**RE: Mills Road Construction**

Dear Resident or Property Owner:

We are contacting you to inform you that on June 3, the City of Denton will begin construction on Mills Road at the intersection of Mayhill Road. Mills Road will be closed to allow crews to safely construct storm drain and inlets, relocate the waterline in the area, and apply a new asphalt surface at the intersection of Mayhill Road and Mills Road. Weather conditions and utility conflicts may impact the plans, but the project is scheduled to be completed by August 6.

During this time, signage will be posted to alert motorists of the temporary street closure and detour in place. All residents will have access to their homes during this time. If necessary for crews to safely complete construction, a door hanger will be placed on your front door to notify you prior to your driveway being blocked. If your driveway happens to be blocked and you need access in or out, you can speak with an on-site crew member directly, or call Utilities Dispatch at (940) 349-7000 (choose option 3) to have someone notify the crews. As part of the project, replacement sod may be placed in your yard and should be watered by the home owner after it is placed. Any issues may be reported within 30 days of the project's completion.

We apologize for any inconvenience, and appreciate your patience as we work to complete this improvement project. **If you have any questions or would like to discuss the project, please contact David McBride, at (940) 208-4318, or at [David.McBride@cityofdenton.com](mailto:David.McBride@cityofdenton.com).**
