless services on a temporary or emergency basis. A temporary portable wireless telecommunications facility is normally vehicle-mounted and contains a telescoping boom as the Antenna support structure.
Temporary Storage Container
See "Storage Containers and Other Portable Storage Units."

Temporary Structure
A structure without any foundation or footings which is attached to the ground or other structure in some nonpermanent fashion. Temporary structures shall require a permit from the Building Inspection Department and shall be removed from the site when the designated time period, activity, or use for which the temporary structure was established has ceased, but not exceeding six months in duration unless an extension is obtained from the Building Inspection Department upon just cause.

Temporary Uses
Temporary uses are defined as those activities permitted and described in Section --.

Thoroughfare Plan
The thoroughfare component of the Mobility Plan, the official map depicting the city's existing and future street system and roadway network, together with explanatory text.

Tiny Home Development
A development that has been subdivided into separate platted lots or a single lot divided into stands for the placement of tiny homes, accessory uses, and service facilities, meeting all requirements of this DDC and any applicable deed restrictions and state laws.

Topography
The physical land surface relief describing the terrain elevation, position of land features and slope. Topography includes land forms, water and other drainage features, and features such as gravel pits. A single feature such as a hillside or valley is called a topographic feature.

Tower, Electric Transmission
A self-supporting structure in excess of 50 feet (15 meters) in height designed to support high voltage electric lines. This does not include local utility or distribution poles (with or without transformers) designed to provide electric service to individual customers.

Tower, Guyed
Any telecommunications tower supported in whole or in part by cables anchored to the ground.

Tower, Monopole
A self-supporting telecommunications tower which consists of a single vertical pole fixed into the ground and/or attached to a foundation.

Tower, Self-supporting Lattice
A telecommunications tower which consists of an open network of metal braces forming a tower which is usually triangular or square in cross-section.

Tower, Telecommunications
A self-supporting or guyed structure more than 20 feet (6 meters) in height, built primarily to support one or more telecommunications antennas.

Toxic and Noxious Matter
Any solid, liquid or gaseous matter which is present in sufficient quantities to endanger health, safety and comfort of persons in the vicinity or which may cause injury or damage to property.

Trailer
A non-motorized vehicle, pulled by an automobile or truck designed or maintained for use as a temporary dwelling or sleeping place for travel or recreation purposes exclusively.
Transfer Station
A temporary storage facility for the consolidation and eventual transfer of solid waste to a landfill.

Transitional Surface
A surface extending outward and upward at right angles to the runway centerline at a slope of 7:1 from the sides of the primary surface and from the sides of the approach surface. Transitional surfaces for those portions of the precision approach surface which project through and beyond the limits of the conical surface, extend a distance of 5,000 feet measured horizontally from the edge of the approach surface and at right angles to the runway centerline.

Transportation Impact Analysis
A study performed by a registered traffic engineer analyzing the impacts of the expected traffic generated by a development on the existing and proposed road system including recommendations for mitigating such traffic.

Travel Plaza
An establishment that provides refueling, servicing, repair, parking (rest), and other services to motorists. A travel center may also include the sale of accessories and equipment for vehicles, overnight accommodations, showers and restaurant facilities.

Tree Protection Zone (TPZ)
An area shown on a tree survey and preservation plan and field inspected where construction activities are prohibited or restricted to prevent injury to preserved trees, especially during pre-construction and construction, and includes the critical root zone and/or beyond.

Ultimate Developed Condition
A fully developed area based on current approved land use plans or "C" factor of six tenths (0.6) for remaining undeveloped land in a watershed.

Understory
A grouping of native, noninvasive low-level woody, herbaceous, or ground covers species with stems less than one inch dbh.

Undeveloped Floodplain
Areas within the FEMA one-percent Annual Chance Floodplain (a.k.a. 100-year floodplain), that are undeveloped and in their natural state.

United States Secretary of Interior Standards for the Treatment of Historic Properties
A document that includes guidelines for preserving, rehabilitating, restoring and reconstructing historic buildings.

Upland Habitat or Cross Timbers Upland Habitat
Contiguous areas ten acres or larger of cross timbers habitat.

Urban Farm
A private facility for the primary purpose of farming fruits, flowers, vegetables, or ornamental plants.

Use
The purpose or purposes for which land or a structure is designed, arranged, or intended, or to which such land or structure is occupied, maintained, or leased.

