

Outlook

 BUILDING SAFETY MONTH

Over 2 billion people live in water-stressed countries, which is expected to be exacerbated as result of climate change and population growth.*

*According to the World Health Organization

Drinking Water

Where Does Our Water Come From

Drinking water can come from a variety of sources, including wells, rivers, lakes and other reservoirs.

Potable Water

Water that is safe to drink. This is made possible through treatment and filtration.

Protecting the Supply

Backflow devices prevent water from flowing in the opposite direction, which can cause contamination. Residents should also be mindful of dumping any soil contaminants.

Contamination

Water can become contaminated through chemical run-off, hazardous spills or aging infrastructure.