Vacating Plat
The termination of, or termination of interest in, an easement, right-of-way, or public dedication of land.
Valley Storage
Water storage capacity of a stream and is a volume that is measured below the base flood elevation.

Variance
A deviation from the specific terms of this DDC that will not be contrary to public interest and is justified because, owing to special conditions, a literal enforcement of this DDC’s provisions will result in practical difficulties and/or hardship.

Vegetation
All plant life; however, for the purposes of this Chapter shall be restricted to mean trees, shrubs, ground cover, annuals, perennials, bulbs, grasses, vines, and aquatic plants, with the exception of state and federally protected and endangered vegetative specie which in all cases shall be preserved.

Vehicles and Equipment
Uses include a broad range of uses for the maintenance, sale, or rental of motor vehicles and related equipment. Accessory uses may include incidental repair and storage and offices.

Veterinary Clinic
Facility for the diagnosis, treatment, or hospitalization of domestic animals, operated under the supervision of a licensed veterinarian. The incidental temporary overnight boarding of animals that are recuperating from treatment is included in this definition.

Vibration
A periodic displacement of the earth measured in inches.

Vision Clearance Area
A triangular area on a lot at the intersection of two streets or a street and a railroad, two sides of which are lot lines measured from the corner intersection of the lot lines for a distance specified in these regulations. The third side of the triangle is a line across the corner of the lot joining the ends of the other two sides. Where the lot lines or intersections have rounded corners, the lot lines will be extended in a straight line to a point of intersection.

Warehouse and Wholesale Facility
A building or area for storage, wholesale, and/or distribution of goods and materials, supplies, and equipment that are manufactured or assembled off-site. This definition excludes the bulk storage of materials that are flammable or explosive or that create hazardous or commonly recognized offensive conditions. Accessory uses may include retail and office uses.
Subchapter 9: Definitions

9.2 Definitions

Water-Related Habitat
Areas designated as wetlands, and trees and understory vegetation containing 50 percent or more of predominately native bottomland hardwood. Bottomland hardwoods occur on the first terrace of floodplains and flats along channels. Periodic inundation prevents establishment of upland species and maintains the functioning of this type of vegetation.

Watershed
The land area(s) that contribute surface runoff or drainage to a water system or body.

Wind Energy Conversion System (WECS)
A large wind energy conversion system (WECS) that has an output rating greater than 100 KW that converts wind energy into electrical power for the primary purpose of sale, resale, or off-site use.

Wind Energy Conversion System (WECS), Small (Building-Mounted)
A small wind energy conversion system (WECS), mounted to a legally existing building or structure, other than a building or structure accessory to a WECS facility, that has a rated capacity of 100 KW or less and is an accessory use within a zoning district. The small wind system shall support the energy needs of the principal use on the site.

Wind Energy Conversion System (WECS), Small (Ground-Mounted)
A small wind energy conversion system (WECS), mounted to the ground, that has a rated capacity of 100 KW or less and is an accessory use within a zoning district. The small wind system shall support the energy needs of the principal use on the site.

Wetland
Area that is inundated or saturated by surface or ground water at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions. Wetlands generally include swamps, marshes, bogs, and similar areas. Includes adjacent and isolated wetlands.

Window
An opening in the wall of a building or structure for admitting light and fitted with a frame containing panes of glass.

Window, False
A device in the wall of a building or structure fitted with a frame containing panes of glass so as to resemble a window, but not admitting light.

Wireless Telecommunications
A structure that is designed and constructed primarily for the purpose of supporting one or more antennae that transmit information (audio, video, data) in the form of electromagnetic signals to one or more receivers without the use of a physical connection between the transmitting and receiving source.
Yard
A required open space located on the same lot as the principal structure, unoccupied and unobstructed except for accessory uses and landscaping.

Figure 9.2-H: Yards

Yard, Front
A yard extended across the full width of and situated between the front lot line and the principal structure extending to the side lot lines. In the case of a corner lot, the front yard adjoins the public or private rights-of-way where the entrance/address is located.

Yard, Rear
A yard extended across the full width of and situated between the rear lot line and the principal structure extending to the side lot lines. In the case of a corner lot, the rear yard shall not extend past the corner side yard.

Yard, Side
A yard extended across the full width of and situated between the side lot line and the principal structure extending from the front yard to the rear yard. In the case of a corner lot, the corner side yard shall extend from the front yard to the rear lot line.
